first compares the transcription from *Clauis II* to Lucentini's notes on Honorius' work, then it analyses the difference between *Clauis II* and *Versio Secunda* in *Periphyseon* V. The relationship is found to be the same as that between the primitive text (*Versio Prima*) of *Periphyseon* in books I-IV and Eriugena's revised version (*Versio Secunda*). Consequently, *Clauis II* should be recognized as an essential witness to the early text of *Periphyseon* V.".

55. Greetham, David C. 2005. "Édouard Jeauneau's Edition of the *Periphyseon* in Light of Contemporary Editorial Theory." *American Catholic Philosophical Quarterly* no. 79:527-548.

    "Textual criticism and the scholarly editions it produces have all too often been regarded by academics as well as general readers as “objective” (or even “scientific”) applications of a fixed set of procedures, designed to create a “definitive” text. But such editions are just as much a reflection of cultural and ideological expectations as are any other “critical” activities. Thus, the Jeauneau parallel-text edition of Eriugena’s *Periphyseon*, with its presentation of “matière en fusion” and its embrace of a continually evolving work in “perpétuel devenir” is to be seen as an appropriate postmodernist celebration of the “supplément,” the marginal, the incomplete, and the fragmented. In this promotion of the “scriptible” (or “open,” “writerly”) text over the “lisible” (“closed” or “readerly”), Jeauneau stands in contrast with the precedent edition of Eriugena by Sheldon-Williams, which is a modernist attempt to arrive at “satisfaction” and the positive." (p. 527).

    "Introduction: While the doctrine of apokatastasis, or universal return holds a central place in the thought of many Patristic writers, it has received relatively little scholarly attention. In what follows, I hope to redress this imbalance by analysing and comparing two of the greatest proponents of this doctrine: Origen (3rd cen.) and Eriugena (9th cen.). Although separated by obstacles of time, tradition, and language, the influence of the former upon the latter is well attested. Nowhere is this so evident as in Eriugena's discussion of the universal return of human nature in Book V of the Periphyseon. In the course of this exposition, I hope to demonstrate both the deep continuity that exists between Origen and Eriugena – the former the greatest ancient advocate of apokatastasis and the latter its greatest mediaeval proponent – as well some crucial ways in which they differ. While Eriugena's discussion of the return

shows him to be a true, latter day disciple of the “blessed Origen,” his Augustinian influences result in significant qualifications to the apokatastasis doctrine. As such, Eriugena’s treatment of the universal return offers a unique example of the creative encounter between the Eastern and Western theological traditions." (p. 195).

63. Herren, Michael W. 1986. "The Commentary on Martianus Attributed to John Scottus: its Hiberno-Latin Background." In *Jean Scot écrivain*, edited by Allard, Guy-H., 265-286. Paris: Vrin.

    Reprinted in M. Herren, *Latin Letters in Early Christian Ireland*, Aldershot: Ashgate, 1996, Essay IV.

    "In the present paper I would like to try to shed some new light on the old problem of what John may have read in Ireland and what kinds of literary skills he may have acquired there, including such items as Greek grammar, Latin metrics, and Latin vocabulary. As it is generally believed that John came to the continent at some point in his adult life, it would seem likely that he did not acquire all the erudition that he displays from continental scholars (2). Of course, we have no way of proving what John did learn at home ; we are, however, in a reasonably good position to show what was available to the Irish - always bearing in mind that it is not easy to establish what aspects of Irish learning were available at home only, what in Irish centres on the continent only, and what in both places.

    The so-called *Annotationes in Marcianum* obviously provide one of the best means of assessing John's reading and learning, since Martianus' encyclopedia embraces nearly all the areas of knowledge available to the ninth century. Moreover, the *Annotationes* frequently cite sources by name, and individual notes reveal a great deal about the technical learning of the author in such matters as astronomy, music, arithmetic, Greek grammar, and metrics. However, before we can undertake an assessment of John's learning in relation to this Irish

background, it will be necessary to address the problem of the authenticity of the *Annotationes* - a problem that has puzzled students of Eriugena since their discovery and has become more complex with the discovery of more Carolingian commentaries or sets of scholia to Martianus." (pp. 265-266)

History of Philosophy no. 19:385-393.

"This paper examines John Scottus Eriugena's account of material bodies. Some scholars have argued that Eriugena's account prefigures Berkeleyan idealism. The interpretation offered in the paper rejects the Berkeleyan interpretation on the grounds that Eriugena, unlike Berkeley, did not propose a thoroughly immaterialist view of reality.".

70. Hochschild, Paige E. 2007. "*Ousia* in the *Categoriae decem* and the *Periphyseon* of John Scottus Eriugena." In *Divine Creation in Ancient, Medieval, and Early Modern Thought. Essays Presented to the Rev'd Dr Robert D. Crouse*, edited by Treschow, Michael, Otten, Willemien and Hannam, Walter, 213-222. Leiden: Brill.

"In this article I will show how Eriugena exploits the *Categoriae decem,* expanding the several notions of *ousia* contained therein and fitting them into a larger metaphysical framework. We shall see that Eriugena's understanding of *ousia* does not create confusion from what is obvious, as Marenbon suggests, but rather develops out of a legitimate reflection upon the philosophical content of the Latin paraphrase. While in no way diminishing the significance of more prominent influences on Eriugena's thought, the *Categoriae decem* may be the most important source for explaining Eriugena's notion of *ousia,* in its full, epistemological and potentially theological richness.(2) It is, however, a difficult and often merely suggestive source, as its varied and controversial history of interpretation indicates.

To this end, I will argue that what Eriugena finds in the *Categoriae decem* in the way of a doctrine of *ousia* is clearly that of Aristotle's *Categories* -- not I think, a radical claim. Moreover, Eriugena shows himself able to comprehend the limits of and distinctions between the several notions of *ousia* found in the *Categoriae decem*.(3) He is quite clear that the primary *ousia* of the *Categoriae decem* is not identical with the full philosophical content of *the ousia* of, for example, Augustine's *De Trinitate* or Gregory's *De hominis officio*. They are distinct but surely connected. Our task is to show how these

several notions of *ousia* are connected for Eriugena and by what specific paths he arrives at their connection." (pp. 213-214)

(2) *Anonymi Paraphasis Themistiana (Pseudo-Augustini Categoriae decem)*, in *Aristoteles Latinus 1.1-5, Categoriae vel Predicamenta,* ed. L Minio-Paluello (Bruges, 1961), pp. 133-175.

Citations will be from this edition and reference shall be made to paragraph, page, and line numbers respectively. Translations are my own. By an 'important' source we certainly do not mean an exhaustive one. By this means we simply limit the scope of our investigation.

(3) The assumption here is that the *Categoriae decem* is *a* faithful report of the content of Aristotle's *Categories,* though one which suggests directions of interpretation not explicit in Aristotle's text. Hence we occasionally use the term 'Aristotelian' loosely; as including a rich tradition of interpretation of which the *Categoriae decem* is a part.

72. Kabaj, Józef. 1977. "Homme et nature dans la cosmologie de Jean Scot Erigena." *Studia Mediewistyczne* no. 18:3-50.

"This article begins by tracing the history of the *term phusis/natura* from the earliest Greek philosophers onwards. The author finds the sources of Eriugena's four divisions in Augustine, Origen and Philo of Alexandria (p. 8) as also in Marius Victorinus. Another (tripartite) variation is to be found in Claudianus Mamertus or in Boethius. The author then analyses (pp. 12 ff.) Eriugena's synthesis of patristic and platonic views while finding Aristotelian elements within his exposition. At the outset this author has declared for a Marxist interpretation of Eriugena and much of section (3) Nature as seen by Eriugen is concerned with a review of mainly 20th century scholars' judgments of his work as either dualist i.e. orthodox in christian terms, or monist/pantheist i.e.

unorthodox, which would be this author's own view: thus the major themes of the *Periphyseon* are discussed, his dialectic leading, inevitably, to monism and pantheistic emanationism. Two sections (4 and 5) 'Human nature in Eriugena' and 'Man and his Existence' treat of man as microcosm, again going back to Heraclitus to trace the reception of this theory: according to Eriugena man participates in both the second and third divisions of nature. The supposed ontological dualism of Eriugena is in fact pancosmic spiritualist monism. In section (6) 'Man's cosmic consciousness' the factor of 'vital motion' is discussed. The author holds (p. 38) that Eriugena needed a fifth 'complementary' book for his *Periphyseon* because the first four did not suffice to resolve the theory of his four divisions. In a final section (7) entitled 'Dialectic of human knowledge' the problem of man's ignorance of *quid sit* and of the relation between gnoseology and ontology are discussed; self-knowledge *(quia sit) is* existence." (Brennan, pp. 232-233).

73. Katz, Sheri. 1990. "Two Views on John Scottus Eriugena's Use of Aristotelian Categories." *Medieval Perspectives* no. 4-5:97-110.

    Abstract: "The article examines the two opposing views on John Scottus Eriugena's use of the Aristotelian categories in "Periphyseon." It agrees with Eriugena's belief that "natura" is the name for all things under the concept of "nature." It also discusses the different divisions of nature according to Eriugena which correspond to various dogmas such as "ea quae sunt et ea quae non sunt" and "rationes aeternae" of Augustine. It also explores the position of John Marenbon in his "From the Circle of Alcuin to the School of Auxerre.".

74. Kavanagh, Catherine. 2002. "The Philosophical Importance of Grammar for Eriugena." In *History and Eschatology in John Scottus Eriugena and His Time*, edited by McEvoy, James and Dunne, Michael, 61-76. Leuven: Leuven University Press.

    "For the ancients and medievals, the discipline of grammar ultimately consisted of two parts: linguistic analysis and literary criticism.1 That linguistic speculation and textual exegesis were seen to be complementary aspects of a single Ars is due to the

particular hermeneutical conception of reality which emerged from the Christian and Platonic speculation oflate antiquity and the early medieval period. Late antique — Stoic and Neoplatonic - belief in the patterning of the world according to the Aoyos·, or Word of God, implied a rational world which could be understood. This belief was assimilated by Christians to the account of creation given in the Book of Genesis, which in turn was read in conjunction with the Prologue to the Gospel of St. John, a text which explicitly states that all things that were made were made through the Word of God, which is God. Of course, Scripture is also the Word of God, and the identification of the Word of Creation with the Word of Scripture helped to reinforce the sense that reality is rational in being textual. Seeing as both are a product of the same intelligence, a similar logic underpins both.

Thus from a Patristic and Carolingian perspective, the world really could be understood by means of a certain hermeneutic."

(...)

"Thus, the question of the relevance of medieval grammar to Eriugena's philosophical method is essentially a question of a certain kind of hermeneutic: either the obvious hermeneutic of textual study, or what one might call the metaphysical hermeneutic of linguistic structures. Certain significant features of his work are distinctively grammatical. First, there is the comparing and contrasting of several different texts from different authorities for the purposes of exegesis of a central text; second, the use of linguistic structures and grammatical figures as key devices, not only in the explication of difficult texts, but also in the establishment of important doctrines, and last, the close philological and philosophical work involved in the translations from Greek. At times Eriugena devises a new construction to serve the philological purpose of translation, which simultaneously introduces a new idea and sets up a new kind of metaphor, e.g. his use of subsilentii2 3 * and praetexta5, one apparently a hapax legomenon and the other a previously unknown metaphorical use of a standard word. This paper will concentrate on three important features of the grammatical

tradition, dealing first with borrowings from grammatical authors, then at more length with figures of grammar and finally with issues arising out of Eriugena's approach to translation before considering the problem as a whole, and concluding." (pp. 61-63)

    "The Aristotelian categories are a fundamental element in Eriugena's philosophical system on account of his realist view of dialectic. He received his texts concerning the categories from Boethius and the *De decem categoriis,* but key ideas in his treatment of them -- namely, the metaphysical importance of dialectic, the unknowability of essence, and the origin of being in place and time, ideas fundamentally rooted in Byzantine developments of the Christology of Chalcedon -- are taken from Maximus the Confessor. Eriugena's work on the categories represents an attempt, much misunderstood, to assimilate the richness of the Eastern tradition to Western philosophical and theological method. This paper examines the synthesis of

Maximus's ideas with Ciceronian and Boethian elements in Eriugena's striking treatment of the Aristotelian *Categories*.".

    Summary: "The moving style and apparent echoes of truly Christian Platonism left the works of Dionysius the Pseudo-Areopagite long tempting to identify with nearly authoritative writings by a friend of Saint Paul. The latter would have really lived centuries before. Centuries later the genius of John Scotus Eriugena drew copiously on the Pseudo-Areopagite, Plato, the Scriptures, etc., to provide a dazzling system of philosophy and theology. While these systems are now recovering modern interest, their ontologically Monist character and their confused attempts to uphold God's omnipotence and other perfections by absorbing creatures, merit analytical reproof. Free Will and ontological Pluralism belong with the metaphysics of the Bible. It is hoped to re-introduce the visions of two often neglected heretics.".

83. Kristeller, Paul Oskar. 1976. "The Historical Position of Johannes Scottus Eriugena." In *Latin Script and Letters A.D. 400-900. Festschrift presented to Ludwig Bieler on the Occasion of his 70th Birthday*, edited by O'Meara, John Joseph and Naumann, Bernd, 156-164. Leiden: Brill.

"Eriugena's example seems to show that an individual scholar and thinker may surpass the intellectual limits of his century, but that he will not perpetuate his best achievements unless they are transmitted through his pupils and embodied in the curriculum of a school that constitutes a kind of institutional tradition. It is the lack of such a school tradition before and after him, that makes of Eriugena a great but isolated figure. It took several more centuries before the acquaintance with Greek sources, this time especially with Aristotle, and the continued struggle with philosophical problems became a wide concern in the Western world. The narrow limits of the seven liberal arts were finally overcome. New institutions, the cathedral schools and universities, attracted a large number of teachers and students and thus assured a continuity and expansion of learning in a variety of subjects. Medicine and jurisprudence, philosophy and the sciences as well as dogmatic theology were constantly and widely taught, discussed and written about, and in the course of the discussions, the problems and the terminology became more and more refined. This tradition, nourished in many ways by Arabic and Latin as well as by Greek sources, has continued through many changes and transformations up to the present day. It is the everlasting glory of Eriugena that through him, and through him alone, the period from 500 to 900, interesting for a variety of political, artistic and scholarly contributions, also deserves a prominent mention in the history of philosophy." (p. 163).

89. ———. 1986. "Martianus Capella et Jean Scot : nouvelle présentation d'un vieux problème." In *Jean Scot écrivain*, edited by Allard, Guy-H., 187-207. Paris: Vrin.

"Mais je ne veux pas maintenant faire la somme de toutes ces questions érudites, petites ou grandes, mais plutôt me reposer le problème du rapport entre Martianus et l'Érigène, en partant d'une autre base, c'est-à-dire de la signification du De nuptiis dans les premiers siècles du Moyen Age(4): considérer l'épisode de Jean Scot comme un épisode à l'intérieur d'une histoire, et en comprendre le sens seulement ainsi.

Il est vrai que, durant les trente dernières années, le *De Nuptiis Philologiae et Mercurii* de Martianus a suscité l'intérêt des chercheurs, mais on ne peut pas dire que, confrontés à cette œuvre difficile, ils aient trouvé une clef d'interprétation sûre et unanime ; et l'on ne peut pas dire non plus que les étapes de son extraordinaire succès, tout au long du Moyen Age et jusqu'à la Renaissance, aient été dégagées et analysées." (pp. 187-188)

(...)

"L'Erigène est bien conscient du fait que le monde de Martianus est éloigné et différent du sien, et il lui est facile de noter que toute la mythologie du *De nuptiis*, toute l'*Einkleidung* de l'œuvre, n'est autre que *poeticum*

deliramentum(65). Mais il n'y a pas seulement cet aspect dans son commentaire: « Martianus quippe Platonicus»(66) est aussi l'auteur antique qui transmet l'idée de l'*anima mundi*, « ex qua spéciales animae... in singulas mundani corporis partes... procedunt(67)» («de laquelle dérivent les âmes particulières dans les diverses parties du corps humain»).

Les gloses sur Martianus de l'Érigène sont donc le témoignage de sa confrontation avec le passé : il repousse le passé et en même temps il en assume le problème, il l'érige en preuve de sa propre autoconscience intellectuelle, à l'école et dans la vie(68). (pp. 202-203)

91. ———. 1973. "The Place of Martianus *Glossae* in the Development of Eriugena's Thought." In *The Mind of Eriugena*, edited by O'Meara, John Joseph and Bieler, Ludwig, 49-58. Dublin: Irish University Press.

"This paper deals with work Eriugena did as a grammarian. It is considered here as a preparatory stage in the growth of the theory by which he tried to understand man and world in a systematic way. In doing so, we shall try to argue that even in this beginning some flexibility of thought and expression and even some development can be traced. These questions must be

seen against the problem which the historical phenomenon 'Eriugena' presents to us. There is a considerable anachronistic element in his appearance: he became the first philosopher of the medieval world in a cultural environment which did not seem to favour the rise of systematic thought. 'The owl of Minerva only starts its flight at dusk.' [**]

Moreover we know since Jacquin's paper of 1907 [*] on *De praedestinatione* that Eriugena's thought went through several phases. The topic of the Martianus glossae underlines the fact that Eriugena started as a grammarian at the court of Charles the Bald and forces us to face his link with Carolingian civilization. It is obvious that the great importance of royal patronage, which lasted throughout his career and has in this form not many parallels in the history of the following centuries of the Middle Ages, was a factor in shaping his mental attitude. Moreover I shall try to show that his original task as grammaticus had also some influence on his later work." (p. 49)

94. Lucentini, Paolo. 1976. "La nuova edizione del "Periphyseon" dell'Eriugena." *Studi Medievali* no. 17:393-414.

"The 'new' edition referred to is the Sheldon-Williams edition of Books I and II for the Dublin Institute for Advanced Studies. This author reports on the manuscript tradition established in the early decades of this century through the studies of Traube,

Rand and Cappuyns and offers some critical suggestions in relation to the completion of the Sheldon-Williams edition interrupted by his death in October 1973. He refers to some inexactitudes in the references to sources, in the description of manuscripts in the Introduction to the edition, as well as in the conclusions on the question of text transmission and of the Eriugenian autograph (which continues to be an open question). He finds that the editor does not succeed in his goal of presenting Eriugena's final text." (Brennan, p. 92).

    "A new grammatical work, a sophisticated Priscian commentary from the ninth century, has recently been discovered. It is the only full Priscianus maior commentary from the Carolingian period, during which Priscian’s massive *Institutiones grammaticae* was studied mainly through glossing and excerpting. This commentary has been tentatively attributed to Eriugena(1). In this paper I will discuss the way in

which this text was used by Eriugena's contemporaries and by the immediately following generations of grammarians. It seems as if this sophisticated commentary as a whole has been practically unknown in the ninth and tenth centuries. The viewpoint that this commentary was not used by the Carolingians also finds support in the fact that it has survived only in one eleventh-century copy, Barcelona, Archivo de la corona de Aragon, MS Ripoil 59. However, certain parts of it became standard teaching material in Carolingian schools, as is attested by anonymous glosses to Priscian's *Institutiones grammaticae*. These glosses deal with the nature and status of grammar as a liberal art." (p. 279)

(...)

"The *Septem periochae* formula, etymologies concerning Priscian's name as well as various introductory material —that is what the sophisticated *In Priscianum* commentary seems to have contributed to Carolingian teaching. The influence is on a practical and elementary level. Only one Carolingian teacher seems to have used the text because of its grammatical content. Paradoxically, the exhortation to employ the dialectician's method to grammatical study was copied from one codex to another but the text itself, a prime example of the application of such a method, was not studied by the Carolingians. But one should not underestimate the importance of the teaching material that we have been examining. It deals with the highly topical issue of the nature and status of grammar in the scheme of the seven liberal arts and the disciplinary boundaries between the arts of the *triuium*. Such elementary teaching material served to integrate into Carolingian teaching the novel idea of the assimilation of the study of the arts of the *triuium*. It bears repeating just how radical a change was being introduced into the educational system, which had previously leaned on the differentiation of the various arts of discourse. But the task that Alcuin was proposing —to compare and synthesize the various aspects of language study— was by no means an easy one. He did not seem to know himself how to go about synthesizing the various methods.

The author of the new Priscian commentary knew better. He tackled Priscian's doctrine in a scholarly fashion scrutinizing its philosophical foundation with a keen eye on its inconsistencies and parallelisms with Peripatetic dialectic. It is a prime example of the new philosophical orientation that the study of grammar took in the ninth century. Though there was not likely to be a large audience for this highly theoretical treatise, this method did bear some fruit in the Carolingian period and came to flourish a couple of centuries later. The Carolingian period is one in which diverse experimentation was being conducted but no one continuous accumulating tradition of philosophical grammar established itself. By the end of the eleventh century we have signs of a more solid tradition in the so called Glosule commentaries. Then there was no longer need to assert that the grammarian should discuss the uox in his grammar. But it was soon time to rethink the disciplinary boundaries for grammar and dialectic —a topical issue at the time of William of Conches and Petrus Helias." (pp. 295-296)

(1) For the attribution of this Priscian commentary to Eriugena, see P.E. Dutton - A. Luhtala, *Eriugena in Priscianum*, in *Mediaeval Studies*, 56 (1994), 151-161 and P.E. Dutton, *Evidence that Dubthach 's Priscian Codex Once Belonged to Eriugena,* in H.J. Westra (ed.), *From Athens to Chartres. Neoplatonism and Medieval Thought. Studies in Honour of Édouard Jeauneau*, Leiden (E.J. Brill), 1992, 15-45. This commentary has survived in one eleventh-century manuscript of Catalan provenance, Barcelona, Archivo de la Corona de Aragon, Ripoll 59, fols. 257v-288v. For this manuscript, see M. Passalacqua, *I Codici di Prisciano* (Sussidi eruditi, 19), Roma (Edizioni di storia e letteratura), 1978, 10-11.

101. ———. 2002. "Time and the Substantival Verb in Eriugena." In *History and Eschatology in John Scottus Eriugena and His Time*, edited by McEvoy, James and Dunne, Michael, 77-87. Leuven: Leuven University Press.

"In the Early Middle Ages efforts were made to create a thoroughly Christian art of grammar. The most famous representative of Christian grammar is Smaragdus (ca 805), who introduced approximately·750 biblical examples into his grammar. He also approached the grammatical text as if it were divinely inspired: it had a deeper meaning, comparable to the figurative sense of the sacred text."

(...)

"Another major influence on medieval grammar came from dialectic which began to penetrate the grammatical method in the Carolingian Renaissance. The interaction between grammar and dialectic goes back to the initiative of Alcuin who encouraged the use of the dialectical method even in doctrinal issues. Dialectic was applied to doctrinal issues most notably by Eriugena in the first Book of the *Periphyseon* which is devoted to a discussion of the applicability of the Aristotelian categories to divine issues. Eriugena is probably also the author of a newly discovered grammatical commentary which makes heavy use of the dialectical method. It is the first systematic Priscian commentary preserved from the Middle Ages, and simultaneously the most remarkable achievement Ages(1). Religious issues do not generally figure in this text at all; thus, the main linguistic theme of the Periphyseon, the inapplicability of the categories to God, is absent from it. However, there is one context which invites comparison with Eriugena's main linguistic theme, namely the discussion of the substantival verb, which is the topic of this article. The substantival verb is compared with the Divine Nature, which — although permanent and timeless — is nevertheless said somehow to move in a similar way to our temporality. In the same way, the substantival verb signifies permanence, and yet expresses temporality by analogy with other verbs."

(...)

"The term substantival verb, *verbum substantivum*, occurs among the ancient authors only in Priscian's *Institutiones grammaticae*. Priscian also mentions its Greek equivalent, ῥῆμα ὑπαρχτικόν(3), which he has probably adopted from his

principal Greek source, Apollonius Dyscolus (2nd century A.D.), as he did his doctrine concerning the substantival verb in general." (pp. 77-78)

(...)

"Conclusion

Throughout his works, Eriugena was concerned with finding parallels between linguistic phenomena and the Divine Nature. Priscian offers a highly stimulating analysis of the twofold nature of the substantival verb, which was elaborated in Eriugena's commentary on Priscian. It was moreover exploited in Eriugena's two late works. Although similar themes occupy him even at the time of De divina praedestinatione and the Periphyseon, he never refers to Priscian's view of the atemporal meaning of the verb esse in these works. This suggests to me that he might not have known Priscian's analysis of the substantival verb at this time. The Periphyseon shows some knowledge of the Institutiones granunaticae2i, but it is worth asking whether Eriugena did the majority of work on his Priscian commentary only late in his career." "The fact that Alcuin's revival of scholarship also involved the use of logic in the study of grammar has received attention from scholars only recently (Vineis 1988; Law 1992; Luhtala 1993). This method, which came to be applied primarily to Priscian's massive *Institutiones grammaticae* (launched into circulation probably by Alcuin himself), was applied highly competently by Eriugena in a text which has only recently been

attributed to him (Dutton-Luhtala 1994). This text, which survives in a single eleventh century

manuscript of Catalan provenance (Barcelona, Archivo de la Corona d'Aragón, Ripoll 59, fols. 257v-288v), is the first systematic Priscian commentary preserved to us from the Middle Ages (see Luhtala 2000a, 2000b). It covers the first sixteen books of Priscian's work, on the eight parts of speech, but its author also shows a knowledge of Priscian's syntactic doctrine, which is contained in the last two books, seventeen and eighteen." (p. 20)

(...)

"I have thus given a brief overview of the philosophical interests of the Priscian commentary attributed to Eriugena. Although it is premature to try to assess Eriugena's philosophy in this text as a whole, we are permitted to draw a couple of conclusions. Firstly, Eriugena has interpreted every occurrence of the term *accidit* as a philosophical term. It means that the categories are now applied even to the discussion on sound and letter because they have accidents; Priscian uses this vocabulary only as pertaining to the description of the noun and the pronoun. It also suggests that Eriugena regarded Priscian's work as a source for philosophy, in which every philosophical term was taken seriously. Philosophical ends occasionally even outweigh the grammatical ones. This is the case when Eriugena chooses to support a somewhat unusual view such that the pronoun can be substituted for the *nomina generalia*. This point seems to have little relevance for grammar. It rather seems to be the case that the author uses the grammatical text as a

point of departure to argue a philosophical (or ultimately theological) case that is important to him, by equating the individuals with the species. Here and elsewhere, this text exhibits philosophical tendencies comparable to those in the *Periphyseon*." (p. 28)

126. McEvoy, James. 1990. "Metaphors of Light and Metaphysics of Light in Eriugena." In *Begriff und Metapher. Sprachform des Denkens bei Eriugena*, edited by Beierwaltes, Werner, 149-167. Heidelberg: Carl Winter.

    "The theme of light in the writings of Eriugena is a vast one, representing as it does a vitally important strand of his dialectic. To think it away, if the effort could be made, would be to destroy not a part only, but in a way the whole of his thought; very much would have to be re-cast, re-thought or left unspoken, if the concepts clustering around light and developed in the context of light were to be omitted, or the symbol of light suppressed."

    (...)

    "An entire study could be devoted to each one of the strands that together make up the light-thematic of Eriugena. One could study the phenomena of sight, for instance the concept of the visual ray and the long history of its transmission, taking in at the same time colour and form, reconstructing the sources which were at the disposal of Eriugena and assessing the use which he made of them. Fire has proved to be a rich and rewarding area of investigation in Eriugena, as Edouard Jeauneau has ably demonstrated in his study of what he rightly calls 'la métaphysique du feu'(2). The sun, taken together with (or even without) the other planets, in its relationship to its origin (fire) and its products (light and heat), is of particular interest to Eriugena (as it had been to Plato, Philo, Plotinus, Basil, Ambrose and Augustine before him), and has an almost transcendent importance in Eriugena's reflections on the physical universe, of which the sun is the 'central' body. The close connection between light and life, and the complementary symbolism of sight and object of sight, on the one hand, and hearing and the word, on the other (developed, for example, in the Homily') is also of great interest, as is the invocation of the authority of Scripture, so regularly made with regard to light and related subjects in *Periphyseon* and *Expositiones*: no

systematic study has as yet been made of the employment of the dozen or so main scriptural texts which Eriugena expounds in connection with light and the symbolism of light and sight(3).

Since it would be unsatisfactory, and indeed next to impossible to give a digest of all these themes, I have adopted the following strategy, for simplicity as much as for hermeneutical purposes. I choose two broad themes within the dialectic of Eriugena, viz the sun as the chief source of light in the universe, and sight or vision. In a first approach, each of these is discussed 'physically' (or physiologically), in order to lay bare the basic concepts and their sources. A second approach addresses itself to the metaphors raised by Eriugena on the base of the concepts as outlined, once again with an eye being kept to his sources. A third demarche attempts to study conjointly the role of the concepts and metaphors within the dialectic, in order to show the specific contribution of both to the dialectical discourse so thoroughly characteristic of Eriugena's personal thought." (pp. 149-150)

(2) Jeauneau, Ed., 'Jean Scot et la métaphysique du feu', in the same writer's volume of collected studies, *Etudes erigéniennes*, Paris 1987, pp. 299-319.

(3) Among the favourite scriptural references to light of Eriugena are the following: *Gen* 1.3: Dixitque Deus: Fiat lux. Et facta est lux. *Gen* 1.4: vidit Deus lucem quod esset bona et divisit lucem a tenebris. *Jn* 1.5: Deus lux est, tenebrae in eo non sunt ullae. *I Tim* 6.16: qui solus habet immortalitatem, et lucem inhabitat inaccessibilem: quern nullus homo videt, sed nec videre potest. *Ps* 109.3: Ex utero ante luciferum genui te. To these may be added the Transfiguration narrative in the Synoptic Gospels: *Matt* 17.1-8; *Mk* 9.1-9; *Lk* 9.28-36.

Part I: Early Medieval Mysticism. Chapter 3: The Entry of Dialectical Mysticism: John Scotts Eriugena.

"Foundations of Erlugenian Mysticism

The mystical theory of John Scottus Eriugena is inseparable from the whole philosophical-theological system presented in Periphyseon and underlying his commentaries on John's Gospel and Dionysius's *Celestial Hierarchy*. Hence it will be necessary to give a brief presentation of the foundational themes of his thought concerning *processio*, the self-manifestation of God, before turning to the more directly mystical themes mostly (but not solely) found in his treatment of *reditus*. I shall do so under three headings taken from his own words, the first two dealing primarily with *processio*, the third with *reditus*: (1) *Deus est superessentialis* (P 1 [460C]) the dialectical view of God; (2) *Omnia lumina sunt* (EI 1.1 [3.76-77] creation as the illuminating divine self-manifestation; (3) *Donec veniamus in unum* (EI 8.2 |133.550-l]) union with God through deifying contemplation." (pp. 97-98)

(...)

"What, then, does the Eriugenian reditus mean? What will change? What will the future state be like? John the Scot was always realistic enough to know what could be said and what could not be said about this final adunatio. The ultimate differentiating union will be a change in the awareness of all humanity. First, humanity will be absorbed back into the elements in death; then, in the general resurrection humankind will be brought to a state in which there will be no more divisions, with sexual differentiation being the first to go. Finally, after it has progressed through all the stages of sublimating unification, humanity will reach the final differentiation in unity of the cosmic Christ The Word stands at the beginning and end. But the end is different from the beginning, and it is perhaps in this aspect of his thought that John Scottus Eriugena proves himself not just a clever synthesizer of East and West, but one of the creative minds of the Christian tradition." (p. 117).

Annotated bibliography on the Philosophical Work of Eriugena (Third Part: McK - Z)

Bibliography

The publications by É. Jeauneau on Eriugena are cited in a separate page: Édouard Jeauneau sur la Philosophie Médiévale. Bibliographie Choisie.

N.B. Summaries cited from: Mary Brennan, *A Guide to Eriugenian Studies. A Survey of Publications 1930-1987*, are indicated with: (Brennan) and page number.

1. McKitterick, Rosamond. 1992. "Knowledge of Plato's '*Timaeus*' in the Ninth Century. The Implications of Valenciennes, Bibliothèque municipale MS 293." In *From Athens to Chartres. Neoplatonism and Medieval Thought. Studies in Honour of Edouard Jeauneau*, edited by Westra, Haijo Jan, 85-95. Leiden: Brill.

   "There is no doubt that Plato's *Timaeus* in Latin translation was known, at least to scholars, in the ninth century. John Scotus Eriugena and members of his circle, such as Remigius of Auxerre, reveal a familiarity with the content of this treatise, Calcidius' translation is listed in the Reichenau catalogue of the second half of the ninth century, and it is Hucbald of St. Amand's own copy of Chalcidius' translation of, and commentary on, the Timaeus which survives in Valenciennes, Bibliothèque Municipale, MS 293. Nor is there any uncertainty as to the appeal such a text could have had in the Carolingian

world. Its essentially philosophical and theological discussion of the divine creation of the world and natural phenomena, of elements of astronomy, the structure of matter and of human psychology and physiology, incorporates nevertheless a great deal of Greek scientific theory about the physical world. In a Christian context, there were obvious comparisons to be drawn with the creation story in *Genesis*, but its essentially scientific content was also in keeping with the other scientific and especially astronomical interests of Carolingian scholars." (p. 85, two notes omitted)

"In this book I seek not only to expound Eriugena's philosophy in its historical and cultural context in ninth-century France but also to evaluate the enduring significance of his philosophical system as a whole. This will, I believe, show Eriugena at his most original and most brilliant.

The Western philosophical tradition has been characterised, in a somewhat misleading and overgeneralised manner, as centring on the concept of being from the time of the earliest Greek thinkers. Eriugena, inspired by Dionysius, departs from this tradition and regards non-being as equally as important as being in the study of the nature of reality as a whole. For Eriugena ontology is not the most fundamental or universal discipline; in fact, he develops a negative dialectic which counterbalances ontological affirmations and constructions with a radical meontology, giving the most detailed analysis of non-being since Plato's *Sophist* and *Parmenides*.

But Eriugena goes farther and anticipates many of the features of the modernist turn in philosophy begun by Descartes (1596-1650). Eriugena begins with a typical Carolingian psychology but is stimulated by Saint Augustine to develop an understanding of the cogito and a deep appreciation of inwardness, which was enriched by his encounter with the anthropology of the Greeks, especially Gregory of Nyssa. He does not stop there, however, but goes on to articulate, in his own terms, what might be called a philosophy of subjectivity. Eriugena sees the human subject as essentially mind. Everything is a product of mind - material reality, spatiotemporal existence, the body itself. In this sense, Eriugena is a thoroughgoing idealist. Matter is a commingling of incorporeal qualities which the mind mistakenly takes to be corporeal; spatiotemporal reality is a consequence of the seduction of the mind by the senses, which is the true Fall of Adam; the body itself is an externalisation of the secret desires of the mind. But more than that, the true being of all things is their being in the mind. Eriugena takes this to be a consequence of the scriptural revelation that the human mind is an image of the divine mind, and that the divine mind contains in itself the ideal exemplars of all things.

(...)

In this book, therefore, I shall discuss Eriugena's philosophy both in terms of its mediaeval origins and in terms of the manner in which it appears to anticipate the turn towards the subject and towards idealism which is found in the modern philosophies of Descartes and Hegel.

In interpreting Eriugena's philosophy, I have concentrated almost exclusively on the *Periphyseon*, with the result that Eriugena's later theological works, including his homily and his commentary on Dionysius, receive scant mention. I hope this book will contribute to the revival of interest in Eriugena which has taken place in this century, by offering a philosophical interpretation of his most important dialogue, the *Periphyseon*.".

Philosophical Essays in Honour of the Most Reverend Desmond Connell, Archbishop of Dublin*, edited by O'Rourke, Fran, 67-96. Dublin: Irish Academic Press.

    "Eriugena has unusual theories of space, time and matter, theories which have led him to be called an immaterialist in the manner of Berkeley, or a critical idealist in the manner of Kant. (1) He may properly be termed an immaterialist with regard to his theory that sensible corporeal bodies are only apparently corporeal—for him physical bodies are a collection or assembly of incorporeal, insensible properties. He is labelled an idealist for his theory of place and time as categories in the mind, prior to all objects, and within which all empirical objects are contained. On this basis, the claim has been made that Eriugena is an original thinker and that his views should be accorded a respectful place in the history of philosophy. This article will examine Eriugena's originality with regard to his theory of the nature of the material world.2 It will emerge that

Eriugena indeed holds an immaterialist account of matter and of physical things, but that there are nuances in his theory which need to be addressed." (p. 67)

(...)
"Conclusion. To conclude, the motif of beauty in Augustine's writings has allowed us to see that the basis of friendship is situated firmly in the context of the desire for, or delight in, the love of God. The desire for unity, truth, order, peace, virtue and benevolent love all find their focus in the desire for beauty, and Augustine always recognized that God alone is truly beautiful. In addition, while agreeing with the classical tradition that the experience of likeness provided the only acceptable basis for the attraction of, or delight in friendship, he nevertheless insisted that this likeness always referred primarily to one's likeness to God. For him, it was inconceivable that one could attain a likeness either to oneself or to another without first becoming like God, because ultimately the very existence of being is itself dependent upon, or is an expression of, this likeness to God. In this fashion, Augustine's insistence on situating friendship in the context of the love of spiritual beauty points inescapably to a metaphysical and religious foundation for friendship, namely our ontological dependence on God." (p. 96)

15. ———. 1999. "Idealism in Medieval Philosophy: The Case of Johannes Scottus Eriugena." *Medieval Philosophy and Theology* no. 8:53-82.

    "In this article I wish to re-examine the vexed issue of the possibility of idealism in ancient and medieval philosophy with particular reference to the case of Johannes Scottus Eriugena (c. 800-c. 877), the Irish Neoplatonic Christian philosopher. Both Bernard Williams and Myles Burnyeat have argued that idealism never emerged (and for Burnyeat, could not have emerged) as a genuine philosophical position in antiquity, a claim that has had wide currency in recent years, and now constitutes something of an orthodoxy. (1) Richard Sorabji (instancing Gregory of Nyssa) and Werner Beierwaltes (citing Proclus and Eriugena), and Eyjólfur Kjalar Emilsson (discussing Plotinus), on the other hand, have all argued that idealism is to be found in the Neoplatonic tradition, a tradition neglected by Burnyeat. (2) Similarly, in a 1989 study, I argued not only that idealism was a genuine possibility in late classical and in medieval philosophy, but that that the ninth-century Carolingian philosopher Johannes Eriugena presents a striking example of an extremely radical, almost fantastical, idealism. (3) Of course, the whole discussion depends entirely on what is meant by 'idealism'. Burnyeat uses Berkeley's immaterialism as his standard for idealism, and it is this decision, coupled with his failure to acknowledge the legacy of German idealism, which prevents him from seeing the classical and medieval roots of idealism more broadly understood." (pp. 53-54)

16. ———. 2002. "Time and Eternity in the *Periphyseon*." In *History and Eschatology in John Scottus Eriugena and His Time*, edited by McEvoy, James and Dunne, Michael, 487-508. Leuven: Leuven University Press.

"In this paper I want to explore Johannes Eriugena's characteristically rich and original treatment of one of the most central themes in the Platonic and Christian traditions, namely, the theme of time and eternity (or timelessness), in his massive cosmological dialogue, *Periphyseon*. Given the elaborate richness of his vision, in evaluating Eriugena's commitment to Christian Platonism, we cannot then simply assume that he is repeating the accounts of time and eternity found, for example, in Plato's Timaeus or in Augustine's Confessiones. Eriugena is both a Platonist and a Christian, but he holds to both these doctrines in his own inimitable fashion, as a ninth-century author, heir to already ancient traditions." (p. 487)

(...)

"Conclusion

I have tried to sketch here the complex manner in which Eriugena combines his philosophical understanding (drawn from Platonic and Aristotelian sources) of the space and time as part of the procession and exitus of the divine nature, as the absolute marks of creation, as the boundaries of the physical world imposed by the fallen human understanding, with the message of Scripture concerning the passing away of all places and times in contrast to the abiding nature of eternal truth. What is significant is how far Eriugena will go to marry his grammatical interpretation of temporal verbs referring to historical events or stages in Scripture with his philosophical critique of temporal predicates in God, to more or less elide entirely the temporal and historical understanding, and to promote the true theoria which leads to theosis and to timelessness. There remains, however, an unresolved tension between time as part of the divine process and time as a consequence of the Fall. Eriugena himself, of course, feels that these accounts do not contradict but can be accommodated within duplex theoria. Finally, his discussion of time and space as frameworks of the mind, which are absent from the true nous, both of human nature and of God, again confirms his idealism." (p. 507).

Actes du IIe Congrès européen d'études médiévales*, edited by Hamesse, Jacqueline, 467-487. Turnhout: Brepols.

    "In keeping with the theme of this FIDEM conference, « Medieval Studies Today and Tomorrow », in this contribution I want to report on the tremendous blossoming of studies in the philosophy of Johannes Scottus Eriugena, witnessed by the growth in critical editions, translations and critical discussions, over not just the past 10 years, but the past 30 years'. The man known to his contemporaries as Johannes Scottus (c.800 - c.877), and who signed himself ‘Eriugena’ (on the manuscript of his translation of Dionysius), is without doubt the most genuinely sophisticated philosopher of the Carolingian era, certainly to be ranked above such Carolingians as Alcuin1 2,

and indeed, stands as the most important philosopher writing in Latin between Boethius and Anselm. He is also, though this parallel remains to be explored, more or less a contemporary of the Arab Neoplatonist Al-Kindi. Eriugena can also be seen as the most significant intellectual figure to emerge from monastic Ireland, the so-called Island of Saints and Scholars, between the sixth to the ninth century (in comparison with Sedulius Scottus or Columban), although his debt to early Irish culture remains much disputed, even allowing for the fact that he worked, at least in part, with Irish-speaking scholars."     Abstract: "In this article I examine the ‘five modes’ (*quinque modi*) of being and non-being of the ninth-century Irish Carolingian philosopher, Johannes Eriugena, as outlined in his dialogue, *Periphyseon*, especially in Books One and Three. Eriugena’s immediate Latin sources have been suggested as Augustine, Marius Victorinus, and Fredigedus, but he was also deeply influenced by passages in the Greek Christian Fathers, especially Gregory of Nyssa, Dionysius, and Maximus, particularly on God as ‘beyond being’, or as ‘non-being’, or ‘nothingness’ (*nihilum*). In this essay, I will review Eriugena’s bold and paradoxical claims about the non-being of the divine being and I shall evaluate the current research concerning its sources and its originality, and make the claim that the divine nothingness is Eriugena’s original contribution in the *Periphyseon*.".

"In this article I shall attempt (I) to isolate as far as possible what Eriugena means by his concept of *natura*, by reviewing both the sources he was inspired by and his use of these sources in the elaboration of this concept. I shall then seek (II) to determine the bearing of this concept on the general inquiry conducted in the *De divisione naturae* by examining its relationship to conceptions presented immediately after it, i.e. the well-known fourfold division of nature and the fivefold classification of modes of being and non-being. Finally (III), the philosophical implications of Eriugena's conception of a study of natura (*physiologia*) will be discussed briefly insofar as this study is suggestive of an unusual metaphysical project.".

    "The importance of arithmology as a feature not only of Eriugena’s work but also of other medieval systems has been rightly stressed by Edouard Jeauneau(1). Medieval thinkers followed in this respect the practice of their ancient sources; arithmology had already played an important part, not only in late antique literature, but also in hellenistic thought, and is already attested in Aristotle’s reports on pre-Platonic Pythagoreanism(2).

    “Arithmology”, as the term is used in modern scholarship, was made current especially, I believe, by Armand Delatte in the work he published toward the beginning of this century concerning ancient Pythagoreanism(3). He used the term in order to designate the associations made in ancient Pythagoreanism between numbers and various aspects of the world, of the gods and of human existence. Delatte regarded

such associations as being a mixture of healthy scientific research and the (by implication unhealthy) phantasies of religion and philosophy. His judgement is clearly based on modern philosophical assumptions. It leaves open the question of how ancient thinkers (and their medieval successors) understood the sense of the associations they made between numbers and other things. It seems that here a wide spectrum of possibilities opens up, going from fairly arbitrary pairings of numbers with various phenomena to a developed philosophy of mathematics and its hermeneutic value for other sciences. Much depends on the background, if any, against which arithmology occurs in an ancient or medieval text."

(...)

"The questions which I propose to discuss briefly here concern Eriugena's practice. How does he understand the arithmological associations he uses, as well as such associations as involve other mathematical objects like geometrical figures? Does his use have a philosophical background which explains and justifies it? What is the ultimate importance for him of such mathematical associations? Eriugena had access to some extent to the ideas on this subject of Proclus and of other ancient Neoplatonists through the works of Augustine and Boethius, Pseudo-Dionysius and Maximus, among others(5). If the idiosyncrasies of the tradition of texts imposed certain limits on Eriugena's access to late antique Neoplatonism, yet his philosophical capacity was such as to make him capable of recovering some of its profoundest ideas." 31. ———. 1986. "Translating Eriugena." In *Jean Scot écrivain*, edited by Allard, Guy-H., 115-128. Paris: Vrin.

"The use of Uhlfelder's serviceable, but incomplete translation of Eriugena's *Periphyseon* in the foregoing analysis was intended merely to help in measuring the value of Sheldon-Williams' rendering. Sheldon-Williams reminds one of Stephen MacKenna, who, although he had, unlike Sheldon-Williams, no professional qualification in Greek or Latin, having discovered Plotinus devoted himself to his translation as a fidus Achates for evermore. Sheldon-Williams had a real passion for the kind of ideas found in Eriugena and in Greek theology. Joined to this he had a strong sense of rhetoric and of an ample balanced style. He rather liked ideas that were complex and, it seemed at times, because they were complex. Altogether, work on the text and translation of the Periphyseon was congenial to him and on it he spent a good deal of his life. He reminds one not only of Stephen MacKenna but also of another famous translator, Scott-Moncrieff, of another famous author, Proust. Scott-Moncrieff, as you will know, was engaged in translating *A la recherche du temps perdu* while Proust was still finishing it. His translation began to be so well known and admired that Proust became jealous of him. I do not wish to suggest that Sheldon-Williams' translation of the *Periphyseon* is of the same class as MacKenna's of Plotinus or Scott-Moncrieff s of Proust; but he has a similar affinity with his author and his *opus magnum*. This gives his translation a feeling which is hard to describe but is for all that perceptible. In the *Foreword* and *Acknowledgements* to the first volume of his edition of the *Periphyseon* Sheldon-Williams, despite my requesting him not to do so, thanks me for, among other things, "important criticisms which have improved the translation." I could still find much to criticize in his translation — what translation is perfect ? —, but my judgment for what it is worth is that we now have in Sheldon-Williams' rendering not only a workable English translation of the *Periphyseon*, but one of welcome affinity with the original." (p. 128).

35. ———. 1992. "Contrasting Approaches to Neoplatonic Immaterialism: Augustine and Eriugena." In *From Athens to Chartres. Neoplatonism and Medieval Thought. Studies in Honour of Edouard Jeauneau*, edited by Westra, Haijo Jan, 175-180. Leiden: Brill.

    "In an earlier paper,(1) I drew a contrast between Augustine and Eriugena in their fundamentally different approaches to the interpretation of an important text from Genesis: *et diuisit Deus lucem a tenebris* (1.4): “For Augustine this signifies, Eriugena says, either the difference between the perfection of form on the one hand and the confusion of ‘informity’ on the other; or the separation of the faithful from the fallen angels. Eriugena here interprets Augustine as understanding that the ‘reasons’ or causes of things are eternal in God and in being created, from being light, become darkness. Eriugena for himself, however, takes so to speak, a diametrically opposite view of the matter. For him following, he says, Dionysius, darkness signifies the incomprehensibility of the eternal reasons in God as well as God himself; and light signifies the declaratio, manifestation or ‘theophany’ of these reasons in the effects that we see. This difference between Eriugena and Augustine, signalled by Eriugena himself, is, as I have said, fundamental . . . .” There is a profound and perhaps revealing difference between looking at darkness as a symbol of

something transcendingly superior to light (Eriugena's approach) and on the other hand greatly inferior to it (Augustine's).

This kind of fundamental difference of approach is, I venture to suggest, also to be discerned in Eriugena's handling of the question of predestination. His overriding view of the problem is, again, God-orientated—there can be no predestination: God's simplicity precludes it. But he does address himself to Augustine's opinions, and strains argument to discover a few texts in which Augustine appears to teach that there is only one predestination, to salvation, and to interpret the de facto overwhelming number of Augustine's declarations on the subject (to the effect that there was predestination to salvation and damnation) through the employment of the figure of speech known as antiphrasis or e contrario: Augustine, he suggests rather desperately, actually means the opposite of what he says.

Repeatedly Eriugena gives this kind of unsatisfying explanation for texts of Augustine that he considers unworthy of his "Father". A singular and important instance of this Eriugenian difficulty arises, as we shall see presently, with the question of Augustine's teaching on the resurrection of bodies. This is a test-case of the real allegiance of each of them to purer Neoplatonic doctrine, and one possible reason for the actual general rejection of Eriugena in the West, where Augustine's view has prevailed." (p. 169)

39. ———. 1990. "The Universe of Nature and the Universe of Man: Difference and Identity." In *Begriff und Metapher. Sprachform des denkens bei Eriugena*, edited by Beierwaltes, Werner, 202-212. Heidelberg: Carl Winter.

    "In view of this volume's theme, i.e. metaphor and philosophy in Eriugena, I would like to concentrate on the connection of these notions with each other. Through an analysis of the figure of man, whose significant role in the *Periphyseon* seems open to several interpretations, I want to show in this paper that in Eriugena metaphorical imagery and philosophical arguments are in fact closely interrelated. Thus, by focusing on one single figure in the context of one specific work, we can perhaps get a better impression of what may be considered the general atmosphere of Eriugena's thinking: subtlety of reasoning corresponding with an unusual flexibility of language.

    In the *Periphyseon* the role of man is important, but unfortunately it is not very well-defined. There is only one of the work's five books which gives an explicit treatment of man, viz. Book IV(1).

    (...)

    1 will therefore try to evoke a portrait of Eriugenian man in which this dual aspect will be given sufficient attention without, however, leading to a fragmented picture. It is my view that even the most scattered elements of Eriugena's speculations

about man still leave openings towards a more integral approach of the matter. The unique philosophical set-up of the work is ultimately responsible for this." (pp. 202-203)

(...)

"What then does this study of Eriugena's allegorical exegesis, notably Eriugena's rational interpretation of it, imply for the interpretation of Eriugenian man? I think that once we have abandoned the static subject-object structure as a suitable model for analyzing Eriugena's figure of man, it may help us see how much room Eriugeha actually leaves for man to play his own role within the vast universe of which he continues to form an integrated part. The observation of Eriugena's handling of allegorical exegesis can help us qualify this role as a creative rational one. Though dependent of nature -man reflects nature's development of processio and reditus - man appears also to be responsible for its execution. The dominance of the theme of the return of all things to God, which permeates the entire description of the Periphyseon's natura, as the collec-tio is implied in the divisio, is equally present in man as in the whole of nature. However. there is one difference, which gives man a slight lead over any other being in the Periphyseon. Whereas the universe of man longs for the realization of the return in the same manner as the whole of the universe, including God, it is still man whose rational nature must guarantee its success. Eriugena's allegorization of paradise with its gradual but definite elimination of the damaging effects of sin can show us how far Eriugena is actually prepared to go to reach his goal." (P. 212)

40. ———. 1990. "The Interplay of Nature and Man in the *Periphyseon*." *Vivarium* no. 28:1-16.

41. ———. 1991. *The Anthropology of Johannes Scottus Eriugena*. Leiden: Brill.

Contents: Preface VII; Introduction 1; 1. Division, definition and return. An inquiry into the Prologue of the *Periphyseon* 7;

2. Creation and God. An explanation of major themes in Eriugena's thinking 40; 3. From physiology to anthropology 82; 4. The universe of man. Its procession and return 118; 5. Back to God. The final *reditus* of man and nature 190; Latin Appendix 221; References 233; Index 239-242.

"... I have taken my starting-point in the *Periphyseon*'s unbroken literary structure, thereby trying to give an analysis of the author's overall ideas. In doing so, I have been led to choose one central theme, namely the study of Eriugena's anthropology, (3) the scope of which I will I here try briefly to define.

The analysis of Eriugena's *Periphyseon* is by nature a historical enterprise. As such it has resulted first of all in an assessment of the early-medieval Christian context of Eriugena's views. Man in this early-medieval world was seen primarily as possessing a created, sinful state, and it is from this viewpoint that I have analyzed Eriugena's ideas. However, defining my purpose simply as the study of Eriugena's anthropology might suggest the analysis of man only in so far as he emerges as the clear object of the *Periphyseon*'s text. However important man as a direct topic of discussion may be, it is not this aspect that has warranted my attention for so long. Rather, during the course of this study I have developed the view that in the *Periphyseon* there is a more veiled presence of man, influencing the whole text. I have tried to trace the origins of this view of man. Without assuming any judgement on the part of my readers, I want to make it clear that, for me, the position of man as the leading character in the vast universe Eriugena evokes was only gradually revealed. It resulted in a complete change in my initial perspective of the *Periphyseon* as a treatise of primarily metaphysical importance. For it put a definite stop to any distinction between man as the object and man as the subject of Eriugena's thought, making him instead the overall centre of the *Periphyseon*'s universe. With this unifying view of man as the central character in the *Periphyseon*'s literary structure, I think we can legitimately regard the work as a coherent exposition of ideas.

Though one should always be careful about the impact of one's descriptions, I think regarding the *Periphyseon* from an anthropological viewpoint may have some effect in counterbalancing attempts which have explained the *Periphyseon* too readily either as a modern, idealistic system comparable to a Heideggerian model for example,(4) or as a statically layered, Neoplatonic universe of Proclean design.(5) One should read and interpret my comparison between Eriugena's confidence in man as he is positioned in an outstretched universe of divine origin, and the far more modern notion of Descartes' self-awareness of the thinking subject along these same lines." (pp. 1-2)

(3) I have used the term 'anthropology' generally to indicate Eriugena's view of man within the context of his written works. Although throughout this study it will gradually be made manifest what I mean by this term, I want to make it clear from the very beginning that, unlike in earlier literature, I do not want to interpret 'anthropology' as psychology, as appears to be the case in Karpp 1950 [Heinrich Karpp, *Probleme altchristlicher Anthropologie. Biblische und philosophische Psychologie bei den Kirchenvätern des dritten Jahrhunderts*, Gütersloh]; Mathon 1964 [Gérard Mathon, *L'Anthropologie chrétienne en Occident de Saint Augustin à Joan Scot Erigène : recherches sur le sort des thèses de l'anthropologie augustinienne durant le Haut Moyen Age*, Lille]

(4) In his outlook on Eriugena's philosophy, Moran seems to be particularly interested in the relevance of his thought for modern, idealist philosophy, see Moran 1989: xii-xiv, 102, 184-185, 283-284.

(5) Cappuyns quotes Hauréau's statement about Eriugena as "un autre Proclus a peine chrétien", see Cappuyns 1933: 264. Hauréau's judgement can be seen as representative for much of the nineteenth and early twentieth century scholarship on Eriugena.

43. ———. 1992. "Between Damnation and Restoration. The Dynamics of Human Nature in Eriugens's *Perphyseon* and Alan of Lille's *Anticlaudianus*." In *From Athens to Chartres. Neoplatonism and Medieval Thought. Studies in Honour of Edouard Jeauneau*, edited by Westra, Haijo Jan, 329-350. Leiden: Brill.

"Introduction: Anthropology From a Theological Perspective

Approaching the learned literature of the pre-scholastic Middle Ages from a twentieth century viewpoint, one can make remarkable discoveries if willing to cross familiar boundaries. In this article I want to stress the continuity of the early-medieval intellectual tradition, that is to say until the twelfth century, by examining two important works. They were written by John Scottus Eriugena and Alan of Lille in the ninth and twelfth centuries respectively. While the historical connection between Eriugena and Alan may be a matter of scholarly debate, the general affinity between their ideas makes it definitely worthwile to undertake a comparison. The Platonic orientation of both authors accounts for some striking parallels, and offers us a penetrating insight into a strong intellectual undercurrent of the prescholastic Middle Ages." (P. 329)

(1) For a discussion of Eriugenian influence in the twelfth century, see P. Lucentini, *Platonismo medievale. Contributi per la storia dell' eriugenismo* (Florence, 1980). For Alan's possible knowledge of Eriugenian metaphysics, one should think of Bernard Silvestris' *Cosmographia* as an indirect link of transmission. On Bernard and Eriugena, see P. Lucentini, op. cit., 53, n. 150. P. Dronke has traced Eriugenian influence in Alan on the point of reason versus authority, see P. Dronke (ed.), *A History of Twelfth-Century Western Philosophy* (Cambridge, 1988) Introduction, 8, n. 13.

(2) For a general overview of the Platonisms of the twelfth century, and the role of Eriugena in them, see M.D. Chenu, *Nature, Man and Society in the Twelfth Century. Essays on New Theological Perspectives in the Latin West*, transl. and ed. by J. Taylor and L.K. Little (Chicago, 1968/repr. 1983) 49-98. See also W. Wetherbee, "Philosophy, Cosmology and the

Renaissance", in P. Dronke (ed.), *A History of Twelfth-Century Western Philosophy*, 21-53. In accordance with Chenu's views, Wetherbee mentions Eriugena's translations of Pseudo-Dionysius and his *Periphyseon* as the two main sources of the mystical, hierarchical Platonism, which coexisted with the 'scientific' Platonism of the early twelfth century (29). He also points out that Platonist cosmological thought increasingly influenced the production of imaginative literature. Alan and Bernard Silvestris occupy an important position in this movement of creative, allegorical poetry (43-53). See also n. 44 below.

(44) For the importance of *integumentum* in the rise of imaginative literature in the twelfth century, see W. Wetherbee, "Philosophy, Cosmology and the Renaissance", in P. Dronke, *A History of Twelfth-Century Western Philosophy*, 43-53. In his article Wetherbee points to three examples of this imaginative literature, namely Bernard Silvestris, John of Salisbury and Alan of Lille.

"To analyze the tradition of negative theology, the article goes back to its prime architect, Pseudo-Dionysius. By comparing him to an author who preceded him, viz. Augustine, and one who followed him, viz. Eriugena, the article aims at giving a 'thicker' description of his position by framing it historically. In doing so it draws two conclusions. It first shows that the connection between negative theology and negative anthropology is indeed Dionysian; as such it is rightfully

pointed to in postmodern thought. In contradistinction to postmodern applications, however, Dionysius' interest in negativity is shown to reflect before all a desire to wrestle with the overpowering presence of the divine instead of concluding to its absence.".

55. Piemonte, Gustavo. 1968. "Notas sobre la creatio de nihilo en Juan Escoto Eriúgena." *Sapientia* no. 23:37-58.

    "In this preliminary study the author, after briefly surveying the contradictory conclusions of scholars on the paradoxes inherent in Eriugena's writings, proceeds in two sections to address the problem of creation *de nihilo* as it occurs in Eriugena and in some other writers.

    I. A large section of *De divisione naturae* III, chapters 5-23 is the subject of analysis. The problem is *nihil* by privation or alternatively by superexcellence. The Bible and the Fathers offer a solution through faith; reason offers an alternative. As the argument unfolds the author points out the sources of the responses of both master and pupil. The dialogue form admits of a discussion of controversial views, Eriugena expressing doubt through the words of the discipulus, a device which may have been responsible over the centuries for the imputation to him of various heresies. The antithesis of *aeterna/facta* is an overriding problem. In that context the author surveys the stages and extension of creation *de nihilo*. " (Brennan, pp. 211-212)

    "II. This section is entitled 'John the Scot and the gnostic tradition in Judaism'. Common sources can be discerned in the work of Eriugena and that of Hebrew mystics of the later

middle ages (cf. Scholem, 481 below) e.g. in Provence and in Spain (as can neoplatonist influence in Shiite Islam of that period). This point is sustained by specific quotations and specific parallels from cabbalistic writers, who may indeed even have read Eriugena's text. It has to be remembered also that early christian writing owed much to earlier Jewish writing." (Brennan, pp. 211-212).

57. ———. 1986. "L'expression "*quae sunt et quae non sunt*": Jean Scot et Marius Victorinus." In *Jean Scot écrivain*, edited by Allard, Guy-H., 81-113. Paris: Vrin.

"L'expression double «quae sunt et quae non sunt», dont les membres antithétiques veulent embrasser la totalité du réel, revient souvent, comme on sait, dans les écrits de Jean Scot. Elle est présente, tout d'abord, dans le *Periphyseon*, et dès ses premières pages, consacrées à l'explication bien connue des manières d'entendre la distinction entre les «choses qui sont» et les «choses qui ne sont pas». Mais elle paraît aussi dans les autres ouvrages érigéniens ; on la trouve déjà — avec une signification qui ne coïncide qu'en partie avec celle que lui donneront les textes postérieurs — dans le *De divina praedestinatione*; on la rencontre également dans les *Expositiones in ierarchiam coelestem* et dans le *Commentaire sur l'évangile de Jean*, et même dans des pièces d'un genre littéraire très différent, moins techniques et destinées à un public plus large, comme l'*Homélie* sur le prologue de ce même évangile, ou les poèmes. C'est justement la première occurrence de cette expression dans la *Vox spiritualis*, au chapitre I, lignes 6 et 8-12, avec les problèmes textuels qu'elle a soulevés, qui m'a amené à l'étudier dans l'ensemble de l'oeuvre de Jean Scot, et à me poser la question des origines possibles d'une locution si typiquement érigénienne. Elle n'était probablement pas courante au temps de notre auteur, puisqu'il se donne plusieurs fois la peine de l'expliquer à ses lecteurs. Où Jean Scot avait-il trouvé l'inspiration pour cette formule d'apparence paradoxale, qui occupait souvent ses méditations et sur laquelle il exerçait toutes les forces de son intelligence («saepe mihi cogitanti diligentiusque quantum uires suppetunt inquirenti... ») ? Chez Denys et Maxime le Confesseur, oui, sans doute; l'Érigène le dit

lui-même (4), et d'ailleurs il n'est pas difficile de retrouver, derrière les mots latins, les vocables grecs respectifs (*tà ônta, tà me ônta*) ; il s'agit bien d'un cas de traduction, et cela n'a rien d'extraordinaire. Mais on peut toujours se demander si notre auteur n'aurait pas suivi consciemment l'exemple de quelque prédécesseur dans son adaptation au latin de ces éléments de la terminologie philosophique grecque. Après avoir fait quelques recherches personnelles, je crois que l'opinion qu'expriment à cet égard, un peu en passant, certains historiens est juste, et que la réponse à la question posée doit être affirmative. Il me semble par ailleurs que l'influence du prédécesseur en question — je parle de Marius Victorinus — n'est pas limitée à ce seul point : elle s'étend aussi à d'autres thèmes, et la façon dont l'Érigène l'a assimilée pourrait nous dire quelque chose sur ses procédés de composition littéraire et en même temps éclaircir certains aspects de sa pensée." (pp. 81-83)

(...)

"Au terme de notre comparaison entre différents passages de Jean Scot et de Marius Victorinus, nous sommes donc en mesure d'affirmer que l'auteur irlandais a très probablement emprunté à ce difficile penseur chrétien du IVe siècle non seulement certaines idées qu'il a intégrées dans sa synthèse personnelle, mais encore des formules, des phrases où ces idées sont exprimées, c'est-à-dire des matériaux littéraires. C'était justement ce que Victorinus lui-même avait fait à l'égard de Porphyre et d'autres philosophes grecs, d'après P. Hadot, qui note que ce mode de composition est d'ailleurs commun à tous les écrivains latins de l'Antiquité finissante: «Tous utilisent pour ainsi dire des éléments préfabriqués.(93) (94) »" (p. 108)

Abstract: "I would like to discuss in this article some issues concerning Scotus Eriugena's ontology. I will focus on the *De Divisione naturae* and, in particular, on the concepts of 'nature', 'essence/substance', 'matter', 'form', 'species' and 'genus'. I will also pay attention to the way in which Scotus deals with some traditional logic themes, like that of individuation and universals. The underlying assumption is that (realist) philosophers of the 'twelfth Century renaissance' take into some consideration elements of Scotus' ontology when discussing the problem of universals.

I tried to read Scotus language in a 'neutral' way, by translating it literally, disregarding historical metaphysical interpretations (which are considered anyway in the footnotes), and by rendering metaphors and literary texts in a comprehensible way, as far as possible.".

65. Préaux, Jean. 1977. "Jean Scot et Martin de Laon en face du *De nuptiis* de Martianus Capella." In *Jean Scot Erigène et l'histoire de la philosophie*, edited by Roques, René, 161-170. Paris: Éditions du Centre national de la recherche scientifique.

66. Puxley, David. 2006. "The Role of the Human in the Procession and Return of the Cosmos from Plotinus to Eriugena." *Dionysius* no. 24:175-208.

"The first two parts of this study examine the formulations of Plotinus and Porphyry (Part 1) and of Iamblichus and Proclus (Part 2) with respect to the median and mediating nature of the human self in terms of its capacity for *anagogé* and *énosis*. Part 3 examines the early reception and transformation of the Iamblicho-Procline formulation. In Part 4 we see that in the «*Periphyseon*» of Eriugena an early and profound synthesis is to be found, with the result that in Eriugena the human soul or self is the agent of creation and thus central to the «exitus» and «reditus» of the cosmos.".

67. Ramelli, Ilaria. 2012. "Eriugena's Commentary on Martianus in the Framework of his Thought and the Philosophical Debate of his Time." In *Carolingian Scholarship and Martianus Capella. Ninth-century Commentary Traditions on 'De nuptiis' in Context*, edited by O'Sullivan, Sinead and Teeuwen, Mariken, 245-272. Turnhout: Brepols.

    Abstract: "It is well known that the Carolingian royal family inspired and promoted a cultural revival of great consequence. The courts of Charlemagne and his successors welcomed lively gatherings of scholars who avidly pursued knowledge and learning, while education became a booming business in the great monastic centres, which were under the protection of the royal family. Scholarly emphasis was placed upon Latin language, religion, and liturgy, but the works of classical and late antique authors were collected, studied, and commented upon with similar zeal. A text that was read by ninth-century scholars with an almost unrivalled enthusiasm is Martianus Capella's De nuptiis Philologiae et Mercurii, a late antique encyclopedia of the seven liberal arts embedded within a mythological framework of the marriage between Philology (learning) and Mercury (eloquence). Several ninth-century commentary traditions testify to the work's popularity in the ninth century. Martianus's text treats a wide range of secular subjects, including mythology, the movement of the heavens, numerical speculation, and the ancient tradition on each of the seven liberal arts. De nuptiis and its exceptionally rich commentary traditions provide the focus of this volume, which addresses both the textual material found in the margins of De nuptiis manuscripts, and the broader intellectual context of commentary traditions on ancient secular texts in the early medieval world.".

    "This essay sketches how Eriugena and Hugh of St. Victor interpreted the Areopagite, emphasizing key passages for each. Eriugena's translation of the *Corpus Dyonisianum* and his *Expositiones on The Celestial Hierarchy* exerted a tremendous influence on subsequent Latin readers, including Hugh, and even survived the condemnation of his masterwork, the *Periphyseon*. The Victorine, whose own Augustinian inclinations were largely untouched by his encounter with the Areopagite, nevertheless exerted a distinctive influence by (falsely) attributing to Dionysius the view that in our pursuit of God, "love surpasses knowledge." Together, despite their stark

differences, they bequeathed a lively Dionysian tradition to the high medieval authors, scholastics and mystics alike.".

    "Chapter IV, "Eriugena -- Causality as Concealing Revelation" follows the great Irish philosopher in his reflections upon causality as a manifestation of the cause in and through its effect, a manifestation, however, which by its very nature cannot but conceal the cause at the same time as it discloses it. For the Christian thinker that is Eriugena, the Trinity constitutes the paradigm of this "concealing revelation". God, who is beyond being and, therefore, strictly speaking "no-thing", enters the domain of being -- "creates himself", as Eriugena puts it in daring terms -- in and through the Trinity, and then, derivatively, through the natural world. We can know God -- and, indeed, God can only come to "know" himself -- only through his effects; yet as in these effects God "alienates" himself from his "true" nature, which is "nothing", creation is as much an obstacle as an aid in our quest for God. Moreover, this ambiguity is not only a theoretical one, having as it does repercussions upon the moral quality of creation, which, as "revelation", serves as a signpost on the road to God, while as "concealment" it presents dangerous temptations, and the occasion of sin." (p. 27).

80. Russell, Robert. 1973. "Some Augustinian Influences in Eriugena's *De diuisione naturae*." In *The Mind of Eriugena*, edited by O'Meara, John Joseph and Bieler, Ludwig, 31-40. Dublin: Irish University Press.

    "In assessing the Latin sources in Eriugena, it goes without saying that St Augustine holds the first place.

    In the first of his more original works, the *De praedestinatione*, composed in 851, and before his contact with the *Corpus Dionysianum*, the Bishop of Hippo is quoted no fewer than sixty times. Just how Eriugena made use of Augustine's works on free will, grace, and predestination in that work has been shown by Professor Gérard Mathon in a Communication delivered during the Semaine Augustinienne in Paris in 1954, entitled 'Utilisation des textes de saint Augustin par Jean Scot Érigène dans son De praedestinatione'.(2)

    It must be acknowledged, however, that, despite its obvious importance, no definitive work has yet appeared on the overall influence exerted by the writings of the African bishop.

    (...)

    The present paper is offered as a modest attempt to supply in part for this notable lacuna in Eriugenian scholarship. I have chosen to restrict this inquiry to an examination of the *De divisione naturae* for several reasons. First, because of a limitation of time imposed by our programme; secondly, because the work itself is not only the most original of Eriugena's writings but also the one which reflects the full maturity of its author. (...)

    Thirdly, since it was composed after the author's contact with the *Corpus Dionysianum*, it is possible to compare and evaluate Augustine's role in the formation of Eriugena's definitive teaching with this and other Greek sources. If one restricts this role to scriptural exegesis, the author of the *De divisione naturae* expressly states his preference for Gregory of Nyssa and Augustine as preeminent after Apostolic times: '. . . post sanctos Apostolos nullum apud Graecos fuisse in expositionibus divinae Scripturae maioris auctoritatis Gregorio

theologo, nullum apud Romanos Aurelio Augustino'.(6) Again, in the field of theology, Augustine is 'sanctissimus divinusque theologus'.(7) Of learning in general, he is 'magnus divinarum humana-rumque rerum et solertissimus inquisitor et copiosissimus expositor'.(8) Finally, Augustine is quoted over forty times in this same work." (pp. 31-32)

(...)

"A fuller treatment of Augustinian influences on Eriugena's *De divisione naturae* would have had to include, in addition to those already indicated, certain aspects of the doctrine of creation, such as *materia informis* and the *rationes seminales*; also, the problem of evil, and perhaps, where Augustine's influence is strongest of all, Eriugena's presentation of Trinitarian theology.

In conclusion, it need hardly be noted that Eriugena's great respect for Augustine did not prevent him from departing consciously from his authority, a position fully justified by Eriugena's conviction of the natural superiority of reason over all human authority. Gilson describes his attitude this way: 'When a man speaks, even if his authority is universally recognized by other men, what he says is true only if reason approves of it.'(54) In a number of instances Eriugena rejects Augustine in favour of Greek authorities on such basic issues as authentic human nature, the constitution of corporeal reality, the status of original paradise, sexual differentiation, the nature of the glorified body, and many aspects of eschatology. In the final analysis, Eriugena's importance and greatness do not lie in the fact that he compiled a *Liber Sententiarum*, but rather that he achieved a new and powerful philosophic-theological synthesis in an age which made such a feat all the more remarkable. The present Colloquium then is not only a fitting tribute to the memory of Eriugena but, hopefully, the beginning of a new era which will witness a richly productive renaissance of Eriugenian studies." 83. ———. 1977. "Wertung und Rezeption antker Logik im Karolingerreich." In *Logik, Ethik, Theorie der Geisteswissenschaften. XI. Deutscher Kongress für Philosophie, Göttingen, 5 - 9 Oktober 1975*, edited by Patzig, Günther, Scheibe, Erhard and Wieland, Wolfgang, 451-456. Hamburg: Meiner.

    "In the years preceding the mid-9th-century Predestination controversy, the doctrine of the Church was defended, and taught, by means of the *catena***,** that is by a survey of the teaching of the Fathers of the Church. In the middle of the 9th century a new method was resorted to by Eriugena, viz. the use of Logic. The author seeks to identify JSE's probable sources in ancient and late antique literature: these he lists, together with the provenance of the manuscripts to which JSE could have had access. He discerns three crucial stages in the dissemination of the relevant literature, viz. Charlemagne's circle and in particular Alcuin, the monastery of Fulda under Rhabanus Maurus, and the cathedral school at Laon in the period of Martinus Scottus and JSE - about 840-860. At the first stage Logic remained a theoretical school subject: at Fulda syllogistic argument began to be appreciated; in Eriugena's writings it became part of the very fabric, reflecting the inherent negative and positive aspects that he sought to express. This bries article is enriched by two valuable pages of footnotes." (Brennan, pp. 45-46).

    "Johannes Scottus Eriugena stellt im dritten Buch seines Hauptwerks eine Verbindung zwischen den Begriffen Leben, Seele und Körper her, die ihm zu behaupten gestattet, nach dem Untergang der wahrnehmbaren Welt lebe jeder Mensch mit einem corpus spirituale weiter. Daß er mit diesem Gedanken die christliche Lehre von der Auferstehung des Fleisches als eine Behauptung nachweisen will, die widerspruchsfrei gedacht werden kann und daher eine reale Möglichkeit festhält, zeigt sich im fünften Buch. Um prüfen zu können, ob ihm dieser Nachweis gelungen ist, ist zunächst der systematische Ort zu bestimmen, den er dem der Begriff der Seele in Periphyseon zuweist; denn um seinetwillen wird der Gedanke entwickelt, der die drei genannten Begriffe miteinander verbindet. Sodann ist der Gedanke selbst darzulegen und ist zu klären, als was darin “Leben”, “Seele”, und vor allem corpus spirituale verstanden werden. Erst im Wissen darum kann untersucht werden, wie haltbar der entwickelte Gedanke ist." (s. 195).

"In the first part of this paper I should like to deal, briefly and on the whole dismissively, with the pagan sources, and in the second with the Christian sources, with an attempt to show how Eriugena first co-ordinated them into a single body of doctrine and then adapted that doctrine to purposes of his own." (p. 1)

(...)

"Plato, then, is known to Eriugena, as to others of his time, not as a writer with whose works he is immediately familiar, but as a kind of eponymous hero of Platonism revealed through the natural philosophers who were his successors: *Plato philosophantium de mundo maximus*.(20) Aristotle occupies a similar position in the field of dialectic: *acutissimus apud Graecos naturalium rerum discretionis repertor*.(21) He knew Boethius's commentary on the *De interpretatione*, and therefore its Greek name, which Boethius gives,(22) but what he says of the work itself is as vague and inaccurate as his knowledge of the *Timaeus*. In the *Annotationes* he simply says that it is a work that treats of the noun, the verb, the connection between them, affirmation, negation and species.(23) In the *Periphyseon*, written when memory of his early reading has grown fainter, he is even less precise and recalls it as a treatise

dealing wholly or for the most part with the possible and the impossible.(24) He also knows of the ten Categories, and devotes a long excursus to them in the first book of the *Periphyseon*, but his knowledge comes from the fourth-century Latin paraphrase of the *De categoriis* that was widely read in his time and commonly attributed to St Augustine. There is nothing, he says, that cannot be found in this paraphrase except that he knows from Martianus Capella of a divergent tradition which, in enumerating the Categories, places quality before quantity,(26) an order which he himself adopted in the first draft of the *Periphyseon*." (p. 2)

(...)

"At the beginning of the *De praedestinatione*, his earliest work, after re-stating St Augustine's declaration that the only true philosophy is religion and the only true religion philosophy, (44) he describes philosophy as a quadriuium of which the four branches are διαιρετική, οριστική, αποδεικτική and αναλυτική. (45) These are the names given to the four branches of dialectic by the Peripatetic scholars of Alexandria: Ammonius in his commentary on the *Prior Analytics*,(46) the Pseudo-Ammonius in his commentary on Porphyry's Isagoge(47) and David, called the Armenian, in the first recension of his commentary on the same work.(48)" (pp. 3-4)

95. ———. 1992. "Yet more on the Autograph of John the Scot: MS Bamberg Ph. 2/2 and Its Place in *Periphyseon* Tradition." In *From Athens to Chartres. Neoplatonism and Medieval Thought. Studies in Honour of Edouard Jeauneau*, edited by Westra, Haijo Jan, 47-70. Leiden: Brill.

    "Perhaps because the newest critical edition of Johannes Scotus Eriugena's *Periphyseon* reached only the end of book three before its editor's [J. P. Sheldon-Williams] death, recent discussion of the manuscript tradition of the work has tended to centre around the codices important to the first three books and containing, by and large, the first and second versions of Eriugena's text. Subsequently, those volumes containing only books four and five, or interesting particularly for versions three and four of the text, have been neglected. In this paper I should like to redress that balance somewhat, especially in regard to the Bamberg manuscript of books four and five, Bamberg, Staatsbibliothek, MS Ph. 2/2 (HJ. IV 6) = J. As I, together with Dr. Mark Zier, am presently assisting Edouard Jeauneau with the edition of *Periphyseon* books four and five, in order to complete Sheldon-Williams' critical edition, it seems appropriate to concentrate on this part of the textual tradition.

Against all expectations, Bamberg J has proved a singularly fascinating witness to the text and I shall concentrate on it in detail, particularly noting the light it brings to the thorny problem of Eriugena's autograph and the contemporary circle of scholars in the area. Firstly, however, in order to set the scene, and for the sake of a clarity which previous editions have not fostered, if only because of constantly shifting nomenclature, I shall survey the manuscript tradition of the work as a whole." (p. 47)

(...)

"This study has been centred on one manuscript and really only one book of Periphyseon; it shows the limitations as well as the fruitfulness of such concentration. It highlights the importance of a new edition since knowledge of the text— the actual writing of and working over of these manuscripts—is crucial to the understanding of their makeup and use. In the meantime, J shows us at least one other, somewhat learned, reader of Eriugena's text. It is becoming more and more evident that Johannes Scotus was not working in a vacuum but amongst a group of receptive and critical readers." (p. 70).

"The ninth-century metaphysician, John the Scot, who came very probably from Ireland to write both polemics and philosophy at the court of Charles the Bald, is known to have read a number of Augustine's writings, and to have cited them in his major work, *De Divisione Naturae* or *Periphyseon,*(1) *at*

times without showing much regard for the context of his quotations. He composed *Periphyseon* around 860 A.D., (2) in a period which was noted for the dissemination of traditional theological ideas to a large, poorly educated public, rather than for its innovations.(3) The influence of Greek ideas on John's mind, unusual in his day, but not quite so unusual as we used to believe, (4) gradually gave rise to the position, now commonly held by historians, that his thought was more or less dominated by Greek ideas to the exclusion of the Latins. This position has had to be modified, however, in the light of closer examination of his use of figures like the

Pseudo-Dionysius."

100. ———. 1980. "In Search of Eriugena's Augustine." In *Eriugena. Studien zu seinen Quellen*, edited by Beierwaltes, Werner, 85-104. Heidelberg: Carl Winter.

"My purpose is to suggest some new lines of direction in assessing the influence of Augustine on the Periphyseon.

To date, Augustine's influence has been gauged by allusions, quotations, misquotations and points of opposition to works which we know for sure that the bishop of Hippo wrote. But the now extensive literature on the subject(1) has paid little attention to the conception Eriugcna himself had of Augustine. Eriugcna was not only acquainted with most of the Maurist canon(2); he also considered authentic later syntheses of Augustine's doctrines like those of Bede and at least one spurious treatise, the anonymous fourth century *Decem Categoriae*. Eriugena's assimilation and transformation of these texts, particularly in books one and two, coloured his interpretation of better known passages from such works as *De Genesi ad Litteram*, *De Trinitate* and *De Civitate Dei*. Their logical bent not only provided him with a rationale for harmonizing the views of the Latins and the Greeks secundum Augustinum. In combination with other works on the trivium actively studied at the 'palace school'(3), they laid the foundation for a number of more general statements on language, reality and God's word.

Augustine's influence should therefore be viewed in two perspectives. The predominant role was played by the real Augustine. While some passages of the theological writings were undoubtedly read in the light of pseudo-Augustine, the majority were not. Nor is there any single key which will unlock the secrets of Eriugena's reading of Augustine as a whole. On the other hand, Eriugena should not be separated artificially from the intellectual milieu of the later Carolingian age. Alcuin, Rabanus Maurus, Heiric of Auxerre and others not only recognized Augustine as the central Latin father and philosopher of history but also as an incisive commentator on topics of ancient logic and grammar. Eriugena undoubtedly shared their views." (pp. 85-86)

113. Weiner, Sebastian Florian. 2007. *Eriugenas Negative Ontologie*. Amsterdam: B. R. Grüner.

"Recently, there has been an upsurge of interest in the work *Periphyseon* of the early medieval philosopher John Scot Eriugena. Previous research has classified the book either as a piece of Neoplatonic philosophy or as part of the Latin dialectic

tradition, which has led to one-sided interpretations. The present publication focuses instead on the philosophical claims defended in the Periphyseon itself, examines its originality and discusses the soundness of its argumentation. As a result, a hitherto unnoticed basic thought of the work has been uncovered, namely the concept of a negative ontology, according to which all substance is completely incomprehensible. This notion constitutes the greatest innovation of Eriugena's thought. In keeping with his negative ontology, Eriugena downgrades the fourfold division of nature that he had presented at the beginning of his work. A critical survey of the current readings of Eriugena as a Neoplatonist and idealist completes this book.".

114. ———. 2008. "Eriugena's Innovation." *Vivarium* no. 46:1-23.

"John Scot Eriugena's work *Periphyseon* is commonly regarded as having introduced Neoplatonism into early medieval thinking. Eriugena's theory of the reunification of the Creator and his creation is then viewed as being based on the Neoplatonic scheme of procession and reversion. However, this interpretation falls short of Eriugena's intentions. Above all, he denies any ontological difference between Creator and creation without taking recourse to the Neoplatonic considerations of procession and reversion. Surprisingly, according to Eriugena's explanation, God is not only the Creator but he is also created. He is created insofar as he alone, possessing all being, is the essence of all created things. Moreover, the fourfold division of nature, presented at the beginning of the work, is not Eriugena's own innovation, but a common Carolingian concept. It is rather his aim to show that from an ontological point of view this division has to be resolved.".

Unpublished MA Thesis, Dalhousie University, Halifax, available at ProQuest Dissertations & Theses.

Contents: Abstract VI; Acknowledgments VII; 1. Introduction 1; 2. Th Early Tradition of the *Categories* from Aristotle to

Ammonius 6; 3. Eriugena's Direct Sources - The *Categories* from Augustine to Alcuin 29; 4. Eriugena's Reception and Treatment of the Categories 48; 5. Conclusion 92; Bibliography 97-107.

"Eriugena's discussion of the Aristotelian categories in Book One of the *Periphyseon* has the appearance of a mere digression in the context of the work as a whole. Moreover, it is often seen as an incoherent interpretation of Aristotle's original doctrine put forward in the *Categories*. This thesis proposes to correct these views by reading Eriugena's treatment of the categories in the context of the Neoplatonic commentary tradition, as well as in Eriugena's own historical context. Eriugena's interpretation of the categories becomes coherent when read as a Carolingian development of the Late Antique commentators, Iamblichus in particular. The fruit of that development, namely Eriugena's unusual approach to the categories as generative intellectual realities, makes his treatment of them integral to his system, and the appropriate starting point for the *Periphyseon* as a whole."

"At a rather more microcosmic level, the earliest manuscript of *Periphyseon*, Reims, Bibl. mun., MS 875 (= *R*), provides a glimpse of how these themes unfolded in the mind of the author himself through a fascinating sequence of additions and emendations to the text that are presently being clarified in the critical edition of the fourth book of that work.

Taken together, the additions and emendations in *R* effectively constitute the second recension of the text. The additions are generally straightforward and intended to amplify the author's argument. When the additions are brief, they accomplish that goal quite handily. But on several occasions the author chooses to amplify his text by means of lengthy citations of the authorities of the ancient church—Augustine, Boethius, Pseudo-Denis, Gregory of Nyssa, Maximus the Confessor—that occasionally do more to muddle than to clarify the author's point, as we shall see below.

Eriugena has emended his text, on the other hand, with an eye to reshaping his argument. In Book IV, which is cast as a commentary on the creation of human being and the events in Eden, it would seem to be the author's eschatological vision of Book V, both in its anthropology and its understanding of deification, that stands behind most of the major emendations. The understanding of that vision, which only becomes clear for the author as he first describes it in Book V, compells him to reshape his earlier text according to his later conclusions. His understanding of the return of all things to God in and through human nature leads him to rework in Book IV his presentation of human nature as the image of God, to precise the noetic nature of that image, and to distinguish between the general redemption of human nature and the deification of the saints." (pp. 71-72)

(...)

"Has Scottus revised his description of the microcosm in Book IV before composing his understanding of the eschatological

vision in Book V? It is perhaps more than coincidence that *R* gives evidence of significant emendation of some of the elements that will play a key role in his eschatological vision. Unfortunately the text in *R* terminates just prior to the end of Book IV, and provides no sure evidence. Nevertheless, it is entirely likely that as he worked out his understanding of the reditus in Book V, the implications of that understanding compelled him to return to his earlier work, especially his discussion of the nature of human being. And it is fitting that we can still trace in the manuscripts that preserve his thought this dialectical dimension in the mind of Eriugena, for whom dialectic was of the essence in the procession and return of the cosmos to God." (pp. 82-83).

Avicenna (Ibn-Sina) on the Subject and the Object of Metaphysics

Introduction

"Ibn Sina (Arabic), also known as Avicenna (Latin) and Abu Ali Sina (Persian) was the most original and systematic Muslim philosopher. In this light he is mentioned by two celebrated historians of medieval western philosophy: A. Maurer states, "...his [ibn Sina's] philosophy is a highly personal achievement, ranking among the greatest in the history of philosophy;" and F. Copleston holds, "The greatest Muslim philosopher of the eastern group without doubt is Avicenna or ibn Sina (980-1037), the real creator of a scholastic system in the Islamic world." (1) Y. Mahdavi lists 244 texts attributed to him and G. A. Anawati lists 270. (2) These works envelop a multiplicity of topics such as metaphysics, poetics, animal physiology, minerals, rhetoric, mechanics of solids, Arabic syntax, meteorology, mystical treatises, and a medical treatise, and are translated into more than nineteen languages. The crown of his philosophical corpus is a set of encyclopedic collections of treatises, especially al-Shifa, al-Najàt, al-Isharatwa al-Tanbihàt and the Danish Nameh; each collection contains elaborate philosophical treatises on metaphysics, physics, psychology, and logic. A standard edition of the logical texts of al-Shifa' alone comprises more than one sixteen hundred double size (1600) pages.(3) (pp. 1-2)

Contemporary philosophies of logical syntax of a language distinguish between two types of primitives-one, designative types of sign, the other, rules for transformation, designation, and interpretation, and these distinctions can be applied to ibn Sina's system.

Ibn Sina's two primordial notions of the soul are 'being' (hasti, wujûd) and the modalities [of necessity (wajib), contingency (mumkin) and impossibility (mumtani)]. The notion of being is the core of his system, while the modalities specify the subset of beings that are existents. The notion of 'being' concatenated with 'necessity' point to 'the necessary being;' using the second version of the ontological argument, 'necessary being' results in 'the Necessary Existent.' The notion of 'being' concatenated with 'contingency' has two possible results: (a) if there is a cause for the case in question, then the contingency is an actual existent-for example, in the case of 'being a human,' persons are existents because they have parents; (b) in the case of absence of the cause, the results are non-actual contingencies such as unicorns. 'Impossibility' and 'being' lead to no existent, as illustrated by 'round squares,' and 'the largest number.' The key notions of ibn Sina's system are very clear: 'Being-qua-being' (hasti, wujûd) corresponds to Aristotle's notion of 'being-qua-being' in Metaphysica 1002a 20 (ὂν ἢ ὀν) and E. Moody's reading of Ockham's use of 'ens' in Summa Totius Logicae. (4) It signifies the most determinable concept. 'Non-being' is meaningless. We should note that all mental concepts (actual or not actual) signify a being. For this reason 'being' is different from 'existent'.

'Existent' (mawjûd) signifies actual entities, Aristotle's notion of first substance (πρώτη φιλοσοφία). There are no impossible existents. For ibn Sina there is only one Necessary existent, which is the ultimate cause of generation of other existents. 'Existence' itself is not an existent, but signifies those entities which are neither uncaused 'contingent beings' nor 'impossible entities.''Essence,' (mahyya) is used by ibn Sina in the sense of "ti esti" and in the secondary sense of "ousia" employed by Aristotle. (5) An existent partakes of an essence; for example, the feature of a basket-hall can be discussed in terms of the formal properties of a sphere. An unrealized entity such as a unicorn may have an essence but no existence." (pp. 20-21)

The relation betweein ontology and theology according to Avicenna

"The inspection of the *llahiyyat* reveals not only the importance of Metaph. α, 1-2 and Λ, 6-10, but also the particular way in which Avicenna reproduces these two loci of the *Metaphysics* in his work: first, the doctrines of α, 1-2 and Λ, 6-10 are somehow interconnected in the final section of the *Ilahiyyat*, the one dealing with philosophical theology (VIII, 1–X, 3); second, within this section the doctrine of α, 1-2 is placed before that of Λ, 6-10, and constitutes a sort of introduction to philosophical theology. It is possible that Avicenna read α, 1-2 and *Λ* 6-10 during his secondary education according to this same pattern. (...)

In sum, Avicenna's approach to the Metaphysics at the time of his secondary instruction had three main features: (i) it was not an extensive reading of this work in its entirety, but only of the essential parts of it, namely--on the basis of the evidence at our disposal--α, 1-2 and Λ, 6-10; (ii) these two loci were read in connection with one another, as elements of the theological part of the Metaphysics, in disregard of the ontological part of it; (iii) a was read as an introduction to Λ, 6-10 whereas books A, B-K of Aristotle's work were probably neglected." (pp. 57-58)

"The first specific endeavour of clarifying the relationship between ontology and theology within the [Aristotle's] *Metaphysics* took place, as far as we know, in Arabic philosophy. In post-Aristotelian

Greek philosophy, this relationship was not perceived as problematic: it appears as a crucial issue neither in an independent "aporetic" treatise on metaphysics like Theophrastus' *Metaphysics*, nor in a reworking of the Metaphysics such as parts II and III of Nicholas of Damascus' *Philosophy of Aristotle* (at least judging from the extant portions of this latter work), nor in the commentaries on the Metaphysics by Alexander of Aphrodisias, Themistius, Syrianus and Ammonius/Asclepius. In Arabic philosophy the problem was determined by the "theologizing" interpretation of the *Metaphysics* offered by philosophers like al-Kindi, which derives proximately from the classifications of sciences of Late Antiquity and depends ultimately on Aristotle's perspective (iii) taken in isolation from the others. (*) Al-Farabi's reacted to al-Kindi's one-sided view of the *Metaphysics*: connecting himself with the commentatorial tradition of Alexander of Aphrodisias, Themistius and Ammonius/Asclepius, he had a broader view of the Metaphysics and in the *Fi Agrad* he clarified that Aristotle's work contains not only a theology, but also an ontology. (**) The background of the entire discussion is the relationship of *falsafa* and Islam: whereas al-Kindi emphasizes the theological part of the *Metaphysics* in order to assimilate Aristotelian metaphysics (and Greek metaphysics in general) and Islamic theology, al-Farabi stresses the distinction of metaphysics and philosophical theology and assigns a broader scope (and, implicitly, a higher rank) to the former with regard to the latter. Avicenna further develops al-Farabi's point of view, somehow incorporating in it al-Kindi's perspective, and presents the fullest and most articulated account of the relationship of ontology and theology within metaphysics in the history of Medieval philosophy.

Avicenna regards as very important to determine the subject-matter of metaphysics: he starts the *Ilahiyyat* addressing this issue and adding the "subject-matter" (*mawud*), as we will see in Chapter 5, to the preliminary questions traditionally discussed by Aristotelian commentators at the beginning of their exegesis of Aristotle's works. He appears to be the first in the history of philosophy to have devoted to this issue a separate and articulated treatment, and his contribution in the first two chapters of *Ilahiyyat* (I, 1-2) has rightly attracted the attention of scholars. (***) In Avicenna's powerful synthesis, Aristotle's different perspectives on the issue are

elucidated and harmonized. As we are going to see in the first part of the present chapter, the main elements of Avicenna's discourse are five. First, he starts with a notion of metaphysics that gathers points (iii) and (i), namely the idea that metaphysics deals with immaterial things and with the first causes and the absolute Prime Cause, i.e. God. Second, he adds point (ii) to point (i) by means of the distinction between the "subject-matter" of metaphysics and the "things searched" in it: according to Avicenna, "existent qua existent", rather than God or the first causes, is the subject-matter of metaphysics. God and the first causes are things searched in metaphysics, and can be taken into account by this discipline just because they are not its subject-matter, for the subject-matter of a discipline is something that is common to all the things searched by the discipline in question, without being itself one of them. Third, he brings to unity perspective (iii) and perspective (ii) by means of a peculiar notion of "existent", according to which this concept is immaterial in as much as it is not restricted to the sphere of material things. Conceived as immaterial, "existent" can be common to all the objects of research of metaphysics. Fourth, he reaches a synthesis between perspective (i) and perspective (ii) by stressing that the first causes and God are a part of "existent" and the principles of the "existent" that is caused. Fifth, he stresses that the first causes and God, despite not being the subject-matter of metaphysics, have nonetheless a fundamental function within this discipline: among the things searched by metaphysics, they are its "goal", namely the things whose knowledge is ultimately pursued." (pp. 113-114)

From: Amos Bertolacci, *The Reception of Aristotle's Metaphysics in Avicenna's Kitab al-Sifa'. A Milestone of Western Metaphysical Thought*. Leiden: Brill 2006.

"Martin Heidegger claims that the history of metaphysics is a history of the oblivion of being while propounding that his "fundamental ontology" presents a "genuine" account of the question of being that attempts to overcome metaphysics and its oblivion of being. Yet, it is perhaps doubtful that, for more than two thousand years (from Aristotle to Edmund Husserl), no philosopher was able to come up with a "genuine" approach to the question of being, and that no philosopher attempted to overcome the metaphysical history of the oblivion of being. This issue becomes more polemical and problematic, given that it is unlikely the case that in the global intellectual history of Chinese, Jewish, or Islamic philosophy, no philosopher or philosophical tradition has successfully attempted to overcome the history of the oblivion of being. In the case of Islamic philosophy, it is well documented that the Near Eastern Muslim world of the Middle ages has had an impact on the intellectual history of Western science and metaphysics. However, it is not yet well documented that the same Near Eastern Islamic philosophical tradition does indeed testify to the development of a phenomenological philosophical tradition that took the question of being to be the most central question of philosophical investigations. Considering the particular case of the physician, philosopher, and poet: Avicenna ([Ibn Sina] 980-1037), it is known that his influential *al-Qanun fi al-tib* (Book on medicine) was translated into Latin (*Liber Canonis*) and many other languages, and was in currency since the late Middle ages and early Renaissance in Europe. It is also known that Avicenna's philosophical works have had a strong impact on Thomism and on the works of Maimonides among others. Moreover, Avicenna's philosophical contributions constituted the milestones of a phenomenological mode of investigation in ontology that impacted subsequent philosophical developments in the Near East, up to the recent modem times, and some investigators have already depicted some of the phenomenological dimensions that characterize his views." (pp. XIII-XIV)

From: Nader El-Bizri, *The Phenomenological Quest between Avicenna and Heidegger*, Binghamton: Global Publications 2000.

Avicenna conception of metaphysics as the "science of being qua being"

"For Ibn Sina, metaphysics is basically the study of "being qua being", but he immediately adds that its most noble, although not its first object is God, the Necessary Being by virtue of itself. (3) All this implies that the existence of God is not self-evident, but has to be proven. In order to do so, Ibn Sina develops his theory of the essence/existence distinction. In God, His essence is His existence, while in all other Beings one has to sharply distinguish their existence from their essence. (4) In the latter case, he qualifies the existence as being not identical with, but "accidental" to essence. Ibn Rushd saw in it a simple affirmation of the pure accidentality of existence, and therefore vehemently criticized Ibn Sina on this point. (5) Till recent times, this latter interpretation remained the standard one in the West. F. Rahman seems to have been the first contemporary commentator to have seriously put into question such an understanding of Ibn Sina's affirmation. (6) However, it deserves to be stated that already Henry of Ghent, in the late thirteenth century, was aware of the fact that the restricted Aristotelian notion of "accidentality" was surely not involved here, but a larger one. (7)

Among the vast majority of the Latin scholastics who followed Ibn Rushd's line of interpretation, was Thomas Aquinas. However, he accepted as most valid Ibn Sina's distinction between essence and existence, (8) a fact already evident from the very title of his famous early work *De ente et essentia*. Thomas Aquinas uses Ibn Sina's theory in order to explain the composite nature of all creatures, especially the immaterial ones, i.e., the angels. He obviously rejects any kind of hylemorphic composition in them. Although he does not mention the Avicennian vocabulary of "necessary in virtue of itself', "necessary in virtue of another", and "possible", he clearly derived his view from Ibn Sina, and not from Aristotle, Boethius, or the *Liber de Causis* as he suggests. (9) But, on the other hand, Thomas wants to distance himself from what he considers to be Ibn Sina's "essentialism". For him, there is not only identity in God between essence and existence, but God is above all "*esse subsistens*", which clearly means that the priority is on the side of the existence. Thomas certainly believed that he thus was radically opposing Ibn Sina's view. Even if he misunderstood the accidentality of existence in the latter's thought, he was right in his opinion that Ibn Sina had not

fully appreciated existence as a part of the integral ontological dimension of Beings. (pp. 1-2)

I have already stressed that for Ibn Sina, metaphysics was essentially the study of being qua being, i.e., an ontology, but that its most noble object of investigation is God, in other words it also includes theodicy. One may add that for Ibn Sina metaphysics is moreover the science that has to demonstrate the principles of the other sciences, which means that it also deals with the "archaeology" of the sciences. Although Aristotle's metaphysics entails elements of all three of these views, it never linked them together within a substantial unity. Based on the important preparatory work of his predecessor al-Farabi, for the first time in the history of philosophy Ibn Sina had worked out a metaphysical "system" as "system". In this respect this latter rightly deserves to be qualified as a kind of onto-theology even if it does not completely match Heidegger's – inspired by Duns Scotus – conception. In view of all this, metaphysics is certainly the highest and most valuable of all sciences, a fact particularly underlined by Ibn Sina when he discusses, in his *Danesh-Nameh,* metaphysics immediately after the "instrumental" science of logic, but before "physics", and such contrary to the customary habit, a habit he himself respects in his Arabic encyclopaedias, of presenting it as the latest of all sciences. While it is commonly designated as "meta-physics", i.e., the science of what comes after physics, an appellation sometimes used by Ibn Sina as well, he does not hesitate to call it *Ilahiyyat*, i.e. "(science) of the Divine Things" as well, and indeed prefers to do so." (pp. 6-7)

Notes

(3) This is a common doctrine in his writings, clearly expressed in his major writing *al-Shifa*, *al-Ilahiyyat*, vol. I, eds. G.C. Anawati and S. Zayed, Cairo, OGIG, 1960, book I, chapters 1-2. This text is also available in a mediaeval Latin translation, see S. Van Riet (ed.), *Avicenna Latinus. Liber de philosophia prima sive scientia divina*, I–IV, Louvain, Peeters; Leiden, Brill, 1977, Tractatus primus, capitula 1-2.

(4)This idea is omnipresent in Ibn Sina's metaphysical works too. Again, I refer only to *al-Shifa*, *al-Ilahiyyat*, but now vol. II, eds. M.Y. Musa, S. Dunya and S. Zayed, Cairo, OGIG, 1960, book VIII, chapter

4; for the Latin translation, see S. Van Riet (ed.), Avicenna Latinus. *Liber de philosophia prima sive scientia divina* V-X, Louvain, Peeters; Leiden, Brill, 1980, Tractatus octavos, capitulum 4.

(5) See e.g., Ibn Rushd, *Tafsir ma ba'd al-Tabia*, ed. M. Bouyges, Beirut, 1938. Repr. Tehran, Int. Hikma, 1377 H.S., vol. I, commentary on book Gamma, C 3, p. 313; there exists a medieval Latin translation, see Averroes, *Opera omnia,* Venetiis, Junta, 1562, vol. VIII, f. 67 B.

The subject of metaphysics

"...it behooves us to commence making known the ides of metaphysics. (...)

The philosophical sciences, as has been pointed out elsewhere in [our] books, are divided into the theoretical and the practical. The difference between the two has [also] been indicated. It has been mentioned that the theoretical are those wherein we seek the perfecting of the theoretical faculty of the soul through the attainment of the intellect in act -- this by the attainment of conceptual and verifiable knowledge through things that are [the things] they are, without [reference to their] being our [own] actions and states. Thus, the aim in these [things] is to attain an opinion and belief which is not an opinion and belief pertaining to the manner of an action, or to the manner of a principle of an action inasmuch as it is a principle of action. And [it has also been stated] that practical [philosophy] is that wherein one first seeks the perfection of the theoretical faculty by attaining conceptual and verifiable knowledge involving things that are [the things] they are in being our own actions -- thereby attaining, secondly, the perfection of the practical faculty through morals.

It was stated that theoretical knowledge is confined to three divisions -- namely, the natural, the mathematical, and the divine.

[It was also stated] that the subject matter of the natural is bodies, with respect to their being in motion and at rest, and [that] its investigation pertains to the occurrences that happen to them essentially in this respect.

[It was also stated] that the subject matter of mathematics is either that which is quantity essentially abstracted from matter, or that which has quantity -- the thing investigated therein being states that occur to quantity inasmuch as it is quantity and where one includes in its definition neither a species of matter nor a motive power.

[Finally, it was stated] that the divine science investigates the things that are separable from matter in subsistence and definition.

You have also heard that the divine science is the one in which the first causes of natural and mathematical existence and what relates to them are investigated; and [so also is] the Cause of Causes and Principle of Principles -- namely, God, exalted be His greatness.

This much is what you would have come to know from the books that have previously come to you. But from this it would not have become

evident to you what the subject matter of metaphysics really is (except for a remark in the *Book of Demonstration*, if you remember it). This is because in the other sciences you would have something which is a subject; things that are searched after; and principles, [universally] admitted, from which demonstrations are constructed. But now you still have not truly ascertained what is the subject matter of this science -- whether it is the essence of the First Cause, so that what one seeks here is knowledge of His attributes and acts, or whether the subject matter is some other notion." pp. 2-3 (Book One, Chapter One).

"Hence, we must inescapably indicate the subject matter of this science so that the purpose that lies in this science becomes evident for us. (p. 7)

"Moreover, [the subject matter of metaphysics] cannot be specifically confined to any one category, nor can it be the attributes of any one thing except the existent inasmuch as it is an existent.

It is thus clear to you from this totality [of what has been said] that the existent inasmuch as it is an existent is something common to all these things and that it must be made the subject matter of this are for the reasons we have stated. And, moreover, because it is above the need either for its quiddity to be learned or for itself to be established so as to require another science to undertake to clarify [such] a state of affairs therein ([this] because of the impossibility of establishing the subject matter of a science and ascertaining its quiddity in the very science that has that subject), [it thus needs] only the admission of its existences and quiddity. The primary subject matter of this science is, hence, the existent inasmuch as it is an existent; and the things sought after in [this science] are those that accompany [the existent,] inasmuch as it is an existent, unconditionally." (pp. 9-10, Book One, Chapter Two).

From: Avicenna, *The Metaphysics of the Healing*. A Parallel English-Arabic Text Translated, Introduced and Annotated by Michael E. Marmura, Provo, Utah: Brigham Young University Press 2005.

The object of metaphysics

"What adheres necessarily to this science [therefore] is that it is necessarily divided into parts. Some of these will investigate the ultimate causes, for these are the causes of every caused existent with respect to its existence. [This science] will [also] investigate the First Cause, from which emanates every caused existent inasmuch as it is a caused existent, not only inasmuch as it is an existent in motion or [only inasmuch as it is] quantified. Some [of the parts of this science] will investigate the accidental occurrences to the existent, and some [will investigate] the principles of the particular sciences. And because the principles of each science that is more particular are things searched after in the higher science -- as, for example, the principles of medicine [found] in natural [science] and of surveying [found] in geometry -- it will so occur in this science that the principles of the particular sciences that investigate the states of the particular existents are clarified therein.

Thus, this science investigates the states of the existent -- and the things that belong to it that are akin [to being] divisions and species -- until it arrives at a specialization with which the subject of natural science begins, relinquishing to it this specialty; [and at a] specialization with which the subject matter of mathematics begins, relinquishing to it this specialty; and so on with the others. And [this science] investigates and determines the state of that which, prior to such specialization, is akin to a principle. Thus, [some of] the things sought after in this science are the causes of the existent inasmuch as it is a caused existent; some [of the things sought after] pertain to the accidental occurrences to the existent; and some [pertain] to the principles of the particular sciences.

This, then, is the science sought after in this art. It is first philosophy, because it is knowledge of the first thing in existence (namely, the First Cause) and the first thing in generality (namely, existence and unity).

It is also wisdom, which is the best knowledge of the best thing known. For, it is the best knowledge (that is, [knowledge that yields] certainty) of the best thing known (that is, God, exalted be He, and the causes after Him). It is also knowledge of the ultimate causes of the whole [of caused things]. Moreover, it is knowledge of God and has the definition of divine science, which consists of a knowledge of

the things that are separable from matter in definition and existence. For, as has become clear, the existent inasmuch as it is an existent, and its principles and the accidental occurrences [it undergoes] are all prior in existence to matter, and none of them is dependent for its existence on [matter's] existence." (pp. 11-12, Book One, Chapter Two).

Translations of the Philosophical Works by Ibn Sina (Avicenna)

Bibliographical Resources

For a list of Avicenna's philosophical works see:

- Amos Bertolacci. *The Reception of Aristotle's Metaphysics in Avicenna's Kitab al-Sifa'. A Milestone of Western Metaphysical Thought*, Leiden: Brill 2006, Appendix C: *Overview of the Main Works by Avicenna on Metaphysics in Chronological Order,* pp. 581-591.
- Dimitri Gutas. *Avicenna and the Aristotelian Tradition*, Second Edition, Brill: Leiden, 2014, Appendix: An *Inventory of Avicenna'a Authentic Works*, pp. 387-558.

I give a list of the translations in English, French, Italian, German and Spanish, in chronological order.

English Translations

1. Avicenna. 1951. *Avicenna on Theology*. Westport: Hyperion Press.

   Translated by Arthur J. Arberry.

2. ———. 1952. *Avicenna's Psychology*. London: Oxford University Press.

   An English translation of *Kitab al-Najat*, Book II, Chapter VI with historico-philosophical notes and textual improvements on the Cairo edition by Fazlur Rahman.

Reprinted: Westport, Hyperion Press, 1981.

3. ———. 1967. "Avicenna on the Divisions of the Rational Sciences." In *Medieval Political Philosophy: A Sourcebook*, edited by Lerner, Ralph, Mahdi, Muhsin and Fortin, Ernest L., 95-97. New York: Free Press of Glencoe.

   Partial translation.

   Reprinted: Ithaca Cornell University Press, 1972.

4. ———. 1967. "The Healing, Metaphysics. First Treatise, Chapter 6. Sixth Treatise, Chapter 1, Chapter 2." In *Philosophy in the Middle Ages. The Christian, Islamic and Jewish Tradition*, edited by Hyman, Arthur and Walsh, James, 240-254. New York: Harper & Row.

5. ———. 1969. "On the Soul." *Philosophical Forum* no. 1:555-562.

   "Translation by L E. Goodman of the opening pages of the psychological portion of Avicenna's Shifa. Avicenna argues for the substantiality of the soul on the grounds that the soul is in no way dependent on or existent in another thing. He defends this assertion with a thought experiment which provides a historical antecedent to the cogito of Descartes: imagining a spontaneously created soul to exist without senses in space. The conceivability of such a state, he argues, demonstrates the distinctness of the notion of soul from all others and the independence of the soul from all other entities on which its existence might be thought to depend."

6. ———. 1971. *Avicenna's Treatise on Logic. (a Concise Philosophical Encyclopaedia) and Autobiography*. The Hague: Nijhoff.

   Part One of *Danesh-name Alai.*

   Edited and translated from the original Persian by Farhaang Zabeeh.

7. ———. 1973. *The Metaphysica of Avicenna (Ibn Sina)*. London: Routledge & Kegan Paul.

   A critical translation-commentary and analysis of the fundamental arguments in Avicenn's *Metaphysica* in the

Danish Nam-i al'i (The *Book of scientific knowledge*).

Reprinted Binghamton, Global Publications, Binghamton University 2001.

8. ———. 1973. *The Propositional Logic of Avicenna. A Translation from Al-Shifa': Al Qiyas*. Dordrecht: Reidel Publishing Company.

   Translated by Nabil Shehaby with introduction (pp. 1-28), commentary (pp. 213-281) and glossary.

9. ———. 1974. *Avicenna's Commentary on the Poetics of Aristotle*. Leiden: Brill.

   A critical study with an annotated translation of the text by Ismail M. Dahiyat.

   Translation of *al-Shi'r*, which forms the 9th part of *al-Mantiq*, itself the 1st section of the author's *al-Shifa*.

10. ———. 1974. *The Life of Ibn Sina*. Albany: State University of New York Press.

    A critical edition and annotated translation, by William E. Gohlman.

    Arabic text and English translation of the author's autobiography, *Sirat al-Shaykh al-Ra'is*, which was completed by his disciple al-Juzajani.

11. ———. 1980. *Avicenna and the Visionary Recital*. Irving: Spring Publications.

    English translation by Willard R. Task.

    Part Two of the original edition, a translation of the Persian commentary on the "Recital of Hayy Ibn Yaqzan" has not been included.

12. ———. 1984. *Remarks and Admonitions. Part One: Logic*. Toronto: Pontifical Institute of Mediaeval Studies.

    Translated from the original Arabic with an introduction and notes by Shams Constantine Inati.

13. ———. 1996. *Ibn Sina and Mysticism. Remarks and Admonitions. Part Iv*. London: Kegan Paul International.

    An analysis and English translation of the fourth part *(Sufism)* of Avicenna's *Remarks and admonitions*.

14. ———. 1999. "Ibn Sina." In *An Anthology of Philosophy in Persia. Vol. I Vol. 1: From Zoroaster to 'Omar Khayyam.*, edited by Nasr, Seyyed Hossein and Aminrazavi, Mehdi, 247-322. New York: Oxford University Press.

    Part III. Early Islamic Philosophy : The Peripatetics: 12. Ibn Sina.

    1. Metaphysics (from *Danish-namah-yi 'ala'i*) 247; 2. Creation Ex-Nihilo and Immediate Creation (from *al-Isharat wa'l-tanbihat*) 269; 3. On Theodicy and Providence I (*from al-Shifa*') 277; 4. On Theodicy and Providence II (from *al-Isharat wa'l-tanbihati*) 289; 5. On Time (*from al-Shifa*') 292; 6. The Stations of the Knowers (from *al-Isharat wa'l-tanbihat*) 303; 7. Living Son of the Awake (from *Risalah Hayy ibn Yaqzan*) 312; 8. Introduction (from *Mantiq al-mashraqiyyin*) 321-322.

15. ———. 2005. *The Metaphysics of the Healing*. Provo, Utah: Brigham Young University Press.

    A parallel English-Arabic text translated, introduced, and annotated by Michael E. Marmura.

16. ———. 2010. *The Physics of the Healing*. Provo, Utah: Brigham Young University Press.

    A parallel English-Arabic text translated, introduced, and annotated by Jon McGinnis (two volumes).

French Translations

1. ———. 1892. *Le Livre Des Théorèmes Et Des Avertissements*. Leyden: Brill.

    First part. Arabic text edited and translated by J. Forget.

    Reprinted by Institut für Geschichte der Arabisch-Islamischen Wissenschaften an der Johann Wolfgang Goethe-Universität,

Frankfrurt am Main, 1999.

2. ———. 1933. *Introduction À Avicenne: Son Épître Des Définitions*. Paris: Desclée de Brouwer.

   Translated with notes by Amélie-Marie Goichon and with a preface by Miguel Asin Palacios.

3. ———. 1951. "Les Notes D'Avicenne Sur La 'Théologie D'Aristote'." *Revue Thomiste* no. 51:346-406.

   Translation by Georges Vajda.

4. ———. 1951. *Livre Des Directives Et Remarques*. Paris: Vrin.

   Translated with an introduction and notes by Amélie-Marie Goichon.

   Reprinted 1999.

5. ———. 1954. *Avicenne Et Le Récit Visionnaire*. Paris: A. Maisonneuve.

   By Henry Corbin.

   Vol. I: Étude sur le cycle des récits avicenniens. - Vol. II: Le Récit de Hayy Ibn Yaqzan, texte arabe, version et commentaire en persan attribués a Juzjany, traduction Français e, notes et gloses.

   English translation by Willard R. Task: *Avicenna and the visionary recital* - Irving, Spring Publications, 1980.

   "Part Two of the original edition, a translation of the Persian commentary on the "Recital of Hayy Ibn Yaqzan" has not been included."

6. ———. 1955. *Le Livre De Science. Tome I. Logique, Métaphysique*. Paris: Les Belles Lettres.

   Translated by Mohammad Achena and Henri Massé; second revised edition 1986.

   Reprinted by Institut für Geschichte der Arabisch-Islamischen Wissenschaften an der Johann Wolfgang Goethe-Universität, Frankfrurt am Main, 1999.

7. ———. 1958. *Le Livre De Science. Tome Ii. Physique, Mathématiques*. Paris: Les Belles Lettres.

   Translated by Mohammad Achena and Henri Massé; second revised edition 1986.

   Reprinted by Institut für Geschichte der Arabisch-Islamischen Wissenschaften an der Johann Wolfgang Goethe-Universität, Frankfrurt am Main, 1999.

8. ———. 1956. *Psychologie D'ibn Sina (Avicenne) D'après Son œuvre as-Sifa*. Praha: Éditions de l'Académie Tchécoslovaque des Sciences.

   Two volumes (vol. I: Arabic text; vol. II: French translation).

   Arabic text and French translation by Jan Bakos.

9. ———. 1963. *Le Livre Des Définitions*. Caire: Publications de l'Institut Français d'Archéologie Orientale du Caire.

   Edited and translated by Amélie-Marie Goichon.

10. ———. 1977. "Les Divisions Des Sciences Intellectuelles D'Avicenne." *Mélanges de l'Institut Dominicain d'Etudes Orientales (MIDEO)* no. 13:323-335.

    Translated by Georges C. Anawati.

11. ———. 1978. *La Métaphysique Du Shifa'. Livres I À V*. Paris: Librairire philosophique J. Vrin.

    Introduction, translation and notes by Georges C. Anawati.

12. ———. 1985. *La Métaphysique Du Shifa'. Livres Vi À X*. Paris: Librairire philosophique J. Vrin.

    Introduction, translation and notes by Georges C. Anawati.

13. ———. 1980. "Les Sciences Physiques Et Métaphysiques Selon La *Risâlah Fî Aqsâm Al-'Ulûm* D'Avicenne. Essai De Traduction Critique." *Bulletin de Philosophie Médiévale* no. 22:64-71.

    Partial translation by Jean R. Michot.

14. ———. 1983. "De La Joie Et Du Bonheur. Essai De Traduction Critique De La Section Ii, 8 Des *Isharat* D'Avicenne." *Bulletin de Philosophie Médiévale* no. 26:49-60.

    Translation by Yahya R. Michot.

17. ———. 1988. "L'eschatologie Dans Le "Livre De La Guidance" D'Avicenne. Présentation, Traductiuon Et Index De La Denièere Secition Du *Kitab Al-Hidâya*." *Bulletin de Philosophie Médiévale* no. 30:138-152.

    Translation by Yahya R. Michot.

18. ———. 1994. *Livre De La Genèse Et Du Retour*. Bruxelles.

    Translation by Yahya R. Michot.

19. ———. 1997. "La Réponse D'Avicenne À Bahmanyar Et Al-Kirmani. Présentation, Traduction Critique Et Lexique Arabe-Français De La *Mubahatha* Iii." *Le Muséon.Revue d'Études Orientales* no. 110:143-221.

    Translation by Yahya R. Michot.

20. ———. 2000. *Lettre Au Vizir Abu Sa'd. Editio Princeps D'aprés Le Manuscrit De Bursa*. Beyrouth: Éditions al-Bouraq.

    Translated with introduction and notes by Y. Michot.

Italian Translations

1. ———. 1969. *Epistola Sulla Vita Futura*. Padova: Antenore.

Arabic text, Italian translation, introduction and notes by Francesca Lucchetta.

2. ———. 1994. "Il Soggetto Della Scienza Prima. Ibn Sina, *as-Sifa'. Al-Ilahiyyat,* I.1-2." *Giornale di Metafisica* no. 16:69-82.

   Italian translation by Giuseppe Roccaro of *Al-ilahiyyat,* I.1-2.

3. ———. 1995. "La Metafisica Del *Libro Della Guida*. Presentazione E Traduzione Della Terza Parte (*Báb*) Del *Kitab-Al-Hidaya* Di Avicenna." *Le Muséon.Revue d'Études Orientales* no. 108:367-424.

   Presentation and translation by Olga Lizzini.

4. ———. 2002. *Metafisica. La Scienza Delle Cose Divine (Al-Ilahiyyat) Dal Libro Della Guarigione (Kitab Al-Sifà)*. Milano: Bompiani.

   Translated from Arabic, with introduction and notes by Olga Lizzini; with Arabic and Latin text.

   Revised reprint 2006.

5. ———. 2008. *Libro Della Guarigione. Le Cose Divine*. Torino: UTET.

   Italian translation by Amos Bertolacci of the *Ilahiyyat* of Avicenna's *Kitab-al-Sifa'*, with introduction, corrections to the Arabic text and notes.

German Translations

1. ———. 1875. "Die Psychologie Des Ibn Sina." *Zeitschrift der Deutschen Morgenlandische Gesellschaft* no. 29:339-372.

   German translation by Samuel Landauer of the *Compendium on the Soul.*

2. ———. 1907. *Die Metaphysik Avicennas. Enthaltend Die Metaphysik, Theologie, Kosmologie and Ethik*. Halle: Rudolf Haupt.

   Translated by Max Horten.

Reprinted by Institut für Geschichte der Arabisch-Islamischen Wissenschaften an der Johann Wolfgang Goethe-Universität, Frankfurt am Main, 1999 and by Kessinger Publishing Co., Whitefish, MT.

3. ———. 2006. *Cuestiones Divinas (Ilahiyyat). Textos Escogidos*. Madrid: Editorial Biblioteca Nueva.

   Texts selected, edited and translated by C. A. Segovia.

Spanish Translations

1. ———. 2006. *Cuestiones Divinas (Ilahiyyat). Textos Escogidos*. Madrid: Editorial Biblioteca Nueva.

   Texts selected, edited and translated by C. A. Segovia.

Modern Editions of Latin Translations

1. Avicenna. 1992. *Avicenna Latinus. Liber Primus Naturalium. Tractatus Primus. De Causis Et Principiis Naturalium*. Louvain: Peeters Publishers.

   Critical edition of the Latin medieval translation by Simone Van Riet.

   With a doctrinal introduction by Gérard Verbeke.

2. ———. 2007. *Avicenna Latinus. Liber Primus Naturalium. Tractatus Secundus. De Motu Et De Consimilibus*. Louvain: Peeters Publishers.

   Critical edition of the Latin medieval translation by Simone Van Riet.

3. ———. 1987. *Avicenna Latinus. Liber Tertius Naturalium De Generatione Et Corruptione*. Louvain: Peeters Publishers.

   Critical edition of the Latin medieval translation and lexicon by Simone Van Riet.

   With a doctrinal introduction by Gérard Verbeke.

4. ———. 1989. *Avicenna Latinus. Liber Quartus Naturalium De Actionibus Et Passionibus Qualitatum Primarum*. Louvain: Peeters Publishers.

Critical edition of the Latin medieval translation and lexicon by Simone Van Riet.

With a doctrinal introduction by Gérard Verbeke.

5. ———. 1972. *Avicenna Latinus. Liber De Anima, Seu Sextus De Naturalibus I-Iii*. Louvain: Peeters Publishers.

   Critical edition of the Latin medieval translation by Simone Van Riet.

   With an introduction on the psychological doctrine of Avicenna by Gérard Verbeke.

6. ———. 1968. *Avicenna Latinus. Liber De Anima, Seu Sextus De Naturalibus Iv-V*. Louvain: Peeters Publishers.

   Critical edition of the Latin medieval translation by Simone Van Riet.

   With an introduction on the psychological doctrine of Avicenna by Gérard Verbeke.

7. ———. 1977. *Avicenna Latinus. Liber De Philosophia Prima Sive Scientia Divina. I-Iv*. Louvain: Peeters Publishers.

   Critical edition of the Latin medieval translation by Simone Van Riet.

   With a doctrinal introduction by Gérard Verbeke.

8. ———. 1980. *Avicenna Latinus. Liber De Philosophia Prima Sive Scientia Divina. V-X*. Louvain: Peeters Publishers.

   Critical edition of the Latin medieval translation by Simone Van Riet.

   With a doctrinal introduction by Gérard Verbeke.

9. ———. 1983. *Avicenna Latinus. Liber De Philosophia Prima Sive Scientia Divina.Tractatus I-X. Lexiques*. Louvain: Peeters Publishers.

Annotated Bibliography on Avicenna's Logic and Metaphysics: First Part: A - K

For the studies on Avicenna the main bibliographical resources are:

- Janssens, Jules L. 1991. *An Annotated Bibliography on Ibn Sina (1970-1989). Including Arabic and Persian publications and Turkish and Russian References* . Leuven: Leuven University Press.
- ———. 1999. *An Annotated Bibliography on Ibn Sina. First Supplement (1990-1994)* . Louvain-La-Neuve: Fédération Internationale des Instituts d'Études médiévales.
- ———. 2017. *An Annotated Bibliography on Ibn Sina. Second Supplement (1995-2009)*. Temple (Arizona): ACMRS Publications.

Bibliography

1. *Le livre du Millenaire d'Avicenne*. 1956. Teheran: Imprimerie de l'Université de Téhéran.

   Vol. IV: "Conférences des membres du Congrés d'Avicenne prononcées en langue allemande.anglaise et Français e sur la biographie, l'époque, les opinions et les œuvres d'Avicenne (2-7 Ordibehechte 1333; 22-27 Avril 1954)"

2. Adamson, Peter. 2005. "On Knowledge of Particulars." *Proceedings of the Aristotelian Society* no. 105:273-294.

"Avicenna's notorious claim that God knows particulars only 'in a universal way' is argued to have its roots in Aristotelian epistemology, and especially in the *Posterior Analytics*. According to Avicenna and Aristotle as understood by Avicenna, there is in fact no such thing as 'knowledge' of particulars, at least not as such. Rather, a particular can only be known by subsuming it under a universal. Thus Avicenna turns out to be committed to a much more surprising epistemological thesis: even humans know particulars only in a universal way."

3. ———, ed. 2013. *Interpreting Avicenna. Critical Essays*. Cambridge: Cambridge University Press.

4. Afnan, Soleil M. 1958. *Avicenna. His Life and Works*. London: George Allen & Unwin.

   Reprinted Westport, Greenwood Press, 1980.

5. Ahmed, Asad Q. 2003. "Avicenna's treatment of Aristotelian modals. A study based on conversion rules and the *Barbara* problematic." In *Before and after Avicenna. Proceedings of the First Conference of the Avicenna Study Group*, edited by Reisman, David C. and Al-Rahim, Ahmed H., 3-24. Leiden: Brill.

6. Al-Ahwani, Ahmad Fuad. 1963. "Being and substance in Islamic philosophy. Ibn Sina versus Ibn Rushd." In *Die Metaphysik im Mittelalter*, edited by Wilpert, Paul, 428-436. Berlin: Walter de Gruyter.

7. Alonso, Alonso Manuel. 1957. "'Al-qiwam' y 'al anniyya' en las traducciones de Gundisalvo." *Al-Andalus* no. 22:377-405.

   "En muchas de las obras traducidas se encontró Gundisalvo con la palabra *al-qiwam*. Vamos a recorrerlas transcribiendo los pasajes más representativos para darnos a entender su significado. (p. 381)

   (...)

   Después de haber señalado así la mayoría de los pasajes en que Gundisalvo, tanto en las traducciones como en sus propias obras emplea la palabra 'existentia' para traducir *al-qiwam,* y despues de haber visto que Gundisalvo quiere asi significar et

'esse' o 'quo est' como contradistinto de 'quod est', debemos preguntarnos ¿qué es lo que et propio Avicena entiende por *al-qiwam*? Desde luego tratamos del sentido correspondiente inmediato entre el concepto y la cosa significada, no de un sentido implicito o de un sentido consecuente al modo como al decir 'casa' significamos 'el techo' y significamos 'las paredes', y al designar et 'individuo' designamos su 'esencia especifica'.

Primeramente observemos que hoy por *al-qiwam* todo el mundo entiende la 'subsistentia' (traducción que tambien Gundisalvo aceptó, como hemos visto). Por esto dice A.-M. Goichon: «599. -'Qiwâm', *subsistence*, sens donné par Lane art. *qiwam* et *rukn*, mais qui n'est presque jamais rendu exactement par les traductions, pourtant des plus diverses». No podían traducir al-qiwam por 'subsistentia', porque el latin corriente de entonces carecía de esa palabra. No se encontrará vocabulario del rabe ni arabista entendido que haya visto en Avicena el uso de *al-qiwam* en el sentido de 'existencia' contrapuesta a la 'esencia' corno *principia quibus* de las cosas, ni Gundisalvo lo vió, ya que la 'existencia' para él no significa lo que en tiempos posteriores a los suyos vino a significar. Contra los que quieren ver en el *al-qiwam* de Avicena o en la `existentia' de Gundisalvo ese significado de tiempos posteriores, ya es bastante decir que nadie, conocedor del árabe, haya encontrado tal significado en dicho *al-qiwam* aviceniano.

En segundo lugar, la existencia en ese sentido posterior a los tiempos de Gundisalvo es algo simple en sí el acto último que entra en la composición de las cosas. Es, como veremos, algo del orden de la *al-anniyya* de Avicena. En cambio, el *al-qiwam* aviceniano es algo compuesto de 'acto' y `potencia', mas o menos simples (cada uno de por sí), o bien mas o menos determinados. (pp. 392-393).

(...)

Que ese 'acto' y esa 'potencia' pueden recibir (según la dottrina de Avicena) determinaciones, hasta convertirse en lo que Santo Tomas llamó 'materia' y `forma', es manifiesto por et mismo pasaje a que aludimos, ya que a continuación prueba Avicena

que ese acro de *al qiwam* es en las plantas *y* animales ' et alma` *y* esa potencia del mismo *al-qiwam* es 'el cuerpo' . De aquí que ese *al-qiwam* sea ciertamente la 'constitucion' de la cosa, o sea su esencia específica, su *mahiyya,* como por otro nombre lo nombra el mismo Avicena, según luego vamos a ver. He ahí por que Gundisalvo, en la traduction de la *Isagoge* de Avicena equiparo el 'esse' (o 'quo est') de Boecio a la *rnahiyya* aviceniana, y la traduce cerca de cien veces por 'esse', y este 'esse', según el, se define: «Esse est existentia formae in materia». Esta existencia, pues, es la esencia específica o simplemente 'la esencia', dicha en abstracto, solo que latinistas posteriores a Gundisalvo cambiaron los conceptos que implicaban esas palabras.

De aquí que tengamos en Avicena pasajes que contradistinguen entre sí *al-qiwam y '* existencia' (*al-wuyud*) en cuanto se suele contraponer a 'la esencia'. (p. 394).

(...)

En otro artículo seguiremosn: con el estudio de *al anniyya* en las obras de Avicena. El hecho de que una palabra se apoderó del significado de la otra, al par que et confusionismo que de eso se siguió y aun vemos seguir, relacionó de un modo inconveniente los terminos *al-qiwam y al-anniyya* y sus mismos conceptos. Pero quizá con lo dicho y con lo que diremos después encontremos alguna mayor claridad en ese boscaje de traducciones e interpretaciones." (p. 405).

    "In Islamic philosophy, in particular, with Ibn Sina (Avicenna), there appears, in quite explicit form, a view of predication at odds with many current interpretations of Aristotle and views of predication. That view is that the simple affirmative categorical proposition 'S is p' is to be read as 'S is (existent) as a p', and that for its truth it is required both that S be existent and that S be p. This paper sketches out the development of that view. It then shows how this view resolves such vexing problems in interpreting Aristotle's logic and ontology as the existential import assumption and his view of First philosophy."

28. Banchetti-Robino, Marina Paola. 2004. "Ibn Sina and Husserl on intention and intentionality." *Philosophy East and West*.

    "The concepts of intention and intentionality were particularly significant notions within the Christian, Jewish, and Islamic medieval philosophical traditions, and they regained philosophical importance in the twentieth century. The theories of intention and intentionality of the medieval Islamic philosopher and physician Ibn Sina and the phenomenological philosopher and mathematician Edmund Husserl are examined, compared, and contrasted here, showing that Ibn Sina's conception of intention is naturalistic and, in its naturalism, is influenced by the medical professional culture to which Ibn Sina belonged. As well, Husserl's anti-naturalistic conception of intentionality is influenced by his background as a mathematician and by his desire to ground mathematics and the empirical sciences in a truly scientific philosophy. In conclusion, an argument is presented for the superiority of the Husserlian transcendentalist account of intentionality over the Avicennian naturalistic account, on the grounds that the latter falls prey to psychologism and reductionism, the two specters that according to Husserl must haunt all naturalistic accounts of consciousness."

31. ———. 2001. "From Al-Kindi to Al-Farabi. Avicenna's progressive knowledge of Aristotle's Metaphysics according to his autobiography." *Arabic Sciences and Philosophy* no. 11:257-295.

"The autobiography witnesses a significant evolution in Avicenna's approach to Aristotle's Metaphysics during the years of his education. It clearly shows that, at a certain point of his philosophical training, Avicenna faced the entire text of the Metaphysics, was puzzled by its extent and complexity, and found in a treatise by al-Farabi a guide for its understanding. But, albeit less perspicuously, the autobiography also suggests that this was not Avicenna's first encounter with the Metaphysics. Avicenna dealt with Aristotle's work in a previous stage of his studies as well. Then, however, he did not read the Metaphysics in its entirety, but, rather, focused only on its essential parts and some commentaries thereupon. The parts of the Metaphysics that Avicenna read in this earlier stage were books Alpha Elatton and Lambda, as constituting the natural theology of Aristotle's work. He neglected, on the contrary, the books corresponding to its ontological part. The special attention to Alpha Elatton and Lambda and the close connection between these two books in a theological context were peculiar traits of al-Kindi's approach to Aristotle's Metaphysics. Therefore, the evolving approach to Aristotle's Metaphysics that Avicenna's autobiography witnesses can properly be described as a passage from the Kindian to the Farabian way of interpretation."

41. ———. 2006. *The Reception of Aristotle's Metaphysics in Avicenna's Kitab al-Sifa'. A Milestone of Western Metaphysical Thought*. Leiden: Brill.

    Contents: Introduction VII; Abbreviations XV;

    Part One. The Arabic reception of the *Metaphysics* before Avicenna.

    Introduction 3; 1. The Arabic translations of the *Metaphysics*: a new assessment on account of the evidence provided by Avicenna 5; 2. Beyond al-Kindi and al-Farabi: Avicenna's position in the history of the Arab reception of the *Metaphysics* 37; 3. Between Ammonius and Avicenna: al-Farabi's treatise *On the Goals of Aristotle's* Metaphysics 65;

Part Two. The scientific profile of the *Metaphysics* according to Avicenna.

Introduction 107; 4. Avicenna' conception of the theme of the *Metaphysics*: "existent *qua* existent" as the subject-matter, the first causes and God as the goal of metaphysics 111; 5. Avicenna's reworking of the structure of the *Metaphysics*: metaphysics as the discipline dealing with the species, the properties and the principles of "existent" 149; 6. Avicenna's elaboration of the method of the *Metaphysics*: metaphysics as a demonstrative, analytical, non-dialectical science 213; 7. Avicenna's view of the relationship of the *Metaphysics* with the other parts of the Aristotelian *corpus*: metaphysics as the founding discipline 265;

Part Three. The content of the *Metaphysics* according to Avicenna.

Introduction 305; 8. The quotations of the *Metaphysics* in the *Ilahiyyat* 309; 9. The main source of Avicenna's conception of metaphysics as a science: book *Gamma* and its quotations 375; 10. Avicenna's attitude towards dialectic: book *Beta* and its quotations 403; 11. The other sources of the *Ilahiyyat* 441; Conclusion 471;

Appendices.

Appendix A: Towards a critical edition of the *Ilahiyyat*: list of corrections of the Cairo printed text 483; Appendix B: Index of authors and works quoted in the *Ilahiyyat* 559; Appendix C: Overview of the main works by Avicenna on metaphysics in chronological order 581; Appendix D: Names for Aristotle's *Metaphysics* and metaphysics as a discipline in Avicenna's works 593; Appendix E: The style of the *Kitab al-Sifa'* 607; Appendix F: The terminology for "property" in the *Ilahiyyat* 613;

Bibliography 617; Index of names and places 655; Index of Aristotle's works with passages cited 665; Index of Avicenna's works with passages cited 666; Index of manuscripts 669; Index of texts, outlines, tables 670-675.

    "In this article I examine how Aquinas employs the Avicennian notion of the mental or conceptual existence of the common nature. I first show how the characteristic features of Avicenna's cognitive psychology, in particular its occasionalist and emanationist framework, bear upon his understanding of mental existence. I then examine Aquinas's adoption of the notion of mental existence with special reference to his doctrine of the intelligible species, which are totally absent from Avicenna's cognitive psychology. I conclude that Aquinas dilutes the original Avicennian conception of mental existence in virtue of his making the intelligible species, rather than the common nature itself, the subject of mental existence."

    "Avicenna has been interpreted as having held the real distinction between 'esse' and 'essence'; Averroes as having criticized him on this point: "Avicenna made a big mistake here." A closer reading, however, will, I believe, reveal that Avicenna was talking about two intelligible notes, 'intentiones' or 'dispositiones', in the comprehension of a concept, whereas Averroes was pushing two different modes of understanding that same content. St. Thomas thought that Averroes "was closer to the truth." No Arabic scholar today would, so far as I can make out, read that real distinction into this context. Avicenna has also been accused of holding an independent order of possibles, just as Averroes was accused of holding a double truth theory. Both charges were libels."

61. D'Ancona Costa, Cristina. 2000. "Avicenna and the *Liber de Causis*: a contribution to dossier." *Revista Espanola de Filosofia Medieval* no. 7:95-115.

    "Taking as a starting point the knowledge that the Arab world had of the neo-Platonic texts ascribed to Aristotle, such as the *Pseudo-Theology* and the *Liber de Causis*, the author of this study investigates the possible knowledge that Avicenna had of this under book, well-known in the Arab world under the title of *Kalamfi mahd al-hayr*. In order to demonstrate this, she provides an analysis of four passages that belong to the *Metaphysics* of the great philosophical encyclopaedia *Al-Sifa'* ("The cure").""

62. Davidson, Herbert Alan. 1979. "Avicenna's Proof of the Existence of a Being Necessarily Existent by Virtue of Itself." In *Islamic Philosophical Theology*, edited by Morewedge, Parviz, 165-187. Albany: State University of New York Press.

Reprinted in: H. A. Davidson, *Proofs for Eternity, Creation and the Existence of God in Medieval Islamic and Jewish Philosophy,* New York: Oxford University Press, 1987 pp. 281-310.

"The first philosopher known to use the concept of necessary existence in order to construct a proof of the existence of God was Avicenna. Avicenna's proof, it will appear, neither is, nor inevitably reduces itself to, an ontological proof. It is rather a certain kind of cosmological proof.

The concept of necessary existence is used by Avicenna to prove the existence of God in two works, at length in the Najat, briefly and somewhat obscurely in the Isharat. The concept is also discussed fully in two other works, the Shifa and Danesh Namesh, but there Avicenna employs it only to define the nature of God, not, as far as I can see, to establish His existence."

95. ———. 2000. "Avicenna's Eastern ("Oriental") philosophy. Nature, contents, transmission." *Arabic Sciences and Philosophy* no. 10:159-180.

    "An initial section traces the history of the development of these tendentious ideas first to Ibn Tufayl and then to the followers of his interpretation in the West in the nineteenth and twentieth centuries.

    Further sections discuss the title of the book, list its contents insofar as they can be reconstructed from Avicenna's statements and the extant portions, and provide additional information about its manuscripts and transmission. The style of the work is then analyzed and compared with that of the *Sifa*' in order to verify Avicenna's claim in the preface to the latter work that the difference between the two was merely stylistic. A final section gives a table of concordance between the contents of the extant part on physics and the corresponding sections in the *Sifa',* establishing the direct relationship and verbal congruity between the two works."

"In this paper I examine (I) Avicenna's view that existence is an accident, (IIi) the status of the problem of the real distinction between essence and existence, and (III) the nature of Avicenna's essentialism. I conclude that Avicenna anticipated Frege and Russell in holding that existence is an accident of accidents. I also defend the view that Avicenna held that there is a real distinction between essence and existence. Finally, I hold that Avicenna's essentialism anticipates Meinong's view about nonexistent objects."

111. ———. 1999. "Let them suffer into the truth: Avicenna's remedy for those denying the axioms of thought." *American Catholic Philosophical Quarterly* no. 73:107-133.

    "For those who are intransigent enough to deny even the principle of noncontradiction, Avicenna advises putting them to the fire or beating them, until they admit that pain is different from nonpain. This treatment may seem too severe, but illustrates theory and practice in his philosophy, and when viewed in that light even becomes reasonable. The paper has four parts: (1) how certain events in Avicenna's autobiography illustrate the interplay of philosophy, religion, and politics in his mind, (2) Avicenna's treatment of the principles of metaphysics in "Shifa', Met." 1, (3) Avicenna's reading of Aristotle on noncontradiction, (4) Avicenna's own treatment of noncontradiction in " *Shifa'. Met.*" 1.8."

"Aborder les thèmes de l'être et de la création chez Avicenne c'est, en principe, risquer une recherche immense à travers les concepts qui structurent trois dès domaines où les spéculations du grand philosophe sont les plus remarquables et aussi les plus difficiles: l'ontologie et la cosmologie, avec leur jointure. Les prendre tels qu'ils s'offrent dans le travail des traducteurs tolédans du 12e siècle, c'est tenter d'en saisir le fil tel qu'il pouvait apparaître à travers un ensemble lexical différent de celui de leur origine, constitué dans une langue d'un type différent et, *a priori,* moins riche; et d'autant moins que le fonds spécial dont disposaient ces traducteurs, leur vocabulaire technique, s'était constitué à partir de textes qui avaient assez peu à voir avec ceux que pratiquait Avicenne: c'étaient ceux de la philosophie latine, des Pères et de Boèce, quelque peu de Platon et de la logique d'Aristote, transposés en latin. D' autant plus remarquable, notons-le, est que les premiers lecteurs de ce corpus avicennien devenu accessible aient su en faire l'usage que l'on sait. On voudrait ici proposer seulement quelques remarques sur une partie du lexique ainsi constitué, en noter quelques correspondances plus ou moins réussies avec celui d'Avicenne, y accrocher quelques observations. Nous disposons pour cela d'un instrument de travail inestimable: les trois tomes de la *Philosophia prima* publiés par la regrettée Simone Van Riet et dont le troisième offre un double lexique: arabe-latin et latin-arabe, où est donc recueillie toute la matière de notre examen (1)." p. 35

(1) Avicenna Latinus. *Liber de philosophia prima sive scientia divina,* I-X. *Lexiques,* par S. Van Riet, Louvain-la-Neuve, E. Peeters - Leiden, E. J. Brill, 1983. Le texte latin se trouve dans les deux autres tomes (1977 et 1980), sous une numérotation des pages continue de l'un à l'autre (I, de 1 à 219 ; II, de 227 à 553). Le texte arabe est ici celui d'Ibn Sinâ, *Al-Šifa. Ilahiyyât,* 2 vol., Le Caire, Organisation générale des impressions gouvernementales, 1380/1960.

    "Following al-Farabi's approach, Ibn Sina undertakes a new foundation of the First Philosophy based on his own critical systematisation of the Aristotelian theory of science, yielding the result that metaphysics is only possible as a transcendental science, i.e. that not only the subject-matter of metaphysics and its properties but also the arguments by which the first principles of knowledge are defended must be transcendental."

Annotated Bibliography on Avicenna's Logic and Metaphysics: L - Z

Bibliography

1. Lagerlund, Henrik. 2009. "Avicenna and Tusi on Modal Logic." *History and Philosophy of Logic* no. 30:227-239.

   "In this article, the author studies some central concepts in Avicenna's and Tusi's modal logics as presented in Avicenna's *Al-Isharat* (*Pointers and Reminders*) and in Tusi's commentary. In this work, Avicenna introduces some remarkable distinctions in order to interpret Aristotle's modal syllogistic in the *Prior Analytics*. The author outlines a new interpretation of absolute sentences as temporally indefinite sentences and argues on the basis of this that Avicenna seems to subscribe to the Principle of Plenitude. He also shows that he has no valid proof of the modal conversion rules and that he uses some rather ad hoc distinctions to show that Aristotle's modal syllogistic is correct. The author also notes some interesting differences between Avicenna's and Tusi's approaches to modal logic."

20. ———. 2004. *Probing in Islamic Philosophy. Studies in the Philosophies of Ibn Sina, al Ghazali and Other Major Muslims Thinkers*. Binghamton: Global Academic Publishing.

    "Part I is devoted to Ibn Sina (Avicenna), noted for his refining the distinction between essence and existence, which constitutes the basis for his proof of God's existence and for his significant theory of the universals. The second part is devotes to Avicenna's theologian critic, Ghazali, noted for his argument that a necessary causal connection between natural events can be proved neither logically nor empirically. The third part pertains to various central themes in Islamic philosophy and includes discussions of the thought of such philosophers as Kindi, Razi, Ibn Tufayl, and Ibn Rushd (Averroes). It concludes with a discussion of on the issues that divided the Islamic theologians, namely whether the value of the moral act is intrinsic to it or whether it is solely derived from the religious law."

Contents:

I. Avicennan studies

Preface VII; Avicenna's *Division of the Sciences* in the *Isagoge* of his *Shifa* 1; Avicenna's metaphysics (from Encyclopedia Iranica) 15; Avicenna's *Chapter on Universals* in the *Isagoge* of his *Shifa'* 31; Quiddity and universality in Avicenna 57; Some aspects of Avicenna's theory of God's knowledge of particulars 67; Avicenna and the Kalam 91; Avicenna's proof from contingency for God's existence in the *Metaphysics* of the *Shifa'* 123; Avicenna on primary concepts in the *Metaphysics* of his *Shifa'* 141; Avicenna and the problem of infinite number of souls 161; Avicenna's "Flying man" in context 169; Avicenna's theory of prophecy in the light of Ash'arite theology 185;

II. Ghazalian Studies

The logical role of the argument from time in the *Tahafut's* second proof for the world's pre-eternity 207; Ghazali and demonstrative science 217; Ghazali on ethical premises 247; Al-Ghazali on bodily resurrection and causality in the *Tahafut* and *Iqtis'ad* 253; Ghazali's Chapter on Divine power in the *Iqtis'ad* 279;

III. Other Studies

(With John Rist), Al-Kindi's discussion of divine existence and oneness 315; The fortuna of the *Posterior Analytics* in the Arabic Middle Ages 331; Divine Omniscience and future contingents in Alfarabi and Avicenna 349; The Islamic philosophers' conception of Islam 363; The philosopher and society: some medieval Arabic discussions 381; A medieval Islamic argument for the intrinsic value of the moral act 395.

23. McGinnis, Jon. 1999. "Ibn Sina on the Now (A new translation with commentary of a section of Avicenna's *Physics*)." *American Catholic Philosophical Quarterly* no. 73:73-106.

    "Ibn Sina's *Treatise on the Now* is philosophically deep analysis of Aristotle's temporal theory.

    The text is translated and discussed, with particular attention to both its un-Aristotelian and uniquely Avicennian aspects. Among the former is his conception of time as the flow of the now, a view found among Aristotle's later commentators, but absent from Aristotle himself. Ibn Sina's originality emerges most vividly in his solution to Aristotle's paradox against a "flowing" or changing now ("Physics" iv 10, 218a8-21). Ibn Sina's answer conceives of the now analogously to our contemporary mathematical notion of a limit."

25. ———. 2006. "A penetrating question in the history of ideas: space, dimensionality and impenetrability in the thought of Avicenna." *Arabic Sciences and Philosophy* no. 16:47-69.

    "Avicenna's discussion of space is found in his comments on Aristotle's account of place. Aristotle identified four candidates for place: a body's matter, form, the occupied space, or the limits of the containing body, and opted for the last. Neoplatonic commentators argued *contra* Aristotle that a thing's place is the space it occupied. Space for these Neoplatonists is something ossessing dimensions and distinct from any body that occupies it, even if never devoid of body. Avicenna argues that this Neoplatonic notion of space is untenable on the basis of three arguments. In general he maintains that bodies' impenetrability is explained by reverence to dimensionality. Avicenna argues that the method used to arrive at the possibility of space is illicit, and so Neoplatonist cannot show that space is even possible. Thus,

concludes Avicenna, Aristotle's initial account must be correct. The paper outlines the historical context of this debate and then treats Avicenna's arguments against space in detail."

26. ———. 2010. *Avicenna*. New York: Oxford University Press.

"Nearly three hundred works have been attributed to Avicenna. Moreover, even if one limits oneself to Avicenna's philosophical encyclopedias, he wrote no less than three (extant) s *ummas,* whose content, organization, and presentation can at times differ significantly. Additionally, recent scholarship has begun making a case that Avicenna's thought underwent an evolution, and so the problems of dating leis works (even the encyclopedias) and determining what are his "mature" views arise. In order partly to address this last issue, I decided to focus primarily on Avicenna's philosophical system as it appears in his most extensive and well-known encyclopedic work, the *Cure (ash-Shifa),* albeit in places drawing significantly on his other extant encyclopedias-particularly the *Salvation (an-Najat),* and to a lesser extent *Pointers and Reminders (al-Isharat wa-t-tanbihat)* as well as his *Canon of Medicine (Qanun fit-tibb).* Unfortunately, this meant that I gave rather short shrift to Avicenna's shorter specialized treatises as well as his *Discussions (Mubahathat)* and *Glosses (Ta'liqat),* even though I recognize that these works frequently have a more fully developed presentation of certain technical and tricky points. Also because of this self-imposed limit, I have thought it prudent not to take up the issue of intellectual development, not because I deny that it occurred or that it is not important, but because in the end I think that presenting a roughly unified Avicennan system of thought as it is appears predominantly in the *Cure* will be more useful for those readers who are interested primarily in getting some initial sense of Avicenna's overall philosophy as well as providing a starting point for scholars who want to explore systematic developments in his thought.

Even limiting myself to the *Cure,* however, presented problems, for what one quickly discovers is that Avicenna is indeed a systematic thinker, weaving and interlacing a few very basic concepts, ideas, and arguments throughout a legion of diverse

philosophical topics and problems. Consequently, in order to appreciate some move he makes, for example, in metaphysics, one must first understand the problem that he is addressing, which might have arisen initially in physics or medicine. Similarly, the value of some Avicennan notion, which might seem peculiar or even gratuitous-such as his doctrine of the Giver of Forms, which is virtually unique to his system-can be fully grasped only by seeing how it provides him with a single solution to a score of seemingly diverse philosophical problems that in fact Avicenna reveals to have a common ailment and so require a common cure. Moreover, often one cannot properly appraise Avicenna's philosophical contribution without first understanding the historical context and problematic to which he is responding. In short, what I had hoped to be a relatively concise presentation of Avicenna's philosophical system quickly grew into a somewhat lengthy tome as I tried to provide the necessary pieces needed to get some sense of the beautiful and, were it possible, almost seamless mosaic that is his system. I can only hope that the present work does justice to the systematic nature of Avicenna's unique philosophical mind." (From the Preface, XI-XII)

28. Mondin, Battista. 1999. "La metafisica di Avicenna." *Sapienza* no. 52:257-279.

    "Avicenna is not only the greatest metaphysicians of Arabic philosophy, but through his excellent paraphrasis of Aristotle's "Metaphysics", he contributed to the knowledge of metaphysics among the Christian scholastics; and his influence on William of Auvergne, Albert the Great, St. Thomas Aquinas and Duns Scotus was quite strong. The present article analyzes the object and properties of metaphysics according to Avicenna; then it explains the structure of metaphysics, the four causes, the real distinction between essence and existence, and between the necessary and the possible, the proof of God's existence the attributes of God and the meaning of divine names, the origin of the world through emanation, divine providence and the

problem of evil. The study is mainly based on the *Kitab al-Shifa*."

31. ———. 2001. *The Mystical Philosophy of Avicenna*. Binghamton: Global Publications, Binghamton University.

    Contents: A introduction to Ibsn Sins's ontology 1; 1. Philosophical analysis and Ibn sina's essence-existence distinction 33; 2. The logic of Emanationism and Sufism in the philosophy of Ibn Sina (Avicenna) 57; 3. A third version of the ontological argument int eh Ibn Sinian *Metaphysics* 117; 4. The analysis of "Substance" un Tusi's *Logic* and in the Ibn Sinian tradition 165; 5. two senses of mysticism in the Neoplatonic and Sufic tradition 207-239.

    "Summary: The enclosed collection of essays focuses on the ontology of the most important medieval Muslim philosopher, ibn Sina (980-1037), proffering the theses that: (a) his ontology is incompatible with monotheistic theologies; (b) his cosmogony is not derivable from either Aristotelian or Neoplatonic systems; and finally (c) the mystical dimension of his system is in accord with monistic "nature mysticism," as classified by R. C. Zaehner*. In contrast to the views of majority of contemporary scholars that ibn Sina's philosophy essentially follows monotheistic or Greek philosophical systems, this collection emphasizes his original contributions to ontology and meta-mysticism."

32. Nasr, Seyyed Hossein. 1989. "Existence ('wujud') and Quiddity ('mahiyyah') in Islamic philosophy." *International Philosophical Quarterly* no. 29:409-428.

"This paper deals with the meaning of "wujud" and "mahiyyah" in various schools of Islamic thought. It begins by turning attention to the significance of this subject for Islamic philosophy as well as theology and even certain schools of sufism. It traces the history of the subject from Al-Farabi and Ibn Sina to Suhrawardi, Fakhr al-din Al-Razi and later Islamic philosophers such as Mir Damad and Mulla Sadra. The essay then deals with the basic distinctions made by Ibn Sina between necessity, contingency and impossibility which forms the basis of the ontology of Islamic philosophers."

43. ———. 2002. "A New Standard for Avicenna Studies." *Journal of the American Oriental Society* no. 122:562-577.

    This is a review article of: *Ibn Sina, lettre au vizir Abu Sa'd: Editio princeps d'après le manuscrit de Bursa,* traduction de l'arabe, introduction, notes et lexique, by Yahya Michot. Sagesses musulmanes 4. Beirut: Éditions al-Boraq. 2000.

    "Yahya Michot's recent contribution marks an important advance in the study of Avicenna's life and thought, not only because it offers a critical edition, translation, and commentary of a relatively unknown letter by Avicenna (the *Letter to the Vizier*), but also because it emphasizes the importance of historiographical and philological methods. However, many of Michot's conclusions concerning the historical context of a number of Avicenna's works, as well as his decision to publish preliminary editions and translations of these works, are open to serious criticism. Many of these historical questions are addressed here, along with manuscript and recension studies of Avicenna's *usul ilm wa-hikma* and *al-Ahd*."

44. ———. 2009. "Avicenna's Enthymeme: A Pointer." *Arabica* no. 56:529-542.

    "In reaction to earlier scholarship on the role of Aristotelian political theory among medieval Arabic-writing intellectuals, this paper argues that another approach of those intellectuals

might more profitably be followed: that of the role of rhetorical speech. That political speech is investigated in Aristotle's Rhetoric makes it a suitable candidate for such a pursuit. However, what the present investigation concludes is that even this aspect of political theory by way of the Rhetoric also was not perceived to warrant investigation among medieval Arabic-writing intellectuals. In a review of all constituents of Greek political theory as it is now understood, this paper finds that there was one aspect of rhetorical speech that captivated the attention of these writers: the use of the enthymeme in speech patterns. Drawing on the writings of Avicenna, the author concludes that, instead of the application of the enthymemic construction of political rhetoric, Avicenna perceived yet another arena for its applicability: the training of philosophy students."

47. ———. 1963. *Studies in the History of Arabic Logic*. Pittsburgh: Pittsburgh University Press.

    "In the ten essays brought together in this volume, the author discusses different aspects and problems related to the intellectual history of Islam and centered around logical and philosophical issues. the guiding line is that Arabic logic is entirely western and has nothing to do with "oriental philosophy." Six of the essays have appeared in different journals. The first essay, written especially for this volume, gives a brief account of the history of Arabic logic. The other essays deal with particular texts and problems related to the writings of such thinkers as Al-FArabi, Al-Kindi, Avicenna, Abu 'l-Salt of Denia, Averroes. The book contains extensive bibliographical references, documentary and critical notes."

48. ———. 1964. *The Development of Arabic Logic*.

"The book begins with a chapter on the "First century" of Arabic logic which is understood to be a period of transmission, translation and assimilation of mainly Alexandrian Aristotelianism.

The author relates how toward the end of the development of Arabic logic the initial relationship which logic bore to medicine, mathematics and astronomy was replaced by a new kinship with the Islamic "sciences" of theology, law, philology and rhetoric."

52. Rizvi, Sajjad. 2000. "Roots of an aporia in later Islamic philosophy. The existence-essence distinction in the metaphysics of Avicenna and Suhrawardi." *Studia Iranica* no. 29:61-108.

    "The distinction between existence and essence in contingent beings is one of the foundational doctrines of medieval philosophy. Building upon the Aristotelian logical distinction between a thing and its existence, Avicenna posited the distinction as a proof for the radical contingency of creation. However, one Islamic philosopher, who had an enormous influence on the development of philosophical discourse in Iran, subverted the traditional Peripatetic vision of reality and disputed the ontological nature of existence. Through a critique of the Peripatetic notion of existence, Suhrawardi denied that the term had 'reference' and demonstrated the irrelevance of the distinction for metaphysical inquiry, which should, instead, rely upon an eidetic vision of the 'hierarchy of lights'. The synthesis of these two views led to the crystallisation of Mullâ Sadrâ Shirâzi's famous doctrine of the 'primacy and systematically graded nature of being'. "

57. ———. 2005. "Le statut ontologique de l'image dans la doctrine avicennienne de la perception." *Arabic Sciences and Philosophy* no. 15:109-140.

"Our goal in this article is to show that the analysis of Avicenna's doctrine of perception enables the isolation of two distinct concepts of the image. In the first part, we examine the passages in which Ibn Sina characterizes the image, in agreement with the ancient conception, as the material replica of a concrete reality formed in the faculty-organs by reification. We then undertake to read his doctrine of perception in the light of the discussion of the essence or common nature, which in itself is indifferent to unity and plurality. This reading enables us to show that for Ibn Sina, the common element of the various representations--sensible, imaginative, and intellective--is the quiddity as it is in itself. Each of these representations adds to the quiddity an intention of universality or of particularity."

61. Street, Tony. 2001. "'The eminent later Scholar' in Avicenna's *Book of the Syllogism*." *Arabic Sciences and Philosophy* no. 11:205-218.

    "Avicenna refers on a number of occasions in his *Book of the Syllogism* to "the eminent later scholar" (*al-fadil min al-muta'ahhirin*). At least three recent studies have argued or assumed that this eminent later scholar is Alexander of Aphrodisias.

It is argued in this article that Avicenna is in fact referring to Alfarabi. This has consequences for reconstructing the lost first part of Alfarabi's *Great Commentary on the Prior Analytics*, for highlighting certain aspects of Alfarabi's logical doctrines, and for understanding more about the relation between Avicenna and Alfarabi in matters logical."

62. ———. 2002. "An Outline of Avicenna's Syllogistic." *Archiv für Geschichte der Philosophie* no. 84:129-160.

    "This study presents an outline of Avicenna's categorical syllogistic with divided modal premises. It is hoped that this will encourage further analysis of the system and, ultimately, the production of a formal semantics for it. The study also takes note of some of the problems in Avicenna's system which motivated the later logicians to introduce modifications into it. Finally, the study proposes translations for a number of the Arabic terms of art."

68. ———. 1982. "Transmission d'Avicenne a l'Occident Latin. Les cheminements l'histoire." *Revue de Théologie et de Philosophie* no. 114:51-64.

"During the last years a critical edition of two important works of Avicenna according to their Latin medieval translation has been published: "De anima" and "De philosophia prima". This translation dates back to the 12th century: as far as the "De anima" is concerned the translation was made wih the help of a Jewish philosopher, Ibn Daoud, who was probably assisted by Dominicus Gundisalvi. Both translations were very influential in the Latin West: the doctrines expressed in them were widely accepted (with some restrictions) and were never censured by the Church."

72. Wisnovsky, Robert. 2000. "Notes on Avicenna's concept of thingness (*Say'iyya*)." *Arabic Sciences and Philosophy* no. 10:181-221.

"Avicenna's appeals to thingness occur most densely in passages devoted to analyzing the relationship between efficient and final causes, an entirely Aristotelian topic. A philological question arises: should these passages be emended to real causality (*sababiyya*) in place of thingness (*say'iyya*)? I argue that the balance of evidence compels us to retain thingness. For Avicenna, thingness is the respect in which the final cause is prior to the efficient cause (as well as to the formal and material causes); existence, by contrast, is the respect in which the efficient cause is prior to the final cause. In fact, over the course of Avicenna's career a progression from the *kalam* problematic of *say'* v. *mawgud* to his own problematic of *mahiyya* v. *wugud* can be detected in his discussions of efficient and final causation."

"My aim in this book is to present a history of the metaphysics of Abú `Ali al-Husayn ibn `Abdallah ibn Sinâ, known in the West by his Latinized name Avicenna.

Since 1937, when Amélie-Marie Goichon published *La distinction de l'essence et de l'existence d'après Ibn Sinâ (Avicenne),* no serious book-length study specifically devoted to Avicenna's metaphysics has appeared. This is surprising enough given how influential Avicenna's metaphysical ideas were, but what makes it astonishing is that tremendous advances have taken place since Goichon's time in fields relevant to this topic. Those fields include - from the ultimate to the proximate, to use Avicenna's terms - the study of late antique Greek philosophy and the study of classical Islamic doctrinal theology, or *kalâm;* the study of the Greco-Arabic philosophical translations and the study of the philosophy of al-Farabi; and the study of Avicenna's metaphysics and the study of his intellectual biography."

Metaphysics or Ontology? The Debate about the Subject-Matter of First Philosophy

Introduction

"As it now exists, the subject of metaphysics can be described by a distinction that became standard in the seventeenth and eighteenth centuries. (*) According to this distinction, metaphysics has two principal divisions: general metaphysics and special metaphysics. *General metaphysics* includes ontology and most of what has been called universal science; it is concerned, on the whole, with the general nature of reality: with problems about abstract and concrete being, the nature of particulars, the distinction between appearance and reality, and the universal principles holding true of what has fundamental being. *Special metaphysics* is concerned with certain problems about particular kinds or aspects of being. These special problems are associated with the distinction between the mental and the physical, the possibility of human freedom, the nature of personal identity, the possibility of survival after death, and the existence of God. The traditional subject of what is real as opposed to what is mere appearance is treated in both general and special metaphysics, for some of the issues relevant to it are more general or fundamental than others." (p.11)

Notes

(*) See, for example, Baruch Spinoza, "Thoughts on Metaphysics," in *Earlier Philosophical Writings*, trans. Frank A. Hayes (Indianapolis, 1963), pp. 107-61. See also the note on "Pneumatology" in G. W. von

Leibniz, *New Essays on Human Understanding*, trans. Peter Remnant and Jonathan Bennett (Cambridge, Eng., 1981), p. LXIV.

From: Bruce Aune, *Metaphysics. The Elements*, Oxford: Basil Blackwell 1986.

"The term 'metaphysics' as the name of the discipline is taken from the title of one of Aristotle's treatises. Aristotle himself never called the treatise by that name; the name was conferred by later thinkers. Aristotle called the discipline at work in the treatise first philosophy or theology and the knowledge that is the aim of the discipline, wisdom. Nonetheless, the subsequent use of the title Metaphysics makes it reasonable to suppose that what we call metaphysics is the sort of thing done in that treatise. Unfortunately, Aristotle does not give us a single account of what he is up to there. In some contexts, he tells us that what he is after in the treatise is a knowledge of first causes. This suggests that metaphysics is one of the departmental disciplines, a discipline with a subject matter distinct from that considered by any other discipline. What subject matter is identified by the expression 'first causes'? Perhaps, a number of different things; but central here is God or the Unmoved Mover. So what subsequently came to be called metaphysics is a discipline concerned with God, and Aristotle tells us a good bit about the discipline. He tells us that it is a theoretical discipline. (...)

But Aristotle is not satisfied to describe metaphysics as the investigation of first causes. He also tells us that it is the science that studies being *qua* being. As this characterization gets fleshed out, metaphysics turns out to be not another departmental discipline with a special subject matter of its own. It is rather a universal science, one that considers all the objects that there are. On this characterization, then, metaphysics examines the items that constitute the subject matter for the other sciences. What is distinctive about metaphysics is the way in which it examines those objects; it examines them from a particular perspective, from the perspective of their being beings or things that exist. So metaphysics considers things as beings or as existents and attempts to specify the properties or features they exhibit just insofar as they are beings or existents. Accordingly, it seeks to understand not merely the concept of being, but also very general concepts like unity or identity,

difference, similarity, and dissimilarity that apply to everything that there is. And central to metaphysics understood as a universal science is the delineation of what Aristotle calls categories. These are the highest or most general kinds under which things fall. What the metaphysician is supposed to do is to identify those highest kinds, to specify the features peculiar to each category, and to identify the relations that tie the different categories together; and by doing this, the metaphysician supposedly provides us with a map of the structure of all that there is.(...)

In the medieval Aristotelian tradition, we continue to meet with this dual characterization of metaphysics; and like Aristotle, the medievals believed that the two conceptions of metaphysics are realized in a single discipline, one that aims both to delineate the categorial structure of reality and to establish the existence and nature of the Divine Substance. But when we reach the metaphysical writings of the Continental rationalists of the seventeenth and eighteenth centuries, we meet with a conception of metaphysics that expands the scope of the metaphysical enterprise.

Someone schooled in the Aristotelian tradition would be puzzled by this new use of the term 'metaphysics' and would likely charge that, in the hands of the rationalists, what is supposed to be a single discipline with a single subject matter turns out to be the examination of a hodgepodge of unrelated topics. Evidently, rationalists were sensitive to this sort of charge, and they sought to provide a rationale for their redrawing of disciplinary boundaries within philosophy. What ultimately emerged is a general map of the metaphysical terrain. (5) The claim was that there is a single subject matter for metaphysics; it is being. So the metaphysician seeks to provide an account of the nature of being; but there is a variety of different perspectives from which one can provide such an account, and corresponding to these different perspectives are different subdisciplines within metaphysics. First, one can examine being from the perspective of its being just that -- being. Since this represents the most general perspective from which one can consider being, the branch of metaphysics that considers being from this perspective was dubbed *general metaphysics*. But the rationalists insisted that we can also examine being from a variety of more specialized perspectives. When we do, we are pursuing this or that

branch of what the rationalists called *special metaphysics*. Thus, we can consider being as it is found in changeable things; we can, that is, consider being from the perspective of its being changeable. To do so is to engage in cosmology. We can, as well, consider being as it is found in rational beings like ourselves. To consider being from this perspective is to pursue that branch of special metaphysics the rationalists called rational psychology. Finally, we can examine being as it is exhibited in the Divine case, and to examine being in this light is to engage in natural theology. Pretty clearly, the rationalist notions of general metaphysics and natural theology correspond to the Aristotelian conceptions of metaphysics as a thoroughly universal science that studies being qua being and as a departmental discipline concerned with first causes; whereas the claim that metaphysics incorporates cosmology and rational psychology as branches expresses the new and broader scope associated with metaphysics in the rationalist scheme." (pp. 2-5)

Historical division of metaphysics in a nutshell

"*Metaphysics* (*ta meta ta phusika*) names a discipline practiced, from the 2nd cent. C.E. on, by the 'Peripatetic and Platonic schools, and also names two "classic" early Peripatetic texts, a long treatise by Aristotle and a short one by Theophrastus. The phrase *ta meta ta phusika* is first attested, as a title for both treatises, in Nicolaus of Damascus (1st cent. C.E.), but is probably earlier as a title for Aristotle's work. While the title comes from the arrangement of this treatise after Aristotle's physical works, this arrangement is determined by the perceived logical order of the subjects of Aristotle's different treatises and the recommended order for instruction; there is no basis for the modern legend that the title originates in a library catalogue. (The systematic arrangement of Aristotle's works is often credited to Andronicus of Rhodes [1st cent. B.C.E.], but the texts had clearly been given some systematic and pedagogical order before Andronicus' edition; it is controversial how far Aristotle himself intended this order.) The Phrase "*ta meta ta phusika*" is intended as equivalent to Aristotle's " wisdom," "first

philosophy," and "*theologikê*." Its advantage over these ether names is that it is more specific. Thus the Stoics use "*theologikê*" to name the discipline that studies gods or divine things; but since these gods are themselves natural bodies, t *theologikê* is a part of physics, although it may be the final, crowning part of physics, and although Cleanthes distinguished it from physics in a stricter sense (D.L. 7.41). The title "*ta meta ta phusika*," for a discipline occupying the same place as Stoic *theologikê*, makes it clear that the divine objects to be studied (unlike the divine objects studied in Aristotle's *De Caelo*) are beyond the physical world.

Although Aristotle uses "wisdom" and "first philosophy" for the same discipline, these names are not interchangeable and are used in different contexts. "Wisdom" (discussed mostly in ethical contexts) designates a certain intellectual virtue, namely, whatever knowledge is most desirable for its own sake and not for any practical consequences. "First philosophy" specifies the object of this knowledge and contrasts it with other disciplines: If there were only physical substances, then "physics would be the first science" (Met. 1026a27-9), but if (as Aristotle thinks) there are eternal unchanging substances separate from matter, then first philosophy can be *contrasted* with physics as the science of the best and divine kind of substance. Aristotle thinks that none of the existing sciences will do as first philosophy. In the early *Topics* (105b19-29) Aristotle recognizes the tripartition of logic," "physics," and "ethics" elsewhere credited to his Academic contemporary Xenocrates, in which all *theoretical* philosophy (knowledge pursued only for its own sake) would fall under physics. But now Aristotle seeks a further theoretical discipline. One candidate would be Platonic dialectic, which, beyond examining hypotheses by question and answer, also classifies and defines and so seeks to grasp the eternal Forms of the definienda. Aristotle admires the practice of dialectic and the ideal of a universal presuppositionless science, but rejects Plato's exaggerated claims for dialectic. Aristotle contrasts dialectic (which aims at defending or refuting, before a general audience, the claim that S is P) with the specialized causal investigations (seeking the real reason why S is P), which alone can produce scientific knowledge. The knowledge (and the scientific definitions) of the forms of natural things can be grasped only by physics, not by

dialectic; and the forms reached in this way are not separate eternal stances but depend for their existence on matter. If separate eternal substances do exist, then they can be known (if at all) only by another causal inquiry, which, unlike physics, would lead us from manifest sensible effects to a cause separate from sensible things." (pp. 335-336)

From: Stephen P. Menn, "Metaphysical thought, Classical", in: Donald J. Zeyl (ed.), *Encyclopedia of Classical Philosophy*, London: Fitzroy Dearborn Publishers 1997.

"Aquinas divided *sapientia* into *metaphysica* (being as being), *prima philosophia* (first principles), and *theologia*. This scheme remained intact until early modern times. It was replaced by Christian Wolff, who divided metaphysics into general and special, calling general metaphysics, the science of being as being, by the name ' *ontologia*' (...)

Special metaphysics was now divided into the three branches of rational theology, rational psychology, and rational cosmology, namely the (rational) sciences of God, souls and bodies respectively, which in fact correspond in subject matter to the divisions of Aristotle's second philosophy. Kant's 'metaphysics of nature', subordinated to epistemology, was divided similarly into a general part, ontology, opposed to the physiology of reason, itself divided into two 'transcendent' parts (rational theology, rational cosmology) and two 'immanent' parts (rational psychology and rational physics). Husserl gave the discipline of being the name of ontology, but divided it into formal ontology and several material or regional ontologies. Formal ontology deals with formal ontological concepts, those concerned with objects in general, as distinct from formal logical concepts, those concerned with truth and inference. Regional ontologies study the most general concepts and principles of the principal regions of being, including physical nature, consciousness, mathematics and the divine. Husserl himself spent much of his time on methodological issues and his regional ontologies were only sketched. Husserl's student Ingarden divided ontology into existential, formal and material. Existential ontology is concerned with what he called moments of existence, like forms of dependence, modality and temporality, which are combined into modes of being.

Formal ontology studies different objects according to their form (thing, property, event, process, relation, state of affairs, system), material ontology according to their kind (spatio-temporal, psychological, divine'. For Ingarden 'metaphysics' denotes among all possible ontologies the one that is actual." (p. 312)

The Debate about the Subject-Matter of First Philosophy in German Renaissance Philosophy

"The earliest German textbook on metaphysics was published by the Wittenberg professor Daniel Cramer in 1594, two years before Taurellus' *Synopsis*. Cramer's *Isagoge in Metaphysicam* is a very modest attempt to present the contents of Aristotle's *Metaphysics*, but the work is important because its basic structure was retained in other early German textbooks. After a preface on the subject-matter of metaphysics, he reversed the order of the two central sections of Aristotle's work, dealing in his book I with the properties of being (act and potency, *ens per se* and *ens per accidens*, the transcendentals), in his book II with its principles (the categories and the principles of natural substance) and finally in his book III with its species (the intelligences). Cramer's work was not strictly a commentary on the *Metaphysics*, but rather a textbook written in the form of questions and answers on points of metaphysical doctrine. The treatises of his successors were also independent of Aristotle's text and sought to apply and develop his thought. (...)

Decisive for the development of German metaphysics as the science of being was the publication of Suárez' *Disputationes metaphysicae* at Mainz in 1605, eight years after its first publication at Salamanca. Suárez' work was well suited to the purposes of the Lutheran thinkers. (...)

The influence of Suárez' approach may be observed as early as the works of Cornelius and Jakob Martini and most clearly in the *Opus*

metaphysicum (1617) and *Epitome metaphysica* (1618) of Christoph Scheibler, professor of logic and metaphysics at Giessen.

In spite of such efforts to maintain the integral character of metaphysics, Lutheran writers came increasingly to regard an independent natural theology as a necessity. They distinguished between traditional metaphysics, as a discipline which had the task of explaining certain generally valid terms and principles, and a discipline which was often called *pneumatologia* because it dealt with the nature, properties and activities of spiritual being. (...)

Scheibler himself contributed to the distinction of the two subjects by publishing a separate textbook on T *heologia naturalis* (1621). In the preface to this work he gave a practical reason for treating the subject separately -- to limit the extent of his general treatment of metaphysics -- but the division was in fact a natural consequence of his own distinction between a *metaphysica generalis* and a *metaphysica specialis*. Also contributory to the separation of the two sciences was the publication at Cologne in 1595 of the *De communibus onmium rerum naturalum principiis* of the Jesuit Benito Pereira. The Wittenberg professor Johannes Scharf referred in the preface to his *Pneumatica* (1629) to Pereira's distinction between first philosophy as the science of being and metaphysics as the science of God, and maintained that it was well founded. (...)

The publication at Basle in 1594 of Jacopo Zabarella's *Opera logica* played an important role in this development. Whereas the theoretical sciences employ a synthetic method in the presentation of doctrine, drawing conclusions from first principles, the practical sciences make use of an analytic method -- described by Zabarella -- which takes as its point of departure the end or purpose of an action and seeks to discover the means and principles by which this end might be attained. (...)

Consequently, whereas Lutheran writers on metaphysics sought to maintain the unity of Aristotle's science and only reluctantly admitted the necessity of an independent natural theology, Calvinist authors tended to distinguish clearly between two sciences, a science of God to the extent that he is accessible to human reason and a science of being understood as a universal science which supplies the principles for all the particular sciences.

For the formulation of the distinction they turned to the Jesuit Benito Pereira. In the preface to his *Isagoge in primam philosophiam* (1598) the Marburg professor Rudolphus Goclenius spoke of two separate sciences, a universal science called 'first philosophy' and a particular science called 'metaphysics'. First philosophy deals with being, its properties and its principles; metaphysics studies the various types of immaterial being: God, the intelligences and the human soul. Goclenius composed no treatise on metaphysics as the science of God, but his *Isagoge* is an introduction to first philosophy as the science of being. The work has two parts, the second of which deals with individual questions in the form of disputations. The first part, entitled *Praecepta metaphysica*, contains his complete treatment of the science. The first chapter deals with the definition of first philosophy and the notion of being, chapter 2-15 take up the simple and conjunct properties of being and the last three chapters treat substance and accident as its principles.

Goclenius seems to have been aware of the difficulties involved in restricting the term 'metaphysics' to the science of God while speaking of the science of being as 'first philosophy'. In his *Lexicon philosophicum* (1613) he made a new and important addition to philosophical terminology. In the article on abstraction he divided the speculative sciences according to the types of abstraction from matter that characterise them; that employed in physics he described as 'physical', that made use of in the science of God and the intelligences as 'transnatural' and that used in the science of being and the transcendentals as 'ontological'.' (pp. 13-19) The term occurs here in its adjectival form, but it soon appeared as a noun. The term 'ontology' made it possible to recognise the claim of the science of being to be metaphysics just as much as the science of God. It was in this way that the term 'metaphysics' came to designate both the universal science of 'first philosophy' or 'ontology' and the particular or special science of 'natural theology'." (pp. 626-632, notes omitted).

From: Charles H. Lohr, "Metaphysics", in: Charles B. Schmitt (ed.), *The Cambridge history in Renaissance philosophy* Cambridge: Cambridge University Press, 1988, pp. 537-638.

"Lutheran Aristotelianism

(...) (31)

By appealing to the philosophical idea of God, Lutheran theologians were to be able to respond to the threat to Orthodoxy which came from some extremist theologians, who maintained not only that the doctrines of faith could not be proved, but also that they are contrary to reason. Distinguishing clearly between that which belongs to reason and that which belongs to revelation, Calixt (*) maintained that reason in its own sphere cannot contradict revelation. The philosophical idea of God which man is able to attain is not such that we can say that it conflicts with the revealed idea. This approach may be observed in the works of Cornelius and Jakob Martini and most clearly in the *Opus metaphysicum* (1617) and *Epitome metaphysica* (1618) of Christoph Scheibler, professor of logic and metaphysics at Giessen.(32)

In this way a new understanding in Lutheran Orthodoxy of the nature and method of revealed theology brought about a distinction between metaphysics as the science of being and metaphysics as natural theology. Lutheran writers came increasingly to regard an independent natural theology as a necessity. They distinguished between traditional metaphysics as a discipline which had the task of explaining certain generally valid terms and principles, and a discipline which was often called *pneumatologia* because it dealt with the nature, properties and activities of spiritual being. Scheibler contributed to the distinction of the two subjects by publishing a separate textbook on Theologia naturalis (1621).

This understanding of the relationship between philosophy and theology opened the way for the free development in Lutheranism of natural theology as a theoretical science -- using the synthetic method -- distinct from the practical science of revealed theology -- using the analytic method.

Calvinist Aristotelianism

The analytic method had little success in those German territories -- like the Palatinate, Nassau, Hesse-Kassel and several smaller principalities – which leaned towards Calvinism. In accordance with the architectonic spirit of Calvinist Scholasticism; (33) Reformed theologians at the universities of Heidelberg and Marburg and later

at Herborn and Burgsteinfurt regarded their science as essentially speculative and followed the synthetic method in the presentation of doctrine. Rejecting the Lutheran transposition of the tracts on salvation and soteriology in systematic works on theology, they took the glory of God and predestination as their point of departure.

Reformed dogmatics began with God as the first cause and final goal of all things, and treated his eternal decrees of providence and predestination before taking up his government of the world in time. In this conception natural theology formed an integral part of the cognitio Dei perfecta at which theology aimed.

Consequently, whereas Lutheran writers on metaphysics only reluctantly admitted the necessity of an independent natural theology, Calvinist authors tended to distinguish clearly between two sciences, a science of God (to the extent that he is accessible to human reason) and a science of being (understood as a universal science which supplies the principles for all the particular sciences).

Thus the Marburg professor Rudolph Goclenius (34) in the preface to his *Isagoge in primam philosophiam* (1598), spoke of two separate sciences, a universal science called 'first philosophy' and a particular science called 'metaphysics'. First philosophy deals with being, its properties and its principles; metaphysics studies the various types of immaterial being: God, the intelligences and the human soul.

Goclenius seems to have been aware of the difficulties involved in restricting the term 'metaphysics' to the science of God while speaking of the science of being as 'first philosophy'. In his *Lexicon philosophicum* (1613) he made a new and important addition to philosophical terminology. In the article on abstraction he divided the speculative sciences according to the types of abstraction from matter that characterize them; that employed in physics he described as 'physical', that made use of in the science of God and the Intelligences as 'transnatural' and that used in the science of being and the transcendentals as 'ontological'. The term 'ontology' made it possible to recognize the claim of the science of being to be metaphysics just as much as the science of God. It was in this way that the term 'metaphysics' came to designate both the universal

science of 'first philosophy' or 'ontology', and the particular or special science of 'natural theology'." (pp. 290-291)"

Metaphysics (1646–1647)." *Analecta Romana Instituti Danici* no. 44:49–71.

Abstract: "This contribution offers a first-hand impression of Bartolomeo Mastri's D*isputations on Metaphysics*, the single most important work on metaphysics produced in the Scotist school during the Early Modern period.

I shall highlight a selection of key passages that convey an impression of this work's historical-literary context, its subject matter, its main motifs, and scientific aims, but also its limitations. Notably, we see Mastri emphasizing the theological aspect of metaphysics, though he in the end refrains from exploring this aspect of metaphysics within his work on metaphysics. I suggest that this discrepancy between Mastri's concept of metaphysics and his practice of metaphysics showcases the difficulty of organizing this discipline during the period of transition from the traditional commentary format, typical of medieval scholasticism, to the Early Modern scholastic Cursus philosophicus literature."

    Abstract: "For more than four decades around the middle of the sixteenth century, Giacomino Malafossa from Barge († 1563) held the Scotist chair of metaphysics at the University of Padua. In his *A Question on the Subject of Metaphysics, in Which Is Included the Question, Whether Metaphysics Is a Science*, he developed a remarkable stance on the subject matter of metaphysics. Metaphysics has two objects: being qua being and God. However, only when it deals with the latter object can it be said to be a science in a strict sense. The reason is that the strict Aristotelian notion of science presupposes that the object of any science has demonstrable properties, which is the case with God, but not with being as being. Although being qua being does have certain properties, namely the transcendentals, these cannot be truly demonstrated. Malafossa's *Quaestio* bears witness both to the clash between Averroism and Scotism at the Italian Renaissance universities and to the complexity of the

Scotist tradition itself. This introductory article highlights Malafossa's sources and traces the critical reception of his views among later Scotist authors."

    Abstract: "The article has three interrelated aims. First, to document that the title "Book of Letters", despite its fame, was far from being 'traditional' in Arabic philosophy, as it is often presented, but it rather served as a temporary designation of the *Metaphysics* inArabic. Apart from later derivatives, this title is attested only four times, in different forms, in writings of the IV/X century, with no trace beforehand and a life-span of a few decades, from the time of the translation activity of Abu-Bišr Matta- (d. 328H/940) until the composition of an ethical work by Miskawayh (written between 358H/968 and 360H/970) and of the *Fihrist* (377H/987-8). This title soon disappeared from the philosophical scenario in the course of the V/XI century, when it apparently lost currency in philosophical contexts.

The second aim is to shed some light on the origin of this expression. “Book of Letters” as a title of the *Metaphysics* comes, in fact, from a cultural environment different from the Arabic-Islamic one, namely from the Syriac tradition of Greek philosophy, or from its Pahlavi offshoots. The Syriac provenience is indicated by the first known user of this expression, Paul the Persian (VI c. CE). It is corroborated by the Syriac background of some parts of Alexander of Aphrodisias’ commentary on the *Metaphysics* preserved in Arabic, in which all the treatises of the *Metaphysics* are systematically designated through letters. The third aim is to explain the waning of the title under discussion with reference to Avicenna (Ibn Sı-na-, d. 428H/1037) and his renewal of philosophical nomenclature in the V/XI century.

The author of the *Book of the Cure/Healing* (*Kita-b al-Šifa -* ’) not only neglected the title at stake, as already others had done before him: in his masterpiece on metaphysics, he also proposed a new and alternative denomination of Aristotle’s eponymous work (“First Teaching”, *al-ta ʿlı-m al-awwal*), which condemned to irrelevance the textual content of the *Metaphysics* and a fortiori its material arrangement in distinct treatise designated by means of letters."

18. Biard, Joël. 2003. "God as First Principle and Metaphysics as a Science." In *The Medieval Heritage in Early Modern Metaphysics and Modal Theory, 1400-1700*, edited by Friedman, Russell L. and Nielsen, Lauge Olaf, 75–98. Dordrecht: Kluwer.

"In Aristotelian "first philosophy" *(prote philosophia),* wisdom is defined as 'the search for first causes and first principles.' (1) Thus, first philosophy is defined as the highest, governing science, even before its object has been determined, i.e. before knowing the precise number and the nature of these first principles, whether nature (*phusis*), being (*to on*), God, or, as Aristotle himself is inclined to think in *Metaphysics* VII (Z), *ousia*.

The very claim that God is first principle -- if such a principle exists -- emerged in the field of philosophy. Before Aristotle,

Anaxagoras had already characterized the *nous* as divine. Further, as we have seen, the question of the nature and existence of a first principle is a crucial one for determining the status of the "highest science" for which Aristotle was looking in the *Metaphysics*. In a situation like this, a confrontation with the doctrine of the great revealed religions was unavoidable. This began in the period of the Alexandrian commentaries, continued in the Arabo-islamic world, and the Latin Middle Ages inherited this rich and complex tradition. In fact, for a long time, medieval Latin thinkers believed that Aristotle had written a theology, supposedly the continuation of Book XII of the *Metaphysics*. They thought that this was to be found in the small text derived from Proclus' *Elements of Theology* and entitled *Liber de causis*.

Does the investigation of the natural world allow us to conclude the existence of a first principle? Following natural reason, what might prompt us to call this principle 'God'? In the highest part of philosophy, what functions does God as first principle play? Are we talking about the same God as the God of the Bible, or is this pure homonymy?

In the first part of this paper I sketch the thirteenth and fourteenth century debate concerning the object of metaphysics, which raised the question of whether God, insofar as he is first principle, is the object of this science. Then I investigate how the first principle can be apprehended and conceived as an integral part of a discipline that proceeds according to human reason. I consequently touch on how the question of the knowability of the first principle serves simultaneously to assign the limits of metaphysics and to determine fully the extent of its validity. Finally I show that Early Modern metaphysics, specifically René Descartes, while completely abandoning the peripatetic conception of knowledge prevalent in the Middle Ages, nevertheless retains certain aspects of the medieval tradition through the use that Descartes made of a philosophical conception of God that provided a foundation for the order of nature and guaranteed our knowledge." (pp. 75-76)

    Abstract "Catholic Philosophy has long acknowledged the primary place of Metaphysics, and a primary question of metaphysicians is “what is Metaphysics about?” This paper engages this primary metaphysical question through the lens of Scholastic dispute over the adequate subject matter of

Metaphysics. Chrysostom Iavelli defended the position that the subject of Metaphysics is real being common to God and creatures against the position of his predecessor Dominic Flandrensis who had argued that it is categorical being to the exclusion of uncreated being. I find Flandrensis's position represented in the writings of notable contemporary Thomists, but not Iavelli's. This paper, offers a sixteenth-century Thomist's position on the subject matter of Metaphysics as a challenge to current Thomist consensus. It attempts to prompt a re-investigation of the reasons behind the current consensus both as a philosophical position and as an interpretation of St. Thomas Aquinas."

tradizione filosofica medievale no. 22:347–382.

Abstract: "Scholars who consider Thomas Aquinas's metaphysics have dedicated muchattention to his account of how the separate substance known as God is related to the subject matter of metaphysics, *ens commune*. Little attention, however, has been paid to his account of how created separate substances, which theologians call 'angels', are related to this subject matter. Indeed, Thomas himself does not address this topic in detail. To the extent that he does, his considerations seem somewhat inconsistent. On the one hand, he presents created separate substances as principles or causes of *ens commune*, suggesting that they are not included under this subject matter. On the other hand, he also treats them as substances or beings, suggesting that they are somehow included under ens commune. This article attempts to show that despite Thomas's seemingly contradictory treatment of this topic, one can nevertheless discern in his writings a coherent and consistent account of how created separate substances are related to the subject matter of metaphysics."

"It is in his influential encyclopedia De divisione philosophiae, (*) however, that Gundissalinus presents his most systematic discussion of metaphysics as a science."

(...)

"Accordingly, the following discussion is divided into three parts: firstly, an exploration of the history of the relevant terminology will show how, for the first time, Gundissalinus interpreted metaphysics as the name of a discipline (1); in a second step, I will analyze the epistemological foundation of metaphysics as an autonomous science in the chapter on metaphysics in De divisione philosophiae, paying particular attention to Gundissalinus's criticism of twelfth-century philosophical theology (2); thirdly, I will examine a key text of the treatise on the division of the sciences, which has received little attention so far: Gundissalinus included a translation of a passage from Avicenna's *Kitâb al-burhân* in his treatise, which discusses the difficult matter of the subordination of the philosophical disciplines under metaphysics (3)." (pp. 691-692)

(°) A Latin edition with German translation of the text may be found in: Alexander Fidora, and Dorothée Werner, *De divisione philosophiae — Über die Einteilung der Philosophie*, Herders Bibliothek der Philosophie des Mittelalters, vol. 11 (Freiburg im Breisgau: Herder, 2007). "The Arabic divisions of the sciences mainly influenced the Latin West through translations from Arabic into Latin by Dominicus Gundissalinus (1110-1190) and even more so through his own works, which rely heavily on the materials he translated1. Like other translators from the Iberian Peninsula, Dominicus Gundissalinus – who was by far the most philosophical of the Toledan translators of the twelfth century – began to translate from Arabic into Latin with the help of Jewish (Ibn Da¯ud) and Mozarabic assistants. These co-translators, who were proficient in Arabic, produced oral translations into vernacular which Gundissalinus then brought into Latin." (p. 191)

(...)

"How much Gundissalinus himself was influenced by al-Fārābī's work is evident in the fact that he took his translation or adaptation of it, called *De scientiis*, as the basis of his own seminal philosophical encyclopedia *De divisione philosophiae*. This work constitutes a hallmark of the history of philosophy, primarily because this synthesis introduces a number of hitherto unknown sciences into Latin philosophy, such as optics (*de aspectibus*) and statics (*de ponderibus*), while substantially redefining others, namely metaphysics and politics. This makes Gundissalinus the first (Latin) thinker to treat metaphysics as the name of a discipline rather than of a text (4)." (p. 192)

Abstract: "The essay traces the history of the debate on the nature of metaphysics and its object from Late Antiquity to the 14th century in the frame of the history of the debate on the nature of the subject/object of science. As a consequence it identifies five elements constituting the question of the nature of metaphysics: the epistemological role of the subject/object of science; the degree of insight of metaphysics into that which it considers; the role assigned to God and separate substances within metaphysics; the relationship between metaphysics, or rational theology, and revealed theology; and the different conceptions that authors develop of the notion of being. The positions of a number of authors from Antiquity to the Later Middle Ages concerning this themes are examined here and their historical relationships investigated. As for Thomas Aquinas, for instance, I argue that he does not consider the *ens commune*, which is the subject of metaphysics, as conceptually identical with transcendental being. For him, transcendental being includes all its inferiors; by contrast, common being includes some inferiors of being (*general rationes*; rationes of immaterial substances as far as the latter are taken as principles of being), but not all of them (particular rationes of material beings; rationes of immaterial substances different from those which characterize these substances when the latter are taken as principles of being). Thus, in Aquinas's view, transcendental being is an ontological/metaphysical notion; common being is an epistemological notion. In reality they are identical, but before the mind they are not completely identical. Furthermore, one can notice that the Italian Dominican maintains that God is both cause of the subject of metaphysics and part of it. *Ens commune*, taken as it is in reality, is identical with transcendental being; hence, on the one hand, it is common both to material substances and to spiritual

substances and, on the other, it is in a way posterior to the latter substances, since it depends upon them."

    Inaugural Address at the Free University of Amsterdam (January 16, 2004).

    "Concluding remarks. We have to come to a close. The study of the history of metaphysics has been addressed from the perspective of the postmetaphysical era. We shied from reproducing the claims to self-evidence that the various metaphysical projects convey and, seeking for safer, more objective ground, rather investigated into the structures that underlie this self-evidence and induce its very production. This line of questioning brought us to consider a connection which is characteristic of the foundation of metaphysics in the Middle Ages, the one between the first object of thought and the *subiectum* of first philosophy. Without reducing the speculation on the first object of thought to the modern concept of subjectivity - both parties would resist their insertion in such a history of continuity -, the medieval discussion on the first

object of thought proved to have an important feature in common with the later philosophy of subjectivity, insofar as an investigation into the horizon of knowledge settles the possibility of a homogeneous field and, therewith, of metaphysics. Yet these same structures which establish the homogeneous field of metaphysics are, in the 14th century, involved in its dispersion. This event, the dispersion of metaphysics at the beginning of the 14th century, was verified by four examples and clarified by the image of the scattered field: the collision of the homogeneous field of metaphysics with the object of knowledge made it disperse in a scattered field. Still, because of its foundation in an established distribution of subjectivity, the medieval dispersion of metaphysics remained entirely unproblematic. Only the explicit turn to the subject for the unfurling of the homogeneous field of metaphysics after the Middle Ages allowed a refreshed dispersion of subjectivity to damage the confidence in metaphysics and herald the postmetaphysical era.

Perhaps the question arises whether, in this way, metaphysics itself has indeed become impossible. Is it not rather a certain episode of its history that has come to a close, an episode in which this foundational scheme of subjectivity grew to full stature and then faded away? But it would be quite ahistorical to think that one could escape from this development and once more try, free now from the rise and fall of subjectivity, to establish a homogeneous field of metaphysics. This reality of which we are not the most creative part, is constituted, on a theoretical level, by structures of which we cannot dispose, structures that, historically determined, are imposed upon us and do not allow us - thus the diagnostics of our postmetaphysical era - to describe reality, like metaphysics intends to do, in terms of a homogeneous field.

This transition from the era of the philosophy of subjectivity to the post- metaphysical era was symbolized by the succession of those both catchwords `subjectivity' and 'structure'. Structural reflection on subjectivity reveals its constitutive vigor to be embedded in or even derived, not to say borrowed from more fundamental structures in the ordering of knowing, structures

that propose and indeed define both the subject-positions to be occupied and the object-domains of metaphysics allegedly constituted by mutually irreducible instances of subjectivity.

Turning things round, a conclusion is reached to which we - rather on the sly, as must be admitted - were tacitly leading all this time. For if, by accepting the perspective of the postmetaphysical era and receiving the self-evidence of metaphysical projects not as something given, but as constituted by analyzable structures, we reached insight into tendencies of dispersion in the history of metaphysics, then, finally, also the self-evidence to which the *postmetaphysical* era appeals reveals itself to be produced and analyzable as to its constitutive structures -- with this analysis, thus we may conclude, we have made a beginning here."     Abstract: "The epistemic constellation that underlies the transformation of metaphysics in the 13th and 14th century is legitimized by the identification of the subject of first philosophy with the first object of the intellect. In this epistemic constellation, a new thought presents itself: the foundation of Aristotle's unconditional starting point of thinking, i.e. the principle of non-contradiction, in the first known, transcendental concepts of the mind. The present article argues that, on the one hand, innovative attempts to found the principle of non-contradiction of the Franciscan Nicolaus Bonetus and the Carmelite John Baconthorpe demonstrate the stability of this epistemic constellation. It is true that, in their foundation of the principle of non-contradiction. Bonetus and Baconthorpe effect a dissociation of the subject of first philosophy and the first object of the intellect, which seems to

challenge the very legitimizing strategy of the medieval transformation of metaphysics. But the very discourse that breaches the identification of the subject of metaphysics with the first object of the intellect, tacitly reproduces it by means of a division of first objects of the intellect. Its articulation of a first object of the intellect that surpasses the subject of first philosophy in generality, on the other hand, preludes tendencies in modern philosophy that, in presenting the thinkable as such as what grants access to reality, give full attention to the modes of being excluded from Aristotle's *Metaphysics*."

    "In the following, we will investigate metaphysics' status as a scientific discipline, through an examination of the medieval sources of the approach that most profoundly transformed modern metaphysics, i.e. Kantian transcendental philosophy. Starting with Kant's direct sources we will trace the discussion back to the ideas of John Duns Scotus (§ 1) and of Francisco Suarez (§ 2), in order to demonstrate with regard to its most

important features just how Kant received (§ 3) and transformed (§ 4) these ideas."

54. Jagadeeswaraiah, Murala. 2018. "Western Understanding of Metaphysics up to Aquinas: A Survey of Literature." *International Journal of Recent Research in Social Sciences and Humanities (IJRRSSH)* no. 5:67–82.

    Abstrct: "In this essay an attempt is made to bring out the importance of the understanding of metaphysics. The origin of the term is discussed and the implication in the ancient Greek philosophy and medieval period in the West are given some consideration. The Ancient Greek philosophers were metaphysicians with a scientific mind. Their search is to find out the one 'stuff' out of which the universe is made. Whereas the Pre-Socratics considered the 'stuff' as one or the other of the elements Socrates and Plato takes Ethics as one thing that is responsible for the universe. Aristotle names it as 'the philosophy' which is the 'wisdom' that inquires the first cause. It has implications on modern science."

    Abstract: "The article analyzes the status of metaphysics in relation to other sciences, especially the sense and reasons behind its priority in the system of sciences, as conveyed in the works of Thomas Aquinas. The question of what comes first in the system of sciences has led to an exploration and

justification of the criteria behind this priority. According to Thomas Aquinas, metaphysics is justly considered to be the first philosophy: on the one hand it is occupied with what comes first in the ontological order – the first causes of being, on the other hand, other sciences rely on it for their first principles. The article critically analyzes both substantiations of the idea of being first. The substantive criterion is questioned by the introduction of revealed theology into the system of sciences accepted by Aquinas; revealed theology is also occupied with what comes first, and does so with greater authority than metaphysics. The article focuses on the analysis of main doubts concerning metaphysics' methodological criterion of priority: the idea that metaphysics, in relation to other sciences, is in a sense first and functions as a determinant, while also being last and determined by these very sciences. Metaphysics is first, as other sciences draw from it their first principles, and last, as it utilizes facts established by other sciences which come first in the process of knowledge acquisition. Hence the charge that Aquinas' argumentation concerning metaphysics' priority is circular in nature. The article analyzes various aspects of this difficulty and offers suggestions on how to overcome them."

"The subject-matter of metaphysics has been debated since the time when Aristotle first conceived the idea of the science. He himself speaks of 'the science we are seeking' and describes it differently in different places. In *Metaphysics* IV 1003a 21-6)) he speaks of a science which studies being as being and contrasts this science with the special sciences, like the mathematical disciplines, which investigate the attributes of a part of being. Two chapters later, IV.3 (1005b2), Aristotle speaks of a science which he calls 'first philosophy' because it grounds the first principles or axioms of the special sciences. But in book VI.1 (1026a18-1 9) he distinguishes three types of speculative science, physics, mathematics and 'divine science', so that one must ask how he understood the relationship between the general science of being, first philosophy and divine science. It is clear that divine science studies objects that are separate from matter and not subject to change. But Aristotle seems to have wanted to identify this science both with the investigation of being and with the science of the principles of the sciences, on the ground that divine science concerns itself with the highest principle of being in general and can for this reason preside over the special sciences. At the same time, each of these definitions of metaphysics must be understood in accordance with Aristotle's own idea of what science is. In his conception, scientific knowledge is attained by way of the definition of the essential natures of things and the demonstration of the attributes which necessarily belong to them. Basically, Aristotle understood reality as an ordered structure. Even where his definitions are definitions of events, these are understood not in their variability as a process, but rather as reified. His science of metaphysics deals therefore with all reality according to its fixed essences and their necessary attributes and has consequently a static character, like the ancient society which it reflected.

In the course of history it was Aristotle's conception of metaphysics as divine science that gave rise to the most difficulties. The encounter of his idea of God as first substance

with divergent religious traditions often forced later thinkers to modify the conception of metaphysics as the science of being. In late antiquity those philosophers who came to the defense of the pagan gods tended to interpret metaphysics as the science of intelligible reality, arranged in hierarchical degrees, separate from matter, but mediating between the divine and the material worlds. In Islam the doctrine of God's oneness compelled philosophers and theologians to emphasise the great gulf which separates the necessary being of the creator from the radically contingent being of the created world. Medieval Latin Christianity learnt of both of these approaches through Avicenna and Pseudo-Dionysius. The notions of a necessary first substance and a hierarchy of intelligences readily found a place in the contemplative and ordered society of the Middle Ages. The Christian notion of a God active in himself as triune and active in the world as incarnate as the fundamental articles of a faith thought to be even more certain than scientific knowledge would seem to have demanded a new definition of science and a new definition of the reality which metaphysics studies. But, paradoxically, it was only with the revolutionary social changes that marked the period under consideration in this volume [the Renaissance] -- a period in which the medieval faith was breaking down - that a vision of reality as dynamic process and a new understanding of science emerged.

This new conception of reality appeared in various guises, as a new mathematics, as the idea of a magical control over nature, as a conflict between Plato and Aristotle, or in connection with the doctrine of God. It was resisted by scholastic authors, who sought for apologetical reasons to maintain Aristotle's static notion of being. But as more and more new sciences -- sciences connected with this new vision of reality and often undreamt of in antiquity -- carne to maturity, even thinkers in the Aristotelian tradition were forced to reopen the question of the definition of metaphysics and its relationship to the individual sciences. Since each of these problems -- the problem of God and the problem of the science of being -- had its own history, I shall treat them separately." (pp. 537-538)

"The Subject of Metaphysics

The Islamic commentators Avicenna and Averroes set the background to the questions that discuss this issue in Scotus's *QM*, namely Book I, q. 1, Book IV, q. 1, and Book VI, q. 1. Avicenna had concluded that the only way to reconcile the criteria for scientific knowledge laid down in Aristotle's *Posterior Analytics* with the descriptions given and the procedures followed by Aristotle in the text of the *Metaphysics* was to take the subject of investigation within metaphysics to be being as being. In proposing this manner of understanding the subject of metaphysics, Avicenna showed how only being as being could fit the Aristotelian requirements for scientific knowledge (Aristotle, *Posterior Analytics* 1.10, 76a31-76b23; 1.28, 87a38-87b4), the range of subjects treated in metaphysics (truth, goodness, and unity; cause/effect; substance and accident; act and potency, as well as necessary and possible being), and, above all, the metaphysical proof of God's existence and the divine attributes (Avicenna, *Metaphysics*,

I.1.1 [IV 4: 64- 5: 81]; I.1.2 [IV 12: 14-22]). Fundamentally, Avicenna reasons that, since no science can prove the existence of its subject, if God's existence is shown in metaphysics, that science cannot have God as its subject.

Adopting the opposing standpoint, Averroes argued that, since no science proves the existence of its own subject, metaphysics must be about God as First Form and Substance or Last End. God's existence is not, contrary to Avicenna's claim, shown within metaphysics but in physics or natural philosophy and its treatment of the Unmoved Mover. Metaphysicians begin, then, with the proof of God's existence afforded them by the natural philosopher and hence the range of being displayed before them: material and immaterial being. What metaphysical analysis strives to indicate is how all the beings of our

experience are related to the First Form or God by way of final causality, while also attempting to show how we may meaningfully attribute certain properties to God (Averroes, *Physics* I, t. 83 [1550, 22vb-23ra]; Averroes, *Metaphysics* IV, t. 6 [1562, 145vM-146vM]; IV, t. 2 [71 vG-M]).

Scotus 's discusssion in Book I, q. 1 involves a protracted treatment of the two Islamic interpreters and their conflicting claims. Though this particular question is one in which there are layers of revision on Scotus 's part and, at times, the discussion is a strain to follow, the gist of Scotus's successive views becomes clear. In the earliest view expressed in the primitive text, Scotus held ultimately that metaphysics is a science that has being as being in the sense of substance as its subject (*Questions* I, q. 1, n. 91-2;

1997: 38-9). At this stage of his career he could see no greater unity to the concept of being than that of the ten categories of being and among these there is only a unity of attribution of the nine accidental categories to the category of substance. Since there is no common notion under which the full range of being can be treated, Scotus opted for the primary subject of the science as substance with the properties of accidents being treated in so far as they are dependent upon and exist for the sake of substance.

When we turn to the extras and additions found in Book I, q. 1, we encounter the more mature and developed position that is assumed in the later books of the *QM* and expounded at even greater length in Scotus's theological writings. The concept of being is univocal not only to the whole of categorial being, the being of substance and the nine accidents, but to being as considered prior to its modal differentiation into finite being and infinite being. Such a notion allows God to enter into metaphysical discourse as something falling under disjunctive propositions such as "Every being is either First or not-First" or "Every being is either in act or in potency" and hence under the disjunctive properties of being "finite/infinite" and "act/potency" respectively (*Question*s I, q. 1, n. 156-7; IV, q. 1, n. 45; 1997: 57-8, 264). This position is one that engenders its

own difficulties, troubles that would cause Scotus to continue to struggle with the senses in which being can be predicated of its own differences and would lead to conflicts among his followers for a considerable period of time after his premature death (Dumont, 1987); subsequent refinements of the position aside, however, the position itself was attractive to contemporaries because ofits ability to explain both the transcendental and theological dimensions of metaphysical discourse within the same framework." (pp. 168-169)

    "Considering the rich survey Professor Lohr has presented this afternoon of Medieval commentaries on Aristotle's philosophical works including *Metaphysics*, there is no point in discussing in general terms the vicissitudes of this Aristotelian work at the Parisian Faculty of Arts. On top of that, in *the lettre d'invitation* of the organizers we were asked to say something about our own recent research in the field under discussion. Therefore I shall confine myself to John Buridan's (c. 1290-c. 1360) commentaries on *Metaphysics*. Fortunately, Buridan's activity as a commentator on *Metaphysics* may to a large degree be regarded as representative of the period. As we learn

from Lohr's survey, from the fourteenth century only some five commentaries on this important Aristotelian writing are extant, quite unlike the thirteenth and fifteenth centuries, from which a considerable amount of such works have survived. (*)" (p. 303)

84. Robiglio, Andrea A. 2004. "Breaking the Great Chain of Being. A note on the Paris condemnations of 1277, Thomas Aquinas and the proper subject of metaphysics." *Verbum* no. 6:51–59.

    Abstract: "In the late 13th century Latin west, the problem of the proper subject of metaphysics (a legacy of the *Avicenna Latinus*) became relevant. Two candidates were open at the time: that of the `ens in quantum ens' as the proper subject of metaphysics, and that of the separate and most noble substances.

    This transition allows for a deeper reading of the Condemnation of 1277. The structure of the Condemnation reveals an intriguing commitment on the part of the condemned articles concerning the separate substances (or angels) and the peculiar neoplatonic "chain of being" that was the underpinning of their accounts. Peter Olivi argued against the neoplatonic chain of being soon after 1277. Even if this polemic is still neglected in the secondary literature on 1277, Olivi's interpretation of the state of the debate reinforces the reading of the Paris Condemnation with regard to neoplatonistic chains of being, and the options available for characterizing the proper subject of metaphysics."

85. Saeedimehr, Mohammad. 2019. "Muslim Philosophers on the Relation between Metaphysics and Theology." *Journal of Philosophical Theological Research* no. 81:103–118.

Abstract: "In different parts of *Metaphysics*, Aristotle presents different (and apparently, conflicting) views on the nature and subject matter of the discipline in question. These different characterizations led to wide-ranging interpretations of the relation between metaphysics and philosophical theology. Muslim Philosophers adopted two different views. Al-Kindi and al-Farabi (in some of his works) endorsed the view that metaphysics is the same as theology as far as its subject matter is the First Cause (God) and it deals essentially with incorporeal entities. After Avicenna, however, a second view became dominant according to which metaphysics has a broader realm that embraces theology as its most noble part. The rationale behind this view is that the subject matter of metaphysics is "being qua being", or unconditioned existent, in its broad sense so that philosophical theology can be taken as discussing some of the proper accidents of the unconditioned existent. This view requires that metaphysics cannot be a secular discipline and should be totally consistent with theology. It also provides us with a certain interpretation of what is usually called "Islamic philosophy"."

86. Salis, Rita. 2018. "The Unity of Aristotle's *Metaphysics*. Book E according to the Interpretation of the Ancient Commentators." *Journal of Ancient Philosophy* no. 12:89–132.

    Abstract "This paper discusses the three ancient commentaries on Book E of Aristotle's *Metaphysics*, that have been handed down to us. It aims to demonstrate the fundamental part played by their particular interpretation of Aristotle's doctrines in the birth of the traditional interpretation of his *Metaphysics*, according to which all the books comprising the work were written as a function of Book Λ, containing the well-known doctrine of the unmoved mover. Among the main elements supporting this assumption there is Aristotle's distinction between three types of science - the theoretical, the practical and the productive - and his claiming the primacy of metaphysics as a theological science. According to the ancient commentators, the remainder of Book E would belong to the unitary project of the *Metaphysics*, since it would indicate what is not encompassed in the object of metaphysics. This would

mean that Aristotle's treatment of accidental being, being as truth and not-being as falsity, and being potentially and actually would take on a negative function. The theological interpretation of Aristotle's *Metaphysics* thus retains its ultimate foundations in premises contained in the Aristotelian text itself."

89. Strohschneider, Anna-Katharina. 2021. "Three Scotist Arguments Against Averroes. Antonius Andreas on the Subject Matter of Metaphysics." *Documenti e Studi sulla Tradizione Filosofica Medievale* no. 32:135–159.

    Abstract: "The influential Scotist thinker Antonius Andreas (d. ca. 1333) ardently criticizes Averroes' theory of the subject matter of metaphysics. In his *Questions on the Metaphysics* Antonius systematizes Averroes' position and condenses it into three distinct statements, against each of which he argues. This paper presents Antonius' own take on the subject matter of metaphysics, evaluates the success of his interpretation of Averroes, and analyzes his arguments against the Commentator. The disagreement between Antonius and Averroes is ultimately rooted in their vastly different theory of science and ontology. Averroes would have disagreed with many premises of Antonius' arguments, whether regarding the conditions for unity or for priority of a science, or the univocity or analogy of being.

    Surprisingly, however, the two thinkers agree on one central aspect, namely in their belief that sciences can provide certain demonstrations of the existence of their subject matter.

90. Strózewski, Wladislaw. 1990. "Metaphysics as a Science." In *Knowledge and the Sciences in Medieval Philosophy: Vol. 1: Proceedings of the Eighth International Congress of Medieval Philosophy (S.I.E.P.M.)*, edited by Asztalos, Monika, Mordoch, John E. and Ilkka, Niiniluoto., 128–157. Helsinki: Acta Philosophica Fennica. Vol. 48.

91. Suárez, Francisco. 2004. *A Commentary on Aristotle's Metaphysics (Index locupletissimus in Metaphysicam Aristotelis)*. Milwaukee: Marquette University Press.

    Translated with an introduction (pp. 7-19) and notes by John P. Doyle.

    The *Index* is the preface to the *Disputationes Metaphysicae*.

    Content: English translation: 20-247; Corresponding Latin texts: I. Ad lectorem 248; II. Disputatio II: Prooemium 250; III. Index Locupletissimus 252; IV. Index Disputationum 390; Persons Mentioned in the Index 410; Bibliography 413; Index of Names 424-426.

    "Balancing the system in the *Disputationes*, the Index amounts to a late medieval commentary, “by way of question,” on the first 12 books of the *Metaphysics*. Shorter in length than, for example, St. Thomas Aquinas’ (1225–1274) commentary on the same 12 books, Suárez’s *Ample Index* more than makes up for that by cross-referencing the *Disputationes* itself hundreds of times. In fact, the *Index* and the *Disputationes* are exactly as Suárez intended them to be, complementary of one another and mutually supportive." (Doyle, p. 8).

    "However, because there will be very many who will desire that this whole doctrine be collated with the books of Aristotle, not only in order to better perceive on what principles of the so great Philosopher it is based, but also in order that it be more easily and usefully employed for understanding Aristotle himself, I have also sought to provide the reader in this matter with an elaborate index, in which, if it is attentively read, most easily (if I am not mistaken) all those things which Aristotle treated in the books of *Metaphysics* can be comprehended and retained in memory. And again, [with that index] all questions

can be at hand which are customarily raised among the expositors of these books." (Suárez, p. 21).

92. ———. 2021. *Metaphysical Disputation I: On the Nature of First Philosophy or Metaphysics*. Washington, D. C.: The Catholic University of America Press.

    Translated and annotated, with corrected Latin text, by Shane Duarte.

    "Section 1: Identifying the adequate object or subject of metaphysics. Suárez classifies metaphysics or first philosophy as a natural science (*scientia naturalis*) (DM 1.2.17). In so classifying it, he in no way means to identify it with a branch of physics or natural philosophy. Rather, “natural” is here contrasted with “supernatural,” so that in this sense of the expression mathematics also counts as a natural science, whereas sacred or supernatural theology, based on divine revelation, does not.

    Suárez further classifies metaphysics as a real science (*scientia realis*), since it is about things (*res*) or real beings (DM 1.2.13). The implicit contrast here is with a rational science (*scientia rationalis*) such as logic, which is not about any thing or real being, but is commonly thought to deal with objective second intentions (e.g., genus, species, subject, predicate, antecedent, consequent), which are beings of reason or items existing only objectively in the mind as objects of thought. Suárez also classifies metaphysics as a theoretical or speculative science (*scientia speculativa*) (DM 1.2.13), since it has the contemplation of truth as its highest end, unlike the practical and productive sciences, whose truths are ordered to some further goal (i.e., action or production)." Abstract: "Both Aquinas and Siger were familiar with a fundamental disagreement within the earlier philosophical tradition concerning the subject of metaphysics: Is it being as being, or is it divine being? If Avicenna represented one approach to this issue, and Averroes another, both Thomas and Siger were closer to Avicenna than to Averroes in their respective solutions.

Nonetheless, each resolved the issue in a distinct way. Also contested in the earlier tradition was the question of whether it belongs to physics or to metaphysics to demonstrate the existence of God. Again, Avicenna represents one side on this issue, and Averroes the other.

Thomas's personal position continues to be debated by contemporary scholars, and Siger's seems to fall between those

proposed by Avicenna and Averroes. Finally, Aquinas is credited with having developed a new and unique way of accounting for the discovery of being as being, through a process known as separatio; though there are antecedents for this in Avicenna."

105. ———. 2010. "The subject of the Aristotelian science of metaphysics." In *The Cambridge History of Medieval Philosophy. Volume II*, edited by Pasnau, Robert, 609–621. Cambridge: Cambridge University Press.

Summary: "Aristotelian science conveys understanding by showing the necessary relationship between immediately evident first principles and conclusions about the natural world. To take a trivial example: induction from repeated experience teaches us that all broad-leaved plants are deciduous. We discover that grapevines have broad leaves. We infer that grapevines are deciduous, and thereby we also learn that they lose their leaves in winter because they are broad-leaved (see Aristotle, *Post. An.* II.16–17).

Aristotelian science explains a subject's possession of an attribute (the *explanandum*) by identifying the possession of that attribute with membership in a species, and then citing as *explanans* the inclusion of that species within a prior genus. In the present example, the property is "losing its leaves in winter," the species is "grapevines," and the genus is "broad-leaved plants." The explanation is then presented in the form of a syllogism. In the first premise an attribute (being deciduous) is predicated of a subject (broad-leaved plant). The second premise introduces a new subject that belongs to the class described by the subject of the first premise, allowing us to conclude that the second subject shares an attribute of the first.

Aristotle describes this demonstration as *propter quid* science because it explains why grape leaves fall. If the deduction were valid, but its premises were not explanatory, it would count as

quia science: knowing a fact without understanding why it obtains (ibid., I.13, 78a22–b3) (see also Chapter 26)." (p. 609)

107. Yıldırım, Ömer Ali. 2020. "The Science of Metaphysics and Different Naming Conventions Ranging From *Prote Philosophia* to al-ʿilm al-ilāhī: An Analysis Centered on Abū al-Barakāt al-Baghdādī." *Ulum* no. 3:393–410.

    Abstreact: "Aristotle is considered to be the founding father of metaphysics. He specified the subject and scope of this science and used the names “first philosophy (*prote philosophia*)”, “theology” and wisdom (*sophia*) for it.

    However, there have been some changes both in the scope and naming of this science after his time. Although it is generally accepted that the subject of metaphysics is “being qua being,” there has been a confusion about the relationship between metaphysics and theology. Philosophers such as al-Fārābī and Avicenna directly studied this issue to eliminate such confusions. Different names such as first philosophy, after-physics, *al-ʿilm al-ilāhī* and *al-ilāhiyyāt* have always been used to refer to it. This study discusses why the science of metaphysics is named in different ways, mainly based on the evaluations of Abū al-Barakāt al-Baghdādī. It also questions if there is a relationship between different names and the scope of metaphysics and the method of analysis it uses? Do different names for the same scholarly area refer to the same science in terms of the subjects, areas of study and problems addressed, or does each name refer to different content than others? To achieve its intended aims, it also refers to the epistemology of Abū al-Barakāt al-Baghdādī."

    Repris dans P. Donini, *Commentary and Tradition: Aristotelianism, Platonism, and Post-Hellenistic Philosophy*, edited by Mauro Bonazzi, Berlin: de Gruyter 2011, pp. 107-123.

    Abstract: "To our knowledge Alexander was the first who attempted to reconcile Aristotle's (apparently conflicting) views regarding the object of that science which Alexander now and there already dubs "metaphysics". For much of his commentary, in fact, Alexander acknowledges that the universal science of being qua being is identical to the science of first substances that are unchangeable, unmoved, and divine, i.e. that science which in *Metaph*. E 1 Aristotle once even dubbed "theology". But this unified conception of Aristotle's "first philosophy" is strangely marred in Alexander's commentary by a few pages (pp. 245-246 H.), where a wholly different situation arises. In his effort to account for a text of *Metaph*. Γ 2 that differs from the one found in manuscripts and in modern critical editions, Alexander suggests that two different levels of first philosophy should be distinguished, even though he applies the same designation to both levels: 1) the first and most universal level of first philosophy as a general science of being qua being, where being is regarded as a genre. This level of first philosophy is responsible for the partition of being into ten categories and for their distinction. In addition to that 2) a second-level science would address each of the individual species of being (i.e. each category) that is conceived of as a species subject to the most universal science. Amid these special sciences of being, however, abides yet another "first philosophy" ("first" but subordinated to the other) operating at a second and thus lower degree of universality, namely, the science of first substance (the immovable and immaterial substance of the divine). Since all other substances are subordinated to the first substance, in accordance with the Aristotelian principle of αφ' ενὸς kai προς ἐν, this science also deals with all the other substances and any properties

belonging to them. The idea of a two-level first philosophy takes up limited space in the commentary and would not necessarily be contradictory in itself if only Alexander had squarely associated the general science of being qua being with just one of the two distinct levels. As this is not the case and both “first” philosophies are identified with the science of being qua being, the outcome is a confused and inherently inconsistent presentation. But more problems lie ahead in pp. 245-246: the biggest is that among the special sciences of being we find practical philosophy, whose object is hard to bring into line with or condense into any one (and if so, which?) of the ten categories. Moreover, the suggestion by those modern scholars, who would liken Alexander’s distinction between the two levels of first philosophy with the later distinction between general metaphysics and special metaphysics, appears somewhat flawed. In any case, identifying the doctrine of categories as the content of the more universal science of being almost seems typical of an age in which this doctrine was attacked or defended as if it were considered the mainstay and the cornerstone itself of Aristotelian philosophy."

25. Guyomarc'h, Gweltaz. 2014. "Fonction et objets de « Philosophie première » chez Aristote." *Revue de philosophie*

ancienne no. 32:137–178.

Résumé : "Cet article consiste en une étude des différentes occurrences de l'expression « philosophie première » dans le corpus aristotélicien. Une interprétation devenue courante, soutenue en particulier par A. Mansion, veut que « philosophie première » renvoie toujours à la science théologique de *Métaphysique* E 1. On cherche au contraire à montrer que l'expression couvre en réalité une grande partie des objets traités par l'ensemble de la Métaphysique, parmi lesquels, par exemple, l'étude de la forme comme substance première, l'examen des axiomes, la réfutation des Idées. Pour ce faire, on s'intéresse à la fonction argumentative de l'expression dans ses contextes d'apparition, en montrant qu'elle sert quasi systématiquement à indiquer les limites de la physique.

L'expression « philosophie première » a ainsi un sens architectonique et une fonction de démarcation. La pluralité des objets qu'elle recouvre, cependant, n'entraîne pas sa dispersion entre plusieurs sciences mais en fait un concept englobant. Il est donc légitime de se servir de l'expression pour poser la question de l'unité de la science recherchée par Aristote."

Abstract: "This article is devoted to the interpretation of the object of metaphysics and theoretical sciences proposed by Alexander of Aphrodisias (fl. 200 AD). I shall propose two conjectures on crucial passages from his commentary on the *Metaphysics* (I*n Metaph*. 245.37-246.6 et 246.6-13) and, on this new textual basis, defend the thesis according to which Alexander articulated a primary fundamental philosophy, devoted to immobile substances and treated by Aristotle in *Metaphysics* Λ, and a philosophy, if one can say so, more primary but less ontological, hence less fundamental, devoted to the general structure of being and treated by Aristotle in *Metaphysics* Γ. The latter seems to differ from the *Categories,* according to Alexander, in that in the *Categories,* Aristotle studies the general classes of beings as general, while in *Metaphysics* Γ, he studies them as beings."

   Ristampato in P. Donini, *Commentary and Tradition: Aristotelianism, Platonism, and Post-Hellenistic Philosophy*, Berlin: Walte de Gruyter 2011, pp. 17-35.

   Abstract: "The opening words at 1069a36-b2 in *Metaphysics Λ* 1 can only be properly understood if the conditional clause εἰ is properly acknowledged. As shown by the development of the argument immediately following, i.e. the investigation into the existence or nonexistence of common principles for all sensitive substances, Aristotle was chiefly interested in finding an answer to this issue, which would in turn serve as a premise for distinguishing the science of sensible substances and that of suprasensible and immaterial substances. The development of the subsequent chapters (see esp. *Λ* 6-10, the chapters dealing with supra-sensible substances), however, shows that Aristotle

does not provide any clear answer to the question of the existence of one principle common to all substances. Indeed, Aristotle had very good reasons for avoiding to answer either way. The upshot is that at the end of the book it is unclear how, if at all, the science dealing with supra-sensible substances might really be set apart from physics, which addresses sensible substances.

Aristotle's hesitation, or rather silence, about the key issues raised in the first chapter suggests that he composed the book *Λ* when he was still highly concerned about (and sought to shake off) some distinctive Platonic and Academic theories: most notably the belief in the existence of common principles common to all things (whether sensible or non-sensible). A single universal science of such principles (which the Academics called "physics") would deal with all sorts of things (i.e. all substances, Aristotelically speaking). As shown by other texts, such as *Metaphysics* α and the *Protrepticus*, Aristotle had initially shared this Academic idea of a "physics" that contemplates all types of substance. Most probably, *Λ* belongs to that same philosophical environment, and displays an effort, for the moment ineffective, to break the unity of Academic "physics" and successfully establish a science expressly addressing supra-sensible substances only: at this time, neither "first philosophy" nor (let alone) "theology" were clearly marked out in Aristotle's mind."

Abstract: "In late antiquity, in the context of the jagged tradition of Neo-Platonism, Aristotle's Metaphysics and the specific science that is traced out in it are indicated with the current denominations of *meta ta physika* and *theologikē pragmateia*, which are seen as consistent with one another and closely interconnected. In this connection, the *Metaphysics*, in the wake of previous philosophical readings, is considered as a treatise on "theological science" — the most elevated among the sciences — and the denomination meta ta physika is seen in a specifically theological sense.

According to a widespread Neo-Platonic reading, the science thematized in the *Metaphysics* is "metaphysics" in that it is theological science, an epistemic discourse on divine realities, which, within the *ordo rerum,* transcend the physical ones, and, therefore, according to the *ordo cognoscendi*, must be studied after the latter."

Sommario: "Da lungo tempo è stato riconosciuto il carattere scotista dell'Expositio in libros Metaphysicorum di Antonio Andrea, a tal punto che essa figura tra le opere di Scoto nelle edizioni del Wadding e di Vivés. Anche ora che la paternità di Antonio Andrea per quest'opera è stata comunemente riconosciuta, accade spesso che si faccia ricorso all'Expositio al fine di illuminare questo o quel punto oscuro del pensiero di Scoto. Tuttavia, una volta analizzata, quest'opera mostra di

essere un adattamento puntuale del commento alla Metafisica di Tommaso dal punto di vista delle teorie di Scoto. Attraverso l'introduzione sistematica nelle formulazioni di Tommaso delle nuove dottrine scotiste dell'univocità dell'ente e della natura communis, Antonio realizzò il progetto di fornire ai primi discepoli di Scoto un manuale della scienza dell'ente come scientia transcendens."

   "The history of modern metaphysics is essentially marked by its splitting up into a metaphysica generalis and a metaphysica specialis, a well-known distinction especially within Christian Wolff's systematic conception of metaphysics. This study investigates the actual origins of this significant development, which can be already found at the beginning of the 14th century. On the basis of a fundamentally revised doctrine of transcendentals the Franciscan theologian Francis of Marchia (~1290-1344) introduces for the first time a dissociation of the primum cognitum of the human intellect from the subject of metaphysics, according to which metaphysics is no longer one science in the sense of a scientia transcendens, as most of his predecessors claimed in the 13th century, but rather twofold: ontology and theology."

    Second updated edition (first edition: Leiden: Brill, 1965).

    "In the fourteenth century, a new version of the first solution makes its appearance. Unlike its thirteenth century predecessor, this version of the solution is aware of the notion of the formal object uniting the various discourses comprising a science, yet it rejects such a notion. This deconstruction of the problematic surrounding the subject of metaphysics may be seen most clearly in the writings of Ockham and Buridan. With this development, the medieval history of the problematic of the subject of metaphysics may be said to reach its apogee by returning to its origins. The notion of a formal unity in a science, a unity that transcends the merely logical unity of a particular demonstrative syllogism, is once again missing from the discussion.

    In this, the second edition of his classic study, Albert Zimmermann has once again provided scholars with a remarkable collection of otherwise unavailable texts along with penetrating studies on that perennial metaphysical question: what is the subject of metaphysics. As indicated by the title, Zimmermann's treatment of the medieval discussion on the object of metaphysical knowledge ranges over the thirteenth and fourteenth centuries, covering authors from the generation of Richard Rufus and Roger Bacon up to John Buridan. The new edition takes account of most of the considerable literature that has appeared since the original publication in 1965. (...)

    Zimmermann's volume divides into two parts. The first presents texts drawn from medieval commentaries on

Aristotle's *Metaphysics* in which the subject of metaphysics is discussed. The second part is subdivided into three chapters: the first sketches out the primary sources for the medieval discussion -- found chiefly in the writings of Aristotle, Avicenna, and Averroes; the second describes the advent of the three basic solutions proposed by medieval authors for the solution to the problem; and the final chapter shows the subsequent development of these three solutions. The study closes with reflections upon the medieval treatment of the problem and what impact the medieval discussion had upon the development of early modern philosophy as well as contemporary European thought.

Given the ambiguity of Aristotle's various statements on the subject of metaphysics, Avicenna and Averroes attempted to work out systematic accounts of the subject of metaphysics. Applying rigorously the model of scientific knowledge expressed in Aristotle's *Posterior Analytics*, Avicenna concluded that being as being, understood as common to substance and accident, had to be the subject of metaphysics since God's existence was sought in metaphysics and no science proves the existence of its subject. Agreeing with many of the basic assumptions of Avicenna, Averroes came to the opposite conclusion: metaphysics has as its subject God since the existence of God is already shown in natural philosophy and thus may be assumed for the purposes of metaphysical investigation.

The medieval philosophers worked out three alternative solutions to the problem presented to them by the texts newly received at the outset of the thirteenth century. The first solution, clearly evidenced in the writings of Roger Bacon, proposed that there are various subjects for the science of metaphysics and thus diffused the disagreement between Avicenna and Averroes. In the case of Bacon, the three subjects are being as being, substance, and God, subjects that are treated successively in the sequence of books in the Aristotelian *Metaphysics*. As Zimmermann notes, this solution is not only too facile but indicates that its proponents had not developed the notion of a single, formal subject that unites all the features

treated within the scope of a science; Bacon is an especially clear case in this regard since he located the unity of metaphysical knowledge in the reducibility of all metaphysical objects to the First Cause and not in any formal unity of the subject matter.

The second solution Zimmermann finds most fully expressed in the writings of St. Thomas Aquinas, though he sees adumbrations of it in the commentaries of Albert the Great and Richard Rufus. Unlike the defenders of the first solution, those advancing the second solution are distinctive in having a refined notion of the formal object of the science and positing the unity of the science to be derived from the formal object. According to this solution, being as being or being in general (*ens in communi*) is limited to the range of creaturely being, a notion of which we attain through our acquaintance with sensible substances. The existence of God is not presupposed for metaphysical science though some judgment (*separatio*) that being is separate in notion and reality from merely sensible things is required. Instead, God relates to metaphysical knowledge as the cause and the principle of the subject of the science or ens commune; hence, God's existence may be known in and through metaphysics, but the names derived from the concept of being that constitutes the object of the science can tell us little about His nature.

The final solution developed by medieval philosophers was also the one most commonly adopted by them. Positing being as being as the subject in the widest possible sense, these thinkers claimed that God falls under the subject of metaphysics in that sense, albeit they often qualified that claim by stating that the sense of being that applies to God and creature is only analogously the same. One of the earliest adherents of this view was the great Dominican theologian Robert Kilwardby, but the most famous of those subsequently defending the view were Henry of Ghent and John Duns Scotus. In many ways, as Zimmermann notes (p. 329), Scotus's systematic presentation of this view marked the culmination of its development and led to the form that the medieval discussion would have thereafter,

connecting the discussion of the subject of metaphysics to distinctively Scotistic theses such as the univocity of being."

Estudios en Español

1. Cabré Duran, Maria. 2022. "Notas sobre el primer sujeto de la metafísica según el comentario a la *Metafísica* de Antoni Andreu." *Anuario Filosófico* no. 56:59–77.

   Resumen: En este artículo estudiaremos algunos elementos propios de la formulación del problema del sujeto de la metafísica tal y como aparece en el comentario de Antoni Andreu a la *Metafísica* aristotélica. Esta cuestión está estrechamente vinculada a la

   concepción de la univocidad aplicada al ser transcendental, pero también a la inclusión de las sustancias separadas en el dominio de la metafísica. La afirmación de un concepto de ser unívoco y real como sujeto-objeto de la metafísica es la base del realismo metafísico propuesto por Antoni Andreu."

   Abstract: "This article examines certain aspects of the problem of the subject-matter of metaphysics as presented in Antonius Andreae's commentary on Aristotle's *Metaphysics*.

   This question is closely linked to the conception of univocal transcendental being, but also to the inclusion of separate substances into the domain of metaphysics.

   The assertion of the univocal and real concept of being as the subject of metaphysics is the basis of metaphysical realism as proposed by Andreae."

2. Cumsille Marzouka, Kamal Andrés, and Figueroa Lackington, Benjamín Antonio. 2021. "Al-Farabi, 'Sobre los propositos de Aristoteles en la Metafisica'. Texto, traduccion y notas." *MEAH, Sección Arabe-Islam* no. 70:441–452.

   Resumen: "El presente texto ofrece una nueva traducción al castellano del *Maqāla fī agrāḍ al-ḥakīm fī kitāb Mā ba'd al-*

ṭabī'a (*Tratado sobre los propósitos de "el Sabio" en el libro de la Metafísica*) de Abū Naṣr al-Fārābī (m. 339/950-951). Desde un punto de vista filológico, nuestra versión toma por referencia los enfoques hermenéuticos de Jon McGinnis, David Reisman, Amos Bertolacci y, más considerablemente, de Dimitri Gutas, tanto en lo que refiere a la traducción de términos filosóficos técnicos como de reorganización del texto en parágrafos. En este sentido, hemos querido ofrecer al público hispanohablante una nueva traducción del *Agrāḍ*, basada en la edición de Friedrich Heinrich Dieterici, que tuviera en cuenta los avances más recientes en el campo de los estudios árabes y, en particular, en los estudios de la obra filosófica de al-Fārābī. Para facilitar la contrastación con el texto de Dieterici, hemos incluido aquí su versión transcrita, con puntuación y parágrafos reordenados."

Abstract: "This document offers a new Spanish translation of the *Maqāla fī agrāḍ al-ḥakīm fī kitāb Mā ba'd al-ṭabī'a* (*Treatise on the Aims of „the Sage" in the Book of Metaphysics*) written by Abū Naṣr al-Fārābī (d. 339/950-951). On a methodological level, our interpretation is mainly informed by the work of Jon McGinnis, David Reisman, Amos Bertolacci, and —more significantly— Dimitri Gutas, with regard to both the translation of key philosophical terms and to the rearrangement of the text in paragraphs. In this sense, we aim to provide a new Spanish translation of the Agrāḍ —based in Friedrich Heinrich Dieterici‘s

edition— that takes into account the latest developments in the field of Arabic studies and, particularly, in the study of al-Fārābī‘s philosophical oeuvre. To facilitate the comparison of the original and the translated text, we have included Dieterici‘s transcription with punctuations and rearranged paragraphs."

6. O'Reilly, Francisco. 2021. "La definición y el objeto de la metafísica en la Philosophia Prima del Avicena Latino." *Anales del Seminario de Historia de la Filosofía* no. 38:441–461.

   Resumen "La *Philosophia Prima* de Avicena ocupa un lugar relevante en la historia de la metafísica. En sus primeros cuatro capítulos encontramos una definición de la metafísica como sabiduría y filosofía ciertísima. Avicena busca con todo ello destacar el carácter científico de la metafísica. En este mismo sentido, la elucidación del objeto propio de esta disciplina se inserta en el debate entre sus fuentes árabes (Al-Kindi y Al-Farabi), pero a su vez se extiende en la discusión histórica sobre el lugar de Dios y el ser en la metafísica.

   En este artículo se presenta la definición de la metafísica como ciencia primera, y el establecimiento del ente como el objeto propio de la metafísica, y Dios como aquello buscado."

   Abstract. "Avicenna's *Philosophia Prima* occupies a relevant place in the history of metaphysics. In its first four chapters, we find a definition of metaphysics as wisdom and the more certain philosophy that highlights the scientific character that Avicenna seeks to

   give metaphysics. The elucidation of the subject matter of this discipline is developed in the debate among its Arab sources (Al-Kindi and Al-Farabi), but at the same time, it extends in the historical discussion on the place of God and being in metaphysics. This article presents the definition of metaphysics as the first science, and the establishment of the being as the proper subject of metaphysics, and God as what is sought."

19. ———. 2022. "El término « metafísica » en la tradición latina." *Pensamiento* no. 78:1871–1882.

    Resumen: "Los estudios sobre la constitución de la noción y el término «metafísica» han sido poco abordados por la historia de la filosofía, y sobre todo, por la tradición filosófica misma.

Este trabajo, sobre la base de lo realizado por Pérez Fernández (1975), es una parte de una serie de publicaciones que pretende arrojar luz sobre este proceso. Concretamente, aquí se narra brevemente cómo el término «metafísica» fue mudando gradualmente su uso y grafía en la tradición latina. Sugeriré que Boecio usa las locuciones *theologia* y μετα` τα` φυσικα` en dos sentidos, la primera la emplea para referirse al tema que es propio de los libros metafísicos de Aristóteles (i.e. teología filosófica), en tanto que la segunda locución la usa en un sentido bibliográfico. De este uso daría cuenta Abelardo en sus obras, que plausiblemente influyeron más tarde en la constitución definitiva del término en la Escuela de Toledo. Se incluyen imágenes de manuscritos para ilustrar lo apuntado."

Abstract: "Studies on the evolution of the notion and the term «metaphysics» have been scarcely addressed by the history of philosophy, and specially, by the philosophical tradition itself. This work, based on what was done by Pérez Fernández (1975), is part of a series of writings that aims to shed light on this process. Specifically, here I will briefly describe how the term «metaphysics» gradually changed its use and spelling in the Latin tradition. I will suggest that Boethius uses the locutions *theologia* and μετα` τα` φυσικα` in two senses, the first one uses it to refer to the subject that is proper to the metaphysical books of Aristotle (i.e. philosophical theology), while the second locution uses it in a bibliographic sense. Of this last use, Abelard would give account in his works, which plausibly later influenced the definitive constitution of the term in the School of Toledo. Images of manuscripts are included to illustrate the point."

Estudios en Portugues

1. Costa Sousa, Meline. 2023. "Avicena e o problema do sujeito da metafísica: a hipótese das causas." *Veritas, Porto Alegre*:1–11.

Resumo: "Um dos problemas com os quais os leitores da *Metafísica* de Aristóteles se deparam é a dificuldade de delimitação do sujeito da sabedoria. Avicena (séc. X), em seu tratado metafísico As coisas divinas (*Ilāhiyyāt*), põe-se a investigar cada um dos três candidatos à posição de sujeito dessa ciência (a dizer, Deus, as causas e o ser). Devido à amplitude da investigação, a análise que se segue se restringirá à segunda hipótese – se, em algum sentido, seria a filosofia primeira uma ciência sobre as causas (uma aitiologia). Desse modo, inicia-se com a exposição do contexto da *Ilāh*. I, que antecede à análise da hipótese das causas. Na sequência, aborda-se a hipótese, juntamente com os argumentos, para mostrar sua falsidade. Por fim, a conclusão apresenta a relação entre causalidade e ser, tendo em vista a resposta ontológica que será dada ao problema central e os problemas que decorrem dessa resposta."

Abstract: "An issue the readers of Aristotle's *Metaphysics* must deal with is the delimitation of the subject-matter of the wisdom. An attempt to answer this problem was proposed by Avicenna (10th Century) in his metaphysical treatise *On Divine Things (Ilāhiyyāt)*. In its first book, the philosopher investigates each one of the three candidates for the position of the subject-matter of this science (i.e., God, causes, and being). Having in mind the difficulties of this topic, the following analysis is limited to the second hypothesis, namely, if the first philosophy is the science of the causes (an aitiology). I will start contextualizing the *Ilāh*. I since it precedes the analysis of the hypothesis of the causes. Then, I will discuss the hypothesis of the causes and show Avicenna's arguments against it. Finally, I will conclude this investigation discussing briefly the relation between causes and being in view of Avicenna's ontological answer to the main problem and the problems emerging from it."

2. Martins, António Manuel. 1994. *Lógica e ontologia em Pedro da Fonseca*. Lisboa: Fundaçao Calouste Gulbenkian.

   English abstract: "The aim of the dissertation is to show the place of Fonseca's work in the history of ontology. Starting with a close analysis of the texts connected with the core of classical

metaphysics it is argued that the Commentarii in libros metaphysicorum Aristotelis far reacher than a mere textual commentary of Aristotle's text and represent one of the rare efforts to bring out a real synthesis of the main theoretical problems and questions emerging in the context of the aristotelian project of a first philosophy. This systematic work is carried out in the second half of the sixteenth century, just before the beginning of modern philosophy. Chapter one is dedicated to a brief account of Fonseca's work in his historical context. The remaining chapters explores some of the central topics of Fonseca's ontology. Chapter two, after a brief discussion of the aristotelian project of first philosophy, follows the transformation of this project in Fonseca's text discussing in particular his analysis of the concept of being under the heading ens commune and the meaning of the thesis of analogia entis as well as the distinction between a formal and an objective concept of being. In chapter three we discuss the question of the distinction between essence and existence in order to grasp the meaning of Fonseca's thesis of a modal distinction ex natura rei. Chapter four seeks to articulate Fonseca's interpretation of the classical doctrine of the transcendentals (unum, bonum, uerum). The wish to articulate the universality and transcendentality of the concept of being has taken us to introduce the problem of the categories in this chapter and a brief historico-critical survey beginning in Aristotle and ending in Kant. Finally, chapter five discusses the meaning of the principle of non contradiction in Aristotle and in Fonseca."

Birth of a New Science: the History of Ontology from Suárez to Kant

Introduction

"To begin with we want to state that ontology should be seen only as an interdiscipline involving both philosophy and science. It is a discipline which points out the problems of the foundations of the sciences as well as the borderline questions, and which further attempts to solve these problems and questions. Ontology is not a discipline which exists separately and independently from all the other scientific disciplines and also from other branches of philosophy. Rather, ontology derives the general structure of the world; it obtains the structure of the world as it really is from knowledge embodied in other disciplines. If one examines the history of philosophy one sees that ontology has never solved or attempted to solve the questions about the structures of our world independently, apart from the other philosophical disciplines or apart from the sciences. As is expressed by this symposium's topic, "Language and Ontology", ontology has derived the world's structure from other disciplines which describe reality, and has thus relied upon the languages of other disciplines. A common belief is that this derivation of the world's most general structures from the knowledge of other disciplines is ontology's only task. But now the belief is that in doing ontology one always selects the most important and most general laws from among all the laws which the various disciplines have to offer at any given time. Further, the ontologist interprets and generalizes those laws and must endeavor to establish certain of them as the most fundamental and general structures of our world.

If ontology is a discipline which uses knowledge from various other disciplines then it is obvious that, in the course of the history of philosophy, ontology must have developed in a most dramatic fashion. If we look at the actual history of ontology we find confirmation of our claim. Ontology mirrors, so to speak, the level of our knowledge of the world at any given time. For instance, Plato and the Platonists have assumed that one could derive our world's most general empirical structures from an ideal world of Platonic Forms. Of this world of Forms it is said that one can experience it intuitively and that its existence has to be presupposed a priori. For this derivation, one needs only two relations, *methexis* and *parousia*. "Methexis" means "participation" or what we would call "representation" "parousia" means "manifestation" (of the ideas in the world) or what we would call "interpretation". These ontological procedures are explained in Plato's Parmenides.

For Aristotle, the main task of philosophy was not to perceive the world of ideas, but to experience the empirical world and acquire knowledge about it (Metaphysics, Chapter 9). He created the first system of ontology in the form of an ontology of substances. Aristotle's search for the world's true structures is interestingly opposed to Plato's. For Aristotle the general properties of things, that is, those properties of things which constitute their invariant form, have to be found through a cognitive process. These general properties of things are universal structures or patterns. These universal patterns are to be defined and axiomatized. For this task one calls on logic for help. The end result is that universals become generally comprehensible.

Here one may ask as Porphyry did what universals really are. The answers that have been proposed are numerous. They include: Platonic ideas, substances residing in things, concepts or representations in the human mind (conceptualism), terms or predicates contained in our language (nominalism), and mathematical-theoretical constructs in the languages of present day theories. The question about the very nature of universals (general structures) has occupied philosophy and the sciences up to the present day as one can see in reading Heisenberg's dialogues with Schrödinger where this question is discussed at length.

In the Middle Ages the concern with universals continued. Various elaborate systems evolved, including, importantly, varieties of conceptualism and nominalism. A decisive turn in the history of ontology is connected with the writings of Goclenius, Wolff, and Leibniz. Goclenius needs to be mentioned for he is credited with the first use of the term 'ontology'. Like all ontologies, so also Wolff's, has to be made dependent upon the level of knowledge existing at his time. Knowledge for Wolff is logical knowledge. He established the interdisciplinary character of his ontology by deriving the most general laws of nature and of all things from the principles of a logic derived from Leibniz. According to Wolff, it is one of the basic ontological structures of everything that exists, that the principle of non-contradiction and the principle of sufficient reason are valid in all merely possible worlds in addition to the real world.

Kant rejected Wolff's logic as metaphysical and Platonistic. Therefore Kant rejected also Wolff's ontology. Instead of traditional logic, Kant introduced his own transcendental logic. This transcendental logic may be seen as a cognitively oriented method which is founded on concepts. If one wants to gain knowledge, then, according to Kant, only those categories (or most general concepts) may be used which fulfill certain spatio-temporal conditions when they are applied. These categories are of subjective origin, that is, created by the human mind. It is a scientific theory, namely, Newton's physics, which furnishes the natural laws which are the basis of Kant's ontology. In his epistemology (an "auxiliary discipline" of his ontology which is contained in the Critique of Pure Reason), Kant methodologically explains Newton's physics.

Leibniz's logic stands in the same relationship to Wolff's ontology, as the natural laws of Newton's physics and Kant's own epistemology stands to Kant's ontology. But for Kant it is not the world of things-in-themselves which determines his ontology but the spatio-temporal categorial system of relations of the phenomena. It is important that here ontology can be clearly separated from epistemology. Kant's epistemology is a metatheory of the cognitive presuppositions and methods of classical physics. Kant's categorial ontology derives from natural laws which are supported and confirmed by empirical evidence of the general structures of the world-the classical physical world, as we would say today. With this, ontology became an

interdiscipline, since it is here that for the first time in the history of philosophy and science that scientific results were thoroughly (philosophically) generalized. This is also an important point in the development of the ontology of the sciences. The ontology of the sciences has progressed enormously in the twentieth century, since many scientific theories with their specialized, cognitively oriented languages and with their specialized mathematical methods did not originate before the twentieth century. Up to now, the ontology of the sciences is the last chapter of the history of ontology.

After Kant, ontology developed in several directions. Ontology of the sciences evolved in Neo-Kantianism, Positivism and Neo-positivism, the philosophy of the Vienna Circle, and in contemporary philosophy of science. On the other side stands phenomenological ontology. Phenomenological ontology expanded Kant's phenomenological "reduction" of the world. Its climax is Husserl's phenomenology in which the world itself becomes the (world) phenomenon. The world's basic structures exist exactly in that way in which they are experienced (phenomenologically) by human beings. The construction and the structure of the world "happen" in man's pure intentional consciousness vis-à-vis reality. According to Husserl, mathematics and logic also participate in the constitution of the world out of the phenomena. This constitution has a semantical character but happens, nevertheless, without language. Heidegger's fundamental ontology, on the other hand, speaks of an anti-logical and anti-scientific basic experience, which is said to be paramount to all scientific knowledge.

The next decisive step in the development of ontology was the result of another development, which had reached its climax in the twentieth century, the development of formal logic. Formal logic, and, in union with it, analytic philosophy, often show the tendency to dissolve epistemology into syntax and semantics, and even pragmatics. The syntactical semantic functions, the reference relation, etc., could, in turn, be based upon the respective functions of language, be it ordinary language or the language of the sciences. Wittgenstein's reduction of thinking to the linguistic medium became an object of a philosophical position whose task was to explain and clarify language. As a result, the ontology of the sciences acquires features which are best characterized by "regional linguistic

ontology". An important result of Wittgenstein's reduction of thinking to language was the dissolution of conceptualistic ontology." (*Preface by the Editors,* pp. 18-20)

From: Werner Leinfellner, Eric Kraemer and Jeffrey Schank (eds.), *Language and Ontology. Proceedings of the Sixth International Wittgenstein Symposium. 23th to 30th August 1981 Kirchberg am Wechsel (Austria),* Wien: Hölder-Pichler-Tempsky, 1982.

The origin of a new Latin term: Ontologia"

Until 2003 the first appearance of the Latin word "ontologia" was known in two works published in 1613:

Rudolf Göckel (1547-1628) Latin Rudolf Goclenius, Professor of Logic in the University of Marburg: in his *Lexicon philosophicum quo tanquam clave philosophiae fores aperiuntur, informatum opera et studio Rodolphi Goclenii*, Frankfurt (reprinted by Georg Olms, second edition 1980) XII, 1143 pages) on the left margin of *abstractio* (the term is written in Greek);

Jacob Lorhard (1561-1609) Latin Jacobo Lorhardo or Jacobus Lorhardus, Professor at the University of St. Gallen (Switzerland) in his *Theatrum philosophicum*, Basilea, SECOND edition.

Göckel's work was well known, but Lorhard's *Theatrum philosophicum* was first discovered by Joseph S. Freedman in the second edition of his *Deutsche Schulphilosophie im Reformationszeitalter (1500-1650): ein Handbuch für den Hochschulunterricht*, Münster, MAKS, 1985, and cited by Jean-François Courtine in his masterpiece *Suárez et le système de la métaphysique*, Paris, Presses Universitaires de France, 1990, p. 410 n. 6.

Lorhard was an unknown author and the only reference I found to him is in the *Syllabus auctorum*, Vol. 9 of the *Bibliographia Philosophica Vetus . Repertorium generale systematicum operum philosophicorum usque ad annum MDCCC typis impressorum* by Wilhelm Risse, Zürich - New York, Georg Olms, 1998:

"*Lorhardus, Jacobus* (fl. 1597), praeceptor Durlaci, rector S. Galli"

Wilhelm Risse 's outstanding work contains a bibliography of the published titles on philosophy up to 1800 (about 18.000 titles!); I tried to find the FIRST edition of Lorhard's work, which was unknown.

In Vol. II, - "*Logica*" of Risse's work, Jacobus Lorhardus is cited twice: year 1597 and year 1606 (references are to the year of publication).

1597: *Liber de adeptione veri necessarii, seu apodictici...*, Tubingae, 1598, (p. 217)

1606: *Ogdoas scholastica, continens diagraphen typicam artium grammatices, logices, rethorices...* Sangalli, 1606, (p. 232)

The title of the second work puzzled me: *Ogdoas* means "composed of eight elements" and the title cited only three disciplines.

May 16, 2003, I discovered that this work was the first edition of the *Theatrum philosophicum* and that the word "*ontologiae*" appeared in the complete title:

Jacobo Lorhardo: *Ogdoas Scholastica continens Diagraphen Typicam artium: Grammatices (Latinae, Graecae), Logices, Rhetorices, Astronomices, Ethices, Physices, Metaphysices, seu Ontologiae.*

The frontispiece of the book *Ogdoas Scholastica* and of the *Metaphysicae su Ontologiae Diagraphe.*

"The first occurence of "ontology" (in German: *Ontologie*) in a dictionary of philosophy can be found in the first philosophical dictionary published in a modern language, the *Philosophisches Lexicon* by Johann Georg Walch (1693-1775): the first edition was published in 1726 (the second improved edition of 1733 has been reprinted in three volumes by Thoemmes in 2001).

July 15, 2005: I received new information about Jacob Lorhard from Peter Øhrstrøm, Institut for Kommunikation, Aalborg Universitet:

"Jacob Lorhard was born in 1561 in Münsingen in South Germany. In 1603 he became "Rektor des Gymnasiums" in the protestant city of St. Gallen. In 1606 he published his book Ogdoas scholastica, on the frontispiece of which the word "ontologia" appears - probably for the

first time ever in a book. "Ontologia" is used synonymously with "Metaphysica". In 1607, i.e., the year after the publication of Ogdoas scholastica, Lorhard received a calling from Landgraf Mortiz von Hessen to become professor of theology in Marburg. At that time Rudolph Göckel (1547-1628) was also professor in Marburg in logic, ethics, and mathematics. It seems to be a likely assumption that Lorhard and Göckel met one or several times during 1607 and that they shared some of their findings with each other. In this way the sources suggest that Göckel during 1607 may have learned about Lorhard's new term "ontologia" not only from reading Ogdoas scholastica but also from personal conversations with Lorhard. For some reason, however, his stay in Marburg became very short and after less than a year he returned to his former position in St. Gallen. Lorhard died on 19 May, 1609. Later, in 1613, Lorhard's book was printed in a second edition under the title Theatrum philosophicum. However, in this new edition the word "ontologia" has disappeared from the front cover but has been maintained inside the book. In 1613, however, the term is also found in Rudolph Göckel's *Lexicon philosophicum*. Here the word "ontologia" is only mentioned briefly as follows: "ontologia, philosophia de ente" (i.e., "ontology, the philosophy of being"). It is very likely that Göckel included this term in his own writings due to inspiration from Lorhard."

October 27, 2006: Dr. Marco Lamanna, Bari University (Italy) send me some important details:

"In July 2006 I had the opportunity to consult a copy of the *Ogdoas Scholastica* (1606) of Lorhard in the University Library in San Marino. The neologism *ontologia* appears four times in the course of the work. On three occasions it occurs in the genitive singular (*Ontologiae*): on the frontispiece, in the title of the section on metaphysics, and at the end of this same section. Only on one occasion (in the dedicatory letter) does the word appear in the accusative case (*Ontologiam*). I was subsequently able to consult Lorhard's *Theatrum philosophicum* at the Herzog August Bibliothek in Wolfenbüttel. This work, the second (amplified) edition of the *Ogdoas Scholastica*, and appeared posthumously at Basel in 1613. The *Theatrum philosophicum* is made up of twelve parts (*continens Grammaticen Latinam, Graecam, et Hebraeam, Logicen, Rhetoricen, Arithmeticen, Geometriam, Musicen, Astronomicen,*

Ethicen, Physicen, Metaphysicen seu Ontologiam). The parts that appear here in addition to the material in the *Ogdoas* are the sections on Hebrew grammar, arithmetic, geometry and music. In the dedicatory letter of the *Theatrum philosophicum*, Lorhardus writes "*hancque Dodecada Scholasticam confeci*" (i.e. a work of twelve parts), in contrast to what he had written in 1606: "*hancque Ogodoada Scholasticam confeci*" (i.e. a work of eight parts).

In September 2006 I confirmed that the part of the work dealing with metaphysics (*Metaphysices seu Ontologiae Diagraphe*) is identical in the *Ogdoas* and in the *Theatrum*, and also discovered that Lorhardus was not the author of this chapter. In fact, what Lorhard did was to create a diagrammatic representation, in the Ramist tradition, of the *Metaphysicae Systema methodicum* of Clemens Timpler, which ran through nine editions, including some unauthorized imprints (Steinfurt 1604, Lich 1604, Hanau 1606, Frankfurt a.M. 1607, Marburg 1607, Hanau 1608, Frankfurt a.M. 1612, Hanau 1612, Hanau 1616).

[See: Joseph S. Freedman, *European Academic Philosophy in the Late Sixteenth and Early Seventeenth Centuries. The life, significance and philosophy of Clemens Timpler (1563/4-1624)*. Hildesheim: Georg Olms 1988].

Since Lorhard finished working on his *Ogdoas Scholastica* (the dedicatory letter was dated 24 February 1606), he could presumably only have had the 1604 editions of Timpler's work to consult. Lorhard faithfully repeats most of the theorems with which Timpler had begun each of his chapters, except for a few minor differences, explicable by the fact that Lorhard was adapting Timpler's work to diagrammatic form and that the *Ogdoas* was a book for *studiosis adolescentibus* of the Gymnasium in Sankt Gallen where he was rector. The only important difference is that Lorhard introduces a new word, not found in Timpler, "*Ontologia*", by which he means all metaphysics. In the title page of the *Ogdoas* and in the title of his Ramistic diagram, Lorhard equates the two words with the phrases "*Metaphysices, seu Ontologiae*", and "*Metaphysicae seu Ontologiae Diagraphe*" respectively. (A similar phrase also occurs in the dedicatory letter).

I have also found another copy of the Ogdoas Scholastica (1606), in the Universitäts- und Landesbibliothek Sachsen-Anhalt in Halle, in

addition to the four copies indicated on the website *Ontology. Theory and History*."

April 27, 2011: An update on Lorhard from Marco Lamanna:

Latest Findings on Jakob Lorhard and the Rise of the Term Ontology

"My latest finding at the Universitätsbibliothek Marburg of the *Lysis duorum sophismatum pro omnipraesentia carnis Christi in Eius Persona* by Jakob Lorhard, gives us the definitive confirmation of the presence of Lorhard in Marburg in 1607.

The work regards a public discussion held by Lorhard at the Faculty of Theology of Marburg's Philipps-Universität in 1607. It contains two dedications: the first to Hermann Vultejus (1565-1634), professor of law and chancellor at University of Marburg, and the second to Gregor Schönfeld (1559-1628), professor of theology and superintendent in Hessen.

In the work, Lorhard for the most part discusses the theme of the omnipresence of Christ in the world, contrasting every pantheistic degeneration.

Lorhard's "exoteric" approach is evident. He argues only on the basis of the literal exegesis of the Sacred Scripture, as evident also in his *Kurtzer begriff Dess wahren ungefälschten Christenthumbs*, completed on his return from Marburg to St. Gallen and published posthumously in 1610.

Probably, the unsuccess of his appointment as professor of theology in Marburg was caused by the distance of Lorhard's theology from the esoteric and apocalyptic researches that were being affirmed in Marburg and at the court of the prince Moritz of Hessen in Kassel, for example with a theologian like Raphael Egli (1559-1622). Perhaps this is the reason that led his return to St. Gallen from Marburg, just four months later, in semptember 1607.

The publication in Marburg of the Lysis not only confirms the indications contained in the biography of Lorhard by Georg Leonhardt Hartmann, but also confirms above all the hypothesis formulated by Peter Øhrstrøm, Jan Andersen, Henrik Schaerfe (*What has happened to Ontology*, in F. Dau / M.-L, Mugnier, G. Stumme (eds.), Springer Verlag, Berlin-Heidelberg 2005): Rudoph Göckel

most probably met Lorhard in Marburg between may and September of 1607, and from Lorhard thus renewed the neologism *ontology*."

The first occurrence of ontology in English

According to the last printed edition of the *Oxford English Dictionary* (Second edition, 1989) the first occurrence of "ontology" was in *An Universal Etymological English Dictionary* (1721) by Nathaniel Bailey (born ? - died 1742): "An Account of Being in the Abstract."

Isaac Watts (1674-1748) in his *Logic, or the Right Use of Reason in the Enquiry after Truth. With a Variety of Rules to Guard against Error, in the Affairs of Religion and Human Life, as well as in the Sciences* (1724) wrote: "In order to make due enquiries into all these, and many other particulars which go towards the complete and comprehensive idea of any being, the science of ontology is exceeding necessary. This is what was wont to be called the first part of metaphysics in the peripatetic schools" I. VI. 9.

The first book in English with "ontology" in the title is: Isaac Watts - "*Philosophical Essays on Various Subjects, (...); With some Remark s on Mr. Locke's Essay on the Human Understanding. To which is subjoined a brief Scheme of Ontology, or the Science of Being in general with its Affections*" (1733).

The on-line *Draft Revision* of the Oxford English Dictionary (September 2008) give as first occurrence (discovered by Fred R. Shapiro in a message to the *Linguist List* (December 25, 2005): Gideon Harvey (1636/7-1702): *Archelogia philosophica nova; or, New principles of Philosophy. Containing Philosophy in general, Metaphysicks or Ontology, Dynamilogy or a Discourse of Power, Religio Philosophi or Natural Theology, Physicks or Natural philosophy* - London, Thomson, 1663, Book II, Chapter One, pp. 17-18: "It is [Metaphysics] called also the First Philosophy, from its nearest approximation to Philosophy, its most proper Denomination is *Ontology*, or a Discourse of a Being."

The first occurrence of ontologia in a work written in German

The poet Christian Weise (1642 - 1708) in a novel published in German in 1675 with the pseudonym *Catharinum Civilem* made use

of the Latin "ontologia":

"Denn durch die PHILOSOPHIE. wird allhier nicht eine DISPUTATION aus der ONTOLOGIA verstanden sondern die rechte PHILOSOPHIA PRACTICA, welche sich in dem Lichte der Natur und in denen Menschlichen Verrichtungen umbsiehet und dannen hero einen festen Grund der unverfälschten Klugheit gestellet hat." (Chapter VIII, p. 181)

Christian Weise, *Die drey Klügsten Leute in der gantzen Welt*, Leipzig, J. Fritzsch, 1675 (Critical edition in: *Sämtliche Werke*, XVIII, Berlin: Walter de Gruyter, 2005, p. 112)

The first occurrence of ontologie in Denmark

February, 24th 2004: I received this message from Dr. Jan Andersen (research assistant with Professor Peter Oehrstroem at the Department of Communication. Aalborg University, Denmark) on the origin of "ontology" in Denmark:

"The Danish-Norwegian author Jens Kraft (1720-1765) published a text book in Danish titled 'Ontologie' as a part of his 'Metaphysik' in 1751. When the book was published Kraft was a professor (mathematics and philosophy) at the Soroe University. 'Ontologie' was meant as a text book aimed at the students there. 'Ontologie' was a part of the larger work 'Metaphysik' which also contained 'Cosmologie' (1752), 'Psychologie' (1752) and 'Naturlig Theologie' (1753). Kraft was a dedicated admirer of Christian Wolff and had (before writing the book) attended Wolff´s lectures at Halle University, Germany, but, as opposed to Wolff, Kraft was an adherent of Newtonian theory, and is considered to be the prime spokesman and the introductor of Newton to Denmark and Norway (the two countries being one united kingdom at the time). Kraft is mentioned in the Dictionary of Scientific Biography (Charles Coulston Gillispie ed.) vol. VII, New York 1973, Charles Scribner's Sons, p. 490 in an article written by Kurt Moeller Pedersen. Kraft´s book can be found at the Statsbiblioteket in Aarhus, Denmark."

Selection of studies on the origin of the Latin ontologia

"In the prolegomena to his *Elementa philosophiae sive Ontosophiae* (1647), Johannes Clauberg remarks: 'Since the science which is about God calls itself Theosophy or Theology, it would seem fitting to call Ontosophy or Ontology that science which does not deal with this and that being, as distinct from the others owing to its special name or properties, but with being in general.' This text may be held, in the present state of historical knowledge, for the birth certificate of ontology as a science conceived after the pattern of theology, yet radically distinct from it, since being qua being is held there as indifferent to all its conceivable determinations. 'There is, Clauberg says, a certain science which envisages being inasmuch as it is being, that is, inasmuch as it is understood to have a certain common nature or degree of being, a degree which is to be found in both corporeal

and incorporeal beings, in God and in creatures, in each and every singular being according to its own mode.' Leibniz will later praise Clauberg for such an undertaking, but he will regret that it had not been a more successful one. The very word "ontology" occurs at least once in an undated fragment of Leibniz, (1) and one can expect accidentally to meet it later in various places, (2) but it is not until 1729 that it finally comes into its own with the Ontologia of Christian Wolff."

"C'est un fait que l'*Ontologia* de WOLFF constitue une étape importante de l'histoire de la métaphysique, même s'iln'est pas vrai, comme on le dit trop souvent, qu'elle soit la toute première Ontologie. Avant lui déjà, en effet, CLAUBERG avait fait paraître à Amsterdam en 1656 une Metaphysica de ente quae rectius Ontosophia, aliarum Disciplinarum, ipsiusque quoque Jurisprudentiae et Litterarum, studiosis accomodata, car ainsi qu'il le déclare: sicuti...geosofia vel geologia dicitur quae circa Deum occupata est scientia: ita haec, quae non circa hoc vel illud ens speciali nomine insignitum vel proprietate quadam ab aliis distinctum, sed circa ens in genere versatur, non incommode Ontosophia vel Ontologia dici posse videatur (Opera omnia, Amstelodami, 1691 t. I, p. 281). De même, en 1669, le Père Réginald, dominicain, publia un ouvrage réédité à Paris en 1878 et intitulé: *Doctrinae Divi Thomae Aquinatis tria principia, cum suis consequentiis*, dont la première partie traite de l'être en général sous le titre: De Ontologia, cependant que Jean-Baptiste Du HAMEL, dans sa: *Philosophia vetus et nova ad usum scholae accomodata, in regia Burgundia ohm pertractata*, Parisiis, 1678, emploie le mot Ontologia

dans le même sens, lorsque, dans le tome III de cet ouvrage, divisant la métaphysique en trois parties, il déclare: In primo quae ad entis ipsius naturam, principia, affectiones et primas velut species pertinent, exsequimur; adeo ut Ontologiam seu entis scientiam hoc tractatu complexamur. Atque haec est prima philosophia aut scientia generalis, ex qua reliquae dimanant (p. 10 et 11 de l'édition de 1687).

Mais ces auteurs ne sont pas les premiers à avoir frayé la voie de l'Ontologie. Le terme même semble avoir fait sa première apparition, tout au moins sous sa forme grecque, dans le *Lexicon philosophicum quo tamquam clave philosophiae fores aperiuntur* de Rudolph GOCLENIUS (Frankfurt, 1613), où l'on peut lire à l'article: *abstractio*, p. 16, dans la marge: οντολογία, et philosophia de ente, et dans le corps de l'article: οντολογία, idest philosophia de ente seu de transcendentibus.

† [*iudiciũ.*]

Rudolf Göckel, *Lexicon philosophicum quo tanquam clave philosophiae fores aperiuntur, informatum opera et studio Rodolphi Goclenii*, Frankfurt, 1613: *abstractio* ('ontologia' is written in Greek).]

C'est encore sous sa forme grecque qu'on le rencontre chez Abraham CALOV qui, dans sa: *Metaphysica divina a principiis eruta, in abstractione entis repraesentata ad S. S. Theologiam applicata, monstrans terminorum et conclusionum transcendentium usum genuinum abusum hereticum constans* (Rostockii, 1636), déclare: Scientia de ente, Metaphysica appellatur communiter a rerum ordine,

οντολογα rectius ab objecto proprio (*Scripta philosophica*, Lubecae, 1651, p. 145) et qui, tout au long de cet de cet ouvrage, appelle ainsi οντολογα la science de l'être; à tel point que sa *Metaphysica divina*... peut être considérée, dans l'état actuel de nos connaisances, comme la première ontologie. Quoi qu'il en soit, on peut bien dire qu'avec CALOV, l'Ontologie en tant que discipline est déjà née. Et c'est cette science de l'être en général que les scolastiques du XVII siècle se sont plu à ériger en une sorte d'introduction à la philosophie - d'où le nom de philosophie première qu'ils lui donnèrent encore -- et qu'ils réduisirent peu à peu à n'être qu'un vocabulaire ou un lexique philosophique, destiné à servir d'instrument de base à l'enseignement de la métaphysique, grâce à la définition des termes employés par celle-ci, comme nous l'apprennent: Johann Franz BUDDE dans une longue note de son ouvrage: *Isagoge historico-theologica in theologiam universam singulasque ejus partes*, Lipsiae, 1727, lib. I, cap. IV, 28, t. I, p. 252-261, et surtout Jacob THOMASIUS dans son: *Historia variae fortunae quant Metaphysica jam sub Aristotele, jam sub Scholasticis, jam sub Recentibus experta est*, ajoutée en appendice à ses *Erotemata metaphysica pro incipientibus*, Lipsiae, 1692, p. 19-87.

Ainsi donc, lorsque l'ouvrage de WOLFF parut, l'ontologie était une conquête de la philosophie vieille déjà d'à peu près cent ans. Mais, à défaut d'en avoir été le créateur, il peut bien être considéré comme son réformateur et son rénovateur. Car, indépendamment du fait qu'il a été le premier à lui donner des dimensions matérielles aussi considérables et à en faire un traité bien à part à côté des autres traités constituant l'ensemble de la métaphysique, il s'est élevé contre la prétention d'en faire purement et simplement un lexique philosophique et a tenté de l'ériger en authentique science première qua *omnis cognitionis humanae principia continentur*, comme le dit son titre. Il lui attribue, en effet, pour rôle d'établir les principes et de définir les concepts nécessaires aux autres disciplines, non seulement philosophiques, mais aussi scientifiques et utiles à la pratique de la vie, en même temps qu'il vise à y édifier une théorie générale de l'être, ainsi que le veut la définition qu'il en donne au 1: *Ontologia seu Philosophia prima est scientia entis in genre, seu quatenus ens est*. En un mot, pour être l'héritier des scolastiques du XVII siècle, et tout en adoptant leur réduction de la philosophie première à l'Ontologie, alors qu'elle était coextensive à toute la métaphysique chez

ARISTOTE, WOLFF n'en a pas moins donné à celle-ci un statut à la fois plus ample et plus ferme. Et c'est ce qui fait que son nom est resté plus intimement lié que celui de ces derniers à son apparition." (p. 116).

From: Jean École, *La Philosophia prima sive Ontologia de Christian Wolff: Histoire, doctrine et méthode,* Giornale di metafisica, 1961/1 pp. 114-125 (reprinted in: Jean École, *Introduction à l'Opus Metaphysicum de Christian Wolff,* Paris, Vrin, 1985 pp. 8-19).

"Christian Wolff popularized (in philosophical circles) the word 'ontology' (*ontologia, Ontologie*). The word appears in the title of his *Philosophia prima sive ontologìa methodo scientifica pertractata, qua omnes cognitionis humanae principia continentur*, first published in 1730. *Ontologia seu philosophia prima* is defined as *scientia entis in genere, quatenus ens est* (op. cit., § 1). Ontology uses a "demonstrative [i.e., rational and deductive] method" (ibid., § 2), and purports to investigate the most general predicates of all *entes* as such (ibid., § 8). Following Wolff, Alexander Baumgarten (>*Metaphysica*, 1740) defined ontology (also called ontosophia, metaphysìca, metaphysica universalis, architectoníca, philosophia prima) as "the science of the most general and abstract predicates of anything" (op. cit., § 4), in so far as they belong to the first cognitive principles of the human mind (ibid., § 5). Kant launched an epoch-making attack against rational ontology in the sense of Wolff and Baumgarten; for ontology was to him both a pseudo-science and a temptation. He was convinced that he had succeeded in eliminating it by the "transcendental Analytic." The whole *Critique of Pure Reason* is, in a way, the work of a man who was obsessed, and deeply distressed, by ontology. On the other hand, the expression 'ontological proof (*ontologischer Beweis*) used by Kant is not a mere alternative expression to 'Anselmian proof; it is intended to emphasize the very nature of the proof. Since Kant is at the crossroads of modern thought, it is important to know what he had in mind when he decided to overthrow the ambitious projects of rational ontologists. An examination of the origins of the concept of ontology is an indispensable step in the clarification of Kant's thought.

Although the concept of ontology preceded the word 'ontology', it can be assumed that only when such a word (or the alternative word,

'ontosophy') carne into use, could philosophers begin to understand fully all the implications of the concept." (p. 36)

"Unless I have missed the pertinent texts, a new name for a new discipline of the character stated above -- which is at the same time 'a new name for some old ways of thinking' - occurred only in the Seventeenth Century. It was proposed by philosophers who did not belong to the Schools, but who had been directly or indirectly influenced by the Scholastic tradition supplemented by the modern rationalist tradition. A number of historians (Rudolf Eucken, Etienne Gilson, Hans PichIer, Max Wundt, Heinz Heimsoeth) mention Johannes Clauberg as the first philosopher who used the new term we are looking for: the term 'ontology.' This is not the case. The first instance occurs in Rudolf Goclenius (*Lexicon philosophicum, quo tanquam clave philosophiae fores aperiuntur, Informatum opera et studio Rodolphi Goclenii*. Francoforti, 1613). In his *Worterbuch der philosophischen Begriffe*, Rudolf Eisler refers to this instance, but fails to indicate its significance. In a way, Eisler was right, because it has no significance.(1) The word 'ontology' occurs in Goclenius's *Lexicon* on page 16 as follows: "οντολογα, philosophia de ente." This is all. Furthermore, it occurs on the left margin of the article "Abstractio," in which the author discusses the concept of abstractio materiae according to Alexander of Hales. lf this were not enough, Goclenius does not even include an article on Metaphysics or First Philosophy in his Lexicon. There is, indeed, an article on Philosophy (Philosophia) which contains various definitions, among them the following one: Philosophy can be understood *per excellentiam as prima philosophia* (definition 4). Therefore, if it is true that Goclenius actually used the word 'ontology' he did very little with it. Neither does he mention such a word in his *Isagoge* (Rod. Goclenii ... *Isagoge in peripateticorum et Scholasticorum primam philosophiam quae vulgo dicitur Metaphysica*, Francoforti, 1612). Here the expression prima philosophia is introduced as a technical term for the more "common" Metaphysica. Goclenius writes to this effect: '1. Duae sunt communissimae disciplinae liberales: Logica, Metaphysica, quae sapientia dicitur ... 3. Metaphysica seu prima philosophia cognitio communis est eorum, quae sunt altissimis causas & prima principia; ... 9. Prima philosophia scientia de Ente qua ens, hoc est, universaliter sumto' (P.A. 4). He therefore relapsed into a relatively long established tradition in philosophical terminology, but 'to relapse

into' is probably too strong an expression when he had scarcely done anything to produce a new terminology. At any rate, his introduction of the word 'ontology' in the Lexicon does not seem to be the result of a careful plan; it looks more like a purely casual and inconsequential remark." (pp. 38-39).

Notes

(1) Jean École, in an article on Wolff's *Ontologia* (Rivista di metafisica, XVI [1961], 114-125) published after the present one was written, also mention Goclenius.

[École's article is the French version of the author's Latin "Introductio" to his critical edition of Wolff's *Philosophia Prima sive Ontologia*, Hildesheim: Olms, 1962].

From: José Ferrater Mora, "On the Early History of 'Ontology' ", in: *Philosophy and Phenomenological Research*, 24, 1963 pp. 36-47.

"Wir gehen vom Titel "Ontologia" aus Dieser ist dem Christian Wolff ganz selbstverständlich. Er benutzt ihn, ohne über seine Herkunft Rechenschaft abzulegen. Dabei ist nicht die historisch verstandene Herkunft entscheidend, sondern die ausgewiesene Zugehörigkeit dieses Titels zum Wesen der in ihm ausgesprochenen Prima Philosophia aus gerade diesem Wesen. Bekanntlich ist der Titel "Prima Philosophia" ein von Aristoteles der Sache und dem Kern der Sache des Denkens verliehener Titel. Dieser Vorgang der Namensgebung ist kein beliebiger! Der Titel "Prima Philosophia", beziehungsweise "prothé filosofia" wird dem Denken beigegeben, als es die ihm zugehörige Gestalt aus seinem eigenen Wesen annimmt. Die ihm später zugetragenen Titel "Metaphysik" und "Ontologie" sind dagegen nur Nebentitel.

Johannes Micraelius (1597 - 1658) schreibt in seinem Lexicon Philosophicum: Metaphysicae objectum est Ens quatenus Ens est. Unde etiam vocatur aliquibus ; (1).Er spricht hier ausdrücklich von "einigen"! Einer davon ist Johannes Clauberg (1622 - 1665), der oft als der erste genannt wird, der den Titel "Ontologia" gebraucht. Dieser verfaßte ein Werk: Elementa philosophiae sive Ontosophia (Groningen 1647). 1660 kam das Buch, oder vielmehr sein Hauptteil, unter einem anderen Titel als: Ontosophia nova, quae vulgo Metaphysica (Duisburg) heraus; es konnte 1664 unter einem

nochmals geänderten Titel erscheinen: Metaphysica de ente, quae rectius Ontosophia, Amsterdam. Bereits in der ersten Ausgabe von 1647 ist der Titel "Ontosophia" auch durch den Titel ,,Ontologia" verdeutlicht (2). Die dritte Ausgabe ist später in die Opera philosophica aufgenommen worden (1691). Dort lautet der Passus: Sicuti autem: Ontologia dicitur quae circa Deum occupata est scientia: ita haec, quae non circa hoc vel illud ens speciali nomine insignitum vel proprietate quaedam ab aliis distinctum, sed circa ens in genere versatur, non incommode Ontosophia vel Ontologia dici posse videatur (3).

Wenig später heißt es: Est quaedam scientia, quae contemplatur ens quatenus ens est, hoc est in quantum communem quandam intelligitur habere naturam vel naturae gradum, qui rebus corporeis et incorporeis, Deo et creaturis, omnibusque adeo et in singulis entibus suo modo inest. Ea vulgo Metaphysica, sed aptius Ontologia vel scientia Catholica, eine allgemeine Wissenschaft, et philosophia universalis nominatur. 13). Der Titel "Ontologia" findet sich jedoch noch vor Clauberg. Abraham Calov (1612 - 1686) hat ihn schon 1636 in seiner Metaphysica divina: Scienta de Ente Metaphysica appellatur communiter a rerum ordine, ' οντολογα; rectius ab objecto proprio (4). Und noch vor Calov benutzt ihn Johann Heinrich Alsted (1588 - 1638). Er gibt 1620 seinen *Cursus philosophici Encyclopaedia* heraus. Dort heißt es: *Metaphysica est sapientia quae considerat ens qua ens: alias dicitur prima philosophia*, et οντολογα in Lexico Goclenii pag. 16 (5). Alsted verweist hier auf den Schulmetaphysiker Rudolf Göckel (Goclenius, 1547 - 1628), der nach allem, was wir wissen, der erste gewesen ist, der den Titel "Ontologia" geprägt hat (6)." (pp. 265-266)

(6) Das hätte man schon immer im Eisler nachschlagen können: Rudolf Eisler, *Wörterbuch der Philosophischen Begriffe*, 4. Aufl., Berlin 1927, Artikel "Ontologie". Trotzdem hielt sich hartnäckig die Behauptung, Clauberg sei der Erfinder dieses Titels gewesen

From: Ernst Vollrath, "Die Gliederung der Metaphysik in eine Metaphysica Generalis und eine Metaphysica Specialis", *Zeitschrift für Philosophische Forschung*, April-June 1962, XVI, 2.

"La thèse de Goclenius qui sépare radicalement la *prima philosophia* et la *metaphysica* (1), nous paraît d'autant plus intéressante que son auteur est très vraisemblablement celui qui a forgé pour la première fois (2) le mot d'ontologie, destiné par la suite à nommer précisément cette *philosophia prima* comme science universelle, dans sa séparation de toute recherche théologique appréhendée désormais comme 'spéciale'. On peut lire en effet, sous la plume de Goclenius, mais encore sous sa forme grecque, le terme d' ontologia, non pas à vrai dire dans son Isagoge, mais dans le célèbre *Lexicon philosophicum quo tanquam clave philosophiae fores aperiuntur, informatum opera et studio Rodolphi Goclenii*, publié quelques années plus tard, à Francfort en 1613. (3) Il est très significatif de trouver cette première occurrence du terme à l'article *abstractio*. Nous avons déjà signalé (cf. chapitre III, p. 458 sq.) que Pérérius introduisait son opposition insolite entre philosophie première métaphysique à partir d'une réflexion critique sur la doctrine

classique ('aristotélico-thomiste') de l'abstraction, et que Suárez développait le plus nettement l'orientation ontologique de son projet métaphysique en fonction de sa doctrine de l'abstraction et de la *praecisio* (*Disputationes Metaphysicae*, II, 2, 15-16)."

(1) Est-il besoin de souligner qu'une telle opposition est contraire à l'esprit de l'enquête aristotélicienne comme à l'élaboration terminologique des commentateurs les plus anciens?

(2) La prudence est ici plus que jamais de mise. Après avoir rédigé ces pages, nous avons été mis, grâce à l'obligeance de J. S. Freedman, à qui l'on doit un excellent travail (*Deutsche Schulphilosophie im Reformationszeitalter 1500-1650*, dact., Münster, 1984), sur la piste d'un auteur assez singulier et à la vérité peu connu, un certain Jacobus Lorhardus, recteur au Gymnasium de Saint-Galles, qui publie à Bâle en 1613, comme secunda editio un *Theatrum philosophicum* qui présente à la manière ramiste une série de tabelles à travers lesquelles se répartissent toutes les disciplines philosophiques. Or le 'diagraphe' qui introduit les divisions de la Métaphysique est précisément intitulé : *Metaphysicae seu Ontologiae Diagraphe* (p. 157). Et il se termine, après la division des ficta ou des êtres de raison, par ces mots : *Finis Ontologiae*. L'ouvrage de Lorhardus est très remarquable également dans sa définition la plus générale de la Métaphysique qui fait évidemment référence à Clemens Timpler (cf. supra, p. 265 sq.): " Metaphysicae (quae est epistheme tou noetoue noeton quatenus ab homine naturali rationis lumine sine ullo materiae conceptu est intelligibile) partes duae sunt... ! "(ibid.).

(3) Reprint Hildesheim, 1964. Signalons aussi qu'en revanche le terme *ontologia* n'apparaît pas, du moins à notre connaissance, dans le *Lexicon philosophicum graecum* de 1615 (Marbourg). (p. 410 n. 6)

From: Jean-François Courtine, *Suárez et le système de la métaphysique,* Paris: Presses Universitaires de France 1990.

Lutherans vs Calvinists on the subject matter of metaphysics

In Calvinism the idea of a synthetic presentation of doctrine was retained, but the encyclopedia of the sciences was enlarged and transformed into a system of systems, governed by a theory of the arts, a “technology”, according to which philosophical conclusions

were presented as derived from nature and theological conclusions as derived from revelation. Whereas Lutheran thinkers - regarding their teaching as essentially practical - adopted the analytic order in presenting their theological teaching, Reformed theologians of the early seventeenth century in Germany regarded their science as the theoretical and used rather a synthetic order in the presentation of doctrine. In accordance with the architectonic spirit of Calvinist Scholasticism, Reformed dogmatics began, in accordance with the synthetic order, with the glory of God as the first cause and final goal of all things, and treated his eternal decrees of providence and predestination before taking up his government of the world in time.

In this conception natural theology formed an integral part of the *cognition Dei perfecta* at which theology aimed. Reformed writers tended, therefore, to distinguish clearly between natural theology and the doctrine of being - a distinction only reluctantly accepted by the Lutherans. Calvinist authors spoke of two sorts of doctrine, a doctrine of God to the extent that he is accessible to human reason and a doctrine of being which had the function of assigning to each of the particular disciplines its proper domain.

The Marburg professor Rudolph Clementius (d. 1628) distinguished two separate disciplines, a universal science called “first philosophy” or “ontology” and a particular science called “natural theology”. Ontology deals with being, its properties and its principles; natural theology studies the various types of immaterial being: God, the intelligences and the human soul. The term “metaphysics” was used to designate both. In the works of authors like Bartholomeus Keckckermann (d. 1609) of Heidelberg and Danzig, Clemens Timpler (d. 1624) of Heidelberg and Steinfurt, and Johann Heinrich Alsted (d. 1638) of Herbom there then appeared a new, unified vision of the encyclopaedia of the scientific disciplines in which ontology had the role of assigning to each of the particular disciplines its proper domain. This new vision was grounded in a conception of doctrine which was specifically a product of the Renaissance, a conception which set it apart from the Aristotelianism of both Catholic Scholasticism and Lutheran Orthodoxy. According to the traditional Aristotelian understanding, taken up by Catholic theologians, scientific knowledge was - as we have seen - made up of conclusions which are both true and certain, because they are the result of a

demonstration based on an evident principle or cause. “Science” was the habit or faculty by which the mind is disposed to assent to such conclusions. Only necessary, universal statements can be scientific; there can be no demonstration of contingent, singular facts and no science of changeable things as such.

Calvinist writers departed from this traditional definition of scientific knowledge in a way which was conditioned by Reformed theology. Because they wanted to assure the truth and certainty of theological conclusions, they extended the range of scientific validity beyond the universal conclusions which natural theology can derive from the properties of things to the singular, contingent facts of history which are dependent on God’s providential care and which revealed theology holds, on the testimony of Scripture, to be principles of knowledge.

In the approach of men like Keckermann scientific doctrine was, for this reason, understood as a body of knowledge, systematically ordered so as to make it possible for a learned man to impart the habit of scientific knowledge to others by correct explanation. The notion of a *corpus doctrinae* differed from the Lutheran idea in a way which betrayed the influence of humanism. Whereas Lutheran writers concerned themselves primarily with theological doctrines and sought simply to show the logical connections between individual theological teachings, the Calvinists saw theological doctrine as part of the sum total of the knowledge which has been gained by man in the course of history and transmitted to the present generation by written and oral tradition. The task of the teacher was to order, to systematize, the doctrine of each of the disciplines and to relate them to one another in a new encyclopaedia of knowledge. In his *Praeeognita philosophica* (Hanau 1608) Keckermann presented a general theory of science - now we should probably say a theory of art - in which he appealed to the norms of certitude which had been proposed by Melanchthon: revelation, the universal sense experience of men, common innate notions and the orderly presentation of syllogistic conclusions (*Opera, Corpus Reformatorum*, XIII 149-53, *De anima, Causae certitudinis).*

Keckermann went beyond Melanchthon, however, by defining the « intellectus ordinis in syllogismo as a facultas artificialis acquisita per certam disciplinam ». By “faculty” he meant an internal source of

certitude which is a habit or disposition - in accordance with the Aristotelian conception. By the “discipline” through which the habit is acquired, he meant the external, ordered body of doctrine handed down in the traditional liberal arts which must be mastered by the learned man.

The most significant word in Keckermann’s definition is the word “artificial”. He described the habit acquired by the learned man not as “scientific”, but rather as “artificial”, because it concerns conclusions which belong to all the liberal arts and includes both universal conclusions drawn from the nature of things and singular, contingent conclusions based on tradition, for the reason that knowledge of both types of conclusion can be gained by the systematic application of methodical principles. (pp. 127-129)

Charles H. Lohr, "*Technologia*: The Calvinist Theory of Science in the Renaissance", in Gregorio Piaia (ed.), *La presenza dell'aristotelismo padovano nella filosofia della prima modernità*, Roma-Padova: Editrice Antenore 2002, pp. 123-132.

Further developments of the history of ontology

"In 1620 the Calvinist Johannes Heinrich Alsted (1588-1638) takes up the term 'ontology' and identifies ontology with metaphysics or 'first philosophy' as 'general discipline of being'. This ontology has a general part which deals with transcendentia and a special part which deals with praedicamenta (categories). Alsted opposes this general discipline or ontology to inferior disciplines which are concerned with special beings such as physics with natural bodies, mathematics with quantity), as well as to the science of transnatural beings, which he calls pneumatica or pneumatologia, the science of God, angels, and separate souls. Metaphysics or ontology is the most general discipline, which cannot have a double subject (being and God) (*Cursus philosophici Encyclopaedia,* 1620, Lib. V-VI).

Johann Micraelius (I579-1658) departs from the reduction of metaphysics to the science of being as being and sees it as embracing also the special sciences of pneumatology (theology, angelography, psychology). These he opposes to ontology as the general part (see the articles 'Metaphysica' and 'Philosophia' in his *Lexicon philosophicum*

of 1653). Micraelius thereby seems to coin the distinction between *metaphysica generalis* and *metataphysica specialis*, a distinction which has been current ever since. Thee notion of 'ontology' was also affected by Cartesianism. Johannes Clauberg distinguishes three kinds of entia: being as thinkable (*ens cogitabile*), being as something (*aliquid*), and being as thing or substantial being (*res sive ens substantiale*). Ontology or 'ontosophy' deals with being in the third sense and it presupposes the science of thinkable things, in other words metaphysics or 'first philosophy', as this is elaborated in Renée Descartes's *Meditationes* (*Metaphysica de Ente, quae rectius Ontosophia*, 1664, 1, 1-5).

Traces of this same distinction, between ontology and a science or method of thought, appear also in the 18th century, for example in the work of Christian Wolff and in Kant. According to Wolff, ontology deals with being in general, but it can also be termed 'first philosophy' in so far as it concerns first principles and notions 'which are used in reasoning' . The method of ontology conforms to that of mathematics (*Philosophia prima sive Ontologia*, 1730, 'Prolegomena')."Kant identifies ontology (the system of all those concepts and principles of reason which relate to objects in general) with the first part of the system of his metaphysics of nature. Ontology in this sense presupposes the method or propaedeutic of the critique of pure reason, the knowledge of the limits of human knowledge. Kant's reformed ontology is concerned only with objects which are accessible to human knowledge (appearing objects, ontology of 'immanent thought') and it is based on the principles of this knowledge developed by Kant in his 'analytic of the pure understanding' (*CPR,* Letter to Beck. 211 January 1792). (On the relations of methodology, metaphysics, and ontology, see also Johann Friedrich Herbart. for example *Kurze Enzvklopädie der Philosophie*, 1831, 11, 190, and Lotze).

Also in the 18th century. the German tradition tends sometimes to locate the object of ontology in the essence of things, rather than in the things themselves. In Wolff's work, this transformation becomes manifest in the fact that the first thing, conceived in being is not existence, but essence (*Philosophia prima*, 144). In Christian August Crusius, ontology becomes explicitly a science of the 'general essence of things', and he sees this essence as something to be analysed

entirely a priori (*Entwurf der notwendigen Vernunftwahrheiten*, 1745, 1, 5: see also Georg Bernhard Bilfinger. (1693-1750), Johann Heinrich Lambert, and Hegel).

As for the relation between metaphysics and ontology, Wolff (*Philosophia rationalis, 'Discursus praeliminaris'*, 79, 99), Crusius (*Entwurf*, 1, 5), and Kant (*CPR, Reflection* 4851) remain faithful to the distinction between general metaphysics (ontology) and special metaphysics (psychology or pneumatology, cosmology, theology).

In the 19th and 20th centuries, the evolution of the notion of 'ontology' can again be analysed in terms of the distinction between the object of ontology and the relation of ontology to other disciplines. The relation between ontology, 'epistemological' sciences and metaphysics is discussed by authors such as Rudolf Hermann Lotze, Nicolai Hartmann, and Günther Jacoby (1881-1969)."

From: Léo Freuler, "ONTOLOGY. I: History of Ontology", in: Hans Burkhardt & Barry Smith (eds.), *Handbook of Metaphysics and Ontology,* Philosophia Verlag GMBH, Munchen 1991, pp. 637-640.

"The study of being in so far as this is shared in common by all entities, both material and immaterial. It deals with the most general properties of beings in all their different varieties.

The books of Aristotle's Physics deal with material entities. His Metaphysics (literally 'what comes after the Physics'), on the other hand, deals with what is beyond or behind the physical world - with immaterial entities - and thus contains theology as its most prominent part. At the same time, however, Aristotle conceives this 'metaphysics' as having as its subject matter all beings, or rather being as such. Metaphysics is accordingly identified also as 'first philosophy', since it deals with the most basic principles upon which all other sciences rest.

From the very beginning, then, an alliance was established between theology and the science of being qua being, and this alliance was sustained successfully throughout the Middle Ages. By the seventeenth century, however, the two disciplines were beginning to fall apart, and there was effected a distinction between metaphysica generalis on the one hand - the science of the most general concepts or categories of being - and metaphysica specialis on the other -

embracing not only theology but also other special sciences of being, including psychology (the science of finite mind) and cosmology.

'Ontology', now, is just another name for metaphysica generalis as thus conceived. The tern was introduced into philosophy by the German Protestant Scholastic Rudolphus Goclenius (Rudolf Göckel) in his *Lexicon philosophicum* (1613) and was given currency above all through the influence of Christian Wolff (1679-1754).

Where metaphysics had traditionally confined itself to the treatment of existent beings, Leibniz, Wolff and others dealt also in their metaphysical writings with the being of what is merely possible. It fell to Meinong in his ' *Uber Gegenstandstheorie*' (1904) to conceive the project of an absolutely general 'theory of objects', which would embrace within its subject matter not merely actual and possible objects, but also impossible objects, obtaining and non-obtaining states of affairs and other higher-order objects, merely hypothetical objects, and also objects 'beyond being and non-being' which are as it were awaiting realization.

In part under the influence of Meinong, in part also under the inspiration of contemporary work in logic and mathematics, Husserl put forward in his *Logical Investigations* (1913-21) the idea of a 'pure theory of objects' or 'formal ontology', a discipline which would deal with such formal-ontological categories as: object, state of affairs, property, genus, species, unity, plurality, number, relation, connection, series, part, whole, dependence, magnitude, open and closed set, boundary, manifold, and so on.

Formal ontology would deal also with the different formal structures manifested by entire regions of being. To each such formal structure there would then correspond in principle a number of alternative material realizations, each having its own specific material or regional ontology. The most important such material ontology relates to the natural world of spatio-temporally extended things, and thus includes ontological theories of space, time, movement, causality, material body, and so on.

Next in order of development is the material ontology of organic entities, followed by the material ontology of minds (of thinking bodies and of their mental acts and states), perhaps also by the

material ontology of cultural and institutional formations." (pp. 373-374)

"Tinology": an alternative to Ontology?

"In our contribution to the *Festschrift* in honour of Ruedi Imbach the focus will be on the term « tino-logia ». The notion is not mentioned in the most complete philosophical dictionary of our time, the *Historisches Worterbuch der Philosophie,* which appeared in 13 volumes from 1971-2007. The vocable was suggested by French scholars two decades ago in their analysis of the genealogy of Western metaphysics and has since then found acceptance. « Tinology » is meant to characterize an alternative for the traditional ontological model of metaphysics. Influential was an observation made by Jean-Francois Courtine at the end of his monumental study on the metaphysics of Francis Suárez : « En rigueur de termes, l'ontologie classique-moderne devrait donc plutot être caracterisée comme une 'tinologie' »(1). The emergence of this neologism and its historical place is the first thing that calls for attention.

The emergence of the notion

The notion « tinology » originated in the study of ancient philosophy, was next applied to modern philosophy and finally also assigned to medieval philosophy.

1. In the continuation of the conclusion just cited, Courtine refers to Pierre Aubenque for the phrase « tinology », but does not specify this reference (2). It turns out that Aubenque puts forward the expression and explains its philosophical significance in an essay on Plato's *Sophist* (3). The analysis of the text is reason for a summary of the basic features of Stoic ontology: (i) only bodies « are » and can be called « beings » ; (ii) there are incorporeal realities, which are not « beings », namely place, time, void and the *lekton (*« sayable ») ; (iii) bodies and incorporeals, which constitute the Stoic world, are joint members of a single supreme genus, which is called « something » *(ti)*. It is the title for the most general determination, of which « being » is only a specification (4).

Aubenque's objective is to show the critical potential of the Stoic doctrine. In the history of ontology, the concept of « being » has again and again been found to be too determined and too limited, for instance, as « idea » or « substance », in proportion to the universal extension it claims. The Stoic « tino-logy » offer the possibility of « un dépassement de l'ontologie surdéterminée du substantialisme au profit d'une doctrine plus englobante du « quelque chose », c'est-e-dire, de la détermination en général » (3) Although the term « tinology » thus refers to a doctrinal development in ancient philosophy, its introduction has a general aim. It signifies an alternative model of metaphysics, insofar as it is based on a more encompassing notion than « being ».

2. In his study on Suárez, Courtine exploits the critical potential of the term. He applies the notion « tinology » to modern philosophy. He recognizes that the systematics underlying the *Disputationes Metaphysicae* is the Scholastic tradition of transcendental thought, but also highlights, the « modernity » of Suárez's metaphysics by presenting his thought as a « turn » (« le tournant Suárezien ») in the history of this discipline. The *Disputationes Metaphysicae* took a decisive step towards the early modern understanding of metaphysics, which devised an alternative for the Aristotelian ontological model.

One of its features is that knowability becomes the ultimate criterion of entity. At the end of this development metaphysics is no longer conceived as a science of (real) being, but as an « onto-logic », as a science of what is thinkable, a theory of « something *(ti)* in general », which can therefore be characterized as a « tinology » (6). In Courtine's reading, the most significant sign of this transformation is Suárez's identification of *ens* and *res*. The central notion of his ontology, becomes a new concept of « reality » *(realitas),* which does not refer to what actually « is », but to the more encompassing notion of *res,* less in the sense of « thing » than of « something » *(aliquid)* -- in an exemplary way expressed as « quelque chose » in French and « etwas » in German (7).

3. Courtine sees a prefiguration and preparation of the modern turn to a « tino-logical »understanding of metaphysics in medieval philosophy. He ascribes a partcular importance to Henry of Ghent's account of *res,* according to which « thing » is the most universal

concept and « the first object of metaphysical thought » (8). His conclusion inspired Olivier Boulnois, who explicitly labels one of the forms of metaphysics in the Middle Ages as « tinology ». Duns Scotus's First Philosophy is a tinology rather than an ontology, since it is the science of *res* or *aliquid,* that is, of all that is not nothing *(non-nihil).* This notion is more encompassing than « being », because it includes real being as well as what is merely thinkable (9). In the next pages, we make some observations on the search for an alternative, tinological model of metaphysics in medieval philosophy." (pp. 729-730)

Proceedings of the 13th International Conference on Conceptual Structures, ICCS 2005, Kassel, Germany, July 17-22, 2005, Berlin: Springer 2005, pp. 425-438

"Abstract: Ontology as the study of being as such dates back to ancient Greek philosophy, but the term itself was coined in the early 17th century.

The idea termed in this manner was further studied within academic circles of the Protestant Enlightenment. In this tradition it was generally believed that ontology is supposed to make true statements about the conceptual structure of reality. A few decades ago computer science imported and since then further elaborated the idea of 'ontology' from philosophy. Here, however, the understanding of ontology as a collection of true statements has often been played down. In the present paper we intend to discuss some significant aspects of the notion of 'ontology' in philosophy and computer science. Mainly we focus on the questions: To what extent are

computer scientists and philosophers -- who all claim to be working with ontology problems -- in fact dealing with the same problems? To what extent may the two groups of researchers benefit from each other? It is argued that the well-known philosophical idea of ontological commitment should be generally accepted in computer science ontology."

Peter Øhrstrøm, Sara L. Uckelman Henrik Schärfe, "Historical and Conceptual Foundations of Diagrammatical Ontology", in: Simon Polovina, Richard Hill, Uta Priss (eds.), *Conceptual Structures: Knowledge Architectures for Smart Applications*. 15th International Conference on Conceptual Structures, ICCS (2007), Sheffield, UK, July 22-27, 2007, Dordrecht: Springer, 2007 pp. 374-386.

"Abstract: During the Renaissance there was a growing interest for the use of diagrams within conceptual studies. This paper investigates the historical and philosophical foundation of this renewed use of diagrams in ontology as well as the modern relevance of this foundation. We discuss the historical and philosophical background for Jacob Lorhard's invention of the word 'ontology' as well as the scientific status of ontology in the 16th and 17th century. We also consider the use of Ramean style diagrams and diagrammatic ontology in general. A modern implementation of Lorhard's ontology is discussed and this classical ontology is compared to some modern ontologies."

    "In 1694, Leibniz defines his metaphysical project in the *Réflexions sur l'avancement de la métaphysique réelle*, et particulièrement sur la nature de la substance expliquée par la force, a French translation of the *De primae philosophiae emendatione et de notione substantiae*. In the following pages, the history of the concept of advancement from Bacon and Glanvill to Leibniz is investigated. The notion moves from dignity to progress. The reasons why the translation of *emendatio* by advancement is not sufficient lead the reader to look, with accuracy, at the syntagma 'real metaphysics', used by Leibniz from 1691 on. The *emendatio* involves both ideas of progress and correction. The latter is echoed in the 'real' metaphysics. Thus, the first elements of the history of that real metaphysics, a formula that occurs until 1716, are presented here. As the translation of *emendatio* by 'advancement' and 'real' is disjunctive, I suggest a one-word translation with the French *rétablissement*."

    "Medieval transcendentals are on the side of things while Kantian transcendentality is on the side of the knower. Is there a link between the two in the Seventeenth-Century scholastic understanding of 'supertranscendentals'? In the century before Kant, scholastic supertranscendental being was primarily identified with extrinsic intelligibility and regarded as a contribution of the knower. It was said to be the same as 'the object as such' (objectum ut tale). This seems very close to 'der Gegenstand uberhaupt' which Kant has called a 'missing concept' above the dichotomy of the possible and the impossible."

44. ———. 2013. *La nascita dell'Ontologia nella metafisica di Rudolph Göckel (1547-1628)*. Hildesheim: Georg Olms.

    "Nel dibattito seguito al cosiddetto *Ontological Turn* della filosofia analitica contemporanea un posto di assoluto rilievo ha avuto, e continua ad avere, l'ipotesi di distinguere l'ambito dell'ontologia da quello della metafisica. Si tratta solo dell'ultima insorgenza di un dibattito epistemologico che ha conosciuto più riprese nel corso dei secoli, in contesti anche molto differenti tra loro. A livello strettamente terminologico, la prima distinzione dell'ontologia dalla metafisica si registra all'inizio del XVII secolo, all'interno della *Schulmetaphysik* riformata, in particolare calvinista. È in quell'ambito che un autore come Rudolph Gōckel (lat. Goclenius) potè intestarsi

una simile operazione a seguito delle istanze scaturite dall'"importazione" dei modelli metafisici dell'aristotelismo gesuita (in particolare di Benet Perera, più che di Francisco Suárez) nella Germania protestante. Erano trascorsi quasi ottant'anni dall'interdetto pronunciato da Lutero contro la metafisica e le sue pretese epistemologiche. Il "ritomo" alla metafisica tra i calvinisti coincise pertanto con la nascita dell'ontologia come scienza propriamente detta e con la distinzione di quest'ultima dalla metafisica, intesa perlopiù come teologia: nel corso delle dispute tra riformati e protestanti si affinerà un modello che dominerà il dibattito scolastico in ambito continentale sino agli anni di Kant, determinando profonde conseguenze nel modo di pensare la realtà."

45. ———. 2014. "Ontology Between Goclenius and Suárez." In *Suárez's Metaphysics in Its Historical and Systematic Context*, edited by Novák, Lukáš, 135-152. Berlin: Walter de Gruyter.

Abstract: "From latest findings the "birth of ontology" has emerged as a debate in which three Reformed authors originally participated: Rudolph Goclenius, Clemens Timpler and Jakob Lorhard. Under this new label ("*ontologia*"), the Calvinist Goclenius aims to make the model of science of being first proposed by the Jesuit Benet Perera standard within Reformed scholastic philosophy. This paper focuses on the dispute between Goclenius and Timpler concerning the status of metaphysics and its subject-matter (*ens*). According to Timpler the subject of the universal part of metaphysics is not being qua being but the purely intelligible (*intelligibile*), a concept even more general than that of being. In this solution Timpler drew upon the Jesuit Pedro da Fonseca, who seemed to approve of the hypothesis that the concept of *ens* might be subordinated to *aliquid*, in a single passage of his *Commentarii in libros metaphysicorum Aristotelis*.

Unlike Timpler, Goclenius adopts the more traditional thesis according to which each noetic definition, however abstract and universal, has to be conceived "*sub specie entis*". Still, Goclenius' point of view is only seemingly "traditional", just like the doctrine of being on which he builds his metaphysics – or rather his "ontology" –, which is based on a new elaboration of

the concept of being and that of other transcendentals. In particular, Goclenius removes the concepts of *res* and *aliquid* from the list of transcendentals, and he puts them into extensional identity with the concept of *ens*. This philosophical choice of Goclenius is not new, but draws upon the doctrine of "*synonymia entis*", proposed also by Suárez in the *Disputationes metaphysicae* (DM 3.2.5)."

    "The bibliographical history offers an interesting point of view for a better understanding of the rise and development of ontology, as an autonomous discipline, in early modern thought. After Luther's interdict, the metaphysics was neglected in many protestant academies and excluded from the disciplinary classifications (§§ 1-2). The return of metaphysics, at the end of the 16th century, coincided, in many cases, with the affirmation of the new scholastic paradigm of ontology (§ 3). An illustrious precedent of this paradigm was constituted by the Jesuit Francisco Suárez and his *Disputationes metaphysicae* (§ 5). The Jesuit models - not only that by Suárez, but also those by Benet Perera and Pedro da Fonseca - represented the standard on which Calvinists and Lutherans built their own metaphysics in an ontological way. This paper provides a conspicuous number of case studies in which the passage from metaphysics to ontology becomes definitively clear: this debate takes place throughout the first handbooks, treatises, magisterial and doctoral disputations (§ 6) proposed by the Calvinist and Lutheran authors."

    "The aim of this paper is to focus on the distinction between logic and metaphysics in German philosophy from Philipp Melanchthon to G.W.F. Hegel. Its scope is a temporal route that goes from the Renaissance to the 19th century, and which exhibits a movement from one extreme to another. Thus, Melanchthon -- owing to his nominalistic background -- was in fact repelled by metaphysical forms and chose not to include metaphysics among the philosophical sciences. For him, metaphysics was to be identified with logic. On the other hand, Hegel was repelled by logical formalism and did not include logic among the philosophical sciences. For Hegel, logic was to be identified with metaphysics. While Melanchthon and Hegel are the subjects, respectively, of the first and last parts of this paper, the second, the third, and the fourth parts are dedicated to the understanding of the relationship between logic and metaphysics in the work of Scheibler, Leibniz and Kant." Bibliography of the Ontologists from 16th to 18th Centuries (First part)

Philosophers in chronological order:

- Pedro da Fonseca (1528-1599)
- Benet Perera (Benedictus Pererius) (1535-1610)
- Diego de Zúñiga (1536-1597)
- Rudolf Göckel (Goclenius) (1547-1628)
- Francisco Suárez (1548-1617)
- Gabriel Vasquez (Vazquez) (1549-1604)
- Diego Mas (Didacus Masius) (1553-1608)
- Cristóbal de los Cobos (1553-1613?)
- Jacob Lorhard (1561-1609)
- Clemens Timpler (1563/4-1624)
- Cornelius Martini (1568-1621)
- Bartholomäus Keckermann (1572-1609)
- Francisco de Araujo (1580-1664)
- Johann Heinrich Alsted (1588-1638)
- Joannes a sancto Thoma (John Poinsot) (1589-1644)

Suggested readings: among the most important studies on this period, I suggest: Courtine (1990) (fundamental) and (2005),

Freedman (1999), Honnefelder (1990) and (2002), Leinsle (1985), Lohr (1988, the best introduction in English), Marion (1975), (1981) and (1988), Schmutz (2000), Wundt (1939 and (1945), Zimmermann (1998).

For the complete references see: Selected Bibliography on the History of Continental Ontology from Suárez to Kant

Pedro da Fonseca (1528-1599)

Being (not God) is the subject of Metaphysics - Exclusion of accidental beings and beings of reason from Metaphysics

"Comprising four quarto volumes, Fonseca's *In libros Metaphysicorum Aristotelis Stagiritae*(Commentary on the Books of Aristotle's *Metaphysics*) contains a critical Greek text which he himself established from the best available manuscripts and printed editions. (...)

After rejectirig opinions which bold that the subject of metaphysics is God, Aristotelian 'separate substances', or being in the categories, Fonseca says that the first and adeguate subject of metaphysics is being -- in so far as it is common to God and creatures (*In libros Metaphysicorum* IV c.1 q.1 s.3). Understood in this way, being is analogous, although as said of species within one genus or of individuals within one species it is univocal. Between God and creatures, between created substance and accidents, between different classes of accident, and between real being and being of reason, being is analogous by analogies both of proportion and of attribution. As God is related to his being, so in proportion a created substance is related to its being. Likewise, as created substance and its being are related, so in proportion is an accident related to its being. Again, as one kind of accident is disposed to its existence so is each other kind of accident to its existence. And as real beings are disposed to their being, so beings of reason are to theirs (*Metaphysicorum* IV c.2 q. l s.5, 7). An analogy of attribution obtains among accidents as an analogy of two things to a third (that is, created substance), while between accidents and substance it is analogy of one to the other. The same is true of beings of reason among themselves and then in comparison with real being; for beings of reason do not depend less upon real beings than do accidents upon

substance. Again, a creature is being only by attribution or reference to God. Pursuing this, Fonseca distinguishes between formal and objective concepts. A formal concept is an 'actual likeness' (*actualis similitudo*) of a thing that is understood, produced by the intellect in order to express that thing. An objective concept is that thing is understood in so far as it is conceived through the formai concept. Both the formal and the objective concept of being are one, but not perfectly so for the reason that they do not prescind perfectly from the concepts of the members which divide being. Being as such is transcendent as are also the concepts of thing, something, one, true and good (*Metaphysicorum* IV c.2 q.2 s.1, 4-5; q.5 s.2).

In God alone there is a perfect identity of essence and existence. In every creature, essence is distinct from existence, but not as one thing from another. Rather, says Fonseca, a created essence is as distinct from its existence as a thing from its ultimate intrinsic mode. In this opinion, he tells us, he is following Alexander of Hales and Duns Scotus (12) (*Metaphysicorum*, IV c.2 q.3 s.4). It is possible that here Fonseca has also to some extent anticipated the Suárezian doctrine of modes.

Excluded from the subject of metaphysics are accidental beings (*entia per accidens*) and beings of reason. An accidental being, in the sense excluded, is a juxtaposition of two or more beings which lack any (intrinsic) relation to one another (*Metaphysicorum* IV c.1 q.1 s.3). Beings of reason are those which exist only inasmuch as they are objects of understanding. Within such beings of reason, as they stand in contrast with mind-independent real beings, Fonseca distinguishes proper being of reason from one which is fictitious. Properly taken, a being of reason is one whose being depends upon the understanding in such way that it can still be said of real beings, for example, the concepts of genus, species, and the like. A fictitious being as such is a being whose essence depends upon the understanding in such way that it cannot be said of any real being, for example, a chimera, a goat-stag, or the like (*Metaphysicorum* IV c.7 q.6 s.5).

2. Ashworth, Earline Jennifer. 1968. "Petrus Fonseca and Material Implication." *Notre Dame Journal of Formal Logic* no. 9:227-228.

   "I intend to show that the sixteenth century Jesuit, Petrus Fonseca, whose *Institutionurn Dialecticarum libri octo* (1564) was one of the most popular textbooks of the period, was well acquainted with [material implication].

   Fonseca introduces the subject in his discussion of the appropriateness of the name hypothetical' as applied to compound propositions."

3. ———. 1997. "Petrus Fonseca on Objective Concepts and the Analogy of Being." In *Logic and the Workings of the Mind. The Logic of Ideas and Faculty Psychology in Early Modern Philosophy*, edited by A., Easton Patricia, 47-63. Atascadero: Ridgeview.

   "Petrus Fonseca was a Portuguese Jesuit who lived from 1528 to 1599. He was one of those responsible for drawing up the Jesuit *Ratio Studiorum* which set the curriculum for Jesuit schools across Europe, and he was also responsible for initiating the production of the Coimbra commentaries on Aristotle, or Conimbricenses, which served as texts for many schools and universities in the seventeenth century. He was himself the author of two popular texts, an introduction to logic, and a commentary on Aristotle's *Metaphysics*. His logic text was one of two alternatives prescribed by the *Ratio Studiorum* of 1599, and may have been used at La Flèche; his *Metaphysics* commentary was used at many Jesuit schools, and may also have been used at La Flèche.

   In short, Fonseca was a leading figure in the Scholastic Aristotelian tradition of the lat *e* sixteenth century, a tradition which lies behind many of the developienis in early modem philosophy, and which in many ways is more important than the humanist tradition represented by Petrus Ramus.

   I have chosen to discuss Fonseca on objective concepts and the analogy of being both because an examination of these issues will help us to understand how logic came to be bound up with the philosophy of mind and because the history of how these issues were treated helps solve a small problem about Descartes's sources. My paper has four parts. I shall begin by giving a historical outline of treatments of analogy and their relevance to Descartes. Secondly, I shall discuss late medieval theories of signification, particularly as they appear in Fonseca, in order to show how logicians turned away from spoken language to inner, mental language. Thirdly, I shall explain how it was that analogy, as a theory of one kind of language use, was particularly bound up with the discussion of concepts. Finally, I shall look at the distinctions Fonseca made while discussing the

concepts associated with analogical terms." p. 47 (notes omitted).

6. Felipe, Donald. 1996. "Fonseca on Topics." In *Studies on the History of Logic. Proceedings of the Iii. Symposium on the History of Logic*, edited by Ignacio, Angelelli and Cerezo, Maria, 43-64. Berlin:

   de Gruyter.

   "Fonseca's treatment of topics in the rather substantial section on topics in *Institutionum dialecticarum* is of interest for at least three reasons. First, although the works of Bird, Stump, and Green-Pederson have shed a great deal of light on the tradition of the topics from Boethius to the 15th century, little is known about later scholastic views on topics in the late 16th and 17th centuries. The tract on topics in Fonseca's well-circulated logic book is certainly a good place to begin an examination of this obscure area. Second, in the tract on topics in ID a heavy dependence on Boethius's works *De topicis differentiis* and *In Cicerona topica* is very evident; a legitimate prima facie concern is that Fonseca's views on topics are unoriginal and not worth the trouble of careful study. I think it can be shown, however, that Fonseca's views on topics are very different from those of Boethius. Not only does Fonseca conceive of the primary purpose of topics in a different way from Boethius, but certain features of Fonseca's treatment of topics reflect the concerns of non-scholastic approaches to logic in the 16th century, e.g. the humanist concern for usefulness and relevance of logic, the humanist and Ramist concerns for pedagogy and easy memorization. What results is a rather unusual, hybrid treatment of topics. Finally, Fonseca's views on topics happen to provide some rather interesting background to Cartesian

criticism that certain rules of dialecticians hinder the natural light of reason in the discovery of truth."

    "This paper starts from the fact that the fourth volume of Fonseca's "Commentariorum in Metaphysicorum Aristotelis Stagiritae libros" (CMA) contains no "quaestiones" to Met. XII. An analysis of several explicit remissions to topics and questions to be developed in the context of that Artistotelian script (Met. XII), made by Fonseca in several places in volumes I, II and III of his CMA, reveals that his project was, from the beginning, to develop in the IV volume the subjects related to the philosophical discourse about God, divine attributes, omnipotence and freedom, contingency as well as to the separate substances'. This indicates clearly that the metaphysics

of Fonseca remained unfinished given the fact that the text on an important thematic cluster was not published notwithstanding the inclusion of such text in the original project of Fonseca. It is sustained that this fact should be taken in due consideration in any global interpretation of Fonseca's thought as well as in any comparison with other (finished) ontologies. Suarez is the most obvious case but not the only one."

    English abstract: "The aim of the dissertation is to show the place of Fonseca's work in the history of ontology. Starting with a close analysis of the texts connected with the core of classical metaphysics it is argued that the Commentarii in libros metaphysicorum Aristotelis far reacher than a mere textual commentary of Aristotle's text and represent one of the rare efforts to bring out a real synthesis of the main theoretical problems and questions emerging in the context of the aristotelian project of a first philosophy. This systematic work is carried out in the second half of the sixteenth century, just before the beginning of modern philosophy. Chapter one is dedicated to a brief account of Fonseca's work in his historical context. The remaining chapters explores some of the central topics of Fonseca's ontology. Chapter two, after a brief discussion of the aristotelian project of first philosophy, follows the transformation of this project in Fonseca's text discussing in particular his analysis of the concept of being under the heading ens commune and the meaning of the thesis of analogia entis as well as the distinction between a formal and an objective concept of being. In chapter three we discuss the question of the distinction between essence and existence in order to grasp the meaning of Fonseca's thesis of a modal distinction ex natura rei. Chapter four seeks to articulate Fonseca's interpretation of the classical doctrine of the transcendentals (unum, bonum,

uerum). The wish to articulate the universality and transcendentality of the concept of being has taken us to introduce the problem of the categories in this chapter and a brief historico-critical survey beginning in Aristotle and ending in Kant. Finally, chapter five discusses the meaning of the principle of non contradiction in Aristotle and in Fonseca."

    "It is claimed that in order to a better understanding of the reception of the text of the *Metaphysics* of Aristotle in the second half of the sixteenth century one must carefully distinguish the commentaries to the whole work from texts that treat particular questions. Although much work is still to be done, the great commentary of Pedro da Fonseca appears as the major original commentary to the *Metaphysics* produced during that period."

Benet Perera (Benedictus Pererius) (1535-1610)

"The problem that continues to haunt the commentators [of Aristotle] is how to reconcile *philosophia prima* as universal *scientia de ente* with *philosophia prima* as *theologia* . The latter appears to be a

special science rather than a universal one, since it studies one particular being (albeit the highest one), whereas the former studies being qua being. Aristotle had already recognised this problem and had come up with a solution that proved so cryptic that it provoked even more discussion. (26)

In the sixteenth and seventeenth centuries this discussion received an entirely new impulse in Protestant metaphysics. Although the early reformers had a very low opinion of Aristotelian metaphysics, by the end of the sixteenth century their successors had taken to writing textbooks on Aristotle's *Metaphysics* which copied the model of earlier commentaries. In fact, the Protestant scholasticism that emerged from the middle of the sixteenth century onwards drew heavily on the great Commentaries of the Counter Reformation, notably the ones composed by the Spanish Jesuits.(27) Faced with the institutional problem of how to teach theology and philosophy, the Protestant masters turned back to systematic Aristotelian philosophy of the familiar kind.(28) Moreover theological contorversies within Lutheranism and between Lutheranism and Calvinism "made precise definitions of terms like 'substance' and 'accident, 'nature' and 'person' absolutely imperative. (29)

This fuelled a keen interest in Aristotelian metaphysics. The Protestants were trying to construct a metaphysics conceived as a universal science of being, a *scientia de ente* . This meant the removal of all the heterogeneous elements of Aristotelian metaphysics that could only with difficulty be combined with this "pure" science of being. Hence we find in most Protestant metaphysicsa marked tendency to separate natural theology from metaphysics as a science of being *qua* being. Therefore, by separating true metaphysics as a universal science of being from natural theology as a *scientia particularis*, the ubiquitous problem of the subject matter of metaphysics was solved. The first to make this separation in the sixteenth century was actually a Jesuit, Benito Pereira (c 1535-1610). (30) His solution was taken up in various ways by Protestant scholastics, both Calvinist and Lutheran, such as Nicolaus Taurellus (1547-1606), Abraham Calov (1612-1686) and Rudolphus Goclenius the Elder (1547-1628). This tradition was not an isolated German phenomenon but also spread to England. By distinguishing between

"first" or "summary philosophy" and natural theology, Francis Bacon clearly draws on this tradition as well."

"Thomas Aquinas is usually studied as a metaphysician, this is not the reading given to him by three Renaissance philosophers. At the turn of the sixteenth century there were at least two schools of Thomists, one influenced by Avicenna and Scotus, and the other influenced by Averroes, a reading of Aristotle and Thomas Aquinas himself. The discussion below traces how the interpretation of Thomas' *De ente et essentia* was changed from being a text for metaphysics to one used for physics. One of the meanings of ens-being-was as a term that was coterminous with the object. As a result, the debate over the first thing thought or the De primo cognito debate centered around the meaning for the term ens, the following essay demonstrates how it moved from metaphysics to physics."

   "Benedictus Pererius (1535-1610) published in 1576 his most successful book *De principiis*, after he had taught philosophy at the Roman College of the Jesuits. It will be shown that parts of this book are actually based on his lectures. But the printed version was intended as a contribution to the debate within his Order on how science should be conceived. Pererius redefined the meaning of scientific speculation to the effect that metaphysics was split into ontology and natural theology, and that further speculative sciences, such as physics, gained their own competence. Throughout this book, as well as in his warning against magic and in his commentaries on the Bible, the Jesuit addresses Renaissance strains of neo-Platonism, Aristotelianism, and syncretism."

Rudolf Göckel (Goclenius) (1547-1628)

"Goclenius is best described as a protestant Scholastic', his most important contribution to the metaphysics being terminological. He is

the first philosopher to use the word *ontologia* [in Greek] (*) to describe general metaphysics (...) Strangely enough, this word does not appear in the *Isagoge*, but rather in the *Lexicon* . Still, his use of the word precedes that of Calovius by 23 years (...), and that of Jean-Baptiste Duhamel by 65 (...).

Although he does not use the term *ontologia* in the *Isagoge*, Goclenius does distinguish general metaphysics from special metaphysics in this work and a fortiori stood the concept of general metaphysics. The distinction between general and special metaphysics is not Goclenius's invention, however. The Spanish Jesuit Benito Pereira (c. 1535-1610) had already made it by 1562 (see Rompe *Die Trennung von Ontologie und Metaphysik. Der Ablösungsprozess und seine Motivierung bei Benedictus Pererius und anderen Denkern des 16. und 17. Jahrhunderts*1968, pp. 7-13) and an earlier manuscript making the distinction has been found (Zimmermann *Ontologie oder Metaphysik. Die Diskussion über den Gegenstand der Metaphysik an 13. und 14. Jahrundert* 1965, p. 60).

Both Wundt and Vollrath seem to have discovered the distinction between general and special metaphysics only in the *Praefatio* of Goclenius's *Isogoge* and have remarked that this distinction does not appear in the main text of the work. This is incorrect, however. The second part of the *Isagoge* is a series of disputations, the first of which, entitled *De ente Communi, ad omnes Categorias conseguente* discusses this distinction (Rompe is aware of this and hers is at present the most trustworthy account of Goclenius's work) Goclenius says that some divide first philosophy (*prima philosophia*), which is usually called 'metaphysics', into two parts. The first is universal and studies the most general notion of being common to all things (*de Ente in communi*). The second part is particular and deals with God, divine spirits (*daemones*), and disembodied intellect (*intellectus separatus a corpore*, p. 126). Goclenius ascribes this view to Aristotle and then goes on to say that he prefers to divide things up differently. Knowledge (*scientia*) should be divided into a universal and a particular part, and the universal part should be called 'first philosophy'. The particular part in turn should be divided into a 'transnatural' part which deals with God, and a 'natural' one, which deals with natural entities (pp. 126-7).

Goclenius's idea of knowledge, then, has a particular part which seems to contain every specific science. In contrast, Perera includes only theology, 'spiritology', and psychology, and Christian Wolff only theology, psychology, and cosmology, within special metaphysics. Thus Goclenius is proposing a way of cutting up the sciences such that *prima philosophia* is truly cast in the role of the queen of the sciences, lording over them all as the *scientia universalis* . On the face of it, Goclenius's taxonomy of metaphysics is more reasonable than that of Wolff or Pereira. If one is going to take seriously the notion of a 'superscience' which studies the most abstract idea of being which the objects of all specific sciences share, then one is compelled, I think, to include all of the particular sciences within specific metaphysics. This is true *unless,* of course, one has platonic misgivings about the possibility of being able to have knowledge about substances which have matter mixed up in them. However, a good Scholastic, wedded as he is to the spirit of Aristotle, has no such misgivings."

(*) The term *ontologia* was coined by Jacob Lorhard in 1606 [Note added by Raul Corazzon]

From: *Goclenius, Rudolphus* by Jeffrey Coombs - in: *Handbook of Metaphysics and Ontology* - Edited by Barry Smith Barry and Hans Burkhardt. Munich: Philosophia Verlag 1991, pp. 312-313.

"Thus the Marburg professor Rudolph Goclenius in the preface to his *Isagoge in primam philosophiam* (1598), spoke of two separate sciences, a universal science called 'first philosophy' and a particular science called 'metaphysics'. First philosophy deals with being, its properties and its principles; metaphysics studies the various types of immaterial being: God, the intelligences and the human soul."

2. ———. 2013. *La Nascita Dell'ontologia Nella Metafisica Di Rudolph Göckel (1547-1628)*. Hildesheim: Georg Olms.

"Nel dibattito seguito al cosiddetto *Ontological Turn* della filosofia analitica contemporanea un posto di assoluto rilievo ha avuto, e continua ad avere, l'ipotesi di distinguere l'ambito dell'ontologia da quello della metafisica. Si tratta solo dell'ultima insorgenza di un dibattito epistemologico che ha conosciuto più riprese nel corso dei secoli, in contesti anche molto differenti tra loro. A livello strettamente terminologico, la prima distinzione dell'ontologia dalla metafisica si registra all'inizio del XVII secolo, all'interno della *Schulmetaphysik* riformata, in particolare calvinista. È in quell'ambito che un autore come Rudolph Gōckel (lat. Goclenius) potè intestarsi una simile operazione a seguito delle istanze scaturite dall'"importazione" dei modelli metafisici dell'aristotelismo gesuita (in particolare di Benet Perera, più che di Francisco Suárez) nella Germania protestante. Erano trascorsi quasi ottant'anni dall'interdetto pronunciato da Lutero contro la metafisica e le sue pretese epistemologiche. Il "ritomo" alla metafisica tra i calvinisti coincise pertanto con la nascita dell'ontologia come scienza propriamente detta e con la distinzione di quest'ultima dalla metafisica, intesa perlopiù come teologia: nel corso delle dispute tra riformati e protestanti si affinerà un modello che dominerà il dibattito scolastico in ambito continentale sino agli anni di Kant, determinando profonde conseguenze nel modo di pensare la realtà."

1. Bastit, Michel. 2004. "De L'intérêt D'une Lecture Traditionnelle De Saint Thomas: La Question De L' *esse* Chez Diego Mas." *Revue Thomiste* no. 104:447-468.

   " *Résumé*. On essaie ici de tester sur un texte de Diego Mas la fécondité théorique d'une lecture traditionnelle thomiste, au sens de lecture au sein d'une école. À partir des questions concernant l'ordre de l'existence à la forme et à l'essence, on aperoit progressivement que la rigoureuse procédure scolastique utilisée par l'auteur du texte reconduit son lecteur à la question elle-même, et le met ainsi en mesure d'être philosophe en acte. En outre cette rigueur permet à une pensée de ce type d'entrer en rapport avec les développements de la philosophie exacte moderne et contemporaine où se manifeste aujourd'hui un regain d'intérêt pour la métaphysique et l'ontologie que l'on aurait tort de négliger."

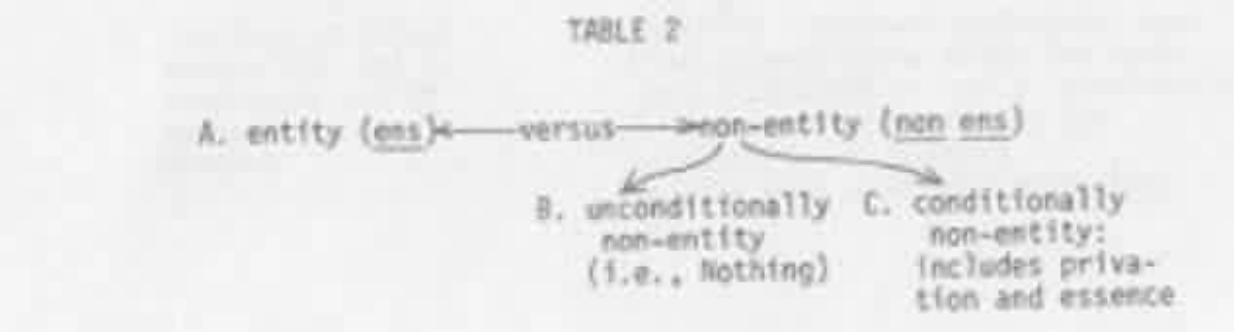
Clemens Timpler (1563/4-1624)



"Within three of his writings, Timpler notes that the study and knowledge of metaphysics is required for the study and knowledge of all other philosophical disciplines. For this reason, Timpler's Metaphysics textbook merits examination here prior to consideration of his other philosophical writings. The basic components of Timpler's Metaphysics textbook can be outlined as follows:

Timpler considers the subject matter of metaphysics to be everything which is intelligible to human beings; therefore, All that is Intelligible (*omne intelligibile*) is the all-inclusive category within which all component parts of Timpler's metaphysics are subsumed. Timpler

divides the category All that is Intelligible into Something (*aliquid*) and Nothing (*nihil*). Each individual intelligible falls within one and only one of these two categories.

Timpler asserts that Nothing cannot be perfectly defined. His brief remarks concerning Nothing shall be presented within chapter 15 section 17 and within chapter 20 section 9. Timpler's "Something" (*aliquid*) is equivalent to "Being" (*esse; est*) in the broadest sense of the latter. Timpler's "Being" can be explained with the use of the following table:

"Being" (understood in its broadest sense) includes A and C yet excludes B.

The broadest and most basic distinction made within Timpler's Metaphysics textbook, therefore, is the distinction made between something (i.e., "Being" understood in its broadest sense) and Nothing (i.e., Non-Being). There is no medium between Something and Nothing; any given intelligible object falls into one and only one of these two categories. According to Timpler, these two categories are contradictorily opposed to one another. The principle which states this contradictory opposition--i.e., which states that it is absolutely impossible for an intelligible subject matter to be both Being and Non-Being simultaneously -- is the principle of contradiction; Timpler regards this principle to be indemonstrable and absolutely necessary. The principle of contradiction is the most important rule contained within Timpler's Metaphysics textbook; in so far as it comprises All that is Intelligible, it regulates the entire subject matter of that textbook.

Timpler also notes that the principle of contradiction is "that primary complex principle which is basic to all of the arts" (i.e., to both the liberal arts and the illiberal arts).

It must be emphasized that All that is Intelligible and the Principle of Contradiction (all sub-categories of the former are regulated by means of the latter) are the broadest, most general categories not only of Timpler's Metaphysics textbook, but of all of his other writings as well. These two categories embrace the entirety of Timpler's thought as expressed within his various philosophical writings. The study of metaphysics is basic to the study of all other disciplines partly due to the fact that it directly deals with these two general categories which are basic to every other discipline."

Theory and History of Ontology

Raul Corazzon || e-mail: rc@ontology

Bibliography of the Ontologists from 16th to 18th Centuries (Second part)

Philosophers in chronological order:

- Christoph Scheibler (1589-1653)
- Johannes Micraelius (1597-1658)
- Sebastian Izquierdo (1601-1681)
- Bartolomeo Mastri (1602-1673)
- Juan Caramuel y Lobkowitz (1606-1682)
- Abraham Calov (1612-1686)
- Johannes Clauberg (1622-1665)
- Jakob Thomasius (1622-1684)
- Jean Baptiste Du Hamel (1624-1706)
- Jean Le Clerc (1657-1736)
- Johann Franz Budde (Buddeus) (1667-1729)
- Christian Wolff (1679-1754)
- Alexander Gottlieb Baumgarten (1714-1762)
- Christian August Crusius (1715-1775)
- Johann Heinrich Lambert (1728-1777)

Suggested readings: among the most important studies on this period, I suggest: Courtine (1990) (fundamental) and (2005), Freedman (1999), Honnefelder (1990) and (2002), Leinsle (1985), Lohr (1988, the best introduction in English), Marion (1975), (1981) and (1988), Schmutz (2000), Wundt (1939 and (1945), Zimmermann (1998).

For the complete references see: Selected Bibliography on the History of Continental Ontology from Suárez to Kant

Christoph Scheibler (1589-1653)

Texts

1. Scheibler, Christoph. 1617. *Opus Metaphysicum Duobus Libris Universum Hujus Scientiae Systema Comprehendens*. Giessen.

   Second edition Oxford 1633; definitive edition in *Opera philosophica*: *Metaphysica duobus libris universum huius scientiae systema comprehendens. Opus, tum omnium facultatum tum in primis philosophiae & theologiae studiosis utile & necessarium. Premissa est Summaria methodus, ...* Frankfurt 1665.

2. ———. 1654. *Opera Philosophica*. Frankfurt.

   Four volumes (1654-1658): *Opera philosophica ut sunt Opus logicum, quatuor partibus ... Opus metaphysicum, duobus libris ... Liber physicus de anima ... Adiectis ubique indicibus necessariis* ... (reprinted 1665).

7. Knebel, Sven K. 2002. "Entre Logique Mentaliste Et Métaphysique Conceptualiste: La *Distinctio Rationis Ratiocinantis*." *Études Philosophiques*:145-168.

   "In the scholastic way of spelling out "A = A", some sort of distinction intervened between the relata, viz. the *distinctio rationis ratiocinantis*. To distinguish between the *distinctio rationis ratiocinatae* and *ratiocinantis* was commonplace from the sixteenth up to the eighteenth centuries. But how to make sense of a distinction that is without any foundation in the object itself? Mastri's account marks a crisis within Scotism, since his reception of Peter Aureol's conceptualism made it possible to give the d *istinctio rationis ratiocinantis* a metaphysical rather than a logical interpretation."

Abraham Calov (1612-1686)

"His most interesting metaphysical works are the *Metaphysica divina pars generalis* and the *Metaphysica divina pars specialis* . Calovius's logical / epistemological works, the *Gnostologia* and *Noologia*, may be of some interest, although as logic the works are weakened by the psychologism which is often found in logic texts of that period and school.

Calovius is a good example of the typical Protestant metaphysician of the 17th century. According tu Calovius, one's metaphysical studies should be guided by the truths of revealed faith, in this case orthodox Lutheranism. Without the guidance of the celestial light, all our travels into scholarly study are nothing more than pitiable wandering. But we cannot follow this celestial light unless we pay attention to both Scripture and nature. Calovius reveals himself to be a true scholastic by naming Aristotle the foremost philosopher. Thus, the main task of Calovius's work is to reconcile the revealed truths of orthodox Lutheranism with the principles of Aristotle's metaphysics. That one is so enabled to refute the errors of agnostic natural scientists, Socinians (a favourite target of Protestant attacks, this Protestant sect denied the doctrine of the Trinity and the divinity of Christ), Jesuits, Calvinists, and other heretics, so much the better. Still, *both* soumces of knowledge are required: without Aristotelian

natural science, there will be factual errors; without Scripture, heresy. (*Hinc tot errores, tot haereses* .)

Metaphysics, according to Calovius, is the wisdom of being qua being (*sapientia Entis qua Entis*). This definition should be understood as denoting one discipline, which is also called 'ontology' or 'transcendental wisdom' (*ontologia* [in Greek] *sive transcendentalis Sapientia*). The usual and improper sense of 'metaphysics' adopted by the Jesuit Benito Pereira (c. 1535-1610). according tu whom metaphysics is concerned with disembodied spirit, is rejected. Indeed, he says, they hallucinate who make the object of metaphysics either God or immaterial substance, and they plainly do not understand the nature of wisdom.

Thus, Calovius believes that the mistake of people like Pereira was to fail to acknowledge a notion of being which is general enough to be common both to spiritual and material beings. This, of course, may not be entirely fair to Pereira and other Thomists, since theological discomfiture may arise from claiming that God and creatures are subsumed under a general concept of being. Does this most general of concepts logically or ontologically precede God? Or is the dignity of God affected by sharing the notion of being with beings like you and me?

Metaphysics, fmally, must deal with what *really* is, not merely what *could* be. Calovius claims that truly and properly, metaphysics concerns itself with non-complex, essential, positive, real, actual being (*Ens incomplexum, per se, positivum, reale et actuale*).

Only in an attenuated sense does it contain complex, accidental, deprived beings, beings of reason, and potential beings (*Entia complexa, per accidens, privationes, Entia rationes et in potentia*). Calovius prefers to limit metaphysics tu the former, and we might not incorrectly cali him an 'actualist'. Atfer all, Calovius wonders, how does one abstract notion of being common to actual and potential being, if potential being is not truly being?"

From: *Calovius, Abraham* by Jeffrey Coombs - in: *Handbook of Metaphysics and Ontology* - Edited by Barry Smith Barry and Hans Burkhardt. Munich: Philosophia Verlag 1991, pp. 112-113.

   "This paper aims to show how the Spinozistic hermeneutical position in the *Tractatus Theologico-Politicus* is founded in a particular tradition, that of Johannes Clauberg, which makes a strong distinction among the *sensus genuinus* (i.e., the meaning intended by the author), the true meaning, and the truth. L. Meyer, a physician and friend of Spinoza, accepts this distinction but he reduces the true meaning to the truth as it is understood in the philosophy of Descartes or Spinoza. Spinoza, however, maintains the distinction between true meaning and truth, and for him the Bible keeps its holy character as long as it helps man to practice justice and charity. Human reason brings

out the universal moral teachings of the Bible and it fosters a community of those who genuinely seek the truth."

   "The *Logica vetus & nova* published by Johannes Clauberg (1654) is directly inspired by the works of Descartes. For this reason, this text is commonly considered as the first handbook of 'cartesian' logic. Which are, therefore, the Cartesian elements distinguishing this logic from the previous ones? Our aim is to show that there are two main aspects which Clauberg derives from the works of Descartes: on the one hand the foundation of logic on the *perceptio clara et distincta*; on the other the role of *medicina mentis* assumed by logic, on the basis of a philosophical theory of prejudices that has been derived from the Principia philosophiae (but also from Bacon). Clauberg's logic, anyway, does not accept the most radical innovations of Cartesian theory of knowledge: in this way it is still bound up with the scholastic tradition."

"It is a much neglected fact that the young Leibniz expressed particular interest for the philosophy of Johannes Clauberg, a follower of Descartes with Aristotelian outlook who taught at the University of Duisburg. Indeed he found here, against the background of Cartesianism, important impulses and preconceptions for important basic positions of his, which in many respects can be understood as extensions and unfoldings of Claubergian approaches. In this way nothing less than a story of creation and development of Leibnizian thought is uncovered, e. g. from the gnoseological (symbolism of ideas; differentiation of nominal and real definitions, truths of reason and fact; the importance of real existence for the coherence of concepts) to the ontological area (the preparation of Leibnizian monadology through the question about the character of being in the innate ideas of Descartes; development of the concept of potency by means of that of facultas to that of virtus, of the *petites perceptions* of Leibniz and accordingly, for the first time in intellectual history, to his basic understanding of the unconscious): Further development of the anthropological question formulation through the idea of pre-established harmony."

Alexander Gottlieb Baumgarten (1714-1762)

"Baumgarten's basic argument for the existence of a special faculty of sensitive cognition leads back to the core of his metaphysics. To be aware of the material perfection of the world from a finite point of view is, he held, possible only in a sensitive way that is not overwhelmed by abstractive concepts of the intellect. For Baumgarten, beauty is the observable phenomenon representing this material perfection, and the finite created mind is able to gain consciousness of it because of its original disposition to represent the reality and order of the world by clear but confused perceptions. Baumgarten elaborates a set of conditions for the 'art of thinking beautifully' (*ars pulchre cogitandi*). He hereby relies on the doctrines of 'special metaphysics': cosmology, psychology, and the discipline yielding the ultimate ground of the relation between these, namely natural theology.

In his account of metaphysics Baumgarten in general follows Wolff. The first main part is 'ontology' or 'general metaphysics'. This sets out the 'predicates of being'. Baumgarten interprets the principle of contradiction in a way which yields the basic ontological concept 'something' or simply 'thing' (ens): what is not 'A and not-A', i.e. 'nothing' (*nihil*), is 'something' (*non-nihil*). The universal connection of all things is governed by the principle of *ratio* and *rationatum* : whatsoever B exist, is founded in something other A, and at the same time there is something other C which is founded in B. The further universal predicates are *unum*, *ordo*, *verum*, and *perfectum*, traditionally called the 'transcendental' predicates of being.

Baumgarten's ontology manifests much sophistication. Yet there are profound difficulties which cannot be ignored. How, for example, can the universal predicates be compatible with each member of such disjunctive predicates as: necessary/contingent; changeable/unchangeable; real/unreal; singular/universal; total/partial; finite/infinite; simple/composed; substance/accidence? The universal and disjunctive predicates constitute the internal determination of the *ens qua ens* . They differ altogether from such external (or 'relative') predicates as: similar and diverse, simultaneous, successive, cause and caused, etc. The ontological predicates then furnish the basic material for most of the arguments of special metaphysics. In two points Baumgarten proves

especially his independence from Wolff: in his doctrine of monads as immaterial, inextended substances; and in his doctrine of pre-established harmony in the absence of *influxus physicus* .

He herewith reinstitutes the genuine ideas of Leibniz, more than any other of the Wolffians."

"Historically Wolff recedes from Leibniz while Baumgarten, coming nearer to Leibniz, recedes from Wolff. If they are compared on two major issues: monadology and preestablished harmony, together with the principle of sufficient reason, concept of substance as force, concept of individual substance, it appears (as in our work on Baumgarten's metaphysics) that Baumgarten is more Leibnizian than Wolff. His metaphysics is the first Leibnizian-Wolffian philosophy; he assumes and develops, with the methodology of Wolff, the philosophy of Leibniz."

Christian August Crusius (1715-1775)

"Crusius, in his *Entwurf der nothwendigen Vernunftwahrheiten* (*Sketch of necessary rational truths*; Leipzig, 1745), divided metaphysics into ontology, theology, cosmology, and pneumatology, in explicit opposition to Wolff's ordering of the metaphysical sciences.

Ontology begins, not with first principles, but with the notion of a thing in general, directly connected with the notion of a "really given thing'. Only after introducing these notions did Crusius discuss essence, existence, and causality. Crusius regarded existence as indefinable and as a primary notion arising from sensation.

In his discussion of causality, Crusius expounded a principle of determining reason, his version of Gottfried Wilhelm Leibniz's principle of sufficient reason. Crusius held, against Wolff, that a sufficient reason suffices only for free actions insofar as they are free. Rational truths and natural events not depending on free causes

need a more cogent foundation, a determining reason. This principle does not derive from the principle of identity, but rather from what we must conceive or what we cannot conceive as united or separate, and thus from a new case of the principle of *cogitabilitas*. Crusius, aiming at a sharper distinction between mechanism and free actions, held that the real nature of causality is unknown and that our knowledge of causal connections is based on the constant conjunction of two events in experience. This, of course, cleared the path for the members of his school to accept the Humean critique of the causal connection.

Crusius's ontology reveals a general characteristic of his metaphysics. His was not a monolithic system beginning with a single principle and deducing from it all subsequent notions and propositions, as was Wolff's. Rather, it was founded both on several independent principles and on a multitude of elementary notions that could be defined only by an appeal to reality (by their concrete representation)--notions such as existence, space, time, and force; or, in psychology, the particular powers of the soul, some mental faculties, and pleasure and pain. Through Hoffman Crusius derived this view from Locke's doctrine of simple ideas, but he supposed that the number of elementary notions (which he once called categories) could be infinite."

   "In this paper we examine some passages of a logical treatise by Christian August Crusius. It seems that Crusius anticipated what might be called the circle of deduction, first discussed by Lewis Carroll.

   The question now emerges: why was it possible for Crusius to have deeper logical insights than his contemporaries, given that he was not a brilliant logician? The answer here proposed traces these insights back to his very peculiar philosophical premisses, which have been important for Kant's development in his early career."

Johann Heinrich Lambert (1728-1777)

"A. Simple concepts. Simple, or fundamental, concepts (*Grundbegriffe*) are a subclass of empirical concepts (*Erfahrungsbegriffe*) and must be found by the Lockean method of collecting and inspecting (*Musterung*) examples. But whereas

empirical concepts may be erroneous (i.e., may have no object corresponding to them) and give only a mere delusory appearance of things, the fundamental concepts are derived from the experience of the *sensu interno* and must be granted even by the skeptic (the solipsist, *der Egoist*) who denies the existence of everything except himself and his experience.(45) The simple concepts can only be ostensively defined, not nominally. They can appear as predicates in a judgment whose subject is a complex empirical concept; but in this case the subject can be analyzed into simple concepts, and the original judgment will thereby be resolved into tautologies ("white is white"), simple negative propositions like Locke's intuited disagreements of ideas ("white is not black"), or relational propositions (such as "space has length, breadth, and height" or "motion has velocity and direction") .(46)

B. Combinations of simple concepts. Our knowledge of such propositions is a priori, for though experience is necessary if we are to have the concepts, we do not have to experience their combinations to see the truth of the propositions.(47) The various sciences are based upon some of the simple concepts (for example, geometry on that of space, chronometry on that of time, phoronomy on space and time, "agathology" on the concept of good), and Lambert builds up large and elaborate tables showing what simple concepts are involved in each of the branches of science and philosophy.(48)

But while Lambert is clear in his theory of simple concepts, his theory of their combination is no more satisfactory than that of Crusius. Lambert uses a weaker form of Crusius' criterion of what can or cannot be thought together, calling it the criterion of "thinkability" (*Gedenkbarkeit*). But while thinkability is a test for a concept, something stronger is needed as a test for judgment; "not to be thought apart," or "must be thought together" as Crusius would say, are needed. This criterion of thinkability, or inseparability, applies to propositions whose predicate is included in the subject, as Leibniz thought; but obviously it will not work for that reason on propositions connecting simple subjects and predicates. Lambert sometimes appeals to the law of contradiction, which in turn is based upon the incredibility (*nicht-glauben-lassen*) of contradictions(49) and sometimes to

the mere possibility of thinking a combination of ideas under maxim that "cogitabile is equal to possibile."(50) But if Gedenkbarkeit is too weak a test, the law of contradiction is too stringent, and Lambert must rightly confess that the "fons possibilitatis duos ideas combinandi has not been fully discovered."(51) It was to remain hidden until Kant clearly distinguished the synthetic a priori from the analytic; and to explain the kind of combinations Lambert and Crusius were concerned with required the whole labor of the *Critique of Pure Reason*.

The total system of all the simple concepts and their permissible combinations constitutes what Lambert calls the realm of truth.(52) It is equally the object of logic (i.e., the science of reason, *Vernunftlehre*) and ontology, which is therefore completely a priori, since it deals with objects only insofar as they are possible. Still, Lambert does not wish the realm of truth to be defined solely in formal terms as a set of non-contradictory propositions having simple concepts as their subjects. He speaks rather of a harmony(53) reigning in the realm of truth. Harmony is what later in the history of philosophy will be called "coherence." Each proposition in the system is not only consistent with all the others, but harmonizes with it in some more intimate fashion, supporting and being supported by all the others. Every erroneous proposition can be discovered by a stepwise process *(Schritt für Schritt,* as Lambert liked to say) of testing it against each of the others; but since every proposition is ultimately reducible to simple concepts which are always logically true, every error contains some truth which we are to discover by analysis. The most harmonious system is, by definition, the logically true system: wholly unified, with no contingencies, and completely comprehensive. Any lacuna is a warning, and any dissonance a sign of error.(54)"

Francisco Suárez on Metaphysics as the Science of Real Beings

Introduction

References to the Latin edition of the *Disputationes Metaphysicae* (= *DM*) are to the edition in two volumes edited by Charles Berton reprinted in the Luis Vivés edition (voll. 25-26).

"Suarez's contributions are important in three areas in particular: philosophy, law, and theology. From a philosophical standpoint his most important works are: De anima, which contains much of his psychology, epistemology, and philosophy of mind; De gratia, which deals with issues of philosophical theology involving free will and determinism; and the monumental Disputationes metaphysicae. The last is undoubtedly one of the great works of Western philosophy. It is the first systematic and comprehensive treatise on metaphysics composed in the West that is not a commentary on Aristotle's Metaphysics. Furthermore, it summarizes and evaluates the metaphysical thought of fifteen hundred years of medieval and scholastic metaphysical speculation. Indeed, it is to this day the most complete and comprehensive exposition of scholastic and Aristotelian metaphysics. Its fifty-four disputations cover every metaphysical topic known during Suarez's time. De legibus is Suarez's most important work dealing with legal and political theory. In it he explores in detail the nature of law and of civil society. Suarez's views on international law (ius gentium) make him one of its founders. Suarez's contributions in theology are contained in his numerous books on the subject. He touched upon almost every aspect of sacred doctrine, from the Trinity to questions pertaining to the spiritual life. This has made his theological writings a standard

source of Catholic theology. Moreover, his role in helping to shape the response of the Catholic Counter-Reformation to the rise of Protestantism, guarantees a prominent place for his ideas in history. Suarez's place in the history of philosophy is frequently disputed. Some authors place him firmly in the medieval tradition, claiming that he should be seen as perhaps the last world-class figure of that tradition before modem philosophy changes the philosophical direction of the West. Others see Suarez as providing the foundation for some of the views that were going to form the core of modem philosophy. Under the latter interpretation he is seen as a precursor of modem philosophy, rather than as the term of a medieval process of development." (pp. 260-261, notes omitted).

From: Jorge J. E. Gracia, "Francisco Suárez: the Man in History", *The American Catholic Philosophical Quarterly*, 65, 1991, pp. 259-266.

"Perhaps the most important enterprise of the *Doctor eximius*, the *Disputationes metaphysicae* is a complete résumé of his own and previous Scholastic thought on a myriad of questions, arranged in the form of fifty-four "Disputations" dealing with various topics systematically. (...)

In format, Suárez's *Disputationes* represented a radical departure from previous metaphysical treatises. Until its appearance, metaphysics had been explicitly treated either just incidentally in the form of *Opuscula* ("little works"), such as St. Thomas Aquinas's *De ente et essentia* ("On Being and Essence"), or in commentaries on the text of Aristotle. Both methods were clearly unsatisfactory, the one incomplete and the other shackled to the rambling obsolete order of Aristotle. So Suárez says that he intends to give, preparatory to theology, a complete exposition of metaphysics which, instead of following the text of Aristotle, will proceed in a systematic fashion.

In executing his intention, the *Doctor eximius* has divided his work into two main parts, to which correspond two tomes. After explaining in the first Disputation the object, the dignity, and the utility of metaphysics, he proceeds in the first part to treat of being in general, its properties and causes. In the second tome, he descends

to items under being, considering them from a metaphysical viewpoint.

The first part studies the concept of being (Disputation 2) which, representing in some way everything that entails an order to existence, transcends all genera, species and differences. It will encompass everything real, from extrinsic denominations, through mere possibles, to the subsistent, purely actual, and necessary reality of God. Following this is a treatment of the essential properties of every being inasmuch as it is a being, namely, unity, truth and goodness. Under the discussion of unity, space is given to questions concerning the principle of individuation (Disputation 5), the reality of universal natures (Disputation 6), and the various kinds of distinction (Disputation 7). The discussion of truth (Disputation 8) is balanced by discussion of falsity (Disputation 9) and that of goodness (Disputation 10) by that of evil (Disputation 11) After the essential properties, there follows a consideration of the causes of being. Disputation 12 treats causes in general while Disputations 13-25 deal with various types of causes. Concluding this first part, Disputation 26 presents a comparison of causes with their effects and Disputation 27 considers the mutual relations of causes one to another.

The second part opens with the division of being into infinite and finite (Disputation 28). Infinite being, or God, is the subject of the next two Disputations. In Disputation 29, the existence and unicity of God is demonstrated metaphysically. Disputation 30 goes on to investigate, as far as unaided human reason can, the divine perfection, simplicity, immensity, immutability, wisdom, and omnipotence. With Disputation 31 Suárez begins his treatment of finite being. It is this Disputation which is the locus of the famed Suárezian denial of the real distinction between essence and existence in creatures. In Disputation 32, Suárez considers the distinction of substance and accident in general. Substance is treated in metaphysical detail through the next four Disputations while the different categories of accident are the subject matter of Disputations 37 to 53. The fifty-fourth Disputation, (...) concludes the whole work with a discussion of "beings of reason" including negations, privations, and reason-dependent relations -- all of which fall outside real being, the object of metaphysics." (pp. 8-10, notes omitted)

From: John P. Doyle "Introduction" to: Francisco Suárez, *On Beings of Reason. (De Entibus Rationis). Metaphysical Disputation LIV*. Milwaukee: Marquette University Press 1995.

"It is generally agreed that modern philosophy places greater stress on the subjectivity of the knower than on the objective reality of the known, as does medieval philosophy. Suárez, when faced with a basic problem of metaphysics, whether the concept of "being" is one or multiple, decided, without any Scholastic precedent, to make a subjective state of mind (*conceptus formalis entis*) the criterion for establishing the unitary sense of objective reality (*conceptus obiectivus entis*). When problems like that of "being" became too difficult to resolve by the usual medieval objective" approach, Suárez recommended recourse to the "subjective" because it was better known (*notior*) to us than the objective, especially as the subjective is produced "by us and in us" (*a nobis et in nobis*). On the basis of the principle that "to one formal concept one objective concept necessarily corresponds;"*uni conceptui formali unus conceptus obiectivus necessario respondet*, Suárez, as never before in Scholasticism, made extra-mental reality dependent for its truth on in intra-mental concept, thus changing the main thrust of medieval philosophy. Descartes adopted the same approach when faced with he basic problem of his system, of establishing, through the resources of the intellect, knowledge that was objectively certain. Like Suárez, he made an intra-mental concept the criterion for determining extra- mental reality. The intra-mental concept was the thinker's "cogito"; the extra-mental reality was the thinker's existence, "sum"; with the certainty of the existence following as a necessary consequence, "*ergo*", from the intra-mental concept itself.

Suárez could not have become the founder of modern philosophy before he had worked out his own system, the technical vocabulary of which provided the groundwork for the emerging modern systems. This vocabulary was first needed to systematize metaphysics. The long subjection to the unmethodical text of Aristotle had delayed the attainment of this important philosophical object, realised at last in the *Disputationes Metaphysicae*.

In the two volumes of that great work, the philosophy of being was given a binary structure, characterized, though not by its author, as

general (vol. 1) and special (vol. 2) metaphysics. *General metaphysics* has as its theme the common concept of being, its general attributes, and its causes; and s *pecial metaphysics*, the kinds of being contained under the common concept, (*) classified in two dichotomies, the primary of finite and infinite, and the secondary of substance and accident. Suárez also furnished the burgeoning modern systems with vocabulary as groundwork for their ideas, in many cases the vocabulary anomalously grew to be alien to the system that was its source. How was this possible? Through that system undergoing anamorphosis, a condition where something distorted occasionally appears to be regular; indeed so regular, that the distorted ideas seem to belong to the nature of anamorphosed thing itself. Which may explain why the realist Suárez is made out to be a crypto-idealist, and it may be that the philosophies of realism (Scholasticism) and idealism (modern philosophies) have some hidden affinity and are closer together than one would suppose." (pp. 27-28)

Notes

(*) Suárez describes *general* metaphysics and its "propriam et adaequatam rationem, ac deinde proprietates eius et causas." DM 2: 1, introductory paragraph [25: 64] "... de communi conceptu entis, illiusque proprietatibus, quae de illa reciproce dicuntur.' DM 28, introductory paragraph [26: 1]. He describes *special* metaphysics as "res omnes, quae sub ente continentur, et illius rationem includunt, et sub obiectiva ratione huius scientiae cadunt, et a materia in suo esse abstrahunt." DM 2: 1, introductory paragraph [25: 64] "... definitas rationes entium... divisiones varias ipsius entis et membrorum eius... primam et maxime essentialem divisionem entis in finitum et infinitum secundum essentiam seu in ratione entis." DM 28, introductory paragraph [26: 1].

Overview of Suárez's Metaphysical Disputations

"The two large folio volumes of the *Disputationes metaphysicae* appeared in Salamanca in 1597. In his brief foreword, "Ad lectorem,"

Suárez indicates his reason for undertaking this project: "It is impossible for anyone to become a competent theologian unless he builds upon a solid metaphysical foundation." He develops this view in the *Prooemium* or prologue to his work. The science of metaphysics, he holds, is indispensable for a mastery of theology. More intimately than any other human field of knowledge, it is connected with theology; it has for its object the most universal and supreme principles which embrace all being and are the foundation of all knowledge. This function of metaphysics was for Suárez a compelling motive for interrupting his theological labors and producing, in one systematic, comprehensive work, the results of his metaphysical studies and investigations, begun many years before. The prologue reads as follows:

"Sacred and supernatural theology relies on divine illumination and on principles revealed by God. However, it is cultivated by human reasoning and investigation, and therefore enlists the aid of truths naturally known, using them as ministers and instruments to develop its deductions and to illustrate divine truths. But of all the natural sciences, that which holds the primacy and has won the name of first philosophy is most valuable for promoting sacred and supernatural theology. For among them all it approaches most closely to the science of divine things, and also explains and vindicates those natural principles which embrace the universe of being and in one way or another stand at the basis of all learning.

For this reason I wished to revise and expand what I have worked out for my students and publicly taught on various occasions during many years concerning this natural wisdom, so that the results of my reflections might be made available to the general public. Accordingly I am forced for a time to interrupt, or rather to postpone, the more weighty commentaries and disputations on sacred theology I am so busily engaged in, as well as the taxing labor required for their publication.

It often happened that while I was treating of divine mysteries, metaphysical problems would come up. Without a knowledge and understanding of these, the higher mysteries of Christianity can scarcely, if at all, be discussed as they deserve. Hence I had to mingle baser questions with supernatural subjects, a practice that is

annoying to readers and is not very profitable for them; or else, to avoid this awkward procedure, I had briefly to propose my own opinion in such matters, and Its demand of toy readers a blind faith in my judgment. This was embarrassing for me, and could well seem out of place to them. Metaphysical principles and truths are so closely interwoven with theological conclusions and deductions, that if knowledge and full understanding of the former are lacking, knowledge of the latter must necessarily suffer.

Led on by such considerations, I yielded to repeated requests and decided to write the present work. I have arranged all the metaphysical disputations according to a method calculated to combine comprehensive treatment with brevity, and so to be of greater service to revealed wisdom. Hence it will not be necessary to divide the work into several books. For all that pertains to this doctrine and is suitable to its subject matter in the light of the method adopted, can be fully handled in a limited number of disputations. What belongs to "pure philosophy" or dialectics has, so far as possible, been left out as not in keeping with the scope of the work. I shall adhere to this norm, even though I am aware that other writers on metaphysics devote much space to such subjects. But before I begin to treat of the subject-matter of this doctrine I shall, God willing, discuss wisdom or metaphysics itself, its object, use, necessity and its attributes and rewards."

The work falls into two main parts, coinciding with the two volumes in which it was published. It comprises fifty-four disputations in all. The first volume treats of metaphysics in its broadest comprehension: being as such, and the properties and causes of being. The first disputation deals with the object of metaphysics; the second inaugurates an exposition of the concept of being. Disputations III to XI discuss the passions and transcendental properties of being. Disputations XII to XXVII embody the author's doctrine on causes.

The second volume opens with a consideration of infinite and finite being. Two disputations deal with natural knowledge of the existence, nature, and attributes of God. The remaining disputations are devoted to the metaphysics of finite being, distributed according to the Aristotelian categories.

As the title indicates, the work is cast in the form of disputations. The discussions follow a regular pattern. First, the problem is stated. Then the various solutions that have actually been proposed by philosophers are reviewed (*Variae opiniones*). Thirdly, Suárez gives what he considers to be the true doctrine or, as the case may be, the most probable theory (*Vera sententia or Resolutio quaestionis*). A refutation of opposing views often brings the disputation to a close." (pp. 6-7)

From: Cyril Vollert, "Introduction" to: Francisco Suárez, *On the Various Kinds of Distinctions (Disputatio VII),* translated from the Latin with an introduction by Cyril Vollert, Milwaukee: Marquette University Press 1947.

Outline of the Metaphysical Disputations

I. The nature of metaphysics (1)

II. The transcendentals: being and its attributes (2-11)

A. Being (2, 3)

B. One (4, 5- 7)

C. True (8, 9)

D. Good (10, 11)

III. The causes of being (12-27)

A. Causes in general (12)

B. The material cause (13, 14)

C. The formal cause (15, 16)

D. The efficient cause (17-19, 20-22)

E. The final cause (23, 24)

F. The exemplar cause (25)

G. Relation of the causes to their effects and to each other (26, 27)

IV. The division of being into infinite and finite (28-31)

A. The distinction between infinite and finite being (28)

B. The existence and nature of the First Being (29, 30)

C. Finite being (31)

V. The division of finite being into substance and accident (32-38)

A. The distinction between substance and accident (32)

B. Created substance in general (33)

C. Primary substance (or *suppositum*) (34)

D. Immaterial substance (35)

E. Material substance (36)

F. Accidents in general (37, 38)

VI. The division of accidents into the nine categories (39-53)

A. The division of accidents into the nine highest genera (39)

B. Quantity (40, 41)

C. Quality (42-46)

D. Relation (47)

E. Action (48)

F. Passion (49)

G. Time (50)

II. Place (51)

I. Position (52)

J. Having (53)

VII. Real being versus being of reason (54)" (pp. XVI-XVII)

From: Alfred J. Freddoso, Introduction to: *On Efficient Causality. Metaphysical Disputations 17, 18, and 19*. New Haven: Yale University Press 1994.

The object of metaphysics in the three first Metaphysical Disputations

"In the twenty-seven Disputations which make up the first volume, Suárez is concerned with being in general while, symmetrically, in the twenty-seven Disputations of the second volume he descends to particular being -- in effect dividing metaphysics itself into a general and a special part.

In the very first Disputation (*Opera omnia*, Paris: Vivès [1856]: vol. 25, pp. 1-64), he tells us that the object of metaphysics is "being insofar as it is real being." Explaining this, in Disputation 2 (pp. 64-102) he uses two distinctions already familiar to Scholastic authors. The first is between the formal concept as an act of the mind and the objective concept as what is immediately the object of that act. This latter may be an individual thing or some common feature (ratio) of things. It may, further, be something mind-independent, whether actual or possible, or it may be something merely objective or mind-dependent. The second distinction is between being as a participle, which refers to actual existents and being as a noun, which refers to whatever is not a simple fiction but is true in itself and apt really to exist. The object of metaphysics is then identified with the "common objective concept of being as a noun." This precise object, which reflects Avicenna's (980-1037) understanding of Aristotelian metaphysics, abstracts from existence and, as common, transcends all categories, genera, species and differences to embrace everything real. This last runs a range from extrinsic denominations (such as "being right," "being left," "being known," or "being willed"), 9 through mere possibles (which reduce to non-contradiction), to actual created substances and accidents, to the subsistent, purely actual, necessary, untreated, and infinite reality of God. Over this range, the common concept of being as a noun is analogous with what Suárez will call "an analogy of intrinsic attribution." In this analogy, a unified concept of being is shared, in an order that is intrinsic to it, by different beings (God and creatures, substance and accidents) in such way that the being of what is posterior depends upon and indeed "demands" (postulat) the being of what is prior.

Disputation 3 (pp. 102-115) offers a general treatment of the transcendental properties, namely unity, truth, and goodness, which belong to every being insofar as it is a being." (pp. XI-XII, notes omitted)

From: John P. Doyle, "Introduction" to: Francisco Suárez, *The Metaphysical Demonstration of the Existence of God. Metaphysical Disputations 28-29,* South Bend: St. Augustine Press 2004, pp. IX-XXIV.

"To what extent Suárez, despite his token references to Thomas Aquinas, follows Scotus' approach is evident from the definition of the subject matter of metaphysics in the first of the 54 disputations. Here he discusses six possible solutions to the problem, but dismisses all of them as either too comprehensive or too restrictive. The subject matter of metaphysics is neither everything that is knowable nor the "supreme real being" (Suárez, *Disp. Met.* 1.1.9), i.e. God or the immaterial being; nor is it the finite being that is the subject matter of physics. Rather, the subject matter of metaphysics is "being as such" (*ens inquantum ens*), i.e. a common determination (ibid. 1.1.23 and 26) that is grasped in a concept that abstracts from all categorial determinations as well as from being finite/infinite, being caused/uncaused, and being material/immaterial. Metaphysics is, therefore, the "most general science" (ibid. 1.5.14), because it treats of the "*rationes universales transcendentales*" (ibid. 1.2.27). That is to say, metaphysics is a *scientia transcendens* in the Scotistic sense. Because the immaterial being (God) cannot be known except through previously known transcategorial attributes of being, metaphysics as transcendental science and metaphysics as theology coincide.

According to Suárez, metaphysics deals with the "formal" as well as the "objective" concept of being. By the formal concept of being, Suárez understands the act of knowing, which "*ex unica et prima impositione*" (ibid. 2.2.24) yields an intentional representation of the object; by the objective concept he designates that which is intentionally represented by that act. In other words, Suárez does not assume a theory of concepts characterized by a noetic-noematic parallelism of *res* and *conceptus*; rather he accepts Ockham's critical approach towards a strictly realistic interpretation of universal concepts. Since Scotus himself does not rely on that parallelism when it comes to the concept of being, Suárez can substantially follow Scotus and apply 'being' to a first and unified formal concept which, in virtue of its imposition, represents a first and unified objective

concept of absolutely simple content that grasps all different beings in an indeterminate way, i.e. as being.

To the formal concept of being there corresponds an appropriate and immediate objective concept, which is explicitly neither substance nor accident, neither God nor creature, but which designates these in a unified way, i.e. inasmuch as they are similar and agree in being. (ibid. 2.2.8)

What does the objective concept that corresponds to the formal concept of being mean? According to Suárez, it is a determination that transcends the generality of the genus; this determination cannot be defined, but only explicated through its relationship to actual existence. 'Being' means "that which can exist" (*id quod aptum est esse seu realiter existere*: ibid. 2.4.7); the possibility of existence is grounded in an ontological disposition which (as we have seen before) appears in the non-contradiction of the internal contents constituting essences.

Because entity in the sense of being(ness) -- which in a concrete being is identical with the entity or being(ness) of that being -- is grasped indeterminately by the concept of being, that concept has an "illimitability and transcendence" (ibid.2.6.10) on account of which it precedes all more determinate modes. First among those more determinate modes, according to both Suárez and Scotus, is the classification "finite/infinite", which Suárez understands in terms of "intensity"; this allows him to interpret finite being as a non-determinate mode of an intensive quantity and infinite being as the "totally indivisible infinity of perfection which in itself is most real and complete" (ibid. 30.2.25)." (pp. 62-63)

In *The Medieval Heritage in Early Modern Metaphysics and Modal Theory, 1400-1700*, edited by Russell L. Friedman and Lauge Olaf Nielsen, Dordrecht: Kluwer 2003, pp. 53-74.

Exclusion of the "Beings of reason" from the subject of metaphysics

"As every historian of philosophy knows, Aristotle thought the subject of metaphysics was "being insofar as it is being" and from this subject he excluded "being as true". Centuries after Aristotle, Francisco Suárez, S.J., designated the subject of metaphysics more explicitly as "being insofar as it is real being".

The addition of "real" to Aristotle's formula highlighted the inclusion of all that can as well as does exist (4). Against the backdrop of two already well known distinctions - (1) between formal and objective concepts, and (2) between being as a participle and being as a noun -- for Suárez the subject so conceived was identical with "the objective concept of being as a noun" (5). Concurrently, while being was said to be analogous with regard to hierarchically ordered objects (God and creatures, substance and accidents) with an intrinsic attribution of the perfection it represented (6), such analogy presupposed a common, unitary, and all but univocal, concept (7). But from that concept and from the subject of metaphysics Suárez excluded "beings of reason" (8), which he subsumed under Aristotle's being as true (9), and of which impossible objects, in the sense of those that would be self-contradictory, furnished the paradigm case. (10)" (pp. 297-298)

Heidegger appreciation of Suárez

"Heidegger reserves the place of honor in his exposition [*of the Thesis of Medieval Ontology*] for the Spanish Jesuit Francisco Suárez (1548-1617), a figure whose pre-eminence for Heidegger is

both systematic and historical. Suárez is the bridge between the Middle Ages and the modern world (*Grundprobleme der Phänomenologie* 111-16/ English translation 79-83). It was through Suárez that the metaphysics of Scholasticism flowed into modern thinkers; his influence is clearly detectable in Descartes, Leibniz, Wolff, Schopenhauer, Kant, and Hegel. Suárez abandoned the format of the *commentarium* employed by the classical Scholastic thinkers and developed instead a strictly philosophical and systematic treatise entitled *Disputationes metaphysicae*. Although it was written in the seventeenth century, it is the first major systematic Scholastic treatise on metaphysics (GP 112/80). St. Thomas' major works, for example, are either commentaries or, when they are systematic, theological treatises. The Disputationes is divided into fifty-four tracts. The first twenty-seven treat of *metaphysica generalis* (or *ontologia*); the next twenty-six treat of special beings (*metaphysica specialis*); the fifty-fourth is devoted to beings of reason (*entia rationis*). In general metaphysics Suárez investigates the properties of the abstract concept of being in general. In special metaphysics, he investigates God and creatures, that is, infinite and finite beings. This distinction between general and special metaphysics was imported fully intact by Wolff and made its way to the center of Kant's architectonic -- to the distinction between the transcendental analytic and the transcendental dialectic -- in the Critique of Pure Reason." (p. 69)

From: John D. Caputo, *Heidegger and Aquinas. An Essay on Overcoming Metaphysics,* New York: Fordham University Press 1982.

"The first *Disputatio* treats: *De natura primae philosophiae seu metaphysicae,* of the essence of First Philosophy or metaphysics. Suárez begins in the introduction (3) by discussing the various designations of metaphysics (*varia metaphysicae nomina*), and does so with independent recourse to Aristotle. Here he finds that metaphysics is designated as *sapientia* (*sophia*), *prudentia* (*phronesis*), then as *prima philosophia* (*proté philosophia*), then as *naturalis theologia*(*theologiké*) -- which Suárez here interprets in a sense quite unlike that of antiquity (*quoniam de Deo ac divinis rebus*

sermonem habet, quantum ex naturali lumine haberi potest 4) – and finally as *metaphysica*.

Suárez says that this natural theology or First Philosophy is called metaphysics because it deals with God (ex *quo etiam metaphysica nominata est* 5). He thereby gives the expression a different meaning from that of Aquinas. Aquinas uses the expression *metaphysica* insofar as it treats *de ente in communi*. Suárez, on the other hand, says it is called metaphysics because it is theology. He remarks that this title 'metaphysics' does not stem from Aristotle himself, but from his interpreters (*quod nomen non tam ab Aristotele, quam ab ejus interpretibus habuit* 6). However, he is of the opinion that Aristotle did put together this collection.

He explains the expression 'metaphysics' in a sense that deviates from the explanation given by Aquinas, and brings in another point of view which is significant in the history of metaphysics: *de his rebus, quae scientias seu res naturales consequuntur*. (7) (...)

The *Metaphysics* is not concerned, then, with such books as come after those about physics, rather 'coming after' is now taken in the sense of *content*: knowledge of the suprasensuous is later than that of the sensuous. In the order of appropriation, in the order in which knowledge of the suprasensuous arises, in the sequence of investigation, metaphysical knowledge is placed after knowledge of physics. Suárez stresses the *méta* in the sense of *post* and understands this *post* in the sense of the stages of knowledge proceeding from the sensuous to the suprasensuous. At the same time however he brings into play the interpretation in terms of content: *méta*, afterwards, that which comes afterwards, which exceeds the sensuous." (pp. 52-53)

(7) *ibid.*

From: Martin Heidegger, *The Fundamental Concepts of Metaphysics. World, Finitude, Solitude*, translated by William McNeill and Nicholas Walker, Bloomington: Indiana University Press 1993.

"Suárez is the thinker who had the strongest influence on modem philosophy. Descartes is directly dependent on him, using his terminology almost everywhere. It is Suárez who for the first time systematized medieval philosophy and above all ontology. Before him the Middle Ages, including Thomas and Duns Scotus, treated ancient thought only in commentaries, which deal with the texts seriatim. The basic book of antiquity, Aristotle's *Metaphysics*, is not a coherent work, being without a systematic structure. Suárez saw this and tried to make up for this lack, as he regarded it, by putting the ontological problems into a systematic form for the first time, a form which determined a classification of metaphysics that lasted through the subsequent centuries down to Hegel.

In accordance with Suárez' scheme, distinctions were drawn between *metaphysica generalis*, general ontology, and *metaphysica specialis*, which included *cosmologia rationalis*, ontology of nature, *psychologia*, ontology of mind, and *theologia rationalis,* ontology of God. This arrangement of the central philosophical disciplines recurs in Kant's *Critique of Pure Reason*. Transcendental logic corresponds in its foundations to general ontology. What Kant deals with in transcendental dialectic, the problems of rational psychology, cosmology, and theology, corresponds to what modern philosophy recognized as questions. Suárez, who gave an exposition of his philosophy in the *Disputationes metaphysicae* (1597), not only exercised great influence on the further development of theology within Catholicism but, with his order colleague Fonseca, had a powerful effect on the shaping of Protestant Scholasticism in the sixteenth and seventeenth centuries. Their thoroughness and philosophical level are higher by far than that which Melanchthon, for example, attained in his commentaries on Aristotle." (p. 80)

Editions and Translations of the Metaphysical Works of Francisco Suárez

Metaphysical works

The standard edition of Suárez's works is: André Michel and Charles Berton (eds.), *R. P. Francisci Suárez e societate Jesu, Opera omnia*, Parisiis apud Ludovicum Vivès (1856-1861) in 26 volumes, with two additional volumes of indexes (27-28).

The main philosophical works are:

a) *Disputationes Metaphysicae* (DM): The first edition was published in Salamanca (Spain) in 1597 (two wolumes) with the title *Metaphysicarum disputationum, in quibus et universa naturalis theologia ordinate traditur, et quaestiones omnes ad duodecim Aristotelis libros pertinentes accurate disputantur,* and reprinted Mainz 1605.

The standard edition, edited by Charles Berton who adopted the current title, is part of the edition of the *Opera omnia*, voll. 25 (I-XXVII) and 26 (XXVIII - LIV). This edition is reprinted by Georg Olms, Hildesheim, 2009.

b) *Commentaria una cum quaestionibus in libros Aristotelis "De anima",* Introduction and critical edition by Salvador Castellote, Spanish translation by C. Baciero and L. Baciero: vol. I (*Disputations* I-II) Madrid, Labor, 1978; vol. II (*Disputations* III-VII) 1981, vol. III (*Disputations* VIII-XIV), Fundación Xavier Zubiri, 1981.

c) *De essentia, existentia et subsistentia* in: Jesús Iturrioz, "Un primer opúscolo de Suárez, desconocido hasta ahora,"*Estudios eclesiásticos* 18: 330-359 (1944); reprinted in: J. Iturroz, *Estudios sobre la metafísica de Francisco Suarez, S. J.*, Madrid, Ediciones Fax, 1949.

English translations of the Disputationes metaphysicae

1. Suárez, Francisco. 2004. *A Commentary on Aristotle's Metaphysics (Index locupletissimus in Metaphysicam Aristotelis)*. Milwaukee: Marquette University Press.

   Translated with an introduction (pp. 7-19) and notes by John P. Doyle.

   The *Index* is the preface to the *Disputationes Metaphysicae*.

   Content: English translation: 20-247; Corresponding Latin texts: I. Ad lectorem 248; II. Disputatio II: Prooemium 250; III. Index Locupletissimus 252; IV. Index Disputationum 390; Persons Mentioned in the Index 410; Bibliography 413; Index of Names 424-426.

   "Balancing the system in the *Disputationes* , the Index amounts to a late medieval commentary, “by way of question,” on the first 12 books of the *Metaphysics*. Shorter in length than, for example, St. Thomas Aquinas’ (1225–1274) commentary on the same 12 books, Suárez’s *Ample Index* more than makes up for that by cross-referencing the *Disputationes* itself hundreds of times. In fact, the *Index* and the *Disputationes* are exactly as Suárez intended them to be, complementary of one another and mutually supportive." (Doyle, p. 8).

   "However, because there will be very many who will desire that this whole doctrine be collated with the books of Aristotle, not only in order to better perceive on what principles of the so great Philosopher it is based, but also in order that it be more easily and usefully employed for understanding Aristotle himself, I have also sought to provide the reader in this matter with an elaborate index, in which, if it is attentively read, most easily (if I am not mistaken) all those things which Aristotle

treated in the books of *Metaphysics* can be comprehended and retained in memory. And again, [with that index] all questions can be at hand which are customarily raised among the expositors of these books." (Suárez, p. 21).

2. ———. 2021. *Metaphysical Disputation I: On the Nature of First Philosophy or Metaphysics*. Washington, D. C.: The Catholic University of America Press.

   Translated and annotated, with corrected Latin text, by Shane Duarte.

   "Section 1: Identifying the adequate object or subject of metaphysics.

   Suárez classifies metaphysics or first philosophy as a natural science (*scientia naturalis*) (DM 1.2.17). In so classifying it, he in no way means to identify it with a branch of physics or natural philosophy. Rather, “natural” is here contrasted with “supernatural,” so that in this sense of the expression mathematics also counts as a natural science, whereas sacred or supernatural theology, based on divine revelation, does not.

   Suárez further classifies metaphysics as a real science (*scientia realis*), since it is about things (*res*) or real beings (DM 1.2.13). The implicit contrast here is with a rational science (*scientia rationalis*) such as logic, which is not about any thing or real being, but is commonly thought to deal with objective second intentions (e.g., genus, species, subject, predicate, antecedent, consequent), which are beings of reason or items existing only objectively in the mind as objects of thought. Suárez also classifies metaphysics as a theoretical or speculative science (*scientia speculativa*) (DM 1.2.13), since it has the contemplation of truth as its highest end, unlike the practical and productive sciences, whose truths are ordered to some further goal (i.e., action or production)." (pp. XXVI-XXVII)

3. ———. 1982. *Suárez on Individuation. Metaphysical Disputation V: Individual Unity and Its Principle (De unitate individuali, elusque principio)*. Milwaukee: Marquette University Press.

Translated from the Latin with introduction (pp. 1-27), notes, glossary (pp. 175-279), and bibliography (pp. 281-287) by Jorge J. E. Gracia.

"When thinking about an individual concrete thing such as a man or a tree, one may consider those features that the thing has or seems to have in common with other things, or alternatively, those features that are peculiar or unique to the thing under consideration. If the common features are part of what distinguishes the thing from a larger group of things and at the same time makes it part of a smaller group of things, the members of which can be distinguished only in terms of individual features, then one is thinking of what was commonly known in the Middle Ages as the thing's "nature." If, on the other hand, one considers those features that set a thing apart from all other things, including those falling together with it into a group, then one is considering the thing's individuality. In either case the content of the thought seems to be different. Take Peter, for instance. A consideration of his nature focuses on his humanity; that is, the feature or group of features such as rationality, capacity to laugh, etc., that make him human and in respect of which he is both indistinguishable from other human beings and distinguishable from non-human beings such as dogs, trees and rocks. A consideration of Peter's individuality, on the other hand, will focus only on that feature or group of features which separate Peter from Paul and any other individual being, whether human or not. In the first case we think of the ways in which Peter is the same as other human beings, In the second of the ways in which Peter is unique. The cluster of philosophical problems concerned with the nature of a thing is usually designated as "the problem of universals," those concerned with individuality are gathered under the term "the problem of individuation," Suárez's attention in Disputation V is directed toward the latter.

Contrary to a widespread misconception, the complexity of the problem of individuation was not ignored by scholastics. Most were aware that there is more than one issue related to individuality, and a few of them isolated and discussed the four most important ones. These are, in logical order: the nature of

individuality, the extension of individuality, the ontological status of individuality in the individual and its relation to the nature, and, finally, the cause or causes that bring about individuality. When references to the medieval or scholastic problem of individuation are found in contemporary literature, it is usually the last that is meant. And not without reason because up to the fourteenth century one seldom finds a careful and clear distinction between these four different issues, and much more effort is put into the solution of the last than any of the others. Yet, it is also evident that as the age progresses they become more and more defined until we find late scholastics like Suárez carefully separating them in their discussions. Some never became quite independent in treatment, however. The first one, the nature of individuality, was usually discussed in the context of the second, the extension of individuality. And even the second does not become the subject of separate investigation until late in the Middle Ages. Only the last two issues, the ontological status of individuality and its cause or causes, were generally discussed in isolation from the others. Suárez's treatise is consistent with this practice. He deals with the nature of individuality in the context of its extension (Sect. I), giving separate analyses of the ontological status of individuality (Sect. II) and it cause in various entities (Sects. III-VII). The last two Sections of the Disputation take up a problem related to the individuality of accidents: whether numerically different accidents can be present in the same subject simultaneously and successively." (Introduction, pp. 1-2)

"In Conclusion I would like to stress four important points. The first is the completely philosophical character of Suárez's analysis. Although some theological considerations and examples creep in once in a while, the discussion is guided wholly by philosophical principles. The arguments given are philosophical, and the criteria by which various views and arguments are judged are also philosophical. Often Suárez will explicitly make the point that an argument is not philosophical enough, meaning that it is based on theological assumptions, or that a particular problem that had surfaced in the discussion is

theological and therefore outside the scope of his discussion (Sect. II, §§ 30 and 37). It is clear, then, that at this time, and for Suárez at least, philosophy and in particular metaphysics had a place of its own among the sciences, independent of theology. In this Suárez is no less modern than Descartes or Leibniz who, as it is well known, read the *Metaphysical Disputations* avidly.

The second point is that Suárez's analysis of individuality is ontological in character. He is not primarily concerned with the discernibility of the individual and its cause, although he is aware both of the problems related to the knowledge of the individual and the epistemological problems related to the way we distinguish between two individuals (Sect. III, § 28 and VII, § 4). The roots of discernibility are always referred to by Suárez, as they are in the scholastic tradition dating back to Thomas, as "signs" or "indications" of individuality rather than its causes or principles.(38) The latter are prior to the former both logically and ontologically, even though the former are prior in human experience. This is why Suárez, like most of philosophers who put ontology before epistemology, cannot adhere to what in contemporary philosophy goes by the name of "the principle of identity of indiscernibles," since such a principle implies a reversal of what Suárez would regard as the proper order between these two sciences. His primary concern is with individuality as it independent of human consideration.

Thirdly, I would stress Suárez's contribution to the controversy surrounding the problem of individuation. Besides the subtlety and originality of many of the arguments he proposes, four factors stand out: (1) His identification of the nature of individuality as indivisibility, and of distinction as a result of individuality rather than a constituent of it. (2) His explicit discussion of the extension of individuality, a problem seldom treated separately by his predecessors, whose views on the subject were in many cases no more than implicit uncritical assumptions rather than explicitly discussed philosophical commitments. (3) His original interpretation of Scotus' doctrine of haecceitas as an answer to the problem of the ontological status of individuality rather than to the problem

concerned with the cause individuality. (4) The merits of his own view on the causal analysis of individuality, which avoids some of the most obvious pitfalls of other views and presents a unified and economic solution to this most vexing philosophical problem. The numerous other merits of Suárez's analysis will become evident, no doubt, to the careful reader.

The fourth most important point I would stress in closing is the centrality of this problem within Suárez's metaphysics. This is evident from the place that the discussion of individuation has within the whole framework of the *Metaphysical Disputations*. As a kind of unity, individuality is discussed just after the general notion of transcendental unity in Disputation IV. This indicates that he considered it the most important kind of the first of the three basic attributes of being (unity, truth, goodness). Universal and formal unit are discussed only after individual unity, in Disputation VI. For it is individual unity that makes all other unity possible. As such, the Disputation V reveals the core of Suarecian metaphysics." (Introduction, pp. 23-24)

4. ———. 1964. *On Formal and Universal Unity (Disputatio VI: De Unitate Formali et Universali)*. Milwaukee: Marquette University Press.

   Disputation VI. Translated from the Latin with an introduction (pp. 1-27) by James F. Ross.

   "The unity of the scholastic tradition on universals is illustrated by a list of metaphysical points on which Aquinas, Scotus, Occam, and Suárez all agree and an indication of the one or two major points on which there is substantial disharmony, although there existed a common tradition as to mode of discussion.

   All four authors are agreed that: (1) There are no universals to be found existing independently both of the operations of the mind and of the existence of singular things; and further that such a notion is inconsistent. (2) Anything that really exists (that is, exists independently of consideration by the human mind and of any mind other than the Divine Mind) is a particular or singular thing, a primary substance. (3) Whatever

is actually universal is an *ens rations* , a mental being called a "concept," whose existence (analogically speaking) is derived from the operations of the conceiving mind. (4) There is a foundation *in re* and independently of the operations of the mind for the universality of the concept which is actually universal. (5) The foundation *in re* is, at least in part, the form found in the individual. (6) The foundation *in re* can be called a universal by extrinsic denomination, i.e., by analogy of attribution based upon the causal relation which holds between the foundation *in re* and the actual universal found in the mind. (48) (7) The universal concept is formed by the mind through a process called "abstraction"; (on this point there are many important distinctions and differences which will not be treated herein). (8) There is a real similarity in things of the same nature, a similarity which is the foundation of the "commonness" of the nature or quiddity.

Other than differences in psychology which we must gloss over, the chief discrepancies among these authors are found in the following areas: (1) the manner in which the forms in individuals are the foundation *in re* for the universal concept and (2) the analysis of the claim that two things are similar because they have something in common. There are several notions of commonness or community involved, several interpretations of the expression "common nature" and consequently several analyses of the expression "the form in the individual is the foundation *in re* for the universality of the concept." These two points are intimately connected, since for each of the four authors, and especially for Suárez, the explanation of the similarity of things is directly connected with the explanation of the foundation of universality.

In brief, Suárez and Scotus are very similar in their psychological doctrine of universals, whereas Aquinas, Occam, and Suárez are all much closer together on the metaphysics of the matter than any one of them is to Scotus, who stands closer to Plato and Augustine. Suárez's view is truly a syntheses of the work of his predecessors, and comparison with those writers should not be used to make him join some older "camp," but

should function merely to clarify the various strands of tradition woven into his original design.(49)

Finally a comparison of starting points is useful:

1) Scotus says we must postulate community (which is a logical consequence of possibility) of natures and must seek causal explanations of universality and singularity, which are logically posterior to community.

2) Occam says we must postulate singularity as a principle of explanation, not itself explicable, and proceed to explain universality and community, which are logically posterior.

3) Suarez and Aquinas say we must have a principle of individuation to explain singularity and must also seek explanations of community and universality, which are logically posterior to the principles of composition (essence-existence, matter-form) through which we solve the problem of the one and the many. As a result, all three factors, universality, communicability, and individuation must be explained in terms of prior metaphysical principles." (*Introduction* , pp. 26-27).

(48) At first sight it might appear that Occam would deny this; but his statement that nothing extra-mental is to be called universal, clearly had in mind literal or proper predication. He had no interest in analogous talk and might still have resisted the point; but his own position compells acquiescence, since he holds for causal dependence of concepts upon particular things. Scotus, too, might seem to resist; but by the same arguments would have to agree, since his position is stronger and entails this one.

(49) The richness of Suárez's *Disputation on Universals* cannot be tapped in an introduction. A much more extensive analysis of Suárez's theory will be forthcoming from the author in a general history of the discussion of universals during the middle ages.

5. ———. 1947. *On the Various Kinds of Distinctions (Disputatio VII: De variis distinctionum generibus)*. Milwaukee: Marquette University Press.

Translation from the Latin, with an introduction (pp. 1-15) by Cyril Vollert (reprinted 1976).

"Disputation VII has been chosen as a sample of the metaphysics of Suárez for two reasons. First, it is typical both of his method and of his philosophical thought; many of his characteristic doctrines are briefly treated in it, or at least are indicated. Secondly, it introduces his teaching on the modes, without which much of his philosophy is unintelligible, and above all propounds his theory on distinctions, a point of capital importance for a grasp of Suarezian metaphysics. As the views of Suarez on distinctions and modes are clearly brought out in the Disputation itself, there seems to be no need of a preliminary exposition of these tenets in survey form.(28)

Suarez treats of distinctions in the context of his discussion on the unity of being, Disputations IV to VII. Disputation IV deals with *unum* in general, Disputation V with individual unity and the principle of individuation, Disputation VI with universals, and Disputation VII with the various kinds of distinctions. The connection between the question of unity and that of distinctions is explained by Suárez himself in the introduction to Disputation VII. Section 3 of this Disputation, on "the same" and "other," is added to the treatise on distinctions in order to round out the general discussion of unity.

The main reason why a philosopher's theory of distinctions is important is that his solution to the problem of distinctions is a key to his concept of being. For distinctions are based on the nature of being; therefore a metaphysician's view of the nature of distinctions leads to an understanding of his doctrine of being itself.(29) In reading Disputation VII, the student can profitably ponder whether any ideas developed in it support the suggestion put forth by a scholar of our own day, who is both a profound philosopher and a shrewd appraiser of intellectual trends:

Everything is accounted for if we recall that Suarez lived in a nominalistic milieu, and that, despite his avowed reaction in favor of realism in logic, he did not fully succeed in keeping his metaphysics free from this influence.(30)"

Indispensable, too, for an appreciation of Suarezian metaphysics, is his modal theory. Suarez perceived that most things are highly complex, composed as they are of distinct entities, substantial and accidental. Hence he concluded that their essential union is tenuous, or even impossible, without some ultimate bond. This bond is a mode of being. He saw, further, that every created being is subject to numberless determinations which lie outside its essence, but do not contribute new reality to it. The mode supplies the complement of finality. It closes and terminates an essence; it is not a formal, but a completing act.

The Suarezian system is coherent in its complicated structure. Suarez remains faithful to his primary concepts of entity, unity, existence, and distinction, and traces out their implications to the ultimate conclusion. No greater mistake could be made than to attempt to "purify" the system by suppressing the modes. Take away the modes, and the Suarezian structure collapses; just as, in his view, without the unifying function of the modes, finite beings themselves would fall apart. Whether for a mind craving for reality the modes provide satisfying fare, is another question. A study of Disputation VII should help toward an answer." (Vollert, Introduction, pp. 12-13).

(28) A sufficiently detailed account of these two questions may be found in P. E. Nolan, "The Suarezian Modes," Proceedings of the Tenth Annual Convention of the Jesuit Educational Association (Chicago: Loyola U. Press, 1931), pp. 184-200.

(29) This point has been fully discussed by Michael V. Murray, S.J., in his hitherto unpublished doctoral dissertation, *The Theory of Distinctions in the Metaphysics of Francis Suarez* , Fordham University, 1944. Dr. Murray advances cogent reasons, well fortified by historical research, for his conclusion that Suarez was thoroughly imbued with the widespread nominalism of his time.

(30) J. Maréchal, *Le point de depart de la métaphysique* , I (2d. ed., Louvain: Museum Lessianum, 1927), p. 185.

6. ———. 1989. *The Metaphysics of Good and Evil According to Suárez. Metaphysical Disputations X and XI and Selected*

Passages from Disputation XXIII and Other Works. München: Philosophia Verlag.

X: *De Bono seu bonitate transcendentali*; XI: *De Malo*; XXXIII: *De substantia creata in communi*.

Also contains translations of: *Tractatus de divina substantia ejusque attributis* , book III chapter 3, §§ 9-11; chapter 7 §10 and *De divina praedestinatione et reprobatione,* book 1, chapter 5, §§ 2-3; book 3, chapter 8, §§.1-2; book 5, chapter 4, §§ 1-3.

Translation, with introduction (pp. 17-101), notes and glossary (pp. 217-265) by Jorge J. E. Gracia, Douglas Davis.

"The subject matter of Disputations X an XI concerns the metaphysical issues that surrounds good and evil. Other matters, also of interest both to philosophers and theologians, such as the problem concerning the foundation of moral judgments, and the problem that the existence of evil poses for those who believe in the existence of an omnipotent, omniscient, and good supreme being, are largely omitted. These and related issues were as important in Suarez's times as they are today, and he addressed them explicitly and in some detail, but not in the *Disputationes metaphysicae*. Following his lead, we have in general omitted reference to these matters with one exception: in order to give the reader a more complete view of Suarez's overall doctrine of evil, we have selected from his opera various texts that address some theological issues which have received considerable attention in contemporary philosophical circles, and which reveal Suarez's views on these matters and complement the views presented in Disputation xi. These texts have been placed in the Appendix.

In spite of the relative brevity, systematic organization, and clarity of thought of Disputations X and XI, the text is not easy to understand for a modern reader. As in many scholastic texts of the late medieval and Renaissance periods, the discussion is carefully organized, but the issues and arguments are so intricate and the number of technical terms so large, that even those familiar with the philosophical literature of the times are

likely to find the text difficult to follow at times. Since the translator should avoid altering the style and general tone of the text, we have had to use other means to facilitate its understanding: we have added an Introduction, notes where they seemed appropriate and, in order to keep their number down, a glossary of technical terms at the end. The Introduction has been kept general; it presents a summary and interpretation of Suarez's position and places it within a philosophical and historical framework. Its aim is propaedeutic. The purpose of the notes is primarily to identify the references to other authors made by Suarez, but in a few instances they are used also to solve particular problems that arise in the text or to clarify important uses of terms that appear infrequently in the Disputations. The texts contained in the Appendix are presented without notes, except for those that identify their origin, because they are fragments of works which may eventually appear in more complete translations; we leave their annotation then for the translator of the complete works. The Glossary, in contrast with the notes, deals with recurring difficulties of interpretation arising from the use of technical terminology. Its purpose is not only to clarify Suarez's use of these terms, but also to identify the common understanding of them by scholastics and, when possible, to point to their source in Aristotle or in his Latin commentators. It is intended primarily to help non-specialists, and thus also makes clear how particular Latin terms have been translated into English. In the English-Latin Index the reader will find the Latin equivalent or equivalents of the English terms used in the text, which in turn will facilitate the use of the Glossary. Finally, the Bibliography lists the works cited in order to help the location of references, and author and subject indexes should aid the reader in locating pertinent materials." *Introduction* , pp. 14-15).

7. ———. 2000. *On the Formal Cause of Substance. Metaphysical Disputation XV (De Causa formali substantiali)*. Milwaukee: Marquette University Press.

   Translated by John Kronen and Jeremiah Reedy; Introduction (pp. 7-16) and explanatory notes by John Kronen.

"The Specific Problems Addressed in Disputation XV

One of the things that made Suárez, a great thinker was his impatience with vagueness of any sort and his systematic thoroughness. In this regard Disputation XV is no exception. Never before or since has there been so thorough a treatment of the Aristotelian notion of form. In the course of the Disputation Suárez considered the existence and nature of substantial forms, their eduction, their causality and effect, and their unity. Finally, to be complete, Suárez, treated what he called the "metaphysical form," though this is only analogous to the substantial form in the proper sense. We shall briefly summarize Suárez's views with respect to each of these issues, and discuss the main reasons he gave for them. But we must warn the reader that no summary of Suárez, much less one this brief, can give any idea of the exhaustiveness and sophistication of his discussion of substantial form; to get the proper sense of these, one must turn to Suárez himself.

Section I: The existence of substantial forms

The first question Suárez treated in Disputation XV concerns the existence of substantial forms. This might seem a rather odd procedure. One might think it suitable first to give a definition of what substantial forms are, before attempting to prove their existence. Disputation XV does have a short section which presents a very thorough definition of substantial form, but it is the fifth section in Disputation XV. Why did Suárez wait so long to give this definition? The reason is simple: substantial forms are inferred entities, not observables. Their very nature, therefore, can only be established on the arguments which present reasons for believing they exist. Accordingly, Suárez first gave arguments for the existence of substantial forms, and answered objections to positing them, before defining them. Furthermore, he regarded some of these objections as important enough to merit sections of their own; hence, he did not give a definition of substantial forms until he had both argued for their existence and responded, to his own satisfaction, to objections against positing them.

The arguments Suárez gave for supposing substantial forms exist are of two sorts, *a posteriori* and *a priori*. The *a posteriori* arguments briefly are: 1) Human beings are constituted by matter and a substantial form; therefore, other material substances are as well; 2) Substantial forms are necessary to root the various essential properties of things; 3) Substantial forms are necessary to provide an explanation for the return of a thing to its connatural state after it has been altered from without; 4) Substantial forms are necessary to explain why the intense application of one power impedes the application of another power; and 5) Substantial forms are necessary to provide proper termini of substantial changes. The single a priori argument is that substantial forms are not intrinsically impossible, and are demanded by the order of the universe, the perfection of the universe, and the perfection and unity of material substances.

Sections 2-4: The eduction of substantial forms

Suárez gave several objections to positing the existence of substantial forms. The one he regarded as the most grave focuses on their origin. It takes the form of a dilemma: 1) If substantial forms exist, then they come to be either a) by creation or b) not by creation. Not (a), since this would require continual miracles. Not (b), since when substantial change occurs the form itself must come to be from nothing; but to come to be from nothing is to be created. Hence, there are no substantial forms.

Suárez accused this argument of laboring under a false dilemma since it fails to consider that forms could come to be without being either 1) created or 2) made out of something. In the course of making his case, Suárez argued that creation is opposed not only to making something *out of something* , but also to making something *in something*. Thus, though he admitted that substantial forms are not made out of anything, as that would lead to an infinite regress, he argued that they are made in something, that is, in a matter properly organized to receive a them. In so arguing Suárez gave a very clear notion of what it means for a substantial form to be educed from the

potency of matter. It is for it to be made with a dependency, both in coming to be and being, in a properly disposed bit of matter.

After having given a clear account of the nature of eduction in general, Suárez took up some very particular problems concerning the eduction of substantial forms. The first problem is whether or not matter always temporally precedes form in every eduction, and the second is whether or not forms are made as such. Without going into his reasons here, Suárez's answer to the first question is that matter need not *temporally* precede form, but need only *ontologically* or *logically* precede it, insofar as matter is the subject of form. His answer to the second question is that form, as a proper part of a complete substance, is not made as such, though it is itself made from nothing, but rather the composite, which the form partially constitutes.

Section 5: The nature of substantial forms

Having given a barrage of arguments to prove forms exist, and having answered crucial objections against supposing that they exist, Suárez gave a very precise definition of substantial forms. According to Suárez, a substantial form is "a simple and incomplete substance which, as the act of matter, constitutes with it the essence of a composite substance." This differs from the traditional definition of form, which is "an intrinsic cause giving being to a thing." Though Suárez used this definition in defining formal causality in DM XII, he did not favor it here because of his disagreement with Thomistic metaphysics. For Suárez form completes the being of a composite, giving it powers particular to a specific sort of substance, but it does not give complete substantial being to a thing; in particular, it does not give the being of matter to a thing. Since, according to Suárez, the Thomists held that form channels the act of existing to matter and thus, in some sense, gives matter its own proper being,(11) Suárez decided not to give the traditional definition of form here, preferring instead one that is more in harmony with his own doctrine of a merely conceptual distinction between essence and existence in finite beings.

Sections 6-9: The causality and effects of substantial forms

In accordance with the general method Suárez adopted in treating the causes of being, after he proved the existence of substantial form and gave a clear definition of it, Suárez went on to treat, in a typically exhaustive manner, of its causality and its effects. The first topic Suárez discussed with respect to a form's causality is its principle of causing. The principle of causing of a thing is the faculty or power *in virtue of which* it causes when it causes. Thus the principle of causing of June Anderson's singing is her vocal chords and her trained musical ability. According to Suárez, the principle of causing of a form is nothing other than the form itself. This is related to the actual causality of the form. For Suárez form, as an intrinsic cause of being, does not cause by creating something distinct from itself in a composite substance; rather, it causes by simply uniting its own essence to the other constituent of the composite. Thus the causality of form is simply its union with matter.

The conditions required for a form to cause are: 1) its existence; (12) 2) its spatial proximity to its subject; and 3) appropriate dispositions on the part of its subject. The first two of these are absolutely necessary (i.e., not even God could bring it about that form causes in their absence); the last is only naturally necessary (i.e., in the natural order dispositions on the part of matter are necessary for the form to inform it, but God could bring it about that form informs in the absence of these. For example, He could bring it about that a human soul informs the body of a cat).

The effects of form are: 1) the actualization of matter and 2) the composite. These are in reality [*ex natura rei*] the same effect taken from the point of view of different relations, in the way that getting a majority of the vote in the general election and being elected president are the same. That is to say, the actualization of matter's potency to be something, say a pig, is *nothing other* than the very constitution of the composite substance of a pig. For Suárez, form gives being to matter only in a certain respect. For example, it may give being to matter by

actualizing its potential to be a pig. However, form does not give being to matter by giving matter its own being qua matter. In this, Suárez disagreed with the Thomists and their doctrine of the real distinction between essence and existence. Nevertheless, though form does not give being intrinsically to matter by actually constituting that being, matter has such a minimal existence that it cannot naturally exist without a dependency on form; only by the absolute and infinite causal power of God can matter exist denuded of all form.(13)

Section 10: The unicity of substantial form

A much debated question in the middles ages was whether or not there is more than one substantial form to each substance. The Franciscans held that there is more than one substantial form in higher substances such as human beings and animals. (14) Their reasons for holding this were diverse, and each of them was treated by Suárez in section 10. However, there seems to have been two main reasons for their doctrine. The first is that, as higher substances share certain powers and properties with lower beings but also possess powers peculiar to their own levels of being, several forms must be posited in them to account for their similarity with and difference from lower beings. The second main reason is that there is evidence that lower forms remain in compounds (e.g., it seems that water is present in plants, animals and humans); therefore, it would seem that compounds are characterized by the forms of the elements that make them up as well as by their own peculiar forms. Scotus added a new argument for the view that there is more than one form in humans based upon the metaphysical distance between the human soul and the body. The human soul, he reasoned, is too perfect to immediately inform naked prime matter; hence, in order for the soul to inform a certain piece of matter, it is necessary that matter be first informed with the form of corporeity, which gives it extension and the required organic structure. Scotus thought his theory confirmed by the fact that human bodies do not immediately corrupt after death.

The Franciscan tradition came under strong attack on these points from Thomas Aquinas and his followers. Aquinas argued, in the first place, that it is impossible for there to be more than one substantial form in a single composite since, as substantial form gives substantial being, a plurality of substantial forms yields a plurality substantial beings. But each substance can only have one substantial being since it is impossible for a *single* thing in a category to be *many things* in that category. Further, Aquinas argued that, as a higher form can do anything a lower can, there is no need to posit many substantial forms to account for the higher powers of humans and animals; one form will give the human being, for example, not only the higher powers of reason, but also the lower powers of sensation, growth, reproduction, etc.(15)

Suárez agreed with the Thomistic tradition in holding that there can only be one complete substantial form in each composite, and he further agreed with the reasons the Thomistic tradition gave in support of this view. However, Suárez disagreed with Aquinas and the Thomists in one major respect. Aquinas had argued that all substantial forms are simple and without entitative parts, apparently on account of their function as unifiers of the composite substance.(16) His view seemed to be that a substantial form cannot give substantial unity to a thing unless it is itself fully one. Suárez, however, held that all substantial forms other than the human are composed of parts, and he thought these parts are incomplete substantial forms. This disagreement with the Thomists probably is related to Suárez's view that essence and existence are not really distinct. Such a view forced Suárez to grant more independence to the parts making up a substance, for example, form and matter, and this made him more open to the possibility that a composite substance that is truly essentially one could be constituted out of really distinct, albeit incomplete, substantial parts.

Section 11: Metaphysical form

For the sake of completeness, Suárez rounded off his discussion of substantial form with an account of the nature and reality of

metaphysical form. Suárez noted, however, that metaphysical form, in whatever sense it is taken, is not a true form because it is not an entity which, by informing some being really distinct from it, constitutes a complete substantial essence. Metaphysical form is, then, form only by analogy.

Suárez distinguished two sorts of metaphysical form. The first is the complete essential nature of a thing, taken as an individual. Thus, as a human nature is constituted out of form and matter, an individual person's metaphysical form is her body informed by her soul. Such a "form," though it could be said to give a person being, is not really distinct from the person whose form it is, and it does not constitute the being of anything by informing some subject really distinct from it. Nevertheless, Suárez did not hold that any individual's essence is precisely identical with her since she is constituted, not simply by her essence, but by a substantial mode terminating her essence and making it incommunicable to another in the way in which Christ's human essence was communicated to His Divine Essence. For Suárez complete individual essence along with substantial mode constitutes the supposite or hypostasis.

The second sort of metaphysical form Suárez discussed Is logical form. This form is equivalent to the difference in a "genus-difference" definition of a thing. Thus, in the traditional definition of human being as "rational animal," "animal" is the genus which is informed or determined by the difference "rational." So "rational" is said to be the formal element in the definition and "animal" the material element. But, as Suárez did not believe that universals really exist and held rather that they are mind-dependent relations, he did not think of differences as really combining with genera to form the real essences of things. Hence, he did not regard logical form as being a form in the true sense of the word. It is rather a form only by a kind of analogy with real, physical forms, i.e., with forms which actually exist and inform a subject really distinct from themselves." (Introduction, pp. 9-14).

(11) Whether or not Aquinas held this view, Suárez was less certain. But he was certain it was the view of the Thomists. See

the present disputation, sect. 8, para. 2.

(12) It should be noted that the existence of the form, though necessary for it to cause, is not a causal condition in the most proper sense of the word, according to Suárez. The reason is that a causal condition must be really distinct from that of which it is a causal condition, and nothing, according to Suarez, is really distinct from its existence.

(13) For Suárez form gives matter the property "being actualized by such and such a form," and the property "being a human body"; it does not give it the property "being such and such a form" or the property "being the substance constituted by such and such a form and such and such matter." Thus my soul gives my body the property "being actualized by a human form," but it does not give it the property "being a human soul" or the property "being a human being."

   XVII: *De causa efficiente in communi*; XVIII: *De causa proxima efficiente, ejusque causalitate, et omnibus quae ad causandum requirit*; XIX: *De causis necessario, et libere seu contingenter agentibus, ubi etiam de fato, fortuna et casu.*

   Translated with an introduction (pp. XIII-XX) by Alfred J. Freddoso.

   "Of the six disputations dealing with efficient causality, the first triad (17-19), contained in the present volume, is concerned mainly with creaturely efficient causality, while the second triad (20-22) deals with the three modes of God's efficient causality: namely, creation, conservation, and general concurrence.

Disputations 17-19 constitute, as far as I know, the longest, most profound, and most thorough tract ever written on creaturely efficient causality from an Aristotelian perspective. Let me briefly describe each of these disputations.

Disputation 17, entitled "On the Efficient Cause in General," provides a general characterization of efficient causality and its various modes. In section 1 Suárez expounds and modifies Aristotle's definition of an efficient or agent cause as that "whence there is a first beginning of change or rest," carefully distinguishing the efficient cause from the other three Aristotelian causes: namely, the formal, material, and final causes. He concludes that an efficient cause is an extrinsic per se principle that communicates esse, or being of some sort, to an effect by the mediation of an action. In section 2 Suárez goes on to discuss the main divisions of efficient causes: namely, (i) *per se* versus *per accidens* , (ii) physical versus moral, (iii) principal versus instrumental, (iv) univocal versus equivocal, and (v) primary versus secondary. Along the way he also makes some illuminating remarks about the important distinction between agent causes or principles properly speaking and the sine qua non conditions required in order for those agents to exercise their causal power.

Disputation i8, entitled "On the Proximate Efficient Cause and on its Causality and on All the Things that it Requires in order to Cause," deals with the metaphysics of creaturely causation in general and especially with the efficient causality proper to material substances and their accidents. Section contains Suárez's reply to occasionalism and other theories that either deny that material substances are efficient causes at all or else severely limit the general range of effects that can be produced by them. Sections 2-6 treat general metaphysical issues concerning the efficient principles involved in the production of new substances and accidents. Then in sections 7-9 Suárez discusses the three most disputed sine qua non conditions for efficient causality: namely (i) the condition that the thing acting (agent) be distinct from the thing acted upon (patient), (ii) the condition that the agent be spatially proximate to the patient, and (iii) the condition that the agent be initially dissimilar to

the patient. Having completed his treatment of the principles and prerequisites of efficient causality, he next (section 10) takes up the ontological question of what it is that formally constitutes a substance or accident as an actual efficient cause. Finally, in section 11 he lays out the metaphysics of destructive or corrupting efficient causality.

Disputation 19, entitled "On Causes that Act Necessarily and Causes that Act Freely or Contingently; also on Fate, Fortune, and Chance," turns to issues concerning causal necessity and contingency. In sections 1-3 Suárez gives a precise characterization of the distinction between causes that act by a necessity of nature and causes that act without necessity; in addition, he takes up the disputed question of whether there could be any causal contingency in the created world if, contrary to fact, God acted only by a necessity of nature. Sections 4-9 go into great depth on the nature of free choice and include an extended treatment of controversial issues surrounding the relationship between intellect and will in free action. Finally, sections 10-12 take up a series of questions concerning fate, fortune, and chance." (Introduction, pp. XVII-XIX).

   Translation, notes, and introduction (pp. XI-CXXIII) by Alfred J. Freddoso.

   "Efficient causality in the *Disputationes Metaphysicae* : context and overview

   I will now provide an overview of Suárez's treatment of efficient causality in Disputations 17-22. My intent is to give the reader some initial idea of the range of questions Suárez deals with

and in this way to set a context within which to situate my later discussions of scholastic metaphysics and of the disputations on divine action. I will introduce a few technical terms here, but will defer an explication of them to Parts 2 and 3 of this introductory essay.

The treatment of efficient causality falls into the first half of the Disputationes Metaphysicae (Disputations 1-27), which treats of being in general prior to its division into infinite being and finite being and, a fortiori, prior to the further division of finite being into substance and accident. After the initial investigations into the nature of metaphysics in Disputation 1 and into the essential notion of being in Disputation 2, Suárez turns in Disputation 3 to a general discussion of the transcendental properties (passiones) of being, which he identifies as one (being as undivided in itself), true (being as an object of cognition) and good (being as an object of love and desire). Disputations 4-7 deal with oneness or unity, focusing on individual unity (or individuality), formal unity (or universality), and the various types of distinctions among beings. Disputations 8-9 deal with truth and falsity and Disputations 10-11 with good and evil.

It is at this juncture, in Disputation 12, that Suárez begins his treatment of the causes of being. Since metaphysical inquiry is often said to aim at a knowledge of the principles of being, he first discusses the notion of a principle and its relation to the notion of a cause. The term 'principle', he tells us, can be used in a wide sense to designate the first element in any sort of ordering, real or merely conceptual, and in this sense it is obviously more inclusive than the term `cause'. However, 'principle' is used most properly in a narrower metaphysical sense to designate "that which truly and directly communicates (*influens*) some sort of being (*esse*) to that of which it is the principle," or, in other words, that on which a real entity depends in some way for its existence.(31) Suárez is careful to point out, however, that even on this narrower reading the notion of a principle is still broader than the notion of a cause, since within the Blessed Trinity there is a communication of being without causality. For the Father is a true principle

eternally 'generating' the Son, and the Father and Son together are true principles eternally 'spiraling' the Holy Spirit, despite the fact that these intraTrinitarian 'relations of origin' involve no causality, strictly speaking. The reason for this, Suárez explains, is that in these relations the principle's own being is in no way distinct from the being of which it is the source; that is, the being (or, nature) which the Son receives from the Father is the Father's very own being and nothing else, and the being (or nature) which the Holy Spirit receives from the Father and the Son is their very own being and nothing else.(32)

A cause, on the other hand, is a principle that communicates being or *esse* distinct from its own being to that of which it is a cause.(33) And a cause's causality is just "that influence or concurrence by which a cause, within its own genus, actually gives being to the effect."(34)

These definitions are meant to apply to every Aristotelian genus of cause material, formal, efficient, and final.(35) Material and formal causes are called 'intrinsic' causes because they do in a sense communicate their own being to the composite which they constitute by their union; however, they satisfy the notion of a cause because the being or esse of the composite substance which results from their union is distinct from the being of either the matter or the form. Efficient and final causes, by contrast, are wholly extrinsic to the entities to which they communicate being.(36)

)It is within this general framework that Suárez situates his tract on efficient causality, the longest and most meticulous such tract in the history of scholasticism. Of the six disputations dealing with efficient causality, the first triad (17-19) is concerned mainly with efficient causality as exercised by creatures,(37) while the second triad (20-22), contained in the present volume, focuses on the three modes of divine efficient causality that can be investigated by the natural light of reason, viz., creation, conservation, and general concurrence. I will now give brief descriptions of each of these six disputations, bearing in mind that in Parts 5-7 below I will be giving a more detailed analysis of the three disputations on divine action (20-22).

Disputation 17, entitled "On the efficient cause in general," provides a broad characterization of efficient causality and its various modes. In Section 1 Suárez expounds and modifies Aristotle's definition of an efficient or agent cause as that "whence there is a first beginning of change or rest," carefully distinguishing the efficient cause from the other three Aristotelian causes. An efficient cause, he concludes, is an extrinsic per se principle that communicates esse or being of some sort to an effect by means of an action. In Section 2 he lays out the main divisions of efficient causes, namely, (a) *per se* (immediate) vs. *per accidens* (mediate) causes, (b) physical vs. moral causes, (c) principal vs. instrumental causes, (d) univocal vs. equivocal causes, and (e) primary or first cause vs. secondary causes, where this last distinction is equivalent to the distinction between God as an agent and creatures as agents. Along the way he also makes some illuminating remarks about the important distinction between an agent cause or efficient principle, properly speaking, and the sine qua non conditions that are prerequisites for an agent's exercising its causal power.

Disputation 18, entitled "On the proximate efficient cause, and on its causality, and on all the things which it requires in order to cause," deals with the metaphysics of creaturely causality in general and especially with the efficient causality proper to material substances and their accidents. Section 1 contains Suárez's reply to occasionalism and other theories that either deny that material substances are efficient causes or else put severe a priori limitations on the range of effects that can be produced by them. Sections 2-6 treat certain metaphysical issues concerning the efficient principles involved in the production of new substances and accidents. Then in Sections 7-9 Suárez discusses in detail the three prerequisites for efficient causality that stand in most need of careful unpacking, namely, (a) the condition that the thing acting (agent) be distinct from the thing acted upon (patient), (b) the condition that the agent be spatially proximate to the patient, and (c) the condition that the agent be initially dissimilar to the patient. Having completed his treatment of the principles and prerequisites of efficient causality, he next (Section 10) takes up

the ontological question of what it is that formally constitutes a substance or accident as an actually acting efficient cause. Finally, in Section 11 he propounds the metaphysics of destructive or corruptive efficient causality.

Disputation 19, entitled "On causes that act necessarily and causes that act freely or contingently, and also on fate, fortune, and chance," turns to issues concerning causal necessity and contingency. In Sections 1-3 Suárez gives a precise characterization of the distinction between agents that act by a necessity of nature and agents that act without necessity; in addition, he takes up the disputed question of whether there could be still be causal contingency in the created world if, contrary to fact, God acted only by a necessity of nature. Sections 4-9 go into great depth about the nature of free choice and include an exhaustive treatment of scholastic debates over the relation between intellect and will in free action. Finally, Sections 10-12 take up a series of questions concerning fate, fortune, and chance.

Disputation 20, entitled "On the First Efficient Cause and on his first action, which is creation," begins in Section 1 by asking whether natural reason can prove that creation ex nihilo is possible. Here Suárez argues that (a) there is no incoherence either in the concept of creation itself or in the concept of the power to create, and that (b) if we assume the existence of God, we can prove that such a power in fact exists and has been exercised. Along the way he tries to show, against the ancient philosophers, that matter is created, and he ends with an interesting discussion of whether Aristotle himself believed in creation ex nihilo. Section 2 takes up the disputed question of whether creation requires an absolutely unlimited power, or whether instead some creature could have the limited power to create at least some entities as a principal cause; and in Section 3 Suárez tries to answer the related, but distinct, question of whether any creature could act as an instrumental cause in God's creative action. Section 4 investigates the ontological status of the action of creation, an issue that will become clearer when I talk about the ontology of action in Part 3 of this introductory essay. Finally, Section 5 asks whether creation

presupposes the prior non-existence of the thing created, or whether instead it is possible that some entities should have been created from eternity without any beginning.

Disputation 21, entitled "On the First Efficient Cause and on his second action, which is conservation," begins in Section 1 by investigating whether natural reason can prove that created beings depend for their existence on the continual actual influence of the First Cause. Section 2 explicates the relation between creation and conservation, while Section 3 asks whether conservation is a divine prerogative.

Disputation 22, entitled "On the First Cause, and on his third action, which is cooperation, or concurrence, with secondary causes," begins in Section 1 by asking whether in order for a created agent to act, it is necessary that God, in addition to creating and conserving that agent along with its causal powers, should also cooperate with it in its very acting. After concluding that the answer is affirmative, Suárez asks in Section 2 whether this cooperation on God's part consists in his giving to the secondary cause itself some power or principle of action that it did not previously have on its own, or whether instead God's actual cooperation has its terminus just in the effect produced by that agent. Section 3 pursues this matter further by asking how God's concurrence is related to the secondary cause's action and to the subject of that action. Section 4 turns to the manner in which God concurs. Here Suárez tries to show that God's manner of granting concurrence to freely acting agents must differ from his manner of grunting concurrence to naturally acting agents. Finally, in Section 5 Suárez gripes that secondary agents do not depend essentially in their acting on any beings other than God.

With this brief overview in hand, we are now ready to look more closely at the ontological framework within which Suárez works out his account of efficient causality in general and God's causality in particular." (Introduction, pp. XXV-XXIX).

(31) See DM 12.1.25.

(32) See especially DM 12.2.6-10. In a moment I will contrast this intra-Trinitarian communication of being with that of the 'intrinsic' causes of creatures.

(33) DM 12.2.4-7.

(34) DM 12.2.13.

(35) Suárez also asks whether exemplar causes — that is, the ideas that serve as paradigms for intellectual agents and specify their actions — constitute a separate genus of cause. He treats this matter at length in Disputation 25, which is devoted exclusively to exemplar causality. There he identifies the exemplar cause as a certain antecedent condition of efficient causality that precedes the actions of intelligent agents.

(36) In Disputation 23 Suárez argues for the claim that, despite their peculiarities, final causes fully satisfy the definition of a cause.

(37) An English translation of these three disputations is available in Francisco Suárez, On Efficient Causality: Metaphysical Disputations 17-19, translated by Alfred J. Freddoso (New Haven, CT: Yale University Press, 1994).

"A Summary of Disputation 28: (11)

As mentioned, the two Disputations that are translated in the present work open the second part of the *Disputationes metaphysicae* and mark the turn from being in general to particular beings. Their concern is with, first in Disputation 28, a comprehensive division of being in general, and after in Disputation 29, the existence of the principal member of this division, namely, that being which is God.

Disputation 28 is divided into three Sections, which ask about the legitimacy and the sufficiency of the division, as well as whether the dividend, i.e. being, is univocal or analogous between God and creatures. In the first Section (Vives: vol. 26, pp. 1-8), the question is whether being is rightly divided into infinite and finite being? Doubts arise from the fact that "infinite" and "finite" on their face do not appear to cover the whole range of being but rather look to be restricted to accidental being in the category of quantity (§ 1). In addition, the terms of the proposed division seem obscure, especially the term "infinite" (§ 2). Suárez's answer is to analyze the terms (§ 3) and then to defend the division as one that is good and necessary (§ 4) as well as first and most evident (§ 5). It is equivalent to other divisions such as being by itself *(ens a se*) and being from another (*ens ab alio*) (§§ 6-7) or, with clarifications, necessary being and contingent being (§§ 8-12). It is also equivalent to: essential being and being by participation (§ 13), created being and uncreated being (§ 14), or being in act and being in potency (§§ 15-16). Suárez next compares the first division with the rest (§ 17), explains the terms of the first division by comparison with quantity (§ 17), and closes the first Section (§ 18) with a reply to objections raised at its beginning.

Section 2 (vol. 26, pp. 8-13) opens with reasons for doubting the sufficiency of the division. These include that fact that relations, because they are found both in creatures and in God, seem to be neither finite nor infinite and do not therefore fit the division (§ 1). Something akin to this occurs from the case of Christ who is both finite and infinite inasmuch as he is both God and man (§ 2).

Again, there is question regarding the free acts of the Divine Will, which would apparently be at once both contingent and necessary (§ 3). Then there is an opinion of Duns Scotus to the effect that being should first be divided into quantified and non-quantified being, and that the division into finite and infinite is a subdivision of quantified being (§ 4). After addressing this last opinion (§§ 5-6), Suárez goes on to defend the sufficiency of the divisions proposed in Section 1, especially

that in terms of being by itself and being from another (§ 7). He then gives extended expositions of and answers to the difficulties proposed about relations, Christ, and Divine free acts (§§ 8-16).

Section 3 of Disputation 28 (vol. 26, pp. 13-21) begins with a rejection of the view that the term being as used between God and creatures is simply equivocal (§ 1). A quite opposite view, which was held by Duns Scotus (1266-1308), is that being is said univocally of God and creatures (§ 2). After explaining the reasons for this view and for its opposition to analogy in this context (§§ 3-4), Suárez himself presents an opinion that the term being is indeed said analogously of God and creatures (§ 5), discusses arguments in support of this (§§ 6-8), and replies to objections that may be raised against these arguments (§ 9). Subsequently, he inquires about the kind of analogy that is present here (§ 10) and rejects Cajetan's doctrine that there is "a proper analogy of proportionality" between God and creatures (§ 11). Also rejecting any "analogy of attribution to a third thing," that is, any position that would affirm that God and creatures are called being only by reference to something else, he next affirms that there is here "an analogy of one to another," which is to say that creatures are being in reference to God and the term being is said more principally of God than of creatures (§ 12). At this point, he brings in the "Platonic" opinion that God is not being but rather above being, which occasions a brief explanation of the name of God in Exodus 3,14 (§ 13). Following this, he explains and affirms that the analogy of being here is intrinsic inasmuch as creatures are designated beings from their own intrinsic being and not just extrinsically from God (§§ 14-17). Finally, his reply to objections and arguments in support of univocity closes the third Section and the Disputation itself (§§ 18-22).

IV. A Summary of Disputation 29:

Though almost twice as long, Disputation 29 like the one before is again divided into three Sections. Section 1 (vol. 26, pp. 21-34) begins after two introductory paragraphs (§§ 1-2) in which Suárez gives reasons for the location of the subject matter of the

Disputation in this place and remarks how he will leave aside as much as possible items which depend for their understanding on Revelation. The first Section then asks whether and/or by what means the existence of God can be demonstrated. Among the Scholastic Doctors, Peter d'Ailly (1350-1420) has denied the possibility of such a demonstration. To this Suárez makes the brief but revealing reply that already by the various divisions of being that have been presented in the previous Disputation the existence of "some being which is uncreated or not produced" has been proven (§ 1). The obvious implication is that by now the existence of God has in effect been proven. But immediately the question arises: by what means, physical or metaphysical, is this properly done? On one side, the opinion of Averroes is that the means is physical, namely the motion of the heavens (§ 2). The contrary opinion, that of Avicenna and later of Duns Scotus among others, holds that the means must be metaphysical (§ 3) — that is, not motion but being itself. A third and a fourth opinion hold in different ways that the task must belong to both physics, that is natural philosophy, and metaphysics (§§ 4-5). In different ways the means would thus be both physical and metaphysical. In Suárez's judgment the second opinion is certainly the true one but there can be some probability in the fourth position, if it is rightly explained (§ 6).

At this juncture, he examines at length the physical argument that proceeds by the medium of motion and for various reasons he finds it wanting (§§ 7-17). Then he considers another physical argument, from the operations and the essence of the rational soul (§ 18). This too comes up short, unless we first pose a question about the soul's being, which is a metaphysical question (§ 19). Here Suárez gives the metaphysical argument that is based upon a broader and deeper principle than the physical one, "Whatever is moved is moved by another." The metaphysical principle is "Whatever is made or produced is made by another" and the argument itself concludes to an unmade Maker (§§ 20-21). An objection of a possibly circular chain of causes is dismissed as every bit as inadmissible as a thing's causing itself (§ 22). Other objections involve an infinite number of causes that would preclude any arriving at a first

uncaused or unmade cause. There are different ways to conceive such an infinity of causes. Suárez explains such ways in detail and shows their insufficiencies (§§ 23-40). The first Section ends (§§ 41-42) with a brief rehearsal of and summary judgment upon the opinions listed at the beginning.

Section 2 (pp. 34-47) gets more exact and asks: whether one can show in an a posteriori way that there is only one uncreated being which will in fact be God? The thought here is that although the basic demonstration has been displayed in the previous Section or even in the previous Disputation, it needs precision. For it might be the case that while by now an unmade or uncreated being has been proven to exist, perhaps there is more than one such, which would mean that we have not reached the true God, who is unique (§§ 1-2).

In a totally opposite direction is a position, which has been associated with St. Anselm of Canterbury (1033-1109), to the effect that the existence of God is self-evident and therefore need not and in fact cannot be demonstrated (§ 3). Suárez's own view is that the existence of God can be demonstrated but it is necessary first to be clear about what we mean by God, that is to say what it is we are attempting to demonstrate (§ 4). This he tells us is "a certain most noble being which both surpasses all the rest and from which as from a first author all the rest depend, which, accordingly, should be worshipped and venerated as the supreme deity" (§ 5). There are, he says, two ways to prove the existence of such a God: "one is completely a posteriori and from effects; the other is immediately a priori, although remotely it also is a posteriori" (§ 7). In the first way, "the beauty of the whole universe and the wonderful connection and order of all things in it sufficiently declare that there is one first being, by whom all things are governed and from whom they draw their origin" (ibid). Four objections are that (1) this may prove that there is one governor of the world but not necessarily that there is one creator, (2) this proof does not rule out a number of rulers who might govern the world by consensus, (3) it says nothing about spiritual beings themselves or their connection with the present material world, and (4) this proof does not foreclose on there being another world

besides this one (§ 8). Suárez goes on in paragraphs following to answer these objections in detail. In reply to the first, he draws from the ancient Christian writer, Lactantius (ca. 240-320), the lesson that "the universe can be governed only by him by whose counsel and power it has been created" (§ 9). He then devotes eleven paragraphs (§§ 10-20) to further explain this in the cases of the elements, mixed bodies (more or less perfect), and especially the heavens. In this last regard, he pays special attention to the causality between the heavens and sublunar natural things. The second objection is met through nine paragraphs (§§ 21-29) in which Suárez argues that a number of world rulers would require that such be at once intelligent but also imperfect and liable to disagreement among themselves. The third objection is presented in more detail (§ 30) and answered over six paragraphs (§§ 31-36) in which Suárez treats the Aristotelian separate substances. From the motion of the heavens their existence is at best only probable, and even if they do exist they must be creatures of God. Finally, in reply to the fourth objection, Suárez shows the reasonable character of the Christian doctrine that God is not limited to making only one world and could indeed be the creator of any number of worlds besides this one, with the result that the objection has no force (§ 37).

Nevertheless, at this point Suárez tells us: "from this and the preceding objection I am convinced that the reasoning made to prove that there is only one unproduced being and that all the rest of beings have been made by that being does not conclude absolutely about all beings, but only about those which can fall under human cognition by way of natural reasoning or philosophy. Therefore, in order that the argument conclude universally, there necessarily must be employed a demonstration a priori, which ... we will pursue in the following Section" (ibid.)

Section 3 (pp. 47-60) first affirms the impossibility of demonstrating the existence of God in a priori manner from cause to effect, since obviously God has no cause (§ 1). Nevertheless, once He has been, in an a posteriori way, demonstrated to exist, it is possible secondarily to use a priori

demonstrations to arrive at some of his properties or attributes (§ 2). However, this is not easy to do, as Suárez shows by rejecting an argument which has been offered to prove God's unicity on the basis that being can belong first and through itself only to a single unproduced being (§§ 3-7). He then proposes two more arguments that purport to prove that there cannot be several beings that exist of themselves. However, objections can be made to both of these arguments (§§ 8-10). A fourth argument, which Suárez finds "very probative," is to the effect that singularity must belong by nature to an unproduced being; therefore such a being cannot be multiplied (§ 11). While objection may be made to this reasoning, Suárez thinks it can be defended (§ 12) and indeed, if it is rightly understood, it may strengthen the first argument offered (§ 13). He further infers that being can belong to other things only by way of efficient causality or effective emanation from the first unproduced being (§ 14). Suárez then considers at length a fifth argument, which he thinks is "enough by itself and also confirms the preceding argument" (§ 15) to the effect that two or more unproduced beings could be neither the same nor diverse in species (§§ 15-22). This leads to an explanation of a text from Aristotle that seems at variance with this (§ 23). At this point, a sixth argument is introduced to show that a first unproduced being which is supreme and infinite in its perfection and most powerful in its acting produces "all things that are" (§ 24). An objection is raised to the effect that if it were to produce all things it would produce itself (§ 25), which, of course, is absurd. Suárez answers that it belongs to the perfection of that being and subsequently to its power "that it is not itself producible by itself' while all else is produced by it (§ 26). Yet another argument can be taken, says the Doctor eximius, "from the causality of the ultimate end" (§ 27) and objections to this are raised and answered (§§ 28-31). Now Suárez states his conclusion - "From all of this, it has been sufficiently demonstrated that God exists" - and reaffirms its metaphysical character (§ 32). "Lastly," he says, "from all that has been said it can be clear by, so to speak, a certain most evident experience how far from truth is the opinion ... which asserted that the existence of God is so self-evident that, for that reason, it could

not be demonstrated" (§ 33). This occasions a final discussion of self-evident propositions (§ 34) as well as of reasons that could motivate such an opinion (§§ 34-37)." (Introduction, pp. XIV-XVIII).

(11) What follows is meant to be little more than an outline. Readers are advised to look at what Suárez has to say for himself, albeit in the present poor English version, rather than rely upon any synopsis of that.

11. ———. 1983. *On the Essence of Finite Being as Such, on the Existence of That Essence and Their Distinction (Disputatio XXXI)*. Milwaukee: Marquette University Press.

    XXXI. *De essentia entis finiti ut tale est, et de illius Esse, eorumque distinctione*.

    Translated from the Latin with an introduction (pp. 3-43) by Norman J. Wells.

    "The bulk of Suárez's written work, edited as well as unedited, reflect his various teaching positions as philosopher and as theologian. However, a number are inspired directly by his state as a religious and a member of the Society of Jesus. Still others have their origin in the legal and political disputes of the day. The structure and contents of most of these works, their extent and quality, can be viewed with convenience in the twenty-six (or twenty-eight) volume edition of Vivés.

    A. *Disputationes Metaphysicae*

    It is against this over-all backdrop, especially the theological tracts, that Suárez's famous *Disputationes Metaphysicae* must be seen, if for no better reason than that this is the way Suarez viewed his metaphysical investigations themselves. For in both the *Ad Lectorem* as well as the *Prooemium* to this work, Suarez indicates the occasion and purpose of his metaphysical work with explicit consideration of its relation to his theological inquiries.

    Sensitive to the pedagogical demands upon a discipline, Suarez confesses that in the course of his theological teaching, he has had to make rather spontaneous, frequent and extensive

reference to metaphysical considerations. And this was required for the simple reason that "metaphysical principles and truths are so closely interwoven with theological conclusions and arguments, that if knowledge and full understanding of the former are lacking, knowledge of the latter must necessarily suffer."(*Prooemium* , XXV, 1ab) Such asides, Suárez finds, are not only burdensome to the *legentes* , but personally embarrassing, since it demanded of his hearers a blind faith in his judgment.

In addition to these immediate pedagogical problems, there are more substantive and overriding reasons presiding at the origins of the *Disputationes Metaphysicae*. Suárez sees clearly that, though sacred and supernatural theology is founded upon divine illumination and principles revealed by God, due to its human condition, such theology must utilize truths which are naturally known as well. It is in this latter area that metaphysics proves so indispensable, for of all the sciences known to man, it comes closest to the science of divine things. Moreover, without any proper knowledge of metaphysical problems, the Christian mysteries could scarcely be probed and discussed. In short, Suárez is convinced that "our philosophy ought to be Christian and the servant of divine theology." (*DM, Ad Lectorem, XXV*).

In the matter of the internal organization of such a discipline as metaphysics, Suárez takes a stand that is significant both historically and methodologically. For he finds himself at odds with the then current practice in the history of Western metaphysics: the medieval technique of commenting on an authoritative text by way of the *quaestio* elaborated, somewhat erratically, within the context of the books of Aristotle's *Metaphysics* . By way of a methodological corrective, Suarez insists that the *ordo doctrinae* , required and demanded by the very object of this discipline, must be heeded in the sequence and hierarchical arrangement of problems and discussions. On this latter score, Suárez also finds himself quite disenchanted and critical of Aristotle's own method, sequence and organization. Consequently, observing the *ordo doctrinae* as Suárez sees it, the *Disputationes Metaphysicae* begin with an

initial consideration of the object of the metaphysical enterprise, its dignity and utility. This is followed by an extensive consideration of the meaning and significance of that object, *ens* , its properties and its causes. This, in turn, is complemented by a consideration of the *inferiores rationes* of *ens* , i.e., the division of *ens* into c*reatum-creator* and further divisions including all the special *genera* and grades of *ens* , closing with a consideration of *ens rationis* in Disputation 54.

B. *Disputation Thirty-One*

As part of this latter division, the thirty-first Disputation, comprised of fourteen separate sections of varying length, is explicitly concerned with laying bare the structure of finite being.

The first section serves as a general introduction to the historical as well as the doctrinal dimensions of this problem. Sections two to four constitute a more specialized introduction wherein Suarez's own basic and guiding principles are set down and established. Sections five to seven are, for the most part, of a critical character, negatively as well as positively. The remaining bulk of the discussion, comprising sections eight to fourteen, deal with the consequences and particular difficulties arising from the various historical traditions in this matter. Hence, they are meant to bolster and confirm, directly and indirectly, Suárez's own principles and conclusions as well as support his negative criticisms. (*Introduction* , pp. 4-6, notes omitted).

12. ———. 2006. *On Real Relation (Disputatio Metaphysica XLVII)*. Milwaukee: Marquette University Press.

XLVII: *De relationibus realis creatis*.

A translation from the Latin, with an introduction (pp. 9-35) and notes by John P. Doyle.

"Summaries of the Sections of Disputation 47.

This portion of my Introduction owes much to the summary given by Sergio Rabade Romeo and his associates in their edition with Spanish translation of the Disputationes

metaphysicae.(95) As they correctly lay it out, the Forty-Seventh Disputation can be articulated as follows:

1. Relation in general — its existence, its essence, and its division (Sections

1-4).

2. Categorical Relation — its essential definition, its subject, foundation, and

terminus (Sections 5-9).

3. The Aristotelian division of relative beings, based on a threefold foundation (Sections 10-15).

4. The question of whether one relation can be the terminus of another (Section 16).

5. The structure of the category of relation (Section 17).

6. The properties of relation (Section 18).

And then descending to the different Sections in turn:

Section I

Beginning with the issue of the real existence of relation, Suárez enumerates up to five reasons for doubting such existence (paragraphs 1-7). He then presents three different opinions: (1) there are no true real relations (paragraph 8); (2) relations exist, but they do not constitute a special category of being (paragraph 9); and (3) in created things there are real relations, which make up a proper and special category (paragraph 10). This last is the most accepted opinion and it is demonstrated by the teachings of the Catholic Faith and by rational arguments (paragraphs 11-15).

Section II

This is the key Section, in which the reality of a relation is directly addressed. It is first necessary to clarify how a real categorical relation is distinguished from substance and all absolute accidents in order to explain the reality and the nature of created relations (paragraph 1). In this regard, Suárez

presents and rejects four different opinions (paragraphs 2-10). He then lingers with another opinion—held by many, especially Nominalists—which defends a distinction of reason with a basis in reality between relation and its absolute foundation (paragraphs 11-17). Next, without approving the distinction between the "being in" and the "being toward" of a relation, he admits the indicated Nominalist opinion (paragraph 22). Finally, he answers the arguments of the other opinions (paragraph 23) and the arguments remaining from Section 1 (paragraphs 24-25).

Section III

The Third Section treats the divisions of relation (paragraph 1). The first division is into real relation and relation of reason. It is only real relation which constitutes the category "toward something" (paragraphs 2-5). The second division is into relation "according to being said" and relation "according to being" (paragraphs 6-9). The third division is into transcendental relation and categorical relation (paragraphs 10-13).

Section IV

Suárez tells us that it is very difficult to explain the difference between categorical and transcendental relations (paragraph 1). It is possible to think of some differences that should be rejected (paragraphs 2-8). Others can be admitted (paragraphs 9-15). From this the inference is that the category "toward something" includes only relations that are categorical in a proper sense (paragraph 16). The remaining paragraphs (17-21) of this Section contain the reply to a difficulty raised in Section 1.

Section V

In this Section the Doctor eximius explains the essence and the proper definition of a categorical relation (paragraphs 1-4), and also explains as well as resolves the difficulties which the mentioned division encounters (paragraphs 5-13).

Section VI

This short Section is limited to proving that a categorical relation requires a subject, a foundation, and a terminus (paragraphs 1-6).

Section VII

As was said in the just preceding Section, a categorical relation needs a foundation (paragraph 1), which in some way is distinguished from the subject of a relation (paragraphs 2-3). This foundation can be either an accident or the substance itself (paragraphs 4-9). Although the question is discussed, Suárez prefers not to separate a foundation from a reason for being founded (paragraphs 10-14).

Section VIII

For a categorical relation there is also required a real terminus (paragraph 1). But must this terminus exist in actuality? There are reasons to doubt that (paragraph 2), and one author has thought that a terminus that is real and really existing is not necessary (paragraph 3). Suárez maintains the contrary, and in so doing he follows the common opinion of philosophers and theologians (paragraphs 4-7). He answers the arguments of Gregory of Rimini (paragraph 8), and he rejects the opinion that the terminus belongs to the essence of a relation (paragraphs 9-12). Finally, he affirms that not even by the absolute power of God can a relation remain without a terminus (paragraphs 13-14).

Section IX

For a real relation it is necessary that the foundation and the terminus, formally considered, be distinguished with a real distinction, although this does not have to be equal in all cases (paragraphs 1-6).

Section X

Suárez proposes to examine the division which Aristotle has made of relation looking at a threefold foundation (paragraph 1). Having first explained the Aristotelian doctrine (paragraphs 2-4), he raises the two main questions which arise with respect to that doctrine: (1) whether each one of the members of the

stated division is designated in a fitting manner, and (2) whether the division includes the whole range of categorical relations. With regard to the first, there are various arguments which present difficulty (paragraphs 5-10), and the same is true with regard to the second (paragraph 11). Nevertheless, the two questions are answered in the sense of approving the division which Aristotle has made (paragraphs 12-16).

Section XI

It is necessary to answer each one of the difficulties of the preceding Section (paragraph 1). Beginning with the first class of relations, which is founded on unity (paragraphs 2-3), it is affirmed that a relation of unity can be founded on the realities of all the categories (paragraph 4) and there is explained the sense in which one relation can be the foundation of another (paragraphs 5-13). In passing, he explains to which class relations of identity, similarity, and equality belong (paragraphs 14-15). The Section ends by affirming that generic unity can found a real relation (paragraphs 16-19) and by indicating the characteristics of relations of the first class (paragraphs 20-21).

Section XII

In order to treat the second class of relations (paragraph 1), the problem is tithed of whether all the relations of this class are real (paragraph 2). Suárez replies by setting up some distinctions (paragraphs 3-4). He concerns himself then with the proximate foundation of paternity (paragraphs 5-6), and of the relation of agent (paragraphs 7-8), whether it is in act (paragraph 9) or in potency (paragraphs 10-14).

Section XIII

Regarding the third class of relations, founded upon the character of measure paragraph 1), Suárez presents and resolves a difficulty about the authentic ought of Aristotle (paragraphs 2.9).

Section XIV

Is the Aristotelian division sufficient and adequate? (paragraph 1). To answer this question, Suárez indicates how all real relations are reduced to the three kinds, which make up the stated division (paragraphs 2-8).

Section XV

After indicating the double sense in which non-mutual relations can be taken (paragraph 1), Suárez makes a division between reciprocal and non-reciprocal relations (paragraph 2) and raises a difficulty in their regard (paragraphs 3-7). To resolve this difficulty, he affirms that there are some non-mutual relations, which are properly found in the third Aristotelian class of relations (paragraph 8). Then he replies to opposing arguments (paragraphs 9-12) and resolves difficulties proposed at the beginning (paragraphs 13-15). Next, he presents the opinion of the Nominalists about relations in God from time (paragraph 16) and, against them, denies that such relations are real (paragraphs 17-29).

Section XVI

This Section concerns the question of whether the formal terminus of one relation is another relation or has an absolute character (paragraph 1). Having explained the title of the Section (paragraph 2), Suárez presents and explains different opinions (paragraphs 3-5). He crystallizes his thought in the following assertions: (1) in non mutual relatives, the reason why one extreme is the terminus of the relation of the other is not a relation that is opposite to that of the other, but the very entity itself or a property of that terminus (paragraphs 6-13); (2) In mutual relations, the raison d'être of a terminus is also some absolute character that constitutes the formal foundation of the opposite relation (paragraphs 14-22). With this an answer is given to the bases of the other opinions, explaining the sense in which relatives are simultaneous in nature, in knowledge, and in definition (paragraphs 23-34), and finally treating of the termini of the divine relations (paragraphs 35-38), and of relative opposition (paragraphs 39-40).

Section XVII

It is proposed to treat the structuring of the category, "toward something" (paragraph 1). The first difficulty is in knowing how all relatives can be reduced to one single genus (paragraph 2). There is accepted the possibility of one single supreme genus which includes all relatives (paragraph 3) and there is adduced the solution which some offer to the motive for doubting (paragraphs 4-5). This solution is probable even though it supposes a false basis (paragraph 6). Suárez affirms that the relative in general Is not in an order to another as to its correlative (paragraphs 7-8), that the relative in general has a terminus in general which corresponds to it (paragraph 8), and that the common character of terminus does not constitute a proper category (paragraph 10). Afterwards, he raises the question of the contraction of the supreme genus of relatives into its inferiors (paragraphs 11-14), the question of the origin of the essential and specific difference of relations (paragraph 15), and the question of the simultaneity of various relations—which differ only numerically—in the same subject (paragraphs 16-23). He ends the Section by rejecting an opinion about the relation that a son has with respect to a father and a mother (paragraphs 24-28).

Section XVIII

This is the shortest Section. It designates as properties of all relatives: not having a contrary; being susceptible of more or less; receiving the designation of "convertibles"; being simultaneous in nature; and also being simultaneous in knowledge and definition (paragraphs 1-6)." (*Introduction* , pp. 28-33).

13. ———. 1995. *On Beings of Reason (De Entibus Rationis). Metaphysical Disputation LIV*. Milwaukee: Marquette University Press.

Translated from the Latin with an introduction (pp. 1-56) and notes by John P. Doyle.

"B. The Prologue and Division of the Disputation:

In a brief prologue to his 54th Disputation, the *Doctor Esimius* notes that beings of reason are not real beings and that they are thus excluded from the direct and proper object of metaphysics. Along with this, however, he remarks how necessary their study is and offers some justification for their inclusion in his metaphysical work.(24) Of interest here is his assessment of them as "not true beings, but as quasi-shadows of being." As such, they have no intrinsic intelligibility, but must be known only indirectly through other things. Immediately flowing from this is the fact that they, like Meinong's later "homeless objects,"(25) are not of direct and primary concern for any science.

All the same, inasmuch as beings of reason are of use in a variety of sciences, they can be grasped and must be treated in some way. In fact, Suarez believes, their treatment is exclusively the concern of the metaphysician. For, even though beings of reason have no true being, they are, as mentioned, "shadows" of being. Like being then they have what he calls a "quasi-transcendentality,"(26) which by itself would remove them from the province of any science other than metaphysics. It is true that more particular disciplines, such as physics or logic, sometimes treat certain beings of reason (e.g., privation, the void, or second intentions such as *species* or *genus*) in connection with their proper scientific objects. But only metaphysics is wide enough to consider, albeit obliquely and concomitantly with its proper object, the whole range of beings of reason as such.

After the *Prologue* , the Disputation splits into six *Sections*. Of these, the first two treat the existence, the nature, and the causes of beings of reason. Sections 3 and 4 consider how such beings of reason are divided. As Suárez sees it, the traditional listing of negations, privations, and relations of reason will exhaust the types that divide beings of reason. Section 5 will then more closely examine negations and privations and Section 6 will go on to treat relations of reason." *Introduction* , 20-21).

(24) For this exclusion and justification, see also DM 1, s. 1, n. 6; XXV, 3-4. For Aristotle's earlier exclusion of "being as true" from the concern of metaphysics, cf. note 10, above [See *Metaphysics* VI, c. 4, 1027b 34-1028a 3; *ibid.* , XI, c. 8, 10695a 22 ff.].

(25) For this, see A. Meinong, *Ueber die Stellung der Gegenstandstheorie im System der Wissenschaften* (Leipzig, 1907), pp. 8-27 and "Zur Gegenstandstheorie" in *Die Philosophie der Gegenwart in Selbstsdarstellungen* (Leipzig, 1923), translated as Appendix I, "Meinong's Ontology," by Reinhardt Grossmann, in *Meinong* (London, 1974), pp. 224-229. Also cf. Roderick M. Chisholm, *Brentano and Meinong Studies* (Atlantic Highlands, NJ, 1982), "Homeless Objects," pp. 37-52.

(26) Suárez's frequent employment of the prefix "quasi" is worth noting. Thus in the sections to follow, he will speak of "quasi-essence," "quasi-essential features," "quasi-essential foundation," "quasi-disposition," "quasi-difference," "quasi-passion," and a "quasi-material" cause of beings of reason (as well as imply quasi-formal and quasi-efficient causes for them). Again, he will speak of "quasi-induction" as well as "quasi-intrinsic," "quasi-extrinsic," and "quasi-common" characteristics in their regard. Without pushing it, I cannot help but think of Meinong (in *Ueber Annahmen* [Leipzig, 1910]), speaking of *Quasi-Transzendenz* (220, 228), *Quasi-Wirklichkeit* (224, 226, 263-4, 266), *Quasibedeutung* (59), *Quasiinhalt* (264, 277, 286, 312), etc.

14. ———. 2012. *Selections from De Anima*. Münich: Philosophia Verlag.

    On the Nature of the Soul in General - On the Immateriality and Immortality of the Rational Soul.

    Translated by John Kronen and Jeremiah Reedy.

    Introduction and explanatory notes by John Kronen.

    Table of Contents: Introduction 9; Disputation I: On the Substance of the Soul in General; Question 1: Whether the soul is act in the sense of being a substantial form 30; Question 2:

Whether and in what way the soul is first act 45; Question 3: Whether the soul possesses an essential ordination to an organic body 65; Question 4: What the quidditative definition of the soul is and how one definition is proven through another 84; Disputation II 108; Question 3: Whether the principle of understanding in humans is something incorporeal, subsistent, and immortal 108; Bibliography 177-188.

"Suárez's *De anima* , like his *Metaphysical Disputations* , is not a commentary on Aristotle, though Suárez, in a general way, follows the order of topics laid out by Aristotle in his *De anima* , and he refers to Aristotle's seminal work with great frequency. In the first Disputation of Suárez's *De anima* , translated here in its entirety, Suárez treats of living beings taken as a whole. In this Disputation he links his psychology to his general metaphysics. This is particularly clear in the first question of the Disputation, which gives a brief proof of Aristotelian hylomorphism, as well as giving a proof of the existence of a special class of material substances which are distinguished from other material substances in that they are capable of immanent actions, i.e. actions which begin and end in the same substance.(9) Even plants, in this way, are "self moving" in the actions of nutrition and growth. In the later questions of this Disputation Suárez answers questions pertaining to the nature of the substantial form (i.e. the soul) characteristic of all living beings. Throughout the Disputation Suárez is chiefly committed to defending a substantivalist view of the nature of the soul and, hence, of the human person, against notions of the person that adumbrate the psychological concept of it found in Locke's writings, and that echo the ancient Buddhist "no-self" doctrine. But Suárez is equally committed to defending, against dualism, that the soul is an incomplete substance, which is by its nature ordered to informing an appropriately disposed matter in order to constitute with it a living substance.

We have translated all of Disputation I because it casts light on how Suárez, and the Scholastics in general, understood the science of the soul. They did not understand it to be an investigation of immaterial substances à la Descartes, because souls are not substances. They are, at best, incomplete

substances which, with matter, constitute a living organism. In this respect it might be better to speak of "the science of living beings" or even of "biology", rather than of "the science of the soul". But even that would not be quite right either since, although the Scholastics were more interested than is often thought with the physical structures of living beings, as well as in the essential roles these structures play in explaining the powers of living beings,(10) they were not very advanced in these questions and, unlike most contemporary biologists, they did not conceive of the "principle of life" in living beings as a complex set of relations between inanimate substances, but as a "thing" or *res*. In short, though for them the soul is an *incomplete* substance, it is nevertheless an incomplete *substance* , not an instance of an especially complex way of arranging inanimate substances." (pp. 16-17)

(9) For an excellent account of the Scholastic notion of "immanent action" see Des Chene, *Life's Form: Late Aristotelian Conceptions of the Soul* (Ithaca: Cornell University Press, 2000), pp. 57-67. Des Chene notes that some Scholastics preferred to define living actions as "intrinsic", i.e. such that no being other than the being doing the action could produce the effect of the action. On this definition, for example, growth would not be a vital action since God could produce in the plant the result of the act of growing (i.e. He could produce the greater quantity), but seeing would be a vital action since not even God could do "my seeing" for me.

(10) See Des Chene, *Life's Form* , pp. 34-39.

2. "Francisco Suárez." 1991. *American Catholic Philosophical Quarterly* no. 65.

   Table of Contents: Jorge J. E. Gracia: Francisco Suárez: The Man in History, 259-266; Carlos Noreña: Suárez and the Jesuits, 267-286; Jorge J. E. Gracia: Suárez's Conception of Metaphysics: A Step in the Direction of Mentalism? 287-310; John P. Doyle: Suárez on the Unity of a Scientific Habit, 311-334; John D. Kronen: The Importance of the Concept of Substantial Unity in Suárez Argument for Hylomorphism, 335-360; Douglas P. Davis: Suárez and the Problem of Positive Evil, 361-372; T. D. Sullivan and Jeremiah Reedy: The Ontology of Eucharist, 373-386; John L. Treloar, S. J. Moral Virtue and the Demise of Prudence in the Thought of Francis Suárez, 387-400.

   "Francisco Suarez (1548-1617) is a major figure in the history of Western thought. His contributions to metaphysics, the philosophy of law, and Catholic theology are well recognized in Continental Europe and Latin America, but they are seldom acknowledged in the English-speaking world. Hopefully, this issue of the *American Catholic Philosophical Quarterly* will help repair the long standing neglect of Suarez among English-speaking scholars.

   This collection of articles attempts to present various aspects of Suarez's thought, although it concentrates primarily on metaphysical topics, reflecting current interests in his philosophy. Suarez's political philosophy and the philosophy of law are not represented because the articles commissioned on those topics never materialized, nor were there submissions in those areas. Thus, these important aspects of Suarez's teaching do not receive the attention they deserve in this collection." (Preface by Jorge J. E. Gracia).

5. Aho, Tuomo. 2007. "Suarez on Cognitive intentions." In *Mind, Cognition and Representation. The Tradition of Commentaries on Aristotle's De anima*, edited by Bakker, Paul J.J.M. and Thijssen, J.M.M.H., 179-203. Aldershot: Ashgate.

6. Åkerlund, Erik. 2009. "Suárez on Forms, Universals and Understanding." *Studia Neoaristotelica* no. 6:159-182.

   "The interpretations in the secondary literature of Suárez' position in the "classical" debate on the status of universals

vary considerably. In this article, the problem is looked at from a slightly different angle: that of Suárez' basic metaphysics of substantial forms and his views concerning understanding and knowledge. These areas of Suárez' thought are thoroughly analysed and related to each other. Regarding the question of the status of universals it is argued that Suárez' thought in the areas of substantial forms and of understanding generally supports the reading of Suarez as a "moderate nominalist"."

7. Ashworth, Earline Jennifer. 1995. "Suárez on the analogy of Being. Some historical background." *Vivarium* no. 33:50-75.

   "I argue that Suárez is best read as part of a tradition which predates Cajetan with respect to the classification of types of analogy, and which to some extent predates Scotus in its insistence on a concept of being which is both one and analogical. I draw on three Fifteenth century philosophers and theologians, Capreolus, Dominic of Flanders, and Soncinas, and one Sixteenth century writer, Domingo de Soto."

8. Aubenque, Pierre. 1999. "Suárez et l'avénement du concept d'être." In *Francisco Suárez (1548-1617). Tradiçao e Modernidade*, edited by Cardoso, Adelino, Martins, Antonio Manuel and Dos Santos, Leonel Ribeiro, 11-20. Lisboa: Ediçoes Colibri.

9. Barrón, Jorge Uscatescu. 1995. "El concepto de metafisica en Suárez: su objeto y dominio." *Pensamiento* no. 200:215-236.

   "Se trata de una interpretacion de la primera disputacion de las *Disputationes metaphysicae* de Suárez. El objeto de la metafisica es el ser real en general con exclusion del ente de razon y del ente "per accidens". Asi pues, el dominio de la metafisica es la totalidad de los entes reales por si. A continuacion se estudia cada uno de los temas que la metafisica debe tratar, lo cual se refleja en la estructura de la mencionada obra de Suárez: propiedades y principios del ser, etc. Al hacer de la inmaterialidad un rasgo del ser se desvirtua el caracter generalisimo de la metafisica, que de por si esta mas alla de la

division del ser material e inmaterial. Por ultimo, se analiza la correspondencia entre los rasgos entresacados de la metafisica como ciencia y el ser real en general."

10. Barroso, Fernández Óscar. 2006. "Suárez, filósofo de encrucijada o del nacimiento de la ontología." *Pensamiento* no. 232:121-138.

    "The present work studies the different interpretations proposed in the 20th century concerning the metaphysics of Francisco Suárez. They are divided in three groups: essentialist, existentialist, and

    objectivist. The essentialist interpretation has been maintained fundamentally by Thomist authors, the most outstanding scholar among them being E. Gilson. The existentialist interpretation, headed by J. Hellín, can be analyzed as a reaction to the essentialist interpretation. The noetic-objectivist interpretation finds its inspiration in M. Heidegger, and its definitive impetus in the works of J. F. Courtine.

    With Courtine, we will maintain that Suárez cannot be classified either as an essentialist or as an existentialist. Efforts to classify him as such will encounter concrete difficulties, since Suárez opens up a new realm for metaphysics, the ontological, situated within the perspective of intentionality and beyond the perspective of effectivity and creation within which medieval metaphysics moves."

11. Bastit, Michel. 1989. "Interprétation analogique de la loi et analogie de l'être chez Suárez: de la similitude à l'identité." *Études Philosophiques* no. 44:429-443.

12. Beuchot, Mauricio. 1992. "La esencia y la existencia en los escolásticos post-medievales. La lucha entre Francisco Suárez y Juan Martínez de Prado." *Doctor Communis* no. 45:153-161.

13. Blanchette, Olivia. 1999. "Suárez and the latent essentialism of Heidegger's fundamental ontology." *Review of Metaphysics* no. 53:3-19.

    "Suárez is viewed by Heidegger and others as having set ontological problems in a form that has marked the whole of

modern metaphysics or ontology. It is in this context that Heidegger himself came to his idea of ontological difference as redefining the question of being in a way that had never been seen before. In his *Marburg lectures* of 1927 Heidegger traces Kant's essentialist conception of being, or rather of reality, back to the late Scholastics who separated essence from existence, which he says was not the same as positing the ontological difference, but which could explain why Kant was unable to raise the question of being in the same way that Suárez would not allow for any real distinction between essence and existence. In his attempt to get beyond the essentialism of modern ontology as found in Kant as well as Suárez, however, Heidegger falls short because he continues to think of "Sein" in essentialist terms as different from being, without ever getting back to the ancient idea of being as act understood as transcending essence in finite being."

14. Burlando, Giannina. 2006. "Suárez on Intrinsic Representationalism." In *Intellect et imagination dans la philosophie médiévale. Actes du XIe Congrès International de Philosophie Médiévale de la Société Internationale pour l'Étude de la Philosophie Médiévale (S.I.E.P.M), Porto, du 26 au 31 août 2002. Vol. III*, edited by Pacheco, Maria Cândida and Meirinhos, José F., 1941-1957. Turnhout: Brepols.

    "Does Suárez avoid the criticisms about nonintrinsic representations?

    This paper tries to show how the ontological moves that avoid the Danto-Dennett (D-D) charges of circularity and regress are the ones Francisco Suárez (1548-1617) makes. The author argues that the rejection of the agent intellect, particularly its transduction function and, in general, his conception of *conceptus objectivus* constitutes Suárez's recognition of the D-D problems. Hence, the real issue about representations turns out to be over causation. Suárez's doctrines of harmony, and intrinsic representations are necessarily connected. Secondly, the article also shows that Dennett is confused at a certain point."

16. ———. 2000. "The relationship between God and essences and the notion of eternal Truths according to Francisco Suárez." *Modern Schoolman* no. 77:127-143.

    "An understanding of the relationship between God and the essences of His creatures is of vital importance for any contemporary theist in understanding the nature of God and the created world. Historically, this concern received a great deal of attention and has been an essential component of many philosophical systems (e.g. St. Augustine's, St. Thomas' and Ockham's). In contemporary circles, philosophers such as Plantinga have revived the discussion. The difficulties that have permeated the historical and contemporary discussions of this topic are: (1) the nature of essences (i.e. Are they eternal? Are they necessary? What is their ontological status? Do non-existent beings have essences?) and (2) how are essences related to God (i.e. Are they necessary because God willed them as such or is their necessity independent of God's will? Are they ontologically independent of God or are they part of God's intellect?). In this paper, I want to explore the notion of essence and its relation to God in the philosophy of Francisco Suárez and establish three conclusions. First, the major one is that Suárez presents an original doctrine, which differs from the more popular Thomistic doctrine, and can serve as a springboard for new thoughts on this topic. Second, I want to demonstrate that Suárez is able to reconcile the seemingly contradictory position of maintaining the special character of the necessity of essences while not delimiting God's freedom. Finally, I will point out the similarity between Suárez's notion of the necessity of essences, entailed in his doctrine of eternal truths, and Plantinga's "necessity of nature"."

17. ———. 2002. "Ultimate reality in the metaphysics of Francisco Suárez." *Ultimate Reality and Meaning.Interdisciplinary Studies in thePhilosophy of Understanding* no. 25:73-92.

"In this paper I examine Francisco Suárez's conception of ultimate reality in his metaphysics. First, I present a succinct biography on Francisco Suárez. Second, I discuss the structure, organization, style and influence of his major philosophical work, the *Metaphysical Disputations*. Finally, I explore Suárez's view on ultimate reality as real being (*ens reale*). I discuss Suárez's view on the relationship between real being (*ens reale*) and possible being (*ens posible*) and how these relate to being (*esse*). I conclude by discussing God's place in Suárez's conception of reality."

18. ———. 2003. "Suárez on Beings of Reason: What Kinds of Beings (*entia*) are Beings of Reason, and What Kind of Being (*esse*) Do They Have?" *American Catholic Philosophical Quarterly* no. 77:171-187.

    "Beings of reason or non-existent objects have always been a source of mind-boggling paradoxes that have vexed philosophers and thinkers in the past and present. Consider Bertrand Russell's paradox: 'if A and B are not different, then the difference between A and B does not subsist. But how can a non-entity be the subject of a proposition?' Or Meinong's paradox: 'There are objects of which it is true that there are no such objects.' At the root of these troubling conundrums are two basic questions: What are beings of reason? What kind of existence do they have? Francisco Suárez was well aware that a solution to the metaphysical questions concerning the essential character of beings of reason and their ontological status would serve as the key to solving the puzzles and paradoxes just described. A solution to these metaphysical questions would also bring about an understanding of how we talk about beings of reason and other problems that they give rise to in the philosophy of language. In this paper, I present Suárez's view on the nature and ontological status of beings of reason and clarify some of the following questions: What kind of beings (*entia*) are beings of reason? What kind of being (*esse*) do beings of reason have? This latter concern is related to the following metaphysical issues: What are real beings? What is the nature and ontological status of possible beings? What is

the distinction between real beings, actual beings, and possible beings?"

26. ———. 2009. "Durée et existence chez Suárez." *Revue Thomiste* no. 109:589-620.

    "In the Metaphysical Disputation L, Suárez draws insights from Aristotle and Saint Augustine in order to examine the ontological connection that could be established between duration and existence. This insight opens up into the metaphysical realm by raising an anthropological and theological inquiry about the body, life and death. Our own being is rooted in a sensible reality which is identical to the duration it manifests, simply because it endures in being. Suárez's concept of duration confirms the metaphysical principle according to which any being actually exists in virtue of the fact that it is individual and singular. Thus, the ability to be, which qualifies real being, appears under the mode of what is possible. This, in Suárez's work, is significant both with regards to politics and history."

27. ———. 2012. *Pensée de l'être et théorie politique: le moment Suarézien*. Louvain: Peeters.

    Vol. I: "Cet ouvrage se propose d'examiner chez Suárez (1548-1617), comment la théorie du droit et de la loi prolonge la pensée de l'étant élaborée par la métaphysique en une compréhension ontologique du politique. Il s'agit précisément de mener à son terme, dans un système unifié du savoir, la détermination de l'étant en procédant à son extension à la question de l'être de l'homme et de l'être-en-commun propre à la société politique.

    Au commencement du XVII° siècle, une autre direction pour l'accomplissement du projet ontologique non identifiable à celle d'une science mathématique de la nature se profile et préfigure une récurrence persistante des origines de la philosophie. Ainsi, on trouve dans le système suarézien la retranscription originale

et réactualisée d'une ligne de force traversant la pensée antique: l'ontopolitique. Il devient alors nécessaire afin d'expliciter et de justifier cette orientation, de déterminer à la fois le fondement et la spécificité de la relation instaurée par Suárez entre l'ontologie, la théologie, l'anthropologie et le politique; ces domaines demeurent indissociables d'une crise et d'un renouveau de la philosophie première s'énonçant comme accomplissement éthique de la raison métaphysique."

Vol. II et III: "Au commencement du XVII° siècle, une autre direction pour l'accomplissement du projet ontologique non identifiable à celle d'une science mathématique de la nature se profile et préfigure une récurrence persistante des origines de la philosophie. Ainsi, on trouve dans le système suarézien la retranscription originale et réactualisée d'une ligne de force traversant la pensée antique: l'ontopolitique. 44. Daniel, Stephen H. 2000. "Berkeley, Suárez, and the "esse-existere" distinction." *American Catholic Philosophical Quarterly* no. 74:621-636.

    "For Berkeley, a thing's existence "*esse*" is nothing more than its being perceived "as that thing". It makes no sense to ask

(with Samuel Johnson) about the "*esse*" of the mind or the specific act of perception, for that would be like asking what it means for existence to exist. Berkeley's "*existere is percipi or percipere*" thus carefully adopts the scholastic distinction between "*esse*" and "*existere*" ignored by Locke and others committed to a substantialist notion of mind. Following the Stoics, Berkeley proposes that, "as" the existence of ideas, minds "subsist" rather than "exist" and, accordingly, cannot be identified as independently existing things."

47. ———. 2000. ""*Ens intime transcendit omnia*": Suárez' Modell der transzendentalen Analyse und die mittelalterlichen Transzendentalienlehren." *Freiburger Zeitschrift für Philosophie und Theologie* no. 47:150-172.

    "The study seeks an approach to the proper outlines of Suárez's ontology in the context of the scholastic tradition of metaphysics. It shows, that Suárez synthesizes elements from different ontological traditions in a new explanation of the transcendentality of being. This explanation does not follow -- as the prevailing interpretation of Suárez's position suggests -- the 'via Scoti'; rather it is unfolded as a countermove to it on a common ground. In consequence of it Suárez replaces Scotus's model of the transcendental analysis by another conception, which takes up the pre-Scotistic doctrine of the transcendentals."

48. ———. 2000. "Suárez' Analyse der Transzendentalien 'Ding' und 'Etwas' im Kontext der scholastischen Metaphysiktradition." *Theologie und Philosophie* no. 75:339-358.

    "Some scholastic authors count 'thing' and 'something' amongst the transcendental attributes of being. The study seeks to

explain Suárez's analysis of these attributes with regard to the scholastic debate on the number of the *passiones entis*. It shows that Suárez integrates different traditions on the basis of an original understanding of 'being' or 'thing'. Recent interpretations of Suárez's ontological approach are questioned by the author's conclusion, that Suárez does not take up Henry of Ghent's and Scotus's scheme of the first conceptions and excludes from metaphysics the reduction of being to '"res"' in the sense of the mere thinkable or *possibile logicum*."

49. ———. 2000. "Die Grundlegung einer allgemeinen Theorie der transzendentalen Eigenschaften des Seienden bei F. Suárez." *Zeitschrift für Philosophische Forschung* no. 54:341-364.

    "The study seeks to explain the central idea in Suárez's general theory of the transcendental properties of being with regard to its background in the medieval doctrine of the transcendentals. It questions the prevailing view that Suárez adopts Scotus's doctrine of the *passiones entis* and leads to the conclusion that Suárez -- within the new framework of his explanation of real being -- rather takes up and reshapes the pre-Scotist doctrine of the transcendentals."

50. ———. 2001. "Suárez' Begriff der transzendentalen Einheit." *Archiv für Begriffsgeschichte* no. 43:37-57.

51. ———. 2003. "Seinswahrheit und Erkenntniswahrheit. Francisco Suárez und die thomistische Lehre von der analogia veri." In *Die Logik des Transzendentalen. Festschrift für Jan A. Aertsen zum 65. Geburtstag*, edited by Pickavé, Martin, 246-265. Berlin: Walter de Gruyter.

    "According to Thomas Aquinas 'true' is predicated essentially of things with reference to truth in the intellect. His reflections on the relation between transcendental and cognitive truth raise questions which in later scholasticism -- in connection with difficulties within the doctrine of analogy -- give rise to controversies on the structure and ontological meaning of the *analogia veri*. In the Thomistic tradition Cajetan's solution had a strong influence, although it reduces ontological truth to a mere extrinsic denomination of things.

Against this solution Suárez develops a new interpretation of the order of predication of 'true'. It confirms both (a) the Aristotelian doctrine according to which the original place of truth is the

intellect, and (b) the traditional doctrine of the transcendentals according to which true is not an extrinsic denomination of things, but their inner entity under a certain respect. The study seeks to

explain Suárez's solution against its historical background."

52. ———. 2003. "Eines oder Vieles. Zu einem Grundproblem der scholastischen Theorien über das Eine." *Zeitschrift für Philosophische Forschung* no. 57:27-52.

    "On the background of the Aristotelian doctrine of the One which is convertible with being, scholastic theories of the One meet with a difficulty that challenges their underlying ontological principles: how can the doctrine of the convertibility of 'one' and 'being' be reconciled with the Aristotelian doctrine, according to which 'one' and 'many' are first differences or opposites of the first division of being? If one divides being, it cannot be converted with 'being' in a proposition, and vice versa. Among the attempts to solve the problem on the basis of the conception of an essential identity of being and one, two main types of solutions may be distinguished. The study seeks to characterize their outlines and ontological implications and explains, how the different approaches emerge within the framework of the Aristotelian tradition of metaphysics."

Suárez on the Truth of the Proposition, "This is My Body" 235; 10. Suárez on Preaching the Gospel to People like the American Indians 257; 11. Francisco Suárez on the Law of Nations 315; 12. Suárez on Human Rights 333; 13. Francisco

Suárez on the Interpretation of Laws 357; 14. Postscript and Prospectus 389; Bibliography 393; Index of Names 409; Index of Terms 413-416.

"The main theme in these studies is twofold. The first is theoretical, centering on the Suarezian conception of being and metaphysics. As Etienne Gilson pointed out in *Being and Some Philosophers,* this conception had its origin in Avicenna's understanding of Aristotelian metaphysics, an understanding which passed through Duns Scotus to Suarez and then on to Suárez's successors, notably Christian Wolff. I still accept Gilson's basic account of Suárez's lineage, which account was also basic for these studies in their original appearance. But now (in 2010) I would modify it along the line suggested by Rolf Darge, who has emphasized the difference of the Suarezian concept of being and its descent to its inferiors versus the Scotistic concept of being as *simpliciter simplex* as this descends to its inferiors by differences outside itself.(1) The second theme takes up the practical side of Suárez's philosophical and theological interests, including his views on human society, law and morality, Church and state, international law, and human rights. The first theme is represented in different metaphysical and epistemological dimensions through eight studies, while the second is the major concern of the last four essays.

The introduction to the collection attempts to give an overview of Suarez the man, his published writings, his philosophical thought, and some of his influence." (p. XI)

    "This volume deals with basic questions regarding the philosophical knowledge of God in Suarez and Descartes, two very different, but historically linked early-modern philosophers. It has two parts devoted to Suarez and Descartes respectively. Each section examines the path along which

philosophy can acquire knowledge of God, the adequacy which is ascribed to this knowledge, as well as selected topics of the doctrine of God's attributes.

Special attention has been given to both critical and positive reactions to Suarez and Descartes on the part of seventeenth-century Dutch Reformed theologians.

The author argues that Descartes, in comparison with Suarez, reduced the theological interests of philosophy and also limited the starting points for attaining to a philosophical knowledge of God. On the other hand, Descartes elevated the presumed adequacy of this knowledge."

75. Gracia, Jorge J.E. 1979. "What the Individual Adds to the Common Nature According to Suárez." *New Scholasticism* no. 53:221-233.

"In M*etaphysical Disputation* V, section 2, Suárez criticizes the views of Thomas, Ockham and Scotus on what the individual adds to the common nature. Then he proceeds to state his own view as follows: (1) the individual adds something real to the common nature, (2) nonetheless, what the individual adds is not really or modally distinct from the common nature, (3) rather, it is conceptually distinct from it, since (4) a conceptual distinction does not require that what is added be conceptual. In this paper I examine briefly the nature of the problem at stake, Suárez's view, and the apparent inconsistency between (1), (2), (3) and (4) above. As a conclusion I submit (a) that Suárez's position is fully consistent, (b) although different from those of Thomas, Scotus and Ockham, with which it has been compared often and (c) that the apparent inconsistency is due to an ambiguity in the use of the term 'addition'."

76. ———. 1991. "Suárez Conception of Metaphysics: A Step in the Direction of Mentalism?" *American Catholic Philosophical Quarterly* no. 65:287-309.

"Mentalism in metaphysics is the view that the object of study of metaphysics is something mental rather than something real. Suárez has been identified as a key figure in the development of mentalism in early modern philosophy. Contrary to this view I

argue that Suárez did not take any unambiguous steps toward mentalism and that his position is concordant with the medieval Aristotelian tradition of realism. In the article I examine Suárez's view of the nature of metaphysics, its object, and the ontological status of that object."

77. ———. 1991. "Francisco Suárez: the Man in History." *American Catholic Philosophical Quarterly* no. 65:259-266.

"Suárez decided early in life that he would pursue an ecclesiastical career. Accordingly, he went to Salamanca to study canon law. While engaged in his studies there, he requested admission into the Society of Jesus. At first he was refused admission for reasons of health and what was perceived as a lack of proper intellectual capacity. Insistence paid off, however, and he was allowed to join the order in 1564. After completing his studies, he began a teaching career that would last for over fifty years, taking him to some of the most reknown institutions of his time: Segovia, Valladolid, Rome, Alcalá, Salamanca, and Coimbra. Suárez died in Lisbon, at the age of seventy, on September 25, 1617.

Suárez did not publish early in his life. His first work, *De Incarnatione Verbi,* appeared in 1590, when he was forty two years of age. After this initial publication, however, a steady stream of works followed: *De mysteriis vitae Christi* (1592), *De sacramentis I* (1595), *Disputationes metaphysicae* (1597), *Varia opuscula theologica* (1599), *De sacramentis II* (1602), *De censuris* (1603), *De Deo uno et trino* (1606), *De virtute et statu religionis I and II* (1608 and 1609), *De legibus* (1612), and *Defensio fidei catholicae* (1613). Several other works appeared posthumously: *De gratia I and III* (1619), *De angelis* (1620), *De opera sex dierum, De anima* (1621), and *De fide, spe, et caritate* (1621), *De virtute et statu religionis III and IV* (1624 and 1625), *De ultimo fine* (1628), *De gratia II* (1651), *De vera intelligentia auxilii efficacis* (1655), *Opuscula sex inedita* (1859), and *Conselhos y pareceres* (1948). Moreover, there are still numerous manuscripts awaiting editing and publication. Obviously, Suarez was a tremendously prolific author; his published works fill twenty-eight large volumes. A good number of Suarez's works were presented as commentaries on

Thomas's *Summa theologiae*, a clear testimony to the importance that Suarez and his contemporaries attached to the Angelic Doctor. In fact, however, many of these works are largely independent treatises for which Thomas's *Summa* is only a thematic occasion." (pp. 260-261).

78. ———. 1992. "Suárez and the doctrine of the Transcendentals." *Topoi* no. 11:121-134.

    "This article discusses Suárez's views concerning the transcendentals, that is, being and those attributes of it that extend to everything. In particular it explores Suárez's notion of transcendentality and the way in which he conceived the transcendental attributes of being are related to it. It makes two claims: first, that Suárez has an intensional rather than an extensional understanding of transcendentality; and, second, that Suárez's understanding of truth and goodness, as expressing real extrinsic denominations based on real relations, appears to contain an inconsistency."

79. ———. 1993. "Suárez and metaphysical mentalism: the last visit." *American Catholic Philosophical Quarterly* no. 67:349-354.

    "This article is a reply to N. J. Wells' article "*Esse Cognitum* and Suárez revisited" ("ACPQ" 67, 3 (1993): 339-348) prompted in turn by my article "Suárez's conception of metaphysics: a step in the direction of mentalism?" ("ACPQ" 65 (1991): 287-309). I argue that, contrary to what Professor Wells' believes: first, he has not clarified the status of the objective concept, and, second, he must accept that, if his interpretation were correct, metaphysics, for Suárez, would be concerned with what is in the mind, rather than with what is outside it."

80. ———. 1994. "Francis Suárez (b. 1548; d. 1617)." In *Individuation in Scholasticism. The later Middle Ages and the Counter-Reformation (1150-1650)*, edited by Gracia, Jorge J.E., 475-510. New York: State University of New York Press.

    "This article presents an analysis of Suárez's position on individuation. It discusses Suárez's views of transcendental

unity and individual unity and their relations, the ontological status of individuality, the individuation of substances (by designated matter, form, existence, and entity), the individuation of accidents (by substance), and the presence of accidents differing only numerically in the same subject. It claims that Suárez's accomplishment is not only to be found in his systematic approach, but also in his abandonment of a reliance on faith in matters philosophical and in the introduction of various precisions which clarify the issues surrounding individuation."

Annotated bibliography on the Metaphysics of Francisco Suárez. Second Part: H - Z

Bibliography

1. Heider, Daniel. 2007. "Is Suarez's Concept of Being Analogical or Univocal?" *American Catholic Philosophical Quarterly* no. 81:21-42.

   "This article deals with the question of Suárez's conception of being, which *prima facie* seems to oscillate between a Scotistic univocal conception and a conception of being according to the analogy of intrinsic attribution. The paper intends to show that Suárez's doctrine can in no way be interpreted as representative of the univocal conception, and proceeds in six steps. First, it highlights the importance of the "uncommon doctor"'s theory of the unity of both the formal and the objective concepts of being. In the second part, the paper asks how the concept of being can, without any internal differentiation and structure, give rise to the different relations that it has to the natures subordinated to it. In the second and the third parts, this question receives an answer against the background of Suárez's critique of Scotus's conception, and with the help of his theory of the radical intimate transcendence of being. In the fourth section, there follows an exposition of Suárez's doctrine on the explication of the concept of being. The fifth section offers a brief presentation of the significance of *esse* for *ratio entis*.

   In the last section, the author places his interpretation in the general context of the *Metaphysical Disputations*."

2. ———. 2009. "The Nature of Suárez's Metaphysics. Disputationes Metaphysicae and Their Main Systematic Strains." *Studia Neoaristotelica* no. 6:99-110.

   "The paper presents seven basic features of Francisco Suárez's metaphysics. They are as follows: "Univocalization" of the concept of being and transcendental properties, "reification" of the act-potency doctrine, "ontologization" of individuality, "conceptualization" of the Scotist perspective, "existential" character of the concept of being, "epistemologization" and "methodologization" of metaphysics. Whereas the first five are indicated as remaining in the preserve of the traditional scholastic philosophy, the last two are taken as portending the methodological priority of the subjective states of affairs of early modern "main-stream" philosophy."

3. ———. 2009. "The unity of Suárez's metaphysics." *Medioevo. Rivista di storia della filosofia medievale* no. 34:475-505.

4. ———. 2014. *Universals in Second Scholasticism: A Comparative Study with Focus on the Theories of Francisco Suárez S.J. (1548-1617), Joao Poinsot O.P. (1589-1644), and Bartolomeo Mastri da Meldola O.F.M. Conv. (1602-1673), Bonaventura Belluto O.F.M. Conv. (1600-1676)*. Philadelphia: John Benjamins.

   "This study aims to present a comparative analysis of philosophical theories of universals espoused by the foremost representatives of the three main schools of early modern scholastic thought. The book introduces the doctrines of Francisco Suarez, S.J. (1548-1617), the Thomist John of St. Thomas, O.P. (1589-1644), and the Scotists Bartolomeo Mastri da Meldola, O.F.M. Conv. (1602-1673) and Bonaventura Belluto, O.F.M. Conv. (1600-1676). The author examines in detail their mutual doctrinal delineation as well as the conceptualist tenet of the Jesuit Pedro Hurtado de Mendoza (1578-1641), whose thought constitutes an important systematic point of comparison especially with Suarez's doctrine. The book offers the first comparative elaboration of the issue of universals, in both its metaphysical and its epistemological aspects, in the era of second scholasticism."

11. Kainz, Howard P. 1970. "The Suárezian position on Being and the Real Distinction: a analytic and comparative study." *Thomist* no. 34:289-305.

    "In elucidating the relationship between "existence" and "essence", it seems that two fundamental options are open: 1) to ground existence in existence itself; or 2) to ground existence in nothingness. Thomas Aquinas, in his doctrine on essence as potentiality, chooses the latter option, for all practical purposes. Suárez, in order to avoid grounding existence in nothingness, chooses the former option. One result of his choice is the purely mental "distinction" between essence and existence."

12. Karofsky, Amy D. 2001. "Suárez's doctrine of eternal truths." *Journal of the History of Philosophy* no. 39:23-47.

    "In this paper, I offer an interpretation of Suárez's doctrine of eternal truths expounded in *Metaphysical Disputation* XXXI, Chapter XII, Sections 38-47. There, Suárez considers and rejects several theories before developing his own. Because it is somewhat difficult to determine what view Suárez ultimately adopts, interpretations of this passage tend to vary. I argue that the interpretations of Norman Wells, Armand Maurer and John P. Doyle are inadequate, since Suárez wants a solution to the problem of eternal truths that does not depend upon the will of the divine being and one that avoids any ontological commitment to unactualized, possible success."

13. ———. 2001. "Suárez's influence on Descartes's theory of eternal truths." *Medieval Philosophy and Theology* no. 10:241-262.

    "There is a philosophical problem, what I will call the problem of eternal truths, that can be stated as follows: If an unactualized, possible essence has no being and is, hence, absolutely nothing, then what grounds the eternal and necessary truth of propositions that purport to be about them? If there were no men, what would ground the necessary truth, "Man is a rational animal"? And what grounded the truth of

that proposition prior to the creation of the world? (If it was in fact true at that moment?)"

15. Kronen, John. 1991. "Essentialism old and new: Suárez and Brody." *Modern Schoolman*:123-151.

    "A revived interest in essentialism characterizes much recent Anglo-American philosophy. In this article I compare and contrast one of the most articulate and well-argued recent versions of essentialism, that of Baruch Brody, with that of the last great system builder of the Schoolmen, Francis Suárez. I argue that Suárez's account of essentialism has advantages over Brody's because in positing a form that is entitative or thing-like as the chief constituent of the essences of substances Suárez's account is better able to explain the substantial unity of substances."

16. ———. 1997. "Substances are not windowless: a Suárezian critique of monadism." *American Catholic Philosophical Quarterly* no. 71:5-81.

    "Recently, Thomas Huffman has defended Leibniz's metaphysics of substance. In this paper I offer a critique of that metaphysics from the point of view of the metaphysics of Leibniz's near contemporary, Francis Suárez. In my critique I show that Suárez's Aristotelianism is better able to account for the existence of composite substances than is Leibniz's metaphysics and that Leibniz's implicit arguments against the Suárezian account of substance fail. I conclude, based upon

this, that Suárez's metaphysics should be preferred to Leibniz's since it better accords with the common sense notion that things such as humans and cats are true substances and not mere aggregates."

In *Forming the Mind Essays on the Internal Senses and the Mind/Body Problem from Avicenna to the Medical Enlightenment*, edited by Lagerlund, Henrik, 237-262. Dordrecht: Kluwer.

    "In this paper I have to limit myself to only a few late Aristotelian authors.

    I shall deal with Thomas de Vio (Cardinal Cajetan) and Francesco Suarez.

    Cajetan was one of the key figues in the rise of the so-called *seconda scolastica*, the counter-reformational attempt to build a new Christian philosophy that fused revelation with Aristotelian thought. Moreover, his ideas about sense perception were heavily attacked by Suarez, who is

    probably the best known and most influential Jesuit authors, who were so important in shaping late Aristotelianism. In this fashion, our sample of case studies is arguably limited, but nevertheless quite representative for sixteenth-century Aristotelian accounts of sense perception. By way of conclusion, this article ends with a brief exploration of how the debate on sense perception and its relation to the metaphysics of the chain of being changed with the advent of modern philosophy, in particular with Descartes." 26. Miner, Robert C. 2001. "Suárez as founder of modernity: reflections on a "topos" in recent historiography." *History of*

Philosophy Quarterly no. 18:17-36.

"The aim of this paper is to query a notion that appears with increasing frequency in recent narratives of modern philosophy. The notion is that the secret founder of modernity is not Bacon, Descartes or Hobbes, but Francisco Suárez. This paper examines three attempts to make the case of Suárez as the founder of modern philosophy and finds each of them deficient. First, I examine the treatment of Suárez in Etienne Gilson's *Being and Some Philosophers*. Secondly, I consider Alasdair MacIntyre's characterization of Suárez as an essentially antihistorical thinker in *Three Rival Versions of Moral Enquiry*. Thirdly, I attempt to disambiguate several claims about Suárez that are characteristically bundled together by post-Heideggerian readings of Suárez as the founder of a new science of ontology. The conclusion is that while it would be premature to reject the possibility that Suárez is the founder of modern philosophy, the precise sense in which he would fit this description has not been persuasively delineated."

27. Nadler, Stephen. 1989. *Arnauld and the Cartesian Philosophy of Ideas*. Manchester: Manchester University Press.

    On Suárez see: Chapter 18. *Objective being in Suárez and Descartes*, pp. 147-165.

28. Noreña, Carlos G. 1981. "Ockham and Suárez on the ontological status of universal concepts." *New Scholasticism* no. 55:348-362.

    "Ockham's failure to explain the ontological conditions for the possibility of universal predication partially justifies the traditional view of him as a nominalist. Ockham rejected the basic aristotelian and Thomistic doctrines about common natures, the principle of individuation and relations. Suárez avoided both the Platonizing realism of Scotus and the nominalistic leanings of Ockham with his carefully articulated theories on the limitation of the act, the principle of individuation, and the difference between essence and existence. Scholastic thought on the ontological status of universal concepts centers on issues which are fundamental to

the interpretation of Plato and Aristotle and which a comprehensive theory of knowledge cannot avoid."

29. ———. 1983. "Heidegger on Suárez: the 1927 Marburg Lectures." *International Philosophical Quarterly* no. 23:407-424.

"Heidegger's thought on Suarez has been studied for the most part by scholastic philosophers with a particular doctrinal intent, in the context of Heidegger's views on the history of ontology, and on the narrow basis of a few passing remarks in some of Heidegger's works.(1) The 1975 publication of Heidegger's (Summer Semester, 1927) lectures on *Die Grundprobleme der Phänomenologie*, and their recent translation into English by Professor Hofstadter, make possible a better documented and more conclusive analysis of the subject.(2) Unfortunately, other relevant sources still remain unpublished, such as Heidegger's lectures and seminars on the history of philosophy from St. Thomas to Kant, medieval mysticism, St. Augustine, and Renaissance scholasticism. All of them, however, give a clear indication of Brentano's influence upon Heidegger's early thought and demonstrate an interest in medieval philosophy which one seldom finds among contemporary thinkers. In this essay we intend 1) to summarize Heidegger's views on medieval scholastic philosophy in general and those of Suärez in particular, and(2) attempt to retrieve from the Marburg lectures what Heidegger left unsaid and unthought on the scholastic distinction between essence and existence." (p. 407)

(1) Some scholars have argued that Heidegger's criticism of medieval ontology was fully justified when directed against Suárez, but radically unfair to St. Thomas. To this group belong: *G. Siewerth, Das Schicksal der Metaphysik vom Thomas zu Heidegger* (Einsideln, 1959); R. Echauri, *Heidegger y la Metafísica Tomista* (Buenos Aires, 1970); B. Rioux, *L'être et la vérité chez Heidegger et Saint Thomas d'Aquin* (Montreal-Paris. 1963); C. Fabro, *Participation et causalité selon S. Thomas d'Aquin* (Louvain. 1961); J. P. Doyle, "Heidegger and Scholastic Metaphysics," *The Modem Schoolman*, 49 (1972), 201-221; O. N. Derisi, "Approximaciones

y diferencias entre la fenomenología existencialista de Martin Heidegger y la ontología de Santo Tomás," *Sapientia*, 22 (1967), 185-192; W. R. Korn, "La question de l'être chez Martin Heidegger," *Revue Thomiste*, 71 (1971), 33-58.

More favorable toSuárez were H. Meyer, *Heidegger und Thomas von Aquin* (Munich, 1968); and M. Schneider, "Der angebliche Essentialismus des Suarez," *Wissenschaft und Weisheit*, 24 (1961), 40-68.

Finally, there are those philosophers who think that both St. Thomas and Suárez fully deserve Heidegger's criticism. See. e.g., H. Siegfried, *Die Warhrheit und Metaphysik bei Suárez* (Bonn. 1967).

Heidegger's references to Suárez can be found in *Sein und Zeit* (*Gesamtausgabe*, ed. by F. W. von Herrmann, vol. 2, Frankfurt am Main, 1977), 30; *Die Frage nach dem Ding* (Tübingen, 1962). 77; and *Nietzsche* (Pfullingcn, 1961), II, 418.

(2) The lectures *Grundprobleme der Phänomenologie* (henceforth GP) were published in 1975 as vol. 24 of the *Gesamtausgabe*. They were reviewed by M. E. Zimmermann in the *International Philosophical Quarterly*, 17 (1977), 235-237. and in *Philosophy and Phenomenological Research*, 39 (1979). 537-550. Professor A. Hofstadter's excellent translation was published in 1981 by Indiana University Press under the title Basic Problems of Phenomenology (henceforth BP). I want to thank both Indiana U. Press and Professor Hofstadter for their kind permission to quote the English translation.

36. Peccorini, Francisco. 1972. "Suárez's struggle with the problem of the one and the many." *Thomist* no. 36:433-471.

    "The purpose of this article is to find out whether Suárez's attempt to reconcile analogy with the thesis of the perfect unity of the concept of 'ens' was successful. To this effect, Suárez's basic premises - his theory of the universals and his conception of existence as such - are discussed. The former is dismissed on the grounds that in it the would be link between conceptualism and realism is no link at all because it rests only on an inductive abstraction which in turn is unworkable inasmuch as it is incompatible with the basic Suárezian tenet that the first direct concept is of the individual only. It is shown also how Suárez nullifies his claims of analogy by accounting for the genesis of his concept of 'ens' in terms of his theory of the universals which necessarily opens up to a univocal format. Finally, the article tackles the second premise - Suárez's conception of existence as such understood as a thing and points to its equivocating effect on the concept of 'ens'."

37. ———. 1974. "Knowledge of the singular: Aquinas, Suárez, and recent interpreters." *Thomist* no. 38 (606):655.

    "Given the decisive influence of Suárez's conception on modern and contemporary nominalism, a thorough criticism is carried

out on different levels: (1) through a 'prima facie' logical analysis of his arguments; (2) through an exhaustive criticism of José M. Alejandro's interpretation of Suárez's position, which is bent upon updating his mentor's foundation; and finally (3) on the basis of an '*ad hominem*' dialogue centered on Suárez's Thomistic claims. It is the contention of this article that through his eclectic solution Suárez jeopardized both the nature of the agent intellect -- by hollowing out its whole ontological value -- and the thesis of the primacy of the individual in epistemology -- by leaving our knowledge unexplained in its most fundamental respects and providing it only with unrealistic grounds. This makes it incumbent upon the author to show that the Thomistic thesis of indirect knowledge of the singular proves to be fully satisfactory if examined in the light of Bernard J Lonergan and Karl Rahner's writings."

38. Pereira, José. 1996. "John of St. Thomas and Suárez." *Acta Philosophica* no. 5:115-136.

    "Classical Thomism, originated by Aquinas, developed by Cajetan and consummated by John of St. Thomas (1589-1644), had many critics, chief among them Francisco Suárez, the prime thinker of Baroque Scholasticism. His critique initiated changes in Thomism, leading John, among other Thomists, to abandon the commentarial method followed by the older Scholastics; to occasionally substitute the Suárezian metaphysical distinction for the real distinction characteristic of Thomism; to concede that the foundational Thomist tenet of the limitation of existence by essence is debatable; and to accept Suárez's definition of God as "ipsum intelligere subsistens" rather than as "ipsum esse subsistens". "

40. ———. 2004. "The existential integralism of Suárez, reevaluation of Gilson's allegation of Suárezian essentialism."

Gregorianum no. 85:660-688.

"In declaring that 'existence as existence corresponds to being as such, and pertains to its intrinsic significance', Suárez accords to existence a preeminence perhaps not ascribed to it by any Scholastic philosopher. Conceptually distinct, existence and essence are really identical, their identity indicated by the term *essentia realis*, or 'existent essence'. Being (*ens*) is at once unitary in meaning and dyadic; it denotes existence that is both actual (*ens ut participium*) and aptitudinal (*ens ut nomen*). 'Actual' existence is realized extra-mentally, while the 'aptitudinal' is existence insofar it is intelligible to the mind, prescinding from but not denying any extra-mental realization. The terminology that Suárez employs is distinctly his own. Gilson, however, reads him Thomistically, and so interprets his *essentia realis* as a kind of Thomist reified concept affirming the preeminence of essence. More recent commentators, influenced by Heidegger, see in the Suarezian *essentia realis* no more than *cogitabilitas*."

44. Riva, Franco. 1979. "La dottrina Suáreziana del concetto e le sue fonti storiche." *Rivista di Filosofia Neo-Scolastica* no. 71:686-699.

"Suárez's doctrine of concept while historically accepting the contribution of the mayor philosophical traditions of Middle Ages, has its own originality as it proceeds from the metaphysical fundamental, i.e., from the constant reference to the doctrine of power and act which is only typical of Suárez. Theoretically, Suárez (whom Descartes read at La Flèche) definitely reaffirms the intention of knowledge supporting the

form of immediate realism. Beyond any gnosiological dualism he demonstrates by exclusion the identity of *verbum* and high intellective and proposes (differing in opinion with Thomas Aquinas) to define "the concept of id quo res concipitur", reducing it to pure instrument or mere sign, the reality of which all lies in the significance."

45. Robinet, André. 1980. "Suárez dans l'oeuvre de Leibniz." *Cuadernos Salmantinos de Filosofia* no. 7:191-209.

    "Statistiquement, Suárez est l'un des auteurs les moins cités par Leibniz (quatorze mentions). Aucune étude directe ne lui est consacrée dans les manuscrits connus. Les références de Leibniz a Suárez sont étudiées autour de sept concepts (métaphysique, principe d'individuation, causalité, harmonie préetablie, *de vinculo substantiale*, eucharistie, *scientia media*) une étude comparative "fondée en realité textuelle" devient alors édifiable."

48. Ross, James F. 1962. "Suárez on "universals"." *Journal of Philosophy* no. 59:736-747.

    "This is an exposition of Francis Suárez's treatment of the following two questions: (1) what sort of "community" obtains among things that are properly said to be of the same sort? (2) in what sense can any "reality" be correctly called universal? The paper explains Suárez's claims that there are real universals and that there is fundamentally but not formally a real community in reality. The pivotal problem is seen to concern the meaning of 'similarity', since it does "not" mean having something in common. The paper offers the only resolution of the problem reconcilable with Suárez's own statements, indicating that it commits him to a very novel (in his time) form of conceptualism."

58. Seigfried, Hans. 1972. "Kant's thesis about being anticipated by Suárez?" In *Proceedings of the Third International Kant*

Congress, edited by Beck, Lewis White, 510-520. Dordrecht: Reidel.

"The paper attempts to clarify a notion in Kant's philosophy which is much discussed today, by referring back to the doctrine of Suárez, an historically influential representative of traditional ontology. It tries to give a rational account of the Suárezian doctrine of possibility and reality by making explicit those assumptions which make it comprehensible and which were still, after some important modifications, the presuppositions underlying Kant's thesis that being is obviously not a real predicate or (a predicate which stands for) something real but merely the positing of a thing."

61. South, James B. 2001. "Francisco Suárez on imagination." *Vivarium* no. 39:119-158.

"I discuss two themes in Suárez's account of internal sensation: the number of internal sense powers and the activities of the internal sense. I show that Suárez rejects a plurality of internal sense powers arguing that there need be only one such power. I then explore his account of the act of internal sensation showing its relation to both external sensation and intellectual knowledge. Most notably, I show why Suárez was compelled to posit an "agent internal sense" and how he manages to remain consistent with his view that there is only one internal sense power."

64. Svoboda, David. 2007. "Francisco Suárez on the Addition of the One to Being and the Priority of the One over the Many." *Studia Neoaristotelica* no. 4:158-172.

"Suárez's solution to the problem of the conceptual Addition of the One to being follows firstly the Aristotelian-Averroistic tradition mediated by Aquinas. According to this tradition, the One adds to being only a negative determination. Suárez claims that the One does not signify any positive perfection either really or conceptually distinct from being as such. Suárez's own solution to the problem is presented in a critical discussion with many different conceptions, but Suárez pays most attention to the theory of certain, mainly Franciscan, authors who hold that the One adds to being a positive perfection which is only conceptually distinct from being as such. The main argument for this thesis is based on the assumption that

indivision is to be taken as a double negation, by which an affirmation is expressed. This concept of indivision was, according to Suárez, also defended by Aquinas, who holds that the negation which is expressed by the One negates the division of one being from another. Suárez rejects this solution and proposes his own conception, according to which the One does not negate the negative moment of the division of one being from another, but the positive moment of an essential division of a being in itself. The One thus negates a real positive division of being in itself. On the basis of this theory, Suárez further rejected Aquinas's (and the Thomistic) conception of a conceptual priority of the One over the Many, which was put forth as an answer to the old Aristotelian problem of a privative opposition between the One and the Many. Suárez defends the real priority of an indivision over a division as well as a real and conceptual priority of the One over the Many. Suárez's conception seems to us to be compatible with his concept of a negative Addition of the One to being. "

67. Uscatescu Barron, Jorge. 1995. "El concepto de metafisica en Suarez: su objeto y dominio." *Pensamiento* no. 51:215-236.

    "Se trata de una interpretacion de la Primera Disputacion de las *Disputationes metaphysicae* de Suarez. El objeto de la metafisica es el ser real en general con exclusion del ente de razon y del ente *per accidens*. Asi pues, el dominio de la metafisica es la totalidad de los entes reales por si. A continuacion se estudia cada uno de los temas que la metafisica debe tratar, lo cual se refleja en la estructura de la mencionada obra de Suarez: propiedades y principios del ser, etc. Al hacer de la inmaterialidad un rasgo del ser se desvirtua el caracter

generalisimo de la metafisica, que de por si esta mas alla de la division del ser material e inmaterial. Por ultimo, se analiza la correspondencia entre los rasgos entresacados de la metafisica como ciencia y el ser real en general."

    "L'article attire l'attention sur l'importance du "tournant" Suárezien dans l'historie de la métaphysique conçue comme *onto - théo - logie*, mettant en lumière les decisions qui sont prises par Suárez par rapport aux "topoi" les plus importants de la pensée scolastique et de la pensée moderne. L'éxtraordinaire fortune de Suárez s'explique par le fait qu'il n'est pas seulement le dernier scolastique, mais aussi le premier moderne."

70. Wells, Norman J. 1955. *The Distinction of Essence and Existence in the Philosophy of Francis Suárez.*

    Ph.D thesis submitted to the University of Toronto.

    Abstract: "The name of Francis Suárez is a famous one in the history of philosophy, not to mention the histories of theology and law. Indeed, his position on the question of the distinction between essence and existence in creatures, the subject matter of this thesis, is especially notorious. However, though his final position on this question is quite well known, the philosophical milieu surrounding that decision and undoubtedly influencing it, is, in contrast, rather obscure. This dissertation is primarily concerned with the latter aspect of the problem.

    Suarez himself is our best guide since he lists the three famous traditions on this question up to his day and cites men and arguments on behalf of each. The first tradition, that of the "Thomists", is the real distinction which maintains, for Suarez, that the essence and existence of a creature are really distinct as duae res or two beings, and mutually separable, each being able to exist apart from the other. The second tradition, that of the modal distinction, also holds for a similar real distinction in

creatures as between a res or a being and its mode which are not mutually separable. The third tradition, the distinction of reason and the position of Suárez, rejects any kind of real distinction of essence and existence in a creature and affirms a distinction which is the work of the intellect and is not at all present in the thing.

Research into the sources of the five arguments Suárez attributes to the "Thomists" he lists has found that the first two are explicit in such "Thomists" as Giles of Rome, John Capreolus, Paulus Barbus Soncinas, Cajetan, Sylvester of Ferrara and Chrysostomus Javellus. The other three arguments are not found in the texts of these men noted by Suárez. But the common denominator of all the arguments is that they affirm a real distinction between an uncreated esse essentiae or essence and a created esse existentiae or existence. That is, for Suarez, these men distinguish what comes to be by an efficient cause, namely, existence, and what does not come to be by an efficient cause, namely, essence. Thus Suárez sees that the "Thomist" school undergoes the doctrinal influence of Avicenna and this Neo-Platonic tradition through St. Albert, Henry of Ghent, and possibly Meister Eckhart.

On behalf of the second tradition, Suarez cites some texts of John Duns Scotus, Henry of Ghent and Dominicus Soto which purportedly support this modal distinction. In this tradition, esse existentiae, according to Suarez, is a mode which is a positive existential entity in his own right as in the first tradition. However, unlike the latter, it cannot endure apart from the essence of which it is the mode. Thus, the second tradition differs from the first, not so much on the notion of essence which is the same, but on the degree of reality each will attribute to esse existentiae. Of interest is the fact that no such position is found in the texts of Scotus and Henry of Ghent. The texts of Soto do contain a doctrine of esse existentiae as a mode of essence but do not describe it as a positive existential reality.

The third tradition is manifested in the texts of the sixteen men cited by Suarez as its exponents although there is a variety of formulation as to the type of distinction of reason in question.

However, this tradition is one in interpreting the real distinctions of the first two traditions to be between duae res or a res and its mode. It is also one in rejecting these two traditions. Moreover, this third tradition is one in holding that the essence and existence in question is the actual existing essence and esse in actu exercito. It is between these that there is only a distinction of reason. However, these men agree that the essence abstractly conceived or essence as possible is distinguished from actual existence or actual essence as non-being from being. The basic reason for their rejection of a real distinction is that something cannot be intrinsically constituted in the existential order by something really distinct from it. For each is a being in its own right as distinct from the other. More basic than this is the fact that there is no esse existentiae in addition to the esse essentiae of a creature. Existence means nothing more than the actual existing essence and in no way signifies an existential actus essendi nor any accidental accretion. The men of this third tradition are characterized for Suarez by the fact that they are all opponents to some extent of any kind of a Platonic realism within being which is the most manifest feature of the first two traditions on this question.

In explaining the principles behind this third tradition Suarez first lakes steps to remove any autonomous essential actuality apart from the divine intellect since he sees very clearly that the first two traditions follow from their doctrine of the divine ideas. For them, the divine ideas are the essences of creatures endowed with an esse essentiae in themselves as in Henry of Ghent. In Suarez' eyes this looks too much like the divine ideas enjoying some eternal existential status apart from God or that they have been created from eternity. As his first principle, and that of the third tradition, Suarez maintains that the essences of creatures, prior to their creation, are absolutely nothing in the sense of enjoying no real existential status. Though a critic of this Avicennian tradition on the divine ideas, Suarez still remains within that tradition since he endows the essences of creatures in the divine intellect with an esse possibile, an esse objectivum or an esse cognitum in much the same fashion as Duns Scotus in his critique of Henry of Ghent and as Durandus

in his critique of the same doctrine. Thus, in his critique of any Platonic realism of essence Suarez remains within the tradition of Duns Scotus and Henry of Ghent but much farther along that doctrinal curve which leads to the nominalism of Ockham. Suarez, in his second principle, carries his critique of any realism of essence into the created order of existing things. For, this principle states that ens in potentia and ens in actu are immediately distinguished as non-being and being. In this Suarez counters those who maintained that ens in potentia or essence enjoys some positive mode of being, though diminished, within the existent creature and his critique follows the pattern of the defense of his first principle.

Suarez' criticisms even carry within the tradition on the distinction of reason, rejecting all except the one which enables him to deny that existence is of the essence of the creature. He finds this feature in what he calls a distinction of the reasoned reason -- a distinction of reason with a foundation in reality. Because a creature has been created or is contingent it can cease to be and can found a concept of itself as non-existent. This concept of a creature prescinded from existence outside its causes but apt to exist, unlike a chimera, is signified by essentia for Suarez. The same concept of that creature as existing and outside its causes is signified by existentia. Existentia is denied of essentia creaturae because the concept of the possible essence does not explicitly include what is signified by existentia or is included in the concept of the actual essence. In a word, the possible essence and the actual essence are mentally distinguished and the concept of the actual essence as possible and the concept of the same essence as actual are likewise so distinguished. Thus Suarez' distinction of reason is a result of a comparison between two concepts or rather, different degrees of contraction or adequation of one concept with respect to the actual existing essence, the one more confused and obscure and less contracted than the other. It is just such a distinction which enables Suarez lo deny existcntia of essentia creaturae. Hence, this distinction between essence and existence is said to be in the existent thing and founded on

it by extrinsic denomination from the concepts of this one existent essence.

By way of this extrinsic denomination Suarez can maintain that the existent essence has some internal metaphysical structure of essence and existence. For, on the basis of the two concepts of essence and existence and their degrees of adequation 10 the existent essence, the concept of existence is said to contract and be contracted by the concept of essence. In this way existence is said to be added to essence. This conceptual structure of the contracted and the contracting is then imposed on the actual essence by extrinsic denomination from these concepts. Thus the constant insistence of Suarez on the intrinsic constitution of the actual essence by existence does not imply any metaphysical structure within the actual existent but is a conceptual structure imposed on this existent. Versus an order of essence within being uarez offers an order of a radically contingent essence which is being itself, impervious to any existential co principle as it is to any distinction within it. In this struggle against the Platonic realism of essence in the first two traditions, being, in the hands of Suarez, has lost its metaphysical dimension to the extent it has become an impenetrable, impervious, indistinct essence. Reality is only metaphysical by extrinsic denomination and the science of metaphysics itself becomes nothing more than an analysis of concepts."

    "This paper is a criticism of an article in the same journal by J. C. Doig, *Suárez, Descartes and the objective reality of ideas*. On the basis of primary and secondary source materials, it is made clear that Doig's exclusively extramental interpretation of

Suárez's objective concept is insensitive to the obvious intramental dimensions of that teaching. Thus Doig's claim of a doctrinal discontinuity between Suárez and Descartes is found wanting due to a failure to consider Suárez's position on the realism of the possibles, their role in scientific knowledge in general, and the part they play in metaphysics."

    "An examination of Suárez's position on the Eternal Truths by bringing to bear upon it a controversy between Chrysostomus Javelli, O. P. (+1538) (who is defending Harvey Nedellec, a.k.a. Hervaeus Natalis, O. P. (+1323) and Paulus Barbus Soncinas, O. P. (+1494) on the issue of efficient causality with respect to necessary essential propositions and the distinction between a non-existential use of the copula "est" *vs* an existential use thereof."

80. ———. 1994. "John Poinsot on Created Eternal Truths *vs* Vasquez, Suárez and Descartes." *American Catholic Philosophical Quarterly* no. 68:425-446.

"An examination of John Poinsot's discussion of created eternal truths wherein he criticizes Gabriel Vasquez's interpretation of Aquinas' position on the eternal truths. What is taken to task is Vasquez's insistence upon a positive eternal aptitudinal truth on the part of necessary as well as contingent truths with regard to creatures. This is such that these truths are not eternal because known by God's eternal intellect. Rather, they are eternally true (aptitudinally) in themselves apart from the divine intellect. Linkage to Suárez's and Descartes' positions on created eternal truths is also considered."

René Descartes. Bibliographie Chronologique et Annotée (Première Partie: 1616-1628)

Introduction

Cette bibliographie des œuvres de Descartes en ordre chronologique tient compte aussi des publications non comprises dans l'édition Adam-Tannery; dans les citations l'orthographe, qu'à la fin du XVIIe siècle n'était pas encore totalement fixée, est modernisée; pour chaque texte je donne la référence aux suivant éditions:

- AT = Charles Adam, Paul Tannery (éds.), *René Descartes, Œuvres*, Nouvelle présentation par J. Beaude, P. Costabel, A. Gabbey et B. Rochot, Paris: Vrin 1964-1974 (Édition du Jubilé, 1996, 11 volumes); première édition 1897-1913 (Les tomes I-V contiennent la *Correspondance*).
- B Op. I = Giulia Belgioioso (éd.), *René Descartes, Opere 1637-1649*, con la collaborazione di I. Agostini, F. Marrone, M. Savini, Testo francese e latino a fronte, Milano: Bompiani, 2009.
- B Op. II = Giulia Belgioioso (éd.), *René Descartes, Opere postume 1650-2009*, con la collaborazione di I. Agostini, F. Marrone, M. Savini, Testo francese e latino a fronte, Milano: Bompiani, 2009.
- CO = Vincent Carraud, Gilles Olivo (éds.), *René Descartes, Étude du bon sens, La recherche de la vérité et autres écrits de jeunesse (1616-1631)*, Paris: Presses Universitaires de France 2013.

- O I = Jean-Marie Beyssade et Denis Kambouchner (éds.), *René Descartes, Œuvres complètes I. Premiers écrits. Règles pour la direction de l'esprit*, Paris: Gallimard, 2016.
- O III = Jean-Marie Beyssade et Denis Kambouchner (éds.), *René Descartes, Œuvres complètes III. Discours de la Méthode et Essais*, Paris: Gallimard, 2009.

Pour la *Correspondance*, je donne les réfèrences aux éditions Adam-Tannery (AT, volume et pages), Armogathe (O VIII, 1 et 2, volume et pages), Belgioioso (B, et le nombre de la lettre).

Pour la liste des éditions de références et des abréviations voir René Descartes. Outils de recherche: Biographies, Dictionnaires et Lexiques des Ses Œuvres

L'Inventaire des écrits de Descartes

- [Inventaire de Stockholm] *Inventaire succinct des Écrits*. 1656.
- AT X 5-12; *Note manuscrite de Leibniz des papiers de Descartes* (AT X 208-209).

  Inventaire des papiers qu'il avait emportés en Suède; un autre inventaire, rédigé à Leyde n'a pas été retrouvé.

  "A la mort de Descartes, 11 février 1650, un inventaire fut dressé à Stockholm, le 14 février, des papiers qu'il avait emportés en Suède, et un autre à Leyde, le 4 mars, de ceux qu'il avait laissés en Hollande. Baillet, dans sa *Vie de Monsieur Des-Cartes* 1691, t. II, p. 427-8, et 428-9), nous apprend, avec force détails, comment ont été faits les deux inventaires; mais il ne donne le texte ni de l'un ni de l'autre. Des recherches faites en Hollande (septembre 1894), pour retrouver le second, n'ont pas abouti. Et d'ailleurs nous savons, par des témoignages du temps, que Descartes avait emporté à Stockholm ses papiers principaux."

  (Charles Adam, AT X, pp. 1-2, notes omises)

  Une traduction latine abrégée de l'inventaire se trouve dans: Pierre Borel, *Elenchus manuscriptorum Cartesii Stocholmi repertorum post Eius obitum anno 1650,* in: *Vitae Renati Cartesii summi philosophi compendium*, Paris 1656, pp. 16-19;

texte français publié en 1887 par Bierens de Haan et, dans un version révisée, par Charles et Henri Adam en 1894 (AT X pp. 5-12).

Dans l' *Introduction* à l'édition critique de la correspondance de l'an 1643, Theo Verbeek a montré que l'inventaire n'a pas été rédigé à Stockholm le 14 février 1650, mais à La Haye avec la collaboration de Christiaan Huygens à la fin du 1653 ou au début du 1654 (*The Correspondence of René Descartes 1643*, édité par Theo Verbeek, Erik-Jan Bos, Jeroen van de Vern, Utrecht, Zeno Institute for Philosophy The Leiden–Utrecht Research Institute, 2003, pp. XV-XXI).

"All this confirms that the 'Stockholm inventory' cannot date from 1650. In fact, it is likely that it was made in The Hague, with the help of Christiaan Huygens, somewhere at the end of 1653 or the beginning of 1654, that is, almost four years after Descartes' papers came into Chanut's possession." (p. XXI).

Bibliographie

1. Armogathe, Jean Robert, Carraud, Vincent, and Feenstra, Robert. 1616. "La Licence en droit de Descartes : un placard inédit de 1616." *Nouvelles de la République des Lettres* no. 2 (1988):123-145.

   Retrouvée en 1981 à Poitiers, manque dans AT.

   Édition critique du texte latin (pp. 125-131) avec la traduction en français, (pp. 131-133) de la thèse en droit soutenue à Poitiers le 21 décembre 1616.

   Première édition : Jean-Robert Armogathe et Vincent Carraud, "Texte original et traduction française d'un inédit de Descartes: *Dédicace du placard de la licence en droit*", *Archives de Philosophie*, 50, 1987, *Bulletin Cartésien* XV, pp. 1-4.

   Texte latin et traduction française, CO, pp. 21-29; texte latin et traduction italienne, B Op. II, 1454-1461; nouvelle traduction par Jean-Marie Beyssade et Michelle Beyssade avec la collaboration d'André Laingui, O I, 46-49.

Traduction anglaise dans : Kurt Smith, "Descartes' Life and Works", *The Stanford Encyclopedia of Philosophy*, Edward N. Zalta (ed.), (URL = plato.stanford.edu/entries/descartes-works/).

"Les écrits authentiques du jeune Descartes sont rares : la lettre d'un jeune Descartes, «collégien à La Flèche», devant être attribuée à son frère Pierre, les premiers textes repérés remontent aux manuscrits décrits dans l'inventaire de Stockholm; ils ne nous sont parvenus que par les extraits traduits par A. Baillet dans sa *Vie* ou dans les textes, aujourd'hui perdus, publiés et traduits par Foucher de Careil.

Le document que nous présentons est donc important à double titre: par les renseignements biographiques nouveaux fournis sur une période encore mal connue de la vie de René Descartes, d'une part; par le texte lui-même, d'autre part. Nettement plus longue que les dédicaces habituelles des placards de thèses, la dédicace de 1616 se présente comme une autobiographie intellectuelle, et même comme une «histoire de [mon] esprit» (pour reprendre, en anticipant, l'expression de Guez de Balzac): c'est ce qui nous a autorisé, dans l'annotation, à citer fréquemment la première partie du *Discours de la Méthode*. « Le philosophe qui dit 'je' » est d'abord celui qui «représente sa vie» et écrit l'histoire de ses études jusqu'à ce qu'il fût «reçu au rang des doctes», l'histoire de son esprit. De cette dédicace, Descartes aurait déjà pu dire : «ne proposant cet écrit que comme une histoire»." (p. 123).

2. Descartes, René. 1618-19?; 1628? *L'art de l'escrime (Extraits de Baillet)*.

   Baillet I 35, II 407; AT X, 535-538; B Op. II, 916-917.

   "Descartes passa l'hiver de la fin de 1612 et du commencement de 1613 dans la ville de Rennes, à revoir sa famille, à monter à cheval, à faire des armes, et aux autres exercices convenables à sa condition. On peut juger par son petit traité d'*Escrime* s'il y perdit entièrement son temps." Baillet I, VIII, 35.

   "Nous trouvons aussi parmi les manuscrits de M. Descartes un petit traité touchant la manière de faire des armes sous le titre

de l'*Art d'escrime*, où il paraît que la plupart des leçons qu'il y donne sont appuyées sur sa propre expérience. Après avoir dit quelque chose en général de la qualité de l'épée et de la manière de s'en servir, il divise son traité en deux parties.

Dans la première il fait « voir comme on peut s'assurer contre tous les efforts de l'adversaire, et en tirer de l'avantage pendant qu'on est en *mesure longue*, et comme on peut le mettre sûrement en *mesure courte* ». Dans la seconde il examine comment étant entré en mesure courte, on peut infailliblement vaincre. Et pour cela il suppose deux hommes d'égale grandeur, d'égale force, et d'armes égales, se réservant à marquer ensuite ce qu'il y a à faire en cas d'inégalité."

Baillet II, XX, 407 ; *Abrégé* 23 et 326.

Selon Paul Adam la date de composition de ce petit traité (aujourd'hui perdu) serait le 1628 ; selon Carraud et Olivo, 1618-1619 (CO, pp. 35-36) .

3. Beeckman, Isaac. 1618-19. *Extraits du Journal tenu par Isaac Beeckman*.

   Le *Journal tenu par Isaac Beeckman de 1604 à 1634*, (abrégé CDW) a été publié en quatre volumes par Cornelis de Waard, La Haye: Martinus Nijhoff, 1939-1953.

   Texte latin AT X : I. *Varia*, 44-66; B Op. II, 1316-1335; II. *Physico-mathematica,* 67-78; B Op. II, 1336-1351; traduction par Frédéric de Buzon, O I, *Notes du Journal (1618-1619)*, 85-97; *Opuscules de Descartes insérés dans le* Journal *de Beeckman* 98-106.

   AT X, I. *Varia* : Angulum nullum esse male probavit Des Cartes 46 ; II. Turbo puerorum, id est *een worptop*, cur erectus flet, cùm vertitur 51 ; III. Chordae majores intactas minores et consonantes tactae movent 52 ; IV. Physico-mathematici paucissimi 52 ; V. Fistula fortius inflata cur in octavam abeat 53 ; VI. Testudinis (*een lute*) chordas disponere 53 ; VII. Quartâ à consonante chorda remota non tremit. — Quarta à quintâ dignoscere 54 ; VIII. Quadratum radici aequale datum 54 ; IX. Mr. Duperon 56 ; X. Bisectio in musicis facillima et gratissima 56 ; XI. Lapis cadens in vacuo cur semper celerius cadat 58 ; XI

bis. Lapidis cadentis tempus supputatum 58 ; XII. Modi non dulces et iclus testimonio probati 61 ; XIII. Modi modorum argumento probati 62 ; XIV. Modi modorum ab objeftione defensi 63 ; XV. Ars Lulli cum Logicâ collata 63-66.

AT X, II. *Physico-mathematica* : I. Aquae comprimentis in vase ratio reddita à D. Des Cartes 67 ; II. Lapis in vacuo versus terrae centrum cadens quantum singulis momentis motu crescat, ratio Des Cartes 72-74.

"Une des découvertes les plus importantes pour la compréhension de l'évolution de la pensée cartésienne fut celle du *Journal* tenu par Isaac Beeckman de 1604 jusqu'à sa mort, survenue le 19 mai 1637 (*). C. de Waard retrouva ce manuscrit à la bibliothèque de Middelburg en juin 1905; immédiatement avisé, Ch. Adam en tint compte dans le tome X des *Œuvres* de Descartes. Cela suppose une grande rapidité de travail : le tome X parut en 1908, mais l'*Avertissement* d'Adam est daté du 15 décembre 1905. D'autres fragments du *Journal,* beeckmaniens cette fois, paraissent dans l'édition que le même C. de Waard donne de la *Correspondance* de M. Mersenne à partir de 1933. On peut remarquer qu'à mesure que les textes de Beeckman sont connus, se modifie favorablement l'image de leur auteur ; il est vrai qu'elle était d'assez mauvaise qualité au rapport de certaines lettres de Descartes, et surtout de Baillet. Un témoin de cette évolution est A. Koyré, qui écrivait en 1939 dans les *Études Galiléennes*, p. 108-9 que « la publication par M. Cornelis de Waard de nouveaux fragments du *Journal* de Beeckman (...) a modifié sensiblement l'image que l'on se faisait, ou plus exactement que l'on ne se faisait pas du Physicien hollandais. En effet, Beeckman, on s'en rend compte maintenant, mérite pleinement l'appellation de *vir ingeniosissimus* dont l'avait gratifié Descartes ; et, ce qui plus est, il nous apparaît désormais comme un chaînon de première importance dans l'histoire de l'évolution des idées scientifiques ; enfin, son influence sur Descartes semble avoir été beaucoup plus profonde que l'on n'a pu le supposer jusqu'ici (...). » A fortiori, cette image s'améliore encore davantage grâce à la publication de la quasi intégralité du *Journal* par, encore et toujours, C. de Waard. Les quatre tomes de cette édition

paraissent à La Haye entre 1939 et 1953 ; ils renferment avec l'indication du foliotage l'essentiel des notes scientifiques, à l'exception très notable de la copie que Beeckman fit faire du *Compendium Musicae* vers 1628, de quelques notes d'intérêt divers: détails familiaux, observations météorologiques, informations maritimes etc.

(...)

Le *Journal* est décrit avec une grande exactitude dans le premier tome de l'édition, pp. XXV-XXXIV ; il se compose d'environ cinq cents feuilles contenant de brèves notes de lecture, de pensées propres, et de remarques concernant les rencontres que faisait Beeckman. Les notes relatives à Descartes ont en premier attiré l'attention, et ceci justement. L'intérêt des renseignements fournis par Beeckman est en effet capital. Les textes cartésiens consignés sont les premiers que nous connaissons, et il apparaît invraisemblable que l'on en découvre d'antérieurs. D'autre part, ils occupent une position critique dans la vie du philosophe ; ils terminent les années d'étude, et débutent une production propre. Descartes rencontra Beeckman (1) le 10 novembre 1618 à Breda. Très rapidement une estime mutuelle s'installe : « Ce Poitevin a fréquenté beaucoup de Jésuites et autres hommes de science. Il dit cependant n'avoir jamais rencontré personne, à part moi, qui use, ce dont je me réjouis, de ce mode d'étude, et joigne exactement la physique avec la mathématique. Et moi, je n'ai jamais parlé qu'à lui de ce mode d'étude (2) ». A de nombreuses reprises les suites de cette rencontre ont été décrites (3); en particulier, les commentateurs mettent en relation les fragments cartésiens du *Journal* avec les *Cogitationes Privatae*. C'est le cas de l'ensemble des *Premières Pensées de Descartes*, que M. H. Gouhier publia en 1958 (Paris, Vrin). D'une façon générale, on peut dire cependant que les historiens des sciences ont fait porter l'accent sur des problèmes « nobles » tels celui de la chute des graves; en revanche, sauf exceptions, ont été négligés les problèmes relatifs à l'acoustique, que nous voudrions décrire avec quelques détails." (pp. 1-3; Frédéric de Buzon, *Descartes, Beeckman et l'acoustique*, Archives de philosophie, 44, 1981, pp. 1-8).

(1) La rencontre est racontée par Lipstorp puis Baillet, cités dans A-T, X, p. 47-51. Voir G. Rodis-Lewis, *L'œuvre de Descartes*, Paris, Vrin 1971, p. 25 et note p. 435.

(2) Nous reprenons la traduction de Mme Rodis-Lewis (op. cit., p. 26) en rétablissant, contre une suggestion d'A-T X, p. 52, le texte original: le *g* de *gaudeo* est parfaitement lisible sur le ms.

(3) Voir les notes bibliographiques de Mme Rodis-Lewis, op. cit., et C. L. Thiss-Schoute, *Nederlands cartesianisme*, Amsterdam 1954, pp. 557-560.

(*) [Beeckman était né le 10 décembre 1588]

"Examinons, dans cette masse énorme de documents, ceux qui se rapportent sans conteste à Descartes, puisqu'il y est nommé. Ils se trouvent en quatre endroits différents :

[1618-1619]

1. — Fol. 97 verso, à fol. 1 18.

2. — Fol. 160 recto, à fol. 178 verso.

3. — Fol. 287 verso, à fol. 290 verso.

[1628-1629]

4. — Fol. 333 recto, a fol. 334 recto, 1. 34. — Fol. 338 recto, 1. 9, à fol. 340 recto, 1. 24. — Fol. 341 verso, 1. i6-30. — Fol.* 352 recto, 1. 8-24." (Charles Adam, AT X, *Avertissement*, p. 22).

4. Descartes, René. 1618. *Musicae Compendium*.

AT X, 89-141; B Op. II, 30-105; traduction française par Frédéric de Buzon, O I, 149-189.

Le manuscrit original est perdu ; première édition posthume: *Musicae compendium,* Trajecti ad Rhenum: Gisberti a Zyll & Theodori ab Ackersdijck, 1650.

Traduction française sur le manuscrit originel par Nicolas-Joseph Poisson (1637-1710) publiée dans : *Traité de la mechanique composé par Monsieur Descartes. De plus l'abrégé de musique du mesme autheur mis en françois. Avec les éclaircissemens nécessaires* (l'*Abrégé* est à pp. 53-98 ; les

Elucidationes physicae in Cartesii musicam de N.-J. Poisson à pp. 101-127), Paris, 1668 (reprint: *Abrégé de musique*, suivi des *Eclaircissements physiques sur la musique de Descartes,* Paris, Méridiens Klincksieck, 1990, introduction et notes par Pascal Dumont, préface de Joseph-François Kremer).

Édition critique avec traduction, présentation (pp. 5-49) et notes par Frédéric de Buzon, *Abrégé de Musique. Compendium Musicae*, Paris: Presses Universitaires de France, 1987.

C'est la première œuvre de Descartes, rédigée du 10 novembre au 31 décembre 1618 pour son ami Isaac Beeckman.

Le *Journal* de Beeckman contient "la copie du *Compendium Musicae* que Descartes, à Bréda, remit à Beeckman pour ses étrennes de 1619. Celui-ci le confia en 1627 au copiste qui écrivait en gothique et qui copia encore d'autres documents de la même époque (...). Lorsque Beeckman fit relier ses papiers en 1628, cet écrit et ceux du même lot devaient interrompre l'ordre chronologique des notes. Beeckman restitua l'original à Descartes en 1629. Depuis lors divers savants hollandais en prirent des copies : Constantin Huygens en 1637 et Van Schooten vers 1640, dont les exemplaires sont conservés respectivement à la Bibliothèque de l'Université de Leyde et à celle de l'Université de Groningue." (Cornelis de Waard, *Avertissement au premier volume* du *Journal tenu par Isaac Beeckman de 1604 à 1634. Tome 1 : 1604-1619*, The Hague: Martinus Nijhoff, 1939, p. XXXVIII.)

Sur l'approche mathématique de Descartes à la musique, voir la lettre à Beeckman du 24 janvier 1619: "Si vous considérez cela, et le reste de ma *Musique*, (8) avec attention, vous verrez que tout ce que j'ai écrit des intervalles des consonances, des degrés et des dissonances s'y trouve démontré de façon mathématique, mais en gros, de manière confuse et beaucoup trop concise.

Mais en voilà assez pour aujourd'hui. Le reste à plus tard." (AT X 153; O VIII 2, 320; B 1).

(8) Le *Compendium musicae*, offert à Beeckman quelques semaines plus tôt.

"Comme l'indique son nom, le *Compendium Musicae* est un traité de musique, et non pas d'harmonie ; ce terme même n'apparaît pas. Cette remarque prend de l'intérêt lorsque l'on aperçoit que, situation unique à notre connaissance, le rythme est traité avant les consonances et les problèmes de hauteur. D'autre part, un ensemble de propositions préalables, les *Praenotanda*, définit les limites de l'objet musical, et plus généralement de l'objet esthétique ; ces propositions produisent également la théorie du rythme et la théorie de la consonance. On comprend aussi qu'on ait pu en inférer une esthétique cartésienne (10)." (Frédéric de Buzon, *Présentation*, p. 8).

(10). V. O. Revault d'Allones, *L'esthétique de Descartes*, Revue des Sciences humaines, n° 61, 1951.

"Les commencements d'une méthode.

Lorsqu'il publia une nouvelle édition du *Discours de la Méthode* le P. Poisson remplaça, en quelque sorte, la *Géométrie* par un traité de mécanique, l'*Explication des machines et engins*, et par la traduction de l'*Abrégé*. [*] Ces deux œuvres étaient donc promues au rang d'essais de la méthode, au même titre que la *Dioptrique* et les *Météores*. Il y a là un abus évident, puisque les *Essais* étaient avec le *Discours* œuvres publiques, alors que les opuscules ainsi annexés n'étaient pas évidemment destinés à être publiés ; et l'*Abrégé* moins encore, que son auteur destinait aux seules archives beeckmaniennes. De plus, si l'on admet que la méthode de Descartes est contenue initialement dans les *Regulae*, et si l'on date le plus probablement cet ouvrage autour de 1628, on ne peut croire que l'*Abrégé* soit la mise à l'épreuve d'une méthode que Descartes ne révélerait à lui-même que dix ans après.

Il reste que l'assimilation de Poisson fait signe vers un problème majeur, celui de la méthode de Descartes avant la méthode, qui pourrait contribuer à définir certaines constantes logiques, voire psychologiques à l'œuvre dès 1618. Quelques caractères peuvent sans doute être ainsi décrits.

En premier lieu, on peut noter qu'à la différence des traités de musique antérieurs — que Descartes n'a pas sous la main (43) —, et à l'unisson des productions scientifiques et philosophiques ultérieures, l'*Abrégé* néglige à peu près toute référence historique, et ne fonde jamais la vérité de son discours sur la moindre évocation des autorités passées; le traité est suffisant par rapport à la chose même, et comme dans la *Géométrie*, Descartes laisse à son lecteur le soin de tirer les conclusions des prémisses. Il n'y a là que l'essentiel. Ce qui explique à la fois l'importance du traité dans l'histoire de la théorie (44), et un certain mépris dans la musicologie classique (45).

De plus, si la méthode n'est jamais thématisée pour elle-même dans l'*Abrégé*, elle offre des analogies intéressantes avec la suite de l'œuvre. On a déjà souligné le fait que Descartes procède constamment du simple au complexe; mais on peut aussi considérer la corde, réduite à sa seule dimension de longueur, comme, précisément une *dimensio*, au sens de la Règle XIV, c'est-à-dire « le mode et la raison, selon laquelle on considère que quelque sujet est mesurable » (46), ou bien une nature simple. Autre nature simple, le temps, et ses divisions qui correspondent aux passions du corps ; l'*Abrégé* ainsi se borne à étudier les paramètres par lesquels la musique est mesurable, en négligeant les qualités (timbres, nuance forte / piano, etc.), laissés aux physiciens (47).

Enfin il est remarquable que Descartes réduise la connaissance de la nature réelle du son et de sa perception par l'oreille au minimum nécessaire à une théorie de l'art. Il y a d'ailleurs une continuité au plan même des exemples avec les textes ultérieurs ; la Règle XIII évoque la question discutée vers 1628 par Mersenne et Beeckman relative aux cordes de grosseur et de tension différentes; comme il l'avait fait en 1618, Descartes met entre parenthèses toute référence à la vibration de la corde, cette donnée n'étant pas conçue comme nécessaire (48).

Ainsi, l'écrit de circonstance qu'est le *Compendium Musicae* a des résonances précises dans l'œuvre ultérieure, tant du côté de l'application de la mathématique à la réalité physique que du

côté de la physiologie et de la théorie des passions. C'est sur ce double registre que joue constamment Descartes ; si l'art a pour fin d'émouvoir les passions, définition commune à Descartes et à Caccini (49), il reste la tâche philosophique de connaître ces passions; les silences de Descartes sur les passions forment ainsi l'indication d'un programme (50).

Il resterait à définir la musique de Descartes après le *Compendium*; elle est connue par la correspondance, et l'on sait le talent de critique déployé par Descartes dans la querelle de Boësset et de J. A. Ban; mais l'ensemble paraît inachevé: « Si je ne meurs que de vieillesse, j'ai encore envie quelque jour d'écrire de la théorie de la musique » (51)." (Frédéric de Buzon, *Abrégé de Musique*, cit., *Présentation*, pp. 16-18).

5. ———. 1619. *[Registre de 1619].*

Le registre autographe de Descartes, légué par Clerselier à l'abbé Legrand, a été perdus après la mort de Legrand dès 1704.

Index des titres: *Parnassus* (18 fuillets); *Praeambula* (4 pages); *Experimenta* (cinq feuillets et demi); *Democritica* (sept ou huit lignes); *Olympica*.

CO, 50-83: Les fragments philosophiques sont édités (52-64), traduits (53-65) et annotés (67-83) dans : "<Registre de 1619> *Parnassus, Democritica, Praembula, Experimenta*; Parnasse, Démocritiques, <Notes:>, Préambules, Observations, <Inventer>.

"L'article *C* de l'Inventaire de Stockholm énumère plusieurs titres de petits traités, que Descartes avait écrits, ajoute-t-on, « en sa jeunesse ». Les textes originaux, remis comme nous savons à Clerselier, sont, à l'heure qu'il est, malheureusement perdus. Toutefois quelque chose, et même, on peut le dire, l'essentiel en a été conservé par deux voies différentes. Baillet eut ces textes entre les mains, et il en fît mention, et les traduisit même en plusieurs endroits, dans sa *Vie de Monsieur Des-Cartes* en 1691. D'autre part, les mêmes textes avaient été mis déjà par Clerselier à la disposition de Leibniz, pendant un séjour de celui-ci à Paris en 1675-76 ; Leibniz en avait pris une copie, et cette copie fut déposée plus tard avec ses papiers à la

Bibliothèque royale de Hanovre." (AT X, *Avertissement,* p. 173).

"M. Chanut ambassadeur de France en Suède, et le baron de Kroneberg commis par la reine Christine, pour assister à l'inventaire de ce qu'il avait laissé à sa mort, trouvèrent parmi les écrits de sa composition un registre relié et couvert de parchemin, contenant divers fragments de pièces différentes auxquelles il paraît qu'il travailla pendant ce temps-là. C'était: 1. *Quelques considérations sur les sciences* en général [le titre du manuscrit est *Parnassus*]; 2. Quelque chose de l'*algèbre*, 3. Quelques pensées écrites sous le titre *Democritica*; 4. Un recueil d'observations sous le titre *Expérimenta*; 5. Un traité commencé sous celui de *Preambula: Initium sapientiæ timor Domìni*; un autre en forme de discours, intitulé *Olympica*, qui n'était que de douze pages, contenait à la marge, d'une encre plus récente, mais de la même main de l'auteur, une remarque qui donne encore aujourd'hui de l'exercice aux curieux. Les termes auxquels cette remarque était conçue portaient: *XI Novembris 1620, cœpi intelligere fondamentum Inventi mirabilis*, dont M. Clerselier ni les autres cartésiens n'ont encore pu donner l'explication. Cette remarque se trouve vis-à-vis d'un texte qui semble nous persuader que cet écrit est postérieur aux autres qui sont dans le registre, et qu'il n'a été commencé qu'au mois de novembre de l'an 1619. Ce texte port ces termes latins: *X Novembris 1619, cùm plenus forem Enthoumsiasmo, & mirabilis scientiæ fundamenta reperirem &c.*

Mais le principal de ces fragments, et le premier de ceux qui se trouvaient dans le registre était un recueil de *Considérations mathématiques*, sous le titre de *Parnassus*, dont il ne restait que trente-six pages. Le sieur Borel a cru que c'était un livre composé l'an 1619, sur une date du premier jour de janvier, que M. Descartes avait mise à la tête du registre. Mais il se peut faire que la date n'ait été que pour le registre en blanc, et qu'elle n'ait voulu dire autre chose, sinon que M. Descartes aura commencé à user de ce registre le premier de janvier 1619, pour continuer de s'en servir dans la suite des temps selon ses vues et sa volonté. L'opinion du sieur Borel n'en est pourtant pas

moins probable, puisque M. Chanut a remarqué dans l'Inventaire de M. Descartes que tous les écrits renfermés dans ce registre (a) paraissent avoir été composés en sa jeunesse." (Baillet I, 50-51)

(a) Coté C de l'Inventaire.

"Descartes est mort à Stockholm le 11 février 1650 ; trois jours après, le 14, un inventaire fut dressé des papiers qu'il avait emportés en Suède (*). Il en reste deux copies ; l'une, assez fautive appartenait à Constantin Huygens et se trouve à la Bibliothèque de l'Université de Leyde; l'autre, qui est à la Bibliothèque nationale, vient sans doute de la collection Clerselier. Charles Adam a soigneusement édité ce texte au début du tome X des *Œuvres*.

Cet inventaire contient vingt-trois articles, A à Z, les lettres I et J ne comptant que pour une, et de même U et V. Les écrits les plus anciens de Descartes se trouvent à l'article C (1).

Il s'agit d' « un petit registre en parchemin, quotté en dedans de la couverture: Anno 1619 *Kalendis Januarii* ». Ceci veut dire que Descartes a décidé, le 1er janvier 1619, de se servir de ce registre.

Ouvrons-le. Il se présente ainsi :

1° « 18 feuillets de considérations mathématiques sous un titre : *Parnassus*. »

2° « six feuillets vides »

3° « six feuillets écrits »

4° « En prenant le livre d'un autre sens, le discours intitulé *Olympica*, et à la marge : *XI Novembris coepi intelligere fundamentum inventi mirabilis*. »

5° « Reprenant le livre en son droit sens, sont deux feuillets écrits, de quelques considérations sur les sciences ; »

6° « puis une demi-page d'algèbre »

7° « puis douze pages vides »

8° « puis sept ou huit lignes intitulées *Democritica* »

9° « huit ou dix feuillets blancs » (2)

10° « cinq feuillets et demi écrits, mais en tournant le livre, sous ce titre *Experimenta* »

11° « douze feuilles blanches »

12° « quatre pages écrites sous ce titre : *Praeambula. Initium sapientiae timor Domini.* »

« Tout ce livre cotté C, ajoute l'auteur de l'inventaire, paraît avoir été écrit en sa jeunesse. »

L'examen de ce registre montre deux choses :

D'abord, la plupart de ces écrits semblent n'être que des commencements destinés à recevoir une suite sur les pages blanches que le jeune homme laisse après chacun d'eux.

Ensuite, le cahier a été commencé par les deux bouts."

(1) AT X, p. 7-8.

(2) Les mots « huit ou dix feuillets » peuvent paraître étranges ; en fait, il y a huit feuillets blancs + le verso de la feuille dont le recto porte les *Democritica* + le verso du dernier feuillet des *Experimenta*.

Henri Gouhier, *Les premières pensées de Descartes*, Paris, Vrin, 1979 pp. 11-12.

(*) Sur la date voir la note a l'*Inventaire succinct des écrits* [Inventaire de Stockholm].

6. ———. 1619. *[Registre de 1619:] Parnassus (Ms. de Leibniz : Cogitationes privatæ).*

Première édition (texte latin et traduction française) : Foucher de Careil I, 2-56; AT X, 213-248; B Op. II, 1060-1095; traduction par Frédéric de Buzon et André Warusfel, O I, 198-214.

"Je terminerai complètement mon traité avant Pâques, et si je trouve des libraires et s'il me paraît digne, je le publierai comme je l'ai promis aujourd'hui, 1620, 23 février" (AT X, p.

218, original en latin): nous ne savons pas à quel écrit se réfère Descartes.

"Nous pensons comme Henri Gouhier que la partie physique et mathématique des *Cogitationes privatae* a de bonnes chances de reproduire le *Parnassus*, qui s'ouvre avec le souvenir de la rencontre de Beeckman du 10 novembre 1618 (AT X, 219, 5). "

(CO, p. 67).

"Le texte de ces dernières notes surtout, tel que l'a donné Foucher de Careil, est des plus défectueux. Et comme le manuscrit manque, pour contrôler ce texte et y faire les corrections nécessaires, grand a été notre embarras. Le regretté Paul Tannery eût sans aucun doute réussi à déchiffrer ces énigmes; mais nous l'avons perdu trop tôt, et avant qu'il eût pris la peine d'y regarder de près. Nous avons dû nous adresser ailleurs. Par bonheur, une des lettres à Beeckman, qui viennent d'être retrouvées, nous fournissait la preuve que Descartes s'était encore servi, en ces premières années, de *caractères cossiques* (voir ci-avant, p. 155-156)."

(...)

"Gustav Enestrom, directeur de la Bibliotheca Mathematica, à Stockholm, possède en pareille matière la plus incontestable autorité. Fort obligeamment, il voulut bien se mettre à l'œuvre, et travailler pour Descartes : comme on pouvait s'y attendre, il remit tout en ordre et expliqua fort bien les passages déclarés ailleurs inexplicables. Nous le désignerons, à la fin des notes qu'il a rédigées pour cette édition, par les initiales de son nom G. E."

(Charles Adam, AT X, pp. 211-212).

"Charles Adam avait publié les *Cogitationes privatæ* respectant la structure du texte donné par Foucher de Careil, certes en l'amendant fortement, mais sans tenter de distinguer entre les différents ensembles de notes pour se rapprocher de la description de l'inventaire de Stockholm. Celui-ci, de même que la lecture de Baillet (*Vie*, I, p. 50-51), permet cependant de distinguer des centres d'intérêt et autorise le regroupement des

notes scientifiques sous le titre qui les désignait. La question de savoir ce qui était précisément contenu dans le *Parnassus* est cependant indécidable dans son détail, en raison de l'état des sources et parce que l'on doit reconnaître avec Henri Gouhier que « Leibniz n'a [...] pas suivi l'ordre du registre quand on l'ouvre du côté de la couverture datée » (*Les Premières Pensées de Descartes*, p. 15 : en effet, les premières remarques transcrites par Leibniz ne relèvent pas des mathématiques, même en prenant le terme au sens le plus large, c'est-à-dire associant mathématiques pures et appliquées. L'éditeur doit écarter les textes qui, visiblement, dépendent des autres ensembles du recueil." (Frédéric de Buzon et André Warusfel, *Présentation*, O I, 194).

7. ———. 1619. *[Registre de 1619:] Praeambula (Ms. de Leibniz : Cogitationes privatæ)*.

   AT X, 213-248; B Op. II, 1060-1095; traduction par Michelle Beyssade, O I, 198-220 et 270-274.

   "Les papiers de Descartes, remis par Chanut à son beau-frère Clerselier, et qui n'ont pas été retrouvés, ne nous sont pas connus seulement par les extraits qu'en a donnés Baillet, dans sa *Vie* du philosophe (voir ci-avant, p. 173-177). Le même Baillet prévient le lecteur que, pour l'aider dans sa tâche, l'abbé Nicaise a pris la peine « d'écrire à Rome, d'où M. Auzout, qui a vu M. Descartes à Paris, et M. Leibnitz, *qui a eu communication des originaux chez M. Clerselier*, ont envoyé ce que la mémoire a pu leur suggérer sur ce sujet ». (*Vie de Monsieur Des-Cartes*, 1691, Préface, p. xxvi.) Leibniz fut, en effet, à Paris en 1675 et 1676; curieux de tout ce qui se rapportait au philosophe français, non seulement il obtint communication des papiers qui restaient de lui, mais il en fit copier et en copia lui-même au moins une bonne partie. Ses copies, qui portent des dates en plusieurs endroits (24 février et 1er juin 1676), furent déposées après sa mort, avec bien d'autres manuscrits, à la Bibliothèque Royale de Hanovre, et y demeurèrent longtemps ignorées. Ce fut seulement vers le milieu du xix siècle, que le comte Foucher de Careil, mis sur cette piste par l'indication de Baillet rappelée ci-dessus, et par quelques déclarations de Leibniz lui-même dans sa

correspondance, réussit à les découvrir enfin. Il les publia aussitôt, avec quelques autres documents (lettres à Wilhem, Huygens, La Thuillerie, etc.), en deux volumes d'*Œuvres inédites de Descartes* (Paris, Auguste Durand, in-8, cxvii-158 et xxii-238 pages, 1859-1860)." (AT X, *Avertissement*, p. 207).

"*Cogitationes privatae* est le titre que Foncher de Careil met en tête de ces fragments. L'avait-il trouvé dans le MS. de Leibniz, ou bien est-ce un titre de son invention? Cette dernière hypothèse est la plus vraisemblable. — Le même éditeur ajoute en note : « Leibniz, qui a copié ce manuscrit, nous avertit en marge qu'il l'a découvert et qu'il en a pris copie le 1er juin 1676, c'est-à-dire pendant son séjour à Paris. » — Nous reproduisons, en haut des pages, la pagination de Foucher de Careil : comme il donne en regard du latin une traduction française, les pages du latin n'ont que des numéros pairs, et les autres des numéros impairs." (AT X, *Avertissement*, p. 213).

8. ———. 1619. *[Registre de 1619:] Experimenta*.

AT X, 189-190; Baillet I, 102-103; B Op. II, 892-895; traduction par Michelle Beyssade, O I, 259-260.

"Le fragment intitulé *Experimenta* n'avait que « cinq feuillets et demi » (p. 8 ci-avant, l. 6-7). Peut-être donc l'avons-nous aussi tout entier, dans les deux grandes pages de Baillet, t. I, p. 102-103 ; au moins en avons-nous l'essentiel. Et là encore l'abondance et la précision des détails permettent de croire que le biographe de Descartes a traduit fidèlement, bien qu'on ne puisse jurer qu'il n'a rien ajouté. — Quant à la date, elle se détermine approximativement ainsi. Descartes raconte une aventure de sa traversée, par mer, d'Allemagne en Hollande, exactement, du port d'Embden en West -Frise, peut-être à Amsterdam. Nos idées sur cette première période des voyages du philosophe sont un peu changées depuis la découverte du *Journal* de Beeckman. Nous savons maintenant qu'en 1619, pour se rendre des Pays-Bas dans la Haute-Allemagne, au lieu de prendre par terre directement, il fit un grand détour par le Danemark, la Pologne, la Hongrie, la Bohême et l'Autriche (ci-avant p. 159, l. 2-6, et p. 162, l. 8-13), et s'embarqua le 29 avril à Amsterdam pour Copenhague. Il craignait que les mouvements

de troupes entre les Pays-Bas et la Bavière ne rendissent la route peu sûre. Mais elle ne l'était sans doute pas davantage au retour. Faut-il donc croire que Descartes sera revenu, sinon tout à fait par le même chemin, au moins par la Silésie, le Brandebourg, le Mecklembourg, qui est l'itinéraire que Baillet lui fait suivre, enfin Hambourg et Embden ? Enfin, comme nous savons, par une lettre de lui, que, le 3 avril 1622, il était à Rennes (t. I, p. 1), son retour en France a dû s'effectuer l'automne de 1621, et c'est alors sans doute qu'eut lieu l'aventure, dont le récit fait le principal si non l'unique objet des *Expérimenta*." (AT X, 175-176).

9. ———. 1619. *[Registre de 1619:] Democritica*.

"On sait que *Democritica* est le titre de « 7 ou 8 lignes » contenues dans le fameux petit registre en parchemin ouvert en 1619 et coté C dans l'inventaire de Chanut (1), contenant également le *Parnassus*, les *Experimenta* et les *Praeambula*. Rien n'est connu de ce texte, en particulier on ignore s'il s'agit de notes de lecture ; *Democritica* semble signifier, par analogie avec d'autres auteurs, des opinions inspirées de Démocrite (2), et rien chez Beeckman n'indique à l'époque une lecture de la doxographie démocritéenne. Peut-être alors faudrait-il revenir sur la composition du mot et donc sa signification : Demo-critica ?" (p. 41, Frédéreic de Buzon, "Democritica: la réfutation cartésienne de l'atomisme", dans: Jean Salem (éd.), J.Salem (ed.) *L'atomisme aux XVIIème et XVIIIème siècles*, Paris: Publications de la Sorbonne, 1999, pp. 27-41)

(1) A.T., X, 8.

(2) *Democritici* signifie, chez Leibniz notamment, les auteurs s'inspirant de Démocrite. — Voir en partic., le fragment *Corpus non est substantia* qui s'applique parfaitement à Descartes (pour la seule première phrase !) : *Intelligo autem per corpus non id quod Scholastici ex materia et forma quadam intelligibili componunt sed quod molem alias Democritici vocant. Hoc ajo non esse substantiam.* («J'entends par corps non ce que les scolastiques composent à partir de la matière et d'une forme intelligible, mais ce qu'autrement les Democritici nomment masse. Je dis que ce n'est pas une substance»); in

Leibniz (G. W. F.), *Nouvelles Lettres et opuscules inédits*, éd. Foucher de Careil, Paris, 18S7 (réimpression: Hildesheim, 1971), p. 171. —Voir aussi les notes sur Cudworth (VE 406 p. 1887).

Selon J. Sirven "La seule hypothèse plausible est donc, que l'allusion au songe de 1619 nous donne tout ce que nous connaissons des *Democritica*, tandis que les autres morceaux d'allure psychologique se rattachent à des préoccupations scientifiques. On s'explique sans peine, alors, que Leibniz ait transcrit d'abord la phrase relative à l'année 1620, qui se trouvait dans les *Expérimenta* (2), puis nous ait donné une ou deux lignes des *Democritica* et enfin deux fragments de la section qu'il rencontrait en continuant ses extraits. Mais, quand il passa aux Olympica, il trouva en marge la réflexion signalée par Baillet, « écrite d'une ancre plus récente, mais toujours de la même main de l'auteur ». Se souvenant alors qu'il venait d'écrire une phrase à peu près identique tirée des *Experimenta*, il se contenta d'ajouter lui-même en marge de sa copie : « Olympica. X. nov. coepi intelligere fundamentum inventi mirabilis (3). »"

(2) La place de cette réflexion dans les *Experimenta* coïncide très bien avec l'hypothèse faite par Milhaud sur la nature de la découverte du 11 nov. 1620, dont nous parlerons plus loin.

(3) Leibniz a transcrit : X Nov., tandis que Baillet donne la date du : XI Nov. Est-ce une faute de Baillet, de Leibniz, ou plus probablement de Foucher de Careil ? Le manuscrit de Leibniz ne se trouvant plus à Hanovre, on ne saurait le dire.

Les annéues d'apprentissage de Descartes (1596-1628) Albi: Imprimerie cooperative du Sud-Ouest 1928, p. 68.

Selon cette hypothèse les sept ou huit lignes des *Democritica* sont identifiées avec le texte de AT X, 216 l. 19-25.

10. ———. 1619. *Olympica (Extraits de Baillet)*.

Première édition: Baillet I, 50-61 / 80-86 / 120; AT X, 179-188; B Op. II, 879-891; CO, 99-108; traduction par Michelle Beyssade, O I, 252-259.

Fernand Hallyn, dans *Les Olympiques de Descartes*, Genève: Droz, 1995, donne trois textes: I. *Le premier récit de Baillet*, (I, pp. 80-86), II. *Le deuxième récit de Baillet*, (*Abrégé,* pp. 37-39), III. *Cogitationes privatae. Pensées pour moi-même*, (Foucher de Careil, I, 10-12) : "On ne reprend ici que ceux qui faisaient partie des *Olympica* selon l'hypothèse d'Henri Gouhier (*Les premières pensées de Descartes*, Paris, Vrin, 1958 et 1979)." p. 41.

Ce texte contient le récit de trois songes de Descartes la nuit du 10 au 11 novembre 1619 : "s'étant couche *tout rempli de son enthousiasme*, et tout occupé de la pensée d'*avoir trouvé ce jour-là les fondements de la science admirable". (*Baillet I, p. 80).

"*Les « Songes » de Descartes*

Le texte se trouve dans la biographie de Baillet qui le tire des *Olympica*. Plus exactement, Baillet en donne une traduction paraphrasée avec quelques citations de l'original latin. Il s'agit du morceau qui ouvre le « discours » écrit sous le titre *Olympica* sur le « petit registre en parchemin ». Les pages qui nous le font connaître laissent supposer un récit bien conduit et rédigé avec un certain souci littéraire, non une suite de notes hâtivement griffonnées.

Baillet ouvre donc le cahier de Descartes et écrit : « Il nous apprend que le dixième de Novembre mil six cent dix-neuf, s'étant couché tout rempli de son enthousiasme, et tout occupé de la pensée d'avoir trouvé ce jour-là les fondements de la science admirable, il eut trois songes consécutifs en une seule nuit, qu'il s'imagina ne pouvoir être venus que d'en hauts (80). » (Gouhier, *op. cit.*, pp. 32-33).

(80) Baillet, t. I, p. 81; AT t. X, p. 181. Remarquons que « *ce jour là* » semble ajouté par Baillet qui traduit le texte latin donné plus haut, p. 32.

"Les historiens de Descartes parlent comme s'il n'y avait qu'un seul texte sur les rêves de novembre 1619 : le récit des *Olympica* tel que Baillet nous l'a transmis (86). Or il y en a

deux. Ceci résulte de la comparaison entre un fragment lu dans la copie de Leibniz et les passages des *Olympica* qu'il rappelle.

Voici le fragment tel que Foucher de Careil l'a présenté (87) :

*Anno 1620, intelligere coepi fundamentum inventi mirabilis.**

Somnium 1619, nov. in quo carmen 7 cujus initium:

Quod vitae sectabor iter?...

Auson

*[En marge :] *Olympica, X nov. coepi intelligere fundamentum inventi mirabilis.*

Ce fragment ne vient pas des *Olympica*.

1° La première ligne avec sa note rappelle évidemment le début des *Olympica* :

X novembris 1619, cum plenus forem enthousiasmo, et mirabilis scientiae fundamenta reperirem (88)... Baillet nous dit qu'en marge, « d'une encre plus récente, mais toujours de la même main de l'Auteur », on lisait: *XI Novembris 1620, coepi intelligere fundamentum inventi mirabilis* (89).

La première ligne du fragment n'est pas exactement semblable à celle que Baillet a lue dans la marge des *Olympica* et qu'il déclare être de la main de Descartes. C'est même pourquoi quelqu'un a transcrit en face la phrase lue dans les *Olympica*, substituant involontairement X à XI: est-ce Descartes? ne serait-ce pas plutôt Leibniz? Peu importe : que ce soit l'un ou l'autre, le fragment est tiré d'une page du petit registre qui n'est pas celle où commence le récit des songes.

2° La seconde ligne rappelle l'épisode final du troisième songe : là aussi le rêveur lit le vers d'Ausone. Mais, dans notre fragment, il s'agit d'une simple note sans verbe : « Songe, nov. 1619, là, poème 7 qui commence : Quel chemin de la vie suivrai-je ? Auson. » Ces lignes n'ont pu être découpées dans le récit visiblement rédigé que suit Baillet, même en tenant compte des enjolivements.

Le vers du poète latin, d'ailleurs, n'apparaît lié à une date dans aucun des trois passages où le traducteur le cite ; la première fois, le rêveur « tombe » sur lui en ouvrant au hasard un *corpus poetarum*, la seconde, il essaie vainement de le retrouver dans le même recueil; la troisième, il y reconnaît un « bon conseil » (90). On ne voit vraiment pas comment l'un de ces morceaux pourrait bien être le contexte du fragment.

Le fragment ne vient pas des Olympica. D'où vient-il ?

La série B du registre est faite de trois groupes de textes sous les rubriques : *Praeambula, Experimenta, Olympica*. Ces lignes se trouvent sur la copie avant le premier fragment incontestablement extrait des *Olympica*, mais séparées de celui-ci par deux autres « pensées ». Si, comme c'est vraisemblable, Leibniz suit l'ordre du registre, cette situation porte à croire qu'elles viennent des *Experimenta*.

(...)

Ce fragment serait-il donc une note sur un cas d'*experimentum* ?

Il y a tout lieu de croire que ces deux courts alinéas constituaient un tout sur le petit registre comme sur la copie de Leibniz telle que nous la connaissons par Foucher de Careil. Il s'agit donc d'une note qui rapproche deux faits et c'est le rapprochement de ces deux faits qui est l'objet même de la note.

(...)

La note sur le rêve des *Experimenta* n'est pas un morceau de fable : elle rappelle deux faits et l'un de ces faits est un songe de la nuit du 10 au 11 novembre 1619.

Tout n'est donc pas fictif dans le récit des *Olympica*.

A la fin du troisième rêve, selon le récit, Descartes se réveille en train d'interpréter le vers : *Quod vitae sectabor iter*? Souvenir immédiat qui effleure la conscience et dont elle part pour rappeler ce qui le précède, c'est, dans le rêve reconstruit, le morceau le plus pur du rêve rêvé. Or, d'après la note des

Experimenta, c'est là aussi le souvenir d'un rêve réellement rêvé dans la nuit du 10 au 11 novembre 1619.

Tout le reste du récit serait-il une fable, cela n'empêcherait pas qu'un fragment de vrai rêve ne se trouve au centre, à l'instant où, en droit, tout aboutit et d'où, en fait, tout part dans le déroulement des pseudo-rêves." (Gouhier, *op. cit.*, pp. 40-41).

(86) Sauf Sirven, *Les Années d'apprentissage de Descartes (1596-1628)*, Paris, Vrin, 1928 p. 65 sq.; mais sa restitution du petit registre est tout à fait différente de celle qui a été proposée ici, de sorte que nos interprétations sont divergentes.

(89) *Ibidem*, t. I, p. 51 (AT t. X, p. 179) ; sur ce texte, voir plus loin, ch. IV, p. 74.

(90) Baillet, t. I, p. 83 et 84 (AT t. X, p. 184).

11. ———. 1619 (automne) - 1623 (printemps). *Studium Bonae Mentis (Extraits de Baillet)*.

    Première édition: Baillet II 406; Baillet I 26 / 34 / 87-91 / 109-110; II 66 / 477 / 479 / 486-487 / 531 / 545; AT X, 191-204; B Op. II, 897-915; traduction par Michelle Beyssade, O I, 260-268; CO, 127-140 (l'édition la plus complète).

    "Un autre ouvrage latin que M. Descartes avait poussé loin, et dont il nous reste un ample fragment est celui de l'*Étude du bon sens*, ou de l'*Art de bien comprendre*, qu'il avait intitulé *Studium bonae Mentis*. Ce sont des considérations sur le désir que nous avons de savoir, sur les sciences, sur les dispositions de l'esprit pour apprendre, sur l'ordre qu'on doit garder pour acquérir la sagesse, c'est-à-dire la science avec la vertu, en joignant les fonctions de la volonté avec celles de l'entendement. Son dessein était de frayer un chemin tout nouveau ; mais il prétendait ne travailler que pour lui-même, et pour l'ami à qui il adressait son traité sous le nom de *Museus*, que les uns ont pris pour le sieur Is. Beeckman principal du

collège de Dordrecht, d'autres pour M. Mydorge ou pour le P. Mersenne."

Baillet VII, chapitre 20, p. 406.

"On peut interpréter d'abord ce terme au sens général d'entreprise, ou d'œuvre, et non au sens d'un ouvrage littéraire ou philosophique particulier. Mais il semble bien que Descartes ait conçu dès ce moment le projet de consigner le fruit de ses réflexions dans un livre et de le publier. En tout cas, il s'est promis à lui-même, quelques mois plus tard, d'achever un livre avant Pâques 1620 et de l'éditer : « Omnino autem ante Pascha absolvam tractatum meum, et si librariorum mihi sit copia dignusque videatur, emittam, ut hodie promisi, 1620, die 23 Febr. » (*) *Cogit. privatae*, t. X, p. 218, l. 3-5.

On ignore ce que peut avoir été ce traité, mais rien ne s'opposerait à ce que ce fût le *Studium bonae mentis* (t. X, p. 191-203), dont ce que nous savons correspond exactement aux préoccupations méthodologiques et morales de Descartes à cette époque : Ce sont des considérations sur le désir que nous avons de savoir, sur les sciences, sur les dispositions de l'esprit pour apprendre, sur l'ordre qu'on doit garder pour acquérir la sagesse, c'est-à-dire la science avec la vertu, en joignant les fonctions de la volonté avec celles de l'entendement. Son dessein était de frayer un chemin tout nouveau ; mais il prétendait ne travailler que pour lui-même et pour l'ami à qui il adressait son traité sous le nom de Museus, que les uns ont pris pour le sieur J. Beeckman, principal du collège de Dordrecht, d'autres pour M. Mydorge ou pour le P. Mersenne (A. Baillet, t. II, p. 406 ; AT X, p. 191). Ces identifications de personnages sont purement conjecturales et il n'y a pas à en tenir compte, d'autant moins que Museus pourrait fort bien n'avoir été qu'un interlocuteur imaginaire ; mais tout le reste s'accorde avec l'élaboration de la méthode et de la morale provisoire que Descartes situe entre novembre 1619 et mars ou avril 1620."

Gilson, *Discours de la méthode. Texte et Commentaire*, Paris: Vrin, 1925 (deuxième édition revue 1926), p. 181 (note a AT VI, p. 17, l. 8 ".. l'ouvrage..." [O III, 92]).

(*) *J'ajoute la traduction et les notes de Fernand Hallyn* : "D'autre part, je terminerai complètement mon traité avant Pâques, et si j'ai matière à livres (1) et si le traité en paraît digne, je le publierai, comme je l'ai promis aujourd'hui, le 23 septembre (2) 1620".

(1) Leçon de Foucher de Careil (« librorum »). AT corrige en « librariorum » en se fondant sur la version de Baillet (« libraires »). Gouhier, *La pensée religieuse de Descartes*, Paris: Vrin 1979, p. 105 (première édition 1924) traduit par « copistes ». Aucune des traductions proposées jusqu'à présent (« livres », au sens courant, pour « librorum », « libraires » ou « copistes » pour « librariorum ») n'est vraiment satisfaisante dans le contexte. Je propose de maintenir « librorum », mais de comprendre le mot au sens de « parties d'un ouvrage », les « livres » dont devrait se composer le traité projeté.

(2) « Février » chez Baillet. Cf. l'introduction (p. 25), où est adoptée la leçon de Baillet mais aussi, ici-même, la contribution de G. Rodis-Lewis, qui maintient « septembre ».

"« La vraie philosophie dépend de l'entendement. » Le *Studium* ne institue pas seulement, comme Étienne Gilson l'avait remarqué, un petit traité *De la philosophie*; il est le premier *traité de philosophie* de Descartes, ouvrant la voie au traité de « vraie philosophie » que seront les *Regulae ad directionem ingenii*. Libérant ce champ inédit pour Descartes est la philosophie, le *Studium bonae mentis* s'avère donc être un texte décisif, en dépit de son inachèvement et de son démembrement — décisif dans son échec même. C'est pourquoi il constitue la pierre de touche la présente édition. C'est un texte difficile aussi, puisque seules les *Regulae* délivrent pleinement le sens de cet échec : à ce titre, le *Studium* et les *Regulae* constituent véritablement un tout indissociable. En charge de li présenter et de l'exploiter tant qu'il restait inédit, Baillet aura baissé les bras, alors même que l'intelligence du *Studium* lui eût ouvert de tout autres perspectives sur le jeune Descartes. Nous osons espérer que les propositions avancées ici pour en restituer le projet parviendront à esquisser la figure d'un Descartes devenant philosophe.

Observons cependant d'emblée que l'ordre et les objets des considérations qui suivent sont encore manifestement d'origine aristotélicienne. Descartes commence en philosophie en répétant à sa manière le livre A de la *Métaphysique*, c'est-à-dire en faisant un *De philosophia* — ce qu'Étienne Gilson avait vu, moyennant un rapprochement avec la *Lettre-préface* aux *Principes* (AT IX-2, 2-8 et 4, 23): Baillet «aurait dû traduire [*Studium Bonae mentis*] par: *Étude de la sagesse*, ou même, plus simplement, *De la philosophie* » *Commentaire*, p. 82, selon AT IX-2, 3 qui reprend en français l'*Epistola dedicatoria des Principia*, AT VIII-1, 4, 24, *studium sapientiae*), suivi à juste titre par Jacques Sirven : «Il y avait là [*sc.* dans les considérations sur le désir que nous avons de savoir du *Studium*] comme un ressouvenir du premier livre des *Métaphysiques* d'Aristote » (*Les Années d'apprentissage de Descartes (1596-1628)*, Albi: 1928 p. 293). Il ne sera donc pas étonnant que peu après Descartes écrive sa propre *Peri tès alètheias theoria*, *De veritate quidem theoria* (Aristotle, *Métaphysique* α 1993 a 30), protreptique qui deviendra recherche de la vérité, *veritatis inquisitio*. Dans la mesure où la *Lettre-préface* obéit à une terminologie scolaire, conformément au genre du manuel, on peut considérer qu'elle reprend le projet du *Studium* comme commencement de la philosophie — à quelque vingt-cinq ans de distance, ces deux textes se répondent silencieusement : c'est pourquoi le livre A y est présent, quoique différemment." Vincent Carraud, note 2 à l'*Étude du bon sens*, dans CO, p. 141.

Dans une lettre à Beeckman du 26 mars 1619 Descartes expose son projet :

"Je suis arrivé ici [à Bréda] il y a six jours, et je me suis remis au culte des Muses avec plus de zèle que jamais. J'ai établi en ce court laps de temps, à l'aide de mes compas (2), quatre démonstrations remarquables et tout à fait neuves.

(...)

C'est autre chose que je cherche maintenant pour l'extraction des racines d'une somme (de plusieurs quantités incommensurables entre elles); si j'y parviens, comme je

l'espère, je mettrai bien en ordre toute cette science, à condition de vaincre mon indolence et si le destin m'en donne le loisir.

Pour ne rien vous cacher de ce que j'entreprends, je voudrais donner au public non pas un *Ars brevis* comme Lulle (7), mais une science toute nouvelle (8), par laquelle on puisse résoudre tous les problèmes possibles, en n'importe quel genre de quantité, continue or discontinue."

(...)

C'est une entreprise infinie, et qui dépasse un seul homme, projet incroyablement ambitieux mais j'entrevois un je-ne-sais-quoi de lumineux dans l'obscur chaos de cette science et je pense pouvoir par ce moyen dissiper les ténèbres les plus épaisses."

(AT X, 156-158, O VII, 2, 321-322; B 2).

(2) Les compas sont ceux que Descartes décrira dans la *Géométrie* II et III (AT VI 391 et 443 [O III, 430 et 471]).

(7) R. Lull, *Artificium sive Ars brevis ad absolvendam omnium artium encyclopœdiam*, ou encore *Ars brevis, quae est imago Artis generalis*, écrit en 1308, imprimé à Barcelone, 1481, souvent réimprimé ensuite (voir sa mention dans Beeckman = AT X 63-65).

(8) Note en marge : « méthode générale [*ars generalis*] pour résoudre toutes les questions » (Beeckman IV 59, n. 7).

12. ———. 1619-20 ou 1623?-1625 - hiver 1627-28. *Regulae ad directionem ingenii*.

Rédaction initiée en Allemande en 1619-1620 où à Paris en 1623, interrompue et reprise en France en 1626-1628 et jamais complétée.

AT X 359-469; B Op. II, 684-815; traduction et notes par Jean-Marie Beyssade et Michelle Beyssade, avec la collaboration de Frédéric Buzon et Denis Kambouchner, O I, 324-497.

Une copie (non autographe) du texte latin avec les seize premières Règles (*), a étée découverte à la Cambridge

University Library en 2011 par Richard Serjeantson, qui en prépare une édition.

(*) manque la deuxième partie de la Règle IV [sur la *mathesis universalis*].

Je donne en parenthèse les abréviations communément utilisées pour les manuscrits et les éditions anciennes.

(N) = Première publication : Jan Hendrik Glazemaker (1620-1682) traduit le manuscrit latin en néerlandais vers le 1680 ; la traduction fut publiée à Amsterdam en 1684, avec le titre *R. Des Cartes Regulen van de bestieringe des verstants.*

(A) = La première édition du texte latin fut publiée en 1701 in *R. Des-Cartes Opuscula posthuma, physica et mathematica*, Amsterdam : P. & J. Blaeu ; l'édition Adam-Tannery ne tient pas compte de la traduction néerlandaise.

(O) = Le manuscrit original est perdu.

(H) = Nous avons une copie de l'original (manuscrit de Hanovre : première édition par Charles Adam, "Ren. Cartesii Regulae de inquirenda veritate", *Revue Bourguignonne de l'Enseignement Supérieur*, 11, 1901, pp. 1-89) fait en 1678 et acheté par Leibniz.

(L) = Cette copie contient de nombreuses erreurs et Leibniz l'a corrigée.

(R) = Une autre copie faite vers 1680 et qui appartenait à Johannes de Raey (1622-1701), probablement utilisée pour les premières éditions, est aujourd'hui perdue.

Éditions critiques des *Regulae*:

Regulae ad directionem ingenii, Kritisch revidiert und herausgegeben von Heinrich Springmeyer, Lüder Gäbe und Hans Günter Zekl, Hamburg: Meiner, 1973.

Regulae ad directionem ingenii. Cogitationes privatae, Übersetzt und herausgegeben von Christian Wohlers, Hamburg Felix Meiner, 2011.

Traductions:

Règles pour la direction de l'esprit, Traduction et notes par Joseph Sirven, Paris: Vrin, 1945.

Règles pour la direction de l'esprit, Traduction et notes par Jacques Brunschwig. Préface, dossier et glossaire par Kim Sang Ong-Van-Cung, Paris: Le Livre de Poche, 2002 (première édition de la traduction dans F. Alquié (éd.), René Descartes, *Œuvres philosophiques,* Paris: Garnier, I, 1963, pp. 67-204).

Règles utiles et claires pour la direction de l'esprit en la recherche de la vérité, Traduction selon le lexique cartésien, et annotation conceptuelle par Jean-Luc Marion. Avec des notes mathématiques de Pierre Costabel, La Haye: Martinus Nijhoff, 1977.

La première mention se trouve dans l'*Inventaire de Stockholm* des écrits de Descartes à la lettre F: "Neuf cahiers reliés ensemble, contentant partie d'un traité des règles utiles et claires pour la direction de l'Esprit en la recherche de la Vérité". (AT X, p. 9).

"En plusieurs endroits de sa *Vie de Monsieur Des-Cartes* (1691), Baillet donne une traduction française de passages des *Regulae*. Le texte latin qu'il avait sous les yeux n'était pas celui que nous avons publié, et qui se trouvait en Hollande et ne fut imprimé qu'en 1701, mais le texte original, qui venait de Clerselier, et qui a disparu depuis lors. La traduction de Baillet n'en est que plus précieuse, puisqu'elle atteste à la fois l'existence de ce texte primitif et sa conformité avec la copie qui nous en a été conservée.

« ...M. Clerselier... s'est trouvé le possesseur unique de tout ce que M. Descartes avait jamais écrit, tant de ce qui était fini que de ce qui n'était que commencé. Mais, après une recherche exacte qui s'est faite de cette Logique prétendue parmi ses papiers, il ne s'est rien trouvé... qui puisse passer pour Logique,

si l'on en excepte ses *Règles pour la direction de l'esprit dans la recherche de la vérité* (en marge: *C'est un manuscrit latin, non achevé, qui est entre nos mains*), qui peuvent servir de modèle pour une excellente Logique, et qui font sans doute une portion considérable de sa Méthode, dont ce que nous avons d'imprimé à la tête de ses Essais, ne fait qu'une petite partie. »

(Baillet I, p. 282.)

« Parmi ceux (*les de M. Descartes*) que les soins de M. Chanut ont fait échoir à M. Clerselier, il n'y en a point de plus considérable ni peut-être de plus achevé, que le traité latin qui contient des *Règles pour conduire nôtre esprit dans la recherche de la vérité*. C'est celui des manuscrits de M. Descartes, à l'impression desquels il semble que le Public ait le plus d'intérêt. On est déjà prévenu sur sa valeur et son prix par la lecture que M. Clerselier en a communiquée à quelques curieux, et par le témoignage que le célèbre Auteur de l'*Art de penser* (en marge : *Part. 4, chap. 2*) a rendu du bon usage qu'on en peut faire. »

(AT X, 477).

Clerselier a montré le manuscrit aux auteurs de la *Logique de Port Royal* qui l'ont utilisé pour la deuxième édition : "La *Logique de Port-Royal* contient un long passage, qui correspond à une partie des Règles XIII et XIV. Comme nous l'avons expliqué dans l'*Avertissement* (p. 351-2), ce passage a pour nous la valeur d'un témoin : il atteste l'existence d'un texte original, que nous n'avons plus, mais que Clerselier avait encore et qu'il a communiqué à Arnauld pour le traduire. On chercherait d'ailleurs en vain cette traduction dans la première édition : *La Logique ou L'Art de penser contenant, outres les règles communes, plusieurs observations nouvelles propres à former le jugement*. (A Paris, chez Jean de Launay, sous le Porche des Escoles de Sorbonne, M,DC.LXII. In-12, pp. 473, plus 5 p. Extrait du Privilège, 1er Avril 1662: Permis au sieur Le Bon... Achevé d'imprimer, 6 juillet 1662.) Le passage qui nous intéresse n'apparaît que dans la seconde édition : *La Logique ou L'Art de penser: contenant* etc. (comme précédemment). *Seconde édition, revue et augmentée*. (A Paris, chez Charles

Savreux, au pied de la Tour de Nostre Dame, à l'enseigne des Trois Vertus, M.DC.LXIV.) C'est aussi un in-12; le passage en question s'y trouve, p. 391-397, avec cette note: « La plus grande partie de ce que l'on dit ici des questions, a été tirée d'un manuscrit de M. Descartes, que M. Clerselier a eu la bonté de prester. » Cette note et le passage visé se retrouvent dans toutes les éditions postérieures de la *Logique de Port-Royal,* à partir de la deuxième, Partie IV, chapitre II." (AT X 470).

Voir l'édition critique : Antoine Arnauld et Pierre Nicole, *La logique ou l'art de penser (dite Logique de Port-Royal)*, édité par Dominique Descotes, Paris: Champion, 2011.

"Le passage suivant du P. Poisson atteste aussi l'existence d'un texte des *Regulae*, autre que celui que nous avons donné ; et cet autre texte était l'original, tandis que le nôtre n'est qu'une copie.

Observation sur la troisième règle de la Méthode de Descartes : Conduire par ordre mes pensées, etc. (Tome VI de la présente édition, p. 18, l.27) :

«... j'ay rencontré dans un Manuscrit, qu'il avait commencé dés les premières années qu'il s'appliqua sérieusement à l'étude, que pour venir à bout de toutes les difficultés qu'on propose, il faut:

1, les connaître distinctement chacune en particulier ;

2, les dépouiller de tout ce qui ne leur est point essentiel dans le sens auquel on les considère ;

3, les réduire et les diviser en petites parties ;

4, examiner avec attention chacune de ces parties, commençant par les plus simples ;

5, il faut rapporter toutes ces parties, en les comparant les unes aux autres.

Voilà à quoi aboutit toute la finesse des méthodes qu'on a trouvées et qu'on trouvera jamais. Elle est également nécessaire dans la Physique et dans la Géométrie. L'article de ces règles le plus difficile à mettre en pratique, c'est ce dernier : tant parce

qu'on ne connait pas assez les termes qu'on doit comparer, qu'à cause qu'on a besoin d'un *Moyen*, qu'on appelle *Medium* dans l'École, qui n'est pas aisé à trouver. »

(*Commentaire ou Remarques sur la Méthode de René Descartes,* par L. P. N. I. P. P. D. L., à Vendôme, M.DC.LXX. Partie II, 6e observation, p. 76.)

(AT X, 476).

En 1676 Leibniz rencontrait Clerselier : "J'ai été aujourd'hui avec Mons. de Tschirnhaus, pour lui donner la connaissance de Mons. Clerselier, et pour lui faire voir les relies de Mons. des Cartes.

Il nous montra un discours de Mons. des Cartes *de la recherche de la vérité*; il y avait environ 22 règles expliquées e illustrées. En Latin." (AT X, 208).

Leibniz et Ehrenfried Tschirnhaus (1651-1708) transcrivirent tous les deux des manuscrits : "en particulier Tschirnhaus qui entre 1676 et 1682 en fit parvenir des copies en Hollande à des amis qui appartenaient au cercle spinoziste, et à Hanovre à Leibniz qui avait quitté Paris en novembre 1676. Durant cette période, le projet d'une édition des mss. à dû mûrir chez les deux amis sous l'impulsion ou du moins avec les encouragements de Clerselier. Nous suivons la trace de ce projet, qui en définitive n'aboutit pas, d'abord à Paris, puis à Amsterdam. Ce dont nous sommes en tout cas certains c'est que Leibniz s'est trouvé dès novembre 1676 en possession d'une copie des *Regulae* et que Tschirnhaus dès 1678 montre qu'il a pris connaissance directement du texte.

(...)

A partir des premières années du XVIIIe siècle nous ne possédons plus de renseignements au sujet des mss. cartésiens, passés des mains de Legrand à celles de Marmion, professeur de philosophie au Collège des Grassins, et nous perdons par conséquent la trace du ms. original des *Regulae*." (Giovanni Crapulli, *Introduction* à l'édition critique, René Descartes,

Regulae ad directionem ingenii, La Haye: Martinus Nijhoff, 1966, p. XIII)

13. ———. 1619-20. *De Solidorum Elementis (Ms. de Leibniz)*.

    Le texte originel de Descartes "Environ seize feuillets in octavo sous ce titre : *Progymnasmata de solidorum elementis*" (*Inventaire succinct des écrits,* lettre M, AT X 10), est perdu, mais nous possédons la copie faite par Leibniz à Paris en 1672-1676 et publiée pour la première fois par Foucher de Careil, vol. II, pp. 214-226.

    AT X 265-276; *Additions* in AT XI 690-692; nouvelle édition par Pierre Costabel dans la *Nouvelle présentation* de AT (1966) X 276 et 687-689; B Op. II, 1224-1237; traduction par André Warusfel, O I, 221-231.

    Nouvelle édition avec traduction en anglais par Pasquale Joseph Federico, *Descartes on Polyhedra. A Study of the* De Solidorum elementis, New York, Springer, 1982.

    Édition critique, avec introduction, traduction, notes et commentaires par Pierre Costabel, *René Descartes. Exercices pour les éléments des solides. Essai en complément d'Euclide. Progymnasmata de solidorum elementis*, Paris, Presses Universitaires de France, 1987.

    "Le présent ouvrage est le résultat d'une longue histoire.

    Le manuscrit mathématique de Descartes qui est ici l'objet d'une restitution a eu un sort tourmenté. Conservé dans les papiers de l'auteur pendant plus d'un demi-siècle, il a disparu peu de temps après avoir eu la chance d'être lu par Leibniz à Paris. Mais la transcription effectuée par ce lecteur exceptionnel a connu le silence des pièces d'archives jusqu'au milieu du XIXe siècle, et elle n'est sortie de l'ombre que pour tomber entre les mains de lecteurs plus avertis de la mathématique de leur temps que des précautions à prendre avec des textes anciens. Elle a ainsi davantage retenu l'attention par les suggestions qu'elle paraissait fournir à un moment de l'évolution de la pensée mathématique, moment caractérisé par la prise de conscience de l'importance de l'analyse de la situation (*Analysis situs*), et si elle a joué un rôle dans les

réflexions consécutives, elle n'a pas tardé, au début du siècle actuel, à être objet de graves réserves, réserves dont la pointe acérée n'a cessé de se préciser. Manque de rigueur, absence de point de vue authentiquement topologique, les raisons de renvoyer ce texte au silence sont aujourd'hui pressantes aux yeux de quelques-uns.

L 'effort de restitution du texte lui-même, qui a été entrepris vers 1894 et réalisé en 1908 avec le tome X de la grande édition des *Œuvres de Descartes* par Charles Adam et Paul Tannery, est donc survenu dans une ambiance peu favorable à sa consistance propre et à sa réception. Affaire d'érudition cartésienne il est apparu dès le début, et il l'est resté jusqu'à la récente mise à tour de l'édition susdite en 1966.

Principal acteur de cette mise à jour, dans les limites de notes correctrices à apporter à la première édition, le présent éditeur savait dès cette époque qu'il y avait lieu de procéder à une prise en charge réellement convenable et il en a fixé les traits à l'occasion de divers articles tout en préparant l'édition nouvelle, séparée, délivrée des conditions restrictives imposées par l'insertion dans des Œuvres complètes monumentales. Il y a près de dix ans que cette édition était prête, mais publier était une autre affaire que d'établir la matière de la publication. Il fallut trouver un éditeur au sens ordinaire et français du terme." (Pierre Costabel, *René Descartes. Exercices pour les éléments des solides, Avertissement*, pp. V-VI).

14. ———. 1628. *Censura quarundam epistolarum Domini Balzacii.*

    AT I, 7-11; CO, 194-202, traduction du XVIIe siècle, pp. 195-203; B 14; traduction par Michelle Beyssade et Denis Kambouchner, O I, 285-289; O VIII 2 345-349 (traduction du XVIIe siècle).

    Première édition : Claude Clerselier (éd.), *Lettres de mr. Descartes*, Paris, Charles Angot, vol. I, 1657, lettre C (février-mars 1628), pp. 462-471.

    1628 est la datation proposée par Clerselier; Balzac en remercia Descartes le 30 mars 1628.

Pour les *Lettres* de Jean-Louis Guez de Balzac (1597-1654), Paris, 1624 (réédition : *Les premières lettres de Guez de Balzac,* voir l'édition critique précédée d'une introduction par H. Bibas et K.-T. Butler, Paris: Droz 1933-34, 2 volumes).

La *Censura* (ou *Jugement de quelques* Lettres *de Balzac*) de Descartes est aussi publiée dans Guez de Balzac, *Socrate chrétien* [1652], édition critique de Jean Jehasse, Paris: Champion, 2008, avec une nouvelle traduction, pp. 243-249.

15. ———. 1628. *[De la Divinité].*

CO pp. 214-216; ce texte n'a pas été retrouvé.

"Ce fut durant cet été [1628] qu'il voulut écrire *De la Divinité*, voyez ci-après au livre III, chap. Ier." (Baillet I, 153, en marge).

"C'était la chaleur du climat de son pays qu'il ne trouvait point favorable à son tempérament par rapport à la liberté de son esprit, dont la jouissance ne pouvait être quelque trouble, lorsqu'il était question de concevoir des vérités, où l'imagination ne devait point se mêler. Il s'était aperçu que l'air de Paris était mêlé pour lui d'une apparence de poison très subtil et très dangereux ; qu'il le disposait insensiblement à la vanité; et qu'il ne lui faisait produire que des chimères. C'est ce qu'il avait particulièrement éprouvé au mois de juin de l'année 1628, lorsque, s'étant retiré de chez M. Le Vasseur pour étudier loin des compagnies, il entreprit de composer quelque chose sur la divinité. Son travail ne put lui réussir faute d'avoir eu les sens assez rassis ; outre n'était peut-être pas d'ailleurs assez purifié ni assez exercé pour pouvoir traiter un sujet si sublime avec solidité." (Baillet I, 171).

16. ———. 1628? *[De deo Socratis].*

CO, pp. 173-179; ce texte n'a pas été retrouvé.

« L'on nous parle encore d'un autre traité de M. Descartes, intitulé *De Deo Socratis*, où il examinait ce que pouvait être cet *esprit familier* de Socrate, qui fait le sujet de l'entretien des curieux depuis tant de siècles. Mais il parait que c'était un bien déjà aliéné, lorsque son Auteur fit le voyage de Suède. Aussi ne se trouva-t-il point parmi les autres dans l'Inventaire que l'on

fit de ses écrits après sa mort. Comme il est tombé en d'autres mains que celles de M. Clerselier, nous ne pourrons contribuer à sa publication que par des prières, pour porter ceux qui en sont devenus les maîtres à lui procurer le jour. Voici par avance ce que M. Descartes pensait de cet esprit familier de Socrate, et ce qu'il en mandait à la princesse Palatine sa disciple : « Et ce qu'on nomme communément le génie de Socrate, n'a sans doute été autre chose, sinon qu'il avait accoutumé de suivre ses inclinations intérieures, et qu'il croyait que l'événement de ce qu'il entreprenait serait heureux, lorsqu'il avait quelque secret sentiment de gaieté, et au contraire qu'il serait malheureux lorsqu'il était triste. Il faut avouer néanmoins qu'il y aurait de la superstition à s'attacher à cette opinion autant qu'on dit qu'il y était attaché. Car Platon rapporte de lui qu'il demeurait même au logis toutes les que son génie ne lui conseillait pas d'en sortir. Mais touchant les actions importantes de la vie, lorsqu'elles se trouvent si douteuses que la prudence ne peut enseigner ce qu'on doit faire, il me semble qu'on a grande raison de suivre les conseils de son génie; et qu'il est utile d'avoir une forte persuasion que les choses que nous entreprenons sans répugnance et avec la liberté qui accompagne d'ordinaire la joie ne manqueront pas de nous bien réussir. » (Baillet II, 408: lettre à Elisabeth du novembre 1646, AT IV, 530; O VIII 2, 270; B 578).

René Descartes. Bibliographie Chronologique et Annotée (Deuxième Partie: (1628-1637)

Bibliographie

Pour la liste des éditions de références et des abréviations voir René Descartes. Outils de recherche: Biographies, Dictionnaires et Lexiques des Ses Œuvres

1. Descartes, René. 1628 (automne) - 1629 (été). *[Traité de métaphysique].*

   CO, 217-227; ce traité en latin, aujourd'hui perdu, (son premier projet de métaphysique) est mentionné par Descartes dans :

   a) la lettre à Gibieuf du 18 juillet 1629: "Je me réserve à vous importuner lorsque j'aurai achevé un petit traité que je commence (5), duquel je ne vous aurais rien mandé qu'il ne fût fait, si je n'avais peur que la longueur du temps vous fît oublier la promesse que vous m'avez faite de le corriger et y ajouter la dernière main ; car je n'espère pas en venir à bout de deux ou trois ans, et peut-être après cela me résoudrai-je de le brûler, ou du moins il n'échappera pas d'entre mes mains et celles de mes amis sans être bien considéré ; car si je ne suis assez habile pour faire quelque chose de bon, je tâcherai au moins d'être assez sage pour ne pas publier mes imperfections." (AT I 17; O VIII 2, 790-791; B 17);

   (5) Les commentateurs rapprochent ce « petit traité » du « petit *Traité de Métaphysique*, lequel j'ai commencé étant en Frise, et dont les principaux points sont de prouver *l'existence de Dieu,*

et celle de nos âmes, lorsqu'elles sont séparées du corps, d'où suit leur immortalité », Descartes écrit à Mersenne, 25 novembre 1630 (AT I 182, [O VIII 1, 85] B 36); voir aussi à Mersenne, 15 avril 1630 (AT I 136, [O VIII 1, 67] B 30).

les lettres à Mersenne du:

b) 15 avril 1630: "Pour votre question de Théologie, encore qu'elle passe la capacité de mon esprit, elle ne me semble pas toutefois hors de ma profession, parce qu'elle ne touche point à ce qui dépend de la révélation, ce que je nomme proprement Théologie; mais elle est plutôt métaphysique (*) et se doit examiner par la raison humaine. Or j'estime que tous ceux à qui Dieu a donné l'usage de cette raison, sont obligés à le connaître, et à se connaître eux-mêmes. C'est par là que j'ai tâché de commencer mes études ; et je vous dirai que je n'eusse su trouver les fondements de la physique, si je ne les eusse cherchés par cette voie. Mais c'est la matière que j'ai le plus étudiée de toutes, et en laquelle, grâce à Dieu, je me suis aucunement satisfait ; au moins pensé-je avoir trouvé comment on peut démontrer les vérités métaphysiques, d'une façon qui est *plus* évidente que les démonstrations de géométrie ; je dis ceci selon mon jugement, car je ne sais pas si je le pourrai persuader aux autres. Les 9 premiers mois que j'ai été en ce pays, je n'ai travaillé à autre chose, et je crois que vous m'aviez déjà ouï parler auparavant que j'avais fait dessein d'en mettre quelque chose par écrit ; mais je ne juge pas à propos de le faire, que n'aie vu premièrement comment la physique sera reçue. (**)" (AT I 143-144; O VIII 1, 72; B 30);

(*) [Première occurrence du terme *métaphysique* dans les écrits de Descartes]

(**) [Descartes se réfère ici au *Monde*, qui ne sera pas publié en raison de la condamnation de Galilée en 1633]

c) 25 novembre 1630 : "J'éprouverai en la *Dioptrique* si je suis capable d'expliquer mes conceptions, et de persuader aux autres une vérité, après que je me la suis persuadée: ce que je ne pense nullement. Mais si je trouvais expérience que cela fût, je ne dis pas que quelque jour je n'achevasse un petit traité de

métaphysique, lequel j'ai commencé étant en Frise, et dont les principaux points sont de prouver *l'existence de Dieu, et celle de nos âmes*, lorsqu'elles sont séparées du corps, d'où suit leur immortalité." (AT I 182; O VIII 1, 85: B 36);

d) Mersenne, vers le 20 avril 1637: "Il y a environ huit ans que j'ai écrit en latin un commencement de Métaphysique (4) (...) et si l'on fait une version latine de ce livre (5), comme on s'y prépare, je l'y pourrai faire mettre." (AT I 350; O VIII 1, 139; B 104).

(4) En 1629 (à Gibieuf, 18 juillet 1629, AT I 17 l. 7, [O VIII 2, 790] B 17; à Mersenne, (15 avril 1630, AT I 144 l. 19, [O VIII 1, 72] B 30).

(5) La traduction latine du *Discours* et des *Essais* (sauf la *Géométrie*), œuvre d'Étienne de Courcelles, n'apparut qu'en 1644. CM suggère qu'un projet a pu se constituer dès 1637 avec le jeune Van Schooten, qui publia en 1649 une traduction latine de la *Géométrie*.

2. Beeckman, Isaac. 1628-29. *Extraits du Journal tenu par Isaac Beeckman*.

   AT X, 331-348; treize extraits mathématiques en latin de 1628-1629; B Op. II, 1352-1379; traduction française par Frédéric de Buzon, O I, *Notes de (1628-1699)*, 107-120.

   I. Historia Des Cartes ejusque mecum necessitudo. — Docti cur pauci 331 ; II. Algebrae Des Cartes specimen quoddam 333 ; III. Angulus refractionis à Des Cartes exploratus 335 ; IV. Chordarum musicarum crassitiei ratio 337 ; V. Solis radijs comburere remotissima 338 ; VI. Ellipsis in quâ omnes radij paralleli concurrunt in puncto medij densioris 338 ; VII. Hyperbola per quam radij in unum punctum concurrunt 340 ; VIII. Ellipsis pars per quam radij in aère exacte concurrunt 340 ; IX. Hyperbola per quam omnes radij paralleli in unum punctum exacte incidant demonstrata 341 ; X. Parabolâ duo média proportionalia inveniri posse demonstratur 342 ; XI. Parabolâ œquationes Cosicas lineis exponere 344 ; XII. Lunae an litterae inscribi possint absentibus legendae 347 ; XIII. Consonantias omnes ex continua chordae bisectione 348.

3. Descartes, René. 1629. *Anatomica quaedam ex M.to Cartesii. Problemata (Ms. de Leibniz).*

   Anatomica quaedam ex M.to Cartesii AT XI, pp. 549-621; B Op. II, 1104-1197; *Problemata* AT XI, 621-634; B OP. II, 1197-1219.

   Première édition du texte latin avec une traduction française dans Foucher de Careil: vol. I. *Observationes Meteorologicae*, 72-100 (AT XI-621-634); *Physiologia* 100-155; Vol. II *Partes similares, et excrementa, et morbi* 66-85; *Anatomica quaedam* 86-134; *Observationum anatomicarum* 134-209.

   Nouvelle édition dans René Descartes, *Écrits physiologiques et médicaux,* Présentation, textes, traduction, notes et annexes de Vincent Aucante, Paris, Presses Universitaires de France, 2000.

   Dans cette édition la première partie, *La génération des animaux*, contient les fragments 1-44 de 1630-1632, 45-72 de 1637, 73-76 de 1648.

4. ———. 1629. *Remedia, et vires medicamentorum (Ms. de Leibniz).*

   Première édition du texte latin avec une traduction française dans Foucher de Careil, vol. II, 210-213.

   AT XI, pp. 641-644; B Op. II, 1216-1219.

   Nouvelle édition dans René Descartes, *Écrits physiologiques et médicaux,* Présentation textes, traduction, notes et annexes de Vincent Aucante, Paris, Presses Universitaires de France, 2000.

   Dans cette édition la deuxième partie, *Fragments de thérapeutique*, contient les fragments T1-T9 de 1628 (*Remèdes et forces des médicaments*) et T10-T14 de 1631.

5. ———. 1629; 1638-40. *Excerpta ex mss. R. Des-Cartes (Ms de Leibniz).*

   Première édition dans R. Des-Cartes *Opuscula posthuma, physîca & mathematica,* Amsterdam 1701, pp. 1-17 (publié à la fine du volume, avec une nouvelle numération).

   AT X, pp. 285-324; B. Op. II, 994-1051; O III, pp. 532-562.

I. Polygonorum inscriptio 285 ; II. Horum Usus Trigonometricus 289 ; ni. Numeri Polygoni 297 ; IV. De Partibus Aliquotis Numerorum 300 ; V. Radix Cubica Binomiorum 302 ; VI. Circuli Quadratio 304 ; VII. Tangens Cycloïdis 305 ; VIII. Tangens Quadratariae per Cycloïdem 307 ; IX. Aequationum Asymmetriae Remotio 308 ; X. Ovales Opticae Quatuor 310 ; XI. Earum Descriptio et Tactio 313-324.

"Le volume intitulé : R. Des-Cartes *Opuscula posthuma, physîca & mathematica* (Amstelodami, ex typographia P. & J. Blaeu, MDCCI), donne à la fin, avec une pagination spéciale (p. 1-17), une série de fragments mathématiques sous la rubrique : *Excerpta ex MSS. R. Des-Cartes.*" (AT X, p. 279).

Il s'agit de 12 fragments, la plupart écrits en 1638-1640; le plus étendu, sur les Ovales, a été écrit avant 1629.

6. ———. 1629-48. *Primae cogitationes circa generationem animalium. De saporibus.*

   Première édition latine dans R. Des-Cartes *Opuscula posthuma, physîca & mathematica,* Amsterdam 1701, pp. 1-23.

   AT XI, pp. 505-538; 539-542; B Op. II, 936-983; 984-987.

   Nouvelle édition dans René Descartes, *Écrits physiologiques et médicaux,* Présentation, textes, traduction, notes et annexes de Vincent Aucante, Paris, Presses universitaires de France, 2000.

   Voir aussi: Annie Bitbol-Hespériès, "Sur quelques *errata* dans les textes biomédicaux latins de Descartes, AT XI", *Bulletin cartésien* XLIV 2013, *Archives de Philosophie*, 2015/1 Tome 78, pp. 45-55: "En préparant l'édition des textes médicaux de Descartes, à paraître dans le volume II des *Œuvres complètes* de Descartes chez Gallimard (coll. Tel), dirigées par Jean Marie Beyssade et Denis Kambouchner, j'ai été conduite à proposer la correction de quelques coquilles figurant dans les éditions des textes latins des *Primae cogitationes circa generationem animalium* et des *Excerpta anatomica* et reprises dans les traductions. " (p. 45).

7. ———. 1629 (octobre) - 1633. *Le Monde, ou Traité de la lumière.*

AT XI, 3-118; B OP. II, 214-359.

Premières publications :

1) *Le Monde de Mr. Descartes ou le Traité de la Lumière, et des autres principaux objets des Sens. Avec un Discours du Mouvement local, et un autre des Fièvres composez selon les principes du même Auteur*, Paris: Jacques Le Gras, 1664 (le texte est basé sur un copie de l'original, les deux Discours placés à la suite ne sont pas de Descartes).

2) Clerselier 1677, pp. 405-511.

Édition critique : *Le Monde, l'Homme*, Introduction de Annie Bitbol-Hespériès; textes établis et annotés par Annie Bitbol-Hespériès et Jean-Pierre Verdet, Paris: Seuil, 1996.

Titres de chapitres introduits par Clerselier dans son édition du *Traité du monde* : I. De la différence qui est entre nos sentiments et les choses qui les produisent ; II. En quoi consiste la chaleur et la lumière du feu ; III. De la dureté et de la liquidité ; IV. Du vide, et d'où vient que nos sens n'aperçoivent pas certains corps ; V. Du nombre des éléments, et de leurs qualités ; VI. Description d'un nouveau monde, et des qualités de la matière dont il est composé ; VII. Des lois de la nature de ce nouveau monde ; VIII. De la formation du soleil et des étoiles de ce nouveau monde ; IX. De l'origine et du cours des planètes et des comètes en général, et en particulier des comètes ; X. Des planètes en général, et en particulier de la terre et de la lune ; XI. De la pesanteur ; XII. Du flux et du reflux de la mer ; XIII. De la lumière ; XIV. Des propriétés de la lumière ; XV. Que la face du ciel de ce nouveau monde doit paraître à ses habitants toute semblable à celle du nôtre ; XVI-XVII [Ces Chapitres n'ont pas été retrouvés] ; Pour le XVIII Chapitre, voir *L'Homme*.

"Le plan du *Monde* décrit dans le *Discours*

La cinquième partie du *Discours* est consacrée, à un résumé du *Monde*, à la faveur duquel Descartes brosse à larges traits les principaux chapitres et le mouvement général de ce livre où il comptait déposer ses connaissances en physique. De manière

schématique, voici la table des matières reconstituée de ce *Monde* qui n'a jamais vu le jour, sinon plus tard dans les *Principes*.

1. Description de la matière.

2. Les lois de la nature.

3. Description des différentes combinaisons possibles de cette matière originelle selon les lois dégagées au deuxième paragraphe, ce qui donne les différents éléments : cieux, terre, planètes, comètes, soleil, étoiles fixes, lumière, etc.

4. Description du monde visible, en général de tous les phénomènes qui sont au-dessus de la terre (mouvements et qualités des Cieux).

5. Description des phénomènes terrestres : pesanteur, flux et reflux des océans, origine des mers, montagnes, etc., métaux, plantes, sable, feu, verre — métamorphose apparente des éléments.

6. Les êtres animés : les animaux, l'homme, ses fonctions, son anatomie. (*)

7. La conclusion est centrée sur l'immortalité de l'âme humaine que Descartes établit par la différence entre l'homme et l'animal-machine.

Ce plan est guidé par un mouvement ascendant qui, trouvant son origine dans la matière inanimée, s'achève par révocation de l'immortalité de l'âme. L'esprit reconstruit probablement l'univers, en partant de l'évidence fournie par le spectacle de la matière elle-même régie par les lois de la mécanique, et achève son chemin en affirmant sa différence, c'est-à-dire son immortalité.

Une étroite correspondance peut être établie entre cette organisation et celle des *Principes* : à la deuxième partie des *Principes* (« Des principes des choses matérielles ») correspondent les chapitres que nous avons numérotés 1, 2 et 3; à la troisième partie (« Du monde visible ») le chapitre 4; et à la quatrième partie (« De la terre ») le chapitre 5. Les racines

métaphysiques de la première partie des *Principes* sont dispersées dans les quatre premières parties du *Discours*, à condition d'en retirer la morale par provision et les textes biographiques qui expliquent leur genèse."

* A ce moment du développement s'intercale l'explication détaillée de la circulation du sang.

Pierre-Alan Cahné, *Un autre Descartes. Le philosophe et son langage*, Paris: Vrin, 1980, pp. 257-258.

Le Monde est commencé en octobre 1629 : "Je ne laisse pas de vous en avoir très grande obligation, et encore plus de l'offre que vous me faites de faire imprimer ce petit traité que j'ai dessein d'écrire; mais je vous dirai qu'il ne sera pas prêt de plus d'un an. Car depuis le temps que je vous avais écrit il y a un mois, je n'ai rien fait du tout qu'en tracer l'argument, et au lieu d'expliquer un phénomène seulement, je me suis résolu d'expliquer tous les phénomènes de la nature, c'est-à-dire toute la physique. Et le dessein que j'ai me contente plus qu'aucun autre que j'aie jamais eu, car je pense avoir trouvé un moyen pour exposer toutes mes pensées en sorte qu'elles satisferont à quelques-uns et que les autres n'auront pas occasion d'y contredire." (lettre à Mersenne du 13 novembre 1629, AT I 70; O VIII 1, 33; B 23).

Le 22 juillet 1633 "Mon traité (9) est presque achevé, mais il me reste encore à le corriger et à le décrire (10) ; et parce qu'il ne m'y faut plus rien chercher de nouveau, j'ai tant de peine à travailler, que si je ne vous avais promis, il y a plus de trois ans, de vous l'envoyer dans la fin de cette année (11), je ne crois pas que j'en pusse de longtemps venir à bout ; mais je veux tâcher de tenir ma promesse (12)." (lettre à Mersenne, AT I, 268; O VIII 1, 107; B 59).

(9) *Le Monde*.

(10) Comprendre : *à le transcrìre* (ou bien, comme le suggère AM, lire *récrire* ?).

(11) Voir à Mersenne, 15 avril 1630 (AT I, 137 l. 16-17; [O VIII 1, 67] B 30) et novembre 1630 (AT I, 179 l. 12-13; [O VIII 1, 83] B

36).

(12) Une lettre de Golius à Huygens (1er novembre 1632, *Brwg*, [*De Briefwisselìng van Constantjin Huygens*, (1608 1687), 6 voll., ‘s-Gravenhage, Martinus Nijhoff, 1911-1917] t. 1, 375) indique que Descartes en est à rédiger la philosophie de l'âme humaine, qu'il fait remonter à Dieu ; Descartes, dit-il, s'est retiré à Deventer pour rédiger en paix. Dans le *Discours*, celui-ci indique : « J'avais décrit, après cela, l'âme raisonnable et fait voir qu'elle ne peut aucunement être tirée de la puissance de la matière, ainsi que les autres choses, mais qu'elle doit expressément être créée », et il poursuit : « Il y a maintenant trois ans que j'étais parvenu à la fin du traité qui contient toutes ces choses » (AT VI, 59-60 [O III, 430 et 471]).

"... je ne vous promets pas de mettre ici des démonstrations exactes de toutes les choses que je dirai, ce sera assez que je vous ouvre le chemin par lequel vous les pourrez trouver de vous-même, quand vous prendrez la peine de les chercher. (...) Et pour faire ici un tableau qui vous agrée, il est besoin que j'y emploie de l'ombre aussi bien que des couleurs claires. Si bien que je me contenterai de poursuivre la description que j'ai commencée, comme n'ayant autre dessein que de vous raconter une fable." (AT XI, 48).

Dans le *Discours de la méthode*, en se référant au *Monde*: " ... pour ombrager un peu toutes ces choses, et pouvoir dire plus librement ce que j'en jugeais, sans être obligé de suivre ni de réfuter les opinions qui sont reçues entre les doctes, je me résolus de laisser tout ce monde ici à leurs disputes, et de parler seulement de ce qui arriverait dans un nouveau, si Dieu créait maintenant quelque part, dans les espaces imaginaires, assez de matière pour le composer, et qu'il agitât diversement et sans ordre les diverses parties de cette matière, en sorte qu'il en composât un chaos aussi confus que les poètes en puissent feindre, et que, par après, il ne fît autre chose que prêter son concours ordinaire à la nature, et la laisser agir suivant les lois qu'il a établies » (AT VI, 43).

Dans la lettre à Mersenne du 15 avril 1630, après avoir exposé sa théorie de la création des vérités éternelles, Descartes écrit:

"J'espère écrire ceci, même avant qu'il soit 15 jours, dans ma *Physique*;" (AT I, 146; O VIII 1, 73; B 30); on trouve un écho de ces pensées à la fine du chapitre VI et dans le chapitre VII: "Si j'y mettais la moindre chose qui fût obscure, il se pourrait faire que parmi cette obscurité il y aurait quelque répugnance (**) cachée dont je ne me serais pas aperçu, et ainsi que, sans y penser, je supposerais une chose impossible; au lieu que, pouvant distinctement imaginer tout ce que j'y mets, il est certain qu'encore qu'il n'y eût rien de tel dans l'ancien monde, Dieu le peut toutefois créer dans un nouveau, car il est certain qu'il peut créer toutes les choses que nous pouvons imaginer.

(...)

Et il est facile à croire que Dieu, qui comme chacun doit savoir est immuable, agit toujours de même façon. Mais, sans m'engager plus avant dans ces considérations métaphysiques, je mettrai ici deux ou trois des principales règles suivant lesquelles il faut penser que Dieu fait agir la nature de ce nouveau monde et qui suffiront, comme je crois, pour faire connaître toutes les autres." (AT XII, 36-38).

(**) *Au XVIIe siècle, répugnance signifie déjà dégoût, mais aussi contrariété, opposition et contradiction, et c'est le sens qu'il faut ici retenir*. (Note de A. Bitbol-Hespériès, *Le Monde, l'Homme*, cit., p. 24).

Le Chapitre VII donne la définition de Nature : "Sachez donc, premièrement, que par la Nature je n'entends point ici quelque Déesse, ou quelque autre sorte de puissance imaginaire, mais que je me sers de ce mot pour signifier la Matière même en tant que je la considère avec toutes les qualités que je lui ai attribuées comprises toutes ensemble, et sous cette condition que Dieu continue de la conserver en la même façon qu'il l'a créée. Car de cela seul qu'il continue ainsi de la conserver, il suit de nécessité qu'il doit y avoir plusieurs changements en ses parties, lesquels ne pouvant, ce me semble, être proprement attribués à l'action de Dieu, parce qu'elle ne change point, je les attribue à la Nature ; et les règles suivant lesquelles se font ces changements, je les nomme les lois de la Nature." (AT XI, 36-37).

La "fable" du *Monde*.

C'est dans la lettre à Mersenne du 25 novembre 1630 que Descartes use pour la première fois cette expression : "Et je ne pense pas après ceci me résoudre jamais plus de faire rien imprimer, au moins moi vivant : car la fable de mon *Monde* (10) me plaît trop pour manquer à la parachever". (AT I, 179; O VIII 1, 83; B 36).

(10 Voir à Mersenne, 13 novembre 1629 (AT I, 70; [O VIII 1, 33] B 23).

Au terme du chapitre V et au débout du Chapitre VI Descartes écrit : "Il me reste ici encore beaucoup d'autres choses à expliquer, et je serais même bien aise d'y ajouter quelques raisons pour rendre mes opinions plus vraisemblables. Mais afin que la longueur de ce discours vous soit moins ennuyeuse, j'en veux envelopper une partie dans l'invention d'une fable, au travers de laquelle j'espère que la vérité ne laissera de paraître suffisamment, et qu'elle ne sera pas moins agréable à voir que si je l'exposais toute nue.

Chapitre VI

Permettez donc pour un peu de temps à votre pensée de sortir hors de ce monde pour en venir voir un autre tout nouveau que je ferai naître en sa présence dans les espaces imaginaires (*). Les Philosophes nous disent que ces espaces sont infinis, et ils doivent bien en être crus puisque ce sont eux-mêmes qui les ont faits. Mais afin que cette infinité ne nous empêche et ne nous embarrasse point, ne tâchons pas d'aller jusqu'au bout ; entrons-y seulement si avant que nous puissions perdre de vue toutes les créatures que Dieu fit il y a cinq ou six mille ans, et après nous être arrêtés là en quelque lieu déterminé, supposons que Dieu crée de nouveau tout autour de nous tant de matière que, de quelque côté que notre imagination se puisse étendre, elle n'y aperçoive plus aucun lieu qui soit vide." (AT XI, 31-32).

(*) ...*espaces imaginaires*... "dans la philosophie scolastique, où le monde est considéré comme fini, les espaces fictifs que l'imagination seule conçoit au-delà des limites du monde et de l'espace réels. Cf. *Index scolastico-cartésien*, pp. 96-97."

(Etienne Gilson, *Discours de la méthode. Texte et commentaire*, Paris: Vrin, 1925, p. 383); voir aussi Francisco Suárez, *Disputationes metaphysicae*, XXX, 7, 28: "extra hunc autem mundum nihil est, nam spatium imaginarium non est, sed imaginatione fingitur (au-delà de ce monde, il n'y a rien; car l'espace imaginaire n'existe pas, mais est forgé par l'imagination)."; voir aussi *Disputationes metaphysicae*, LI, *De "ubi"*, passim.

"... je vous prie me mander s'il n'y a rien de déterminé en la religion, touchant l'étendue des choses créées, savoir si elle est finie ou plutôt infinie, et qu'en tous ces pays qu'on appelle les espaces imaginaires il y ait des corps créés et véritables ; car encore que je n'eusse pas envie de toucher cette question, je crois toutefois que je serai contraint de la prouver." (lettre à Mersenne du 18 décembre 1629, AT I, 86; O VIII 1, 41; B 25).

Descartes a renoncé à la publication après la condamnation de Galilée (cfr. la lettre à Mersenne 28 novembre 1633: "Mais comme je ne voudrais pour rien au monde qu'il sortît de moi un discours, où il se trouvât le moindre mot qui fut désapprouvé de l'Eglise, aussi aimé-je mieux le supprimer, que de le faire paraître estropié. (10)" (AT I, 270-271; O VIII 1, 108; B 60).

(10) Rapprocher du récit de la sixième partie du *Discours* (dont la rédaction se poursuivit jusqu'en mars 1636, AT VI, 60 l. 4-61 l. 2 [O III, 121]) Il est peu crédible de mettre en doute la sincérité de Descartes : le protestant Claude Saumaise écrivait le 7 mars 1638 à l'abbé Ismaël Bouillard à propos du *Monde* que si Descartes « était moins bon catholique, il nous l'aurait déjà donné, mais il craint de publier une opinion qui n'est pas approuvée à Rome » (ce qui, de surcroît, aurait été contre-productif pour l'adoption de son système en France et chez les jésuites), texte inédit cité par Henk J. M. Nellen, « Ismaël Boulliaud (1605-1694) : astronome, épistolier, nouvelliste et intermédiaire scientifique; ses rapports avec les milieux du libertinage érudit », in *Études de l'Institut Pierre Bayle, Nimègue*, 24, APA-Holland University Press, 1994, p. 70.

"Pendant l'été 1634, Descartes écrit à Beeckman au sujet de la propagation de la lumière. Aucune lettre connue de Descartes

ne date du début de l'année 1635. Mais le 16 avril 1635, Descartes écrit à Golius qu'il a lu à M. de Zuilichem, c'est-à-dire à Constantin Huygens qu'il vient de rencontrer, « une partie de sa *Dioptrique* (282) ». En mai, il réfléchit à «la cause de la lumière (283) » et évoque les couronnes et les parhélies. Puis, dans les mois qui suivent, il écrit que, « depuis la condamnation de Galilée », il a « entièrement séparé de son *Monde* le traité sur "les lunettes" », et qu'il l'a « revu et entièrement achevé ». Il se « propose de le faire imprimer seul dans peu de temps ». Il ajoute également qu'il « juge maintenant hors de saison» de « faire voir son *Monde* avec le mouvement défendu » (284).

Ces indications sont très précieuses parce qu'elles montrent d'une part que Descartes abandonne l'idée de publier *Le Monde*, et d'autre part qu'il se consacre maintenant à *La Dioptrique*, en vue de sa publication. De sorte que la composition de *La Dioptrique* a alors évolué, et qu'elle s'est notamment augmentée d'un approfondissement des réflexions inaugurales du *Monde* sur la lumière, mais plus encore des analyses du chapitre XVIII du *Monde* consacré à *L'Homme*. En effet, les références directes à *La Dioptrique* figurant dans *Le Monde* incluant *L'Homme* permettent de voir quel en était le noyau initial. Ainsi, *Le Monde* renvoie directement à *La Dioptrique* pour l'explication de la réflexion et de la réfraction (285), qui se trouve au discours second de l'*Essai* de 1637. *L'Homme* se réfère explicitement à *La Dioptrique* au sujet de la taille des verres (objet de la réflexion de Descartes depuis 1629), parce que la figure du cristallin ressemble à celle d'un verre hyperbolique (286), dont les particularités sont exposées au discours huitième de l'*Essai* de 1637.

L'Homme cite à nouveau *La Dioptrique* en ce qui concerne le mécanisme de la vision (287), exposé dans les discours troisième et sixième de l'*Essai* de 1637."

(282) AT 1, 314. [O VIII 1; 647; B 71]

(283) AT I, 318. [O VIII 1; 648; B 74]

(284) AT I, 322. [O VIII 1; 121; B 75] Lettre datée de l'automne 1635 dans AT et de juin ou juillet 1635 dans Alquié, et probablement adressée à Mersenne.

(286) AT XI, 153, 156.

(287) AT XI, 187.

Introduction de Annie Bitbol-Hespériès à R. Descartes, *Le Monde, l'Homme*, Paris: Seuil, 1996, pp. XXXV.

"Pour les lunettes, je vous dirai que depuis la condamnation de Galilée (4), j'ai revu et entièrement achevé le Traité que j'en avais autrefois commencé (5) ; et l'ayant entièrement séparé de mon *Monde*, je me propose de le faire imprimer seul dans peu de temps (6). Toutefois parce qu'il s'écoulera peut-être encore plus d'un an, avant qu'on le puisse voir imprimé, si M. N. (7) y désirait travailler avant ce temps-là, je le tiendrais à faveur, et je m'offre de faire transcrire tout ce que j'ai mis touchant la pratique, et de lui envoyer quand il lui plaira." (lettre à Mersenne (?) mars 1635 ?, AT I, 322; O VIII 1, 121; B 75)

(4) Descartes est souvent revenu dans ses lettres à Mersenne sur la condamnation de Galilée (1633) : fin novembre 1633 (AT I, 270-273, [O VIII 1, 107-109;] B 60); février 1634 (AT I, 281-282, [O VIII, 1; 109-110] B63); 15 mai 1634 (AT I, 298-299, [O VIII 1, 114-118] B 66).

(5) La rédaction de la *Dioptrique*, dont Descartes a souvent entretenu Mersenne (25 novembre 1630, AT I 182 1. 13 sq., [O VIII 1, 82-85] B36; juin 1632, AT I, 254 l. 3 sq., [O VIII 1, 102-104] B 55).

(6) En effet, Descartes écrit à Golius le 16 avril 1635 : « Monsieur de Zuyleichem [Huygens], que j'ai eu l'honneur de voir ces jours à Amsterdam, après avoir eu la patience d'ouïr lire une partie de ma *Dioptrique*... » et envoie à Huygens une copie du texte le 25 avril 1635 (AT I, 585-586; [O VIII 2, 13-14] B 72).

(7) Cl-Inst : de Beaune (suivi par AT ? et AM ?); CM V 125 n. 5 suggère Mydorge, « plutôt que Ferrier, à qui Descartes avait déjà donné ses instructions depuis longtemps ».

8. ———. 1629 (octobre) - 1633. *L'Homme*.

AT XI, 119-215; B Op. II, 362-507. Ce traité est le XVIIIe Chapitre du *Monde*.

Premières publications :

1) Traduction latine de Florent Schuyl : *Renatus Des Cartes De Homine, figuris et latinitate donatus a Florentio Schuyl*, Leyden: P. Leffen & F. Moyardum. 1662.

2) Édition du texte original : Clerselier 1677, pp. 1-98.

Édition critique : *Le Monde, l'Homme*, Introduction de Annie Bitbol-Hespériès; textes établis et annotés par Annie Bitbol-Hespériès et Jean-Pierre Verdet, Paris: Seuil, 1996.

Dans une lettre à Mersenne du 18 décembre 1629 Descartes écrit : "je veux commencer à étudier l'anatomie. (44)" (AT I, 102; O VIII 1, 49; B 25).

(44) Première mention des études d'anatomie de Descartes : on retrouve ce souci dans à Mersenne, 15 avril 1630 (AT I, 137 l. 5-6 [O VIII 1, 68; B 30]), 20 février 1639 (AT II, 525 l. 14-18 [O VIII 1, 326; B 204]) et 13 novembre 1639 (AT II, 621 l. 3-15 [O VIII 1, 351; B 224]); Descartes en parle aussi au médecin Plempius le 15 février 1638 (AT I, 523, l. 1-3 [O VIII 1, 407; B 146]) ; voir aussi le *Traité de l'Homme* (AT XI 120 l. 25-121 l. 9) et le *Discours* (AT VI, 47 l. 1-8 [O III, 112]).

"Le plan suivi dans le *Traité de l'Homme*.

Ce traité, qui est une description systématique de la machine qu'est le corps, est très construit, de manière concertée et révélatrice d'une hiérarchie et du constant souci de totalité de Descartes. Car, encore que toute cette machine soit régie, en toutes ses fonctions, par les mêmes principes issus de la mécanique la plus élémentaire, Descartes ne laisse pas de suivre un ordre qui reproduit, dans le microcosme du corps, la

structure générale de l'exposé qu'il utilise pour décrire le macrocosme du monde.

Mais d'abord, les données : le plan du *Traité de l'Homme* est le suivant.

En un premier temps, c'est le cours du sang qui guide le développement, depuis son origine jusqu'à sa métamorphose en une autre substance :

— la digestion des viandes, le circuit des aliments, le foie, le sang ;

— la respiration ;

— la circulation du sang ;

— la croissance ;

— la raréfaction du sang, origine des esprits animaux.

La deuxième partie du développement suit maintenant le cours des esprits animaux, ce qui conduit Descartes à décrire les systèmes nerveux, moteur et sensible :

— le système nerveux, moteur, les nerfs-tuyaux et les muscles ;

— le système nerveux sensible, les nerfs-filets ;

— le mécanisme des sentiments intérieurs (faim, soif, etc.) ;

— les esprits animaux et les passions.

Enfin, une dernière parties2 est centrée sur les fonctions du cerveau:

— les fonctions de la veille (imagination, mémoire, etc.) ;

— les fonctions du sommeil (les songes).

La conclusion insiste sur l'identité entre cette machine créée par la nature et celle issue de l'industrie humaine (horloge)."

Pierre-Alan Cahné, *Un autre Descartes. Le philosophe et son langage*, Paris: Vrin, 1980, pp. 259.

"Les notes de cette édition du traité de *L'Homme* montrent les points de rencontre nombreux entre le chapitre XVIII du

Monde et *La Dioptrique*. La convergence de ces textes ne doit d'ailleurs aucunement surprendre, puisque, nous l'avons vu, ils ont été élaborés dans les mêmes années. Mais, à plusieurs reprises, des phrases identiques se retrouvent d'un texte à l'autre, ce qui laisse penser qu'après la condamnation de Galilée Descartes a inséré dans *La Dioptrique* plusieurs passages du traité de *L'Homme* consacrés à l'explication du sens de la vue. Ce qui est intéressant à remarquer, c'est que l'esprit qui anime Descartes n'a pas changé entre le début de la rédaction de *L'Homme* et de *La Dioptrique*, et le remaniement du texte de *La Dioptrique* à partir de 1635, en vue de sa publication." *Introduction* de Annie Bitbol-Hespériès à René Descartes, *Le Monde, l'Homme*, Paris: Seuil, 1996, pp. XXXV-XXXVI.

9. ———. 1630. *[La théorie de la création des vérités éternelles]*.

La théorie de la création des vérités éternelles comme fondement métaphysique de la physique.

Cette théorie est formulée pour la première fois dans une lettre à Mersenne : le débat commence le 15 avril 1630, en posant comme thème, en réponse à des lettres perdues de Mersenne, "les vérités mathématiques que vous appelez éternelles". La même année, le philosophe en discute aussi bien avec lui dans deux autres lettres, qu'avec Beeckman dans une lettre du 17 octobre de la même année. Le débat se prolonge jusqu'en 1649 : il est présent dans la correspondance avec Arnauld, dans la lettre à Mersenne du 27 mai 1638 et, surtout, dans celle à Mesland du 2 juin 1644. On peut considérer que le débat se termine le 5 février 1649 avec la discussion entamée avec More sur les vérités contradictoires. Dans les œuvres imprimées, la théorie ne sera publiée que dans les *Responsiones* (AT VII, 380 et 435-436). Vagues allusions dans le *Discours de la méthode*,

V (AT VI 41 ll. 12-13 [O III, 108]) et dans les *Principia philosophiae* (I, §§ 22 et 24; AT VIII-1, 13-14).

10. ———. 1630-31 (?). *La recherche de la vérité par la lumière naturelle*.

    AT X, 495-527; B Op. II, 826-871; CO 249-341; dialogue (incomplet) écrit en français, dont l'original est perdu.

    Les sources existant sont :

    1) une copie (partielle) en français, conservée à Hanovre (H) faite par Ehrenfried Walther von Tschirnhaus (1651 - 1708) sur le manuscrit en possession de Clerselier, datée 16 novembre 1676 et envoyée à Leibniz en février 1677 (AT X pp. 495-514).

    2) la traduction néerlandaise complète (N): Amsterdam 1684.

    3) la traduction latine complète (A): *Inquisitio veritatis per lumen naturale*, in *Opuscola posthuma, physica et mathematica,* Amsterdam 1701, pp. 67-90 (AT X, 514-527).

    CO donne le texte française pour la partie existante, la traduction latine et le texte néerlandaise avec la première traduction française de cette version (par Corinna Vermeulen).

    Édition critique : René Descartes, *La Recherche de la vérité par la lumière naturelle*, sous la direction de Ettore Lojacono, textes établis par Erik Jan Bos, lemmatisation et concordances du texte français par Franco A. Meschini, index et concordances du texte latin et néerlandais par Francesco Saita, Milano: Franco Angeli, 2002, avec un essai de Ettore Lojacono. Pour une interprétation et une datation de *La Recherche de la vérité par la lumière naturelle de René Descartes*, (pp. VII-XL) et une note "La présente édition", par Erik-Jan Bos (pp. XLI-LXV).

    Ettore Lojacono donne un bilan complet des débats consacrés à la datation du texte (pp. 161-201).

    Traductions :

    La recherche de la vérité par la lumière naturelle, Introduction, Appendices, Notice biographique et bibliographique par Ettore Lojacono, Introduction et

commentaire historique et conceptuel, textes revus par Massimilano Savini, Paris: Presses universitaires de France, 2009.

La recherche de la vérité par la lumière naturelle, traduction et notes par Emmanuel Faye, Paris: Librairie Générale Française, (Le Livre de Poche), 2010.

"La première édition de la *Recherche de la vérité* fut publiée à Amsterdam, en 1684, dans une traduction néerlandaise. Sous le titre de *Onderzoek der waarheit door 't naturelijk licht* (N) le texte fut ajouté, avec une traduction des *Regulae*, à l'édition néerlandaise du vol. III de la *Correspondance* de Descartes, telle qu'elle avait été publiée par Clerselier. Enfin, dans le même volume on trouve une traduction du *Traité de la lumière* ou *Le Monde*. Le traducteur de la *Correspondance* et du *Monde* était J. H. Glazemaker. L'identité du ou des traducteurs de la *Recherche* et des *Regulae* est inconnue. Rieuwertsz avait commencé l'impression de la correspondance en l'automne de 1682. Elle était achevée au printemps de 1684." (*La Recherche de la vérité par la lumière naturelle,* "La présente édition", p. LIV).

"La version latine de la *Recherche*, *Inquisitio veritatis per lumen naturale* (A), due à un traducteur inconnu, fut publiée en 1701 dans le recueil des *Opuscula posthuma*, qui constituent le vol. IX (le dernier) des *Opera omnia de Descartes*, commencés en 1692 par une « Société de libraires ». Dans cette édition, A couvre 23 pages, la première de 28 lignes la dernière de 27, les autres de 38. Au sein des *Opuscula posthuma* A forme une unité typographique propre, avec sa propre pagination et sa propre page de titre : *Regulae ad directionem ingenii, ut et Inquisitio veritatis per lumen naturale* : *Regulae*, pp. 1-66; *Inquisitio veritatis*, pp. 67-90). Dans la *Préface* on ne trouve aucune indication sur la provenance des copies. En fait, l'éditeur anonyme s'est acquitté de sa tâche en donnant simplement quelques citations de Baillet." (*La Recherche de la vérité par la lumière naturelle,* "La présente édition", p. LVI).

"Dans la présente édition on trouve le texte intégral des trois sources, H, N et A. Le texte de H, comme source principale du

texte français, a été imprimé avant les autres. Il a été établi sur la base d'un collationnement du texte imprimé dans G. W. Leibniz, *Sämtliche Schriften und Briefe,* Zweiter Band : 1676-1679, Berlin, 1987 avec des photocopies de H. Enfin, on a collationné ce texte avec l'original de Hanovre. Dans l'édition de H pour une certaine mesure (voir § 3.1) le texte a été normalisé et en plusieurs passages on a préféré la leçon de N et A à celle de H (voir § 3.2). Pour N et A les textes de base ont été les exemplaires de la Bibliothèque universitaire d'Utrecht, collationnés avec quatre autres exemplaires (voir §§ 2.2 et 2.3). Pour l'édition de N et de A nous avons suivi les critères présentés ci-dessous. Pour faciliter une étude comparative de ces textes ils sont imprimés l'un en regard de l'autre." (*La Recherche de la vérité par la lumière naturelle,* "La présente édition", p. LIX).

Voir aussi: Siegrid Agostini, "2002-1013 : une décennie d'édition de *La Recherche de la vérité par la lumière naturelle*", *Bulletin cartésien* XLIII, *Archives de philosophie*, 77, 2014, p. 163-170.

11. ———. 1637. *Discours de la méthode. Pour bien conduire sa raison, et chercher la vérité dans les sciences. Plus la Dioptrique. Les Météores. Et la Géométrie. Qui sont des essais de cette Méthode*. Leyde: Imprimerie Ian Maire.

    AT VI, 1-515; B Op. I, 24-653; O III, 81-508.

    Avertissement V; *Frontispice des Essais* XIII; *Discours de la méthode* 1; *La Dioptrique* 79; *Les Météores* 229; *La Géométrie* 367; *Avertissement* 486; *Tables des principales difficultés qui sont expliquées dans La Dioptrique* 487; *Tables des principales difficultés qui sont expliquées aux Météores* 498; *Table des matières de la Géométrie* 511; *Privilège* 515.

    Première édition anonyme : 8 juin 1637 (réimpression anastatique Lecce: Conte Editore, 1987).

    Discours de la méthode : AT VI, 1-78.

    Date de composition : hiver 1635-36 - printemps 1637 (sur la chronologie de l'œuvre voir les études de Gilbert Gadoffre,

Láscaris Comneno, Elie Denissoff et Edwin Curley, dans ma bibliographie sur les sources de la pensée de Descartes).

Après avoir renoncé à publier *Le monde*, Descartes entreprend en 1635 un nouveau projet, qui sera terminé en mars 1637 et aboutira dans la publication du *Discours* : "Pour le traité de physique dont vous me faites la faveur de me demander la publication (5), je n'aurais pas été si imprudent que d'en parler en la façon que j'ai fait, si je n'avais envie de le mettre au jour, en cas que le monde le désire, et que j'y trouve mon compte et mes sûretés. Mais je veux bien vous dire, que tout le dessein de ce que je fais imprimer à cette fois, n'est que de lui préparer le chemin, et sonder le gué. Je propose à cet effet une méthode générale (6), laquelle véritablement je n'enseigne pas, mais je tâche d'en donner des preuves par les trois traités suivants (7), que je joins au discours où j'en parle, ayant pour le premier un sujet mêlé de philosophie et de mathématique (8), pour le second, un tout pur de philosophie (9); et pour le 3e, un tout pur de mathématique (10), dans lesquels je puis dire que je ne me suis abstenu de parler d'aucune chose, (au moins de celles qui peuvent être connues par la force du raisonnement), parce que j'ai cru ne la pas savoir; en sorte qu'il me semble par là donner occasion de juger que j'use d'une méthode par laquelle je pourrais expliquer aussi bien toute autre matière, en cas que j'eusse les expériences qui y seraient nécessaires, et le temps pour les considérer. Outre que pour montrer que cette méthode s'étend à tout, j'ai inséré brièvement quelque chose de métaphysique, de physique et de médecine dans le premier discours (11). Que si je puis faire avoir au monde cette opinion de ma méthode, je croirai alors n'avoir plus tant de sujet de craindre que les principes de ma physique soient mal reçus; et si je ne rencontrais que des juges aussi favorables que vous, je ne le craindrais pas dès maintenant." (lettre à [Germain Habert, abbé de Cérisy], [avril ?] 1637, AT I 370-371; O VIII 2, 833; B109).

(6) Seule occurrence du syntagme « méthode générale » dans le corpus cartésien.

(7) Les trois *Essais* (*Dioptrique, Météores, Géométrie*).

(8) La *Dioptrique*.

(9) Les *Météores* (rappelons que « philosophie » signifie « philosophie naturelle », c'est-à-dire ce que nous appelons la « physique »).

(10) La *Géométrie*.

(11) Dans les 4e et 5e parties du *Discours* (AT VI, 31-60 [O III, 102-121]).

En 1636 Descartes, qui se trouve à Leyde, confie l'impression du livre à Mersenne : "Il y a environ cinq semaines que j'ai reçu vos dernières du dix-huit janvier, et je n'avais reçu les précédentes que quatre ou cinq jours auparavant. Ce qui m'a fait différer de vous faire réponse, a été que j'espérais de vous mander bientôt que j'étais occupé à faire imprimer. Car je suis venu à ce dessein en cette ville (2); mais les [Elzevier (3)] qui témoignaient auparavant avoir fort envie d'être mes libraires, s'imaginant, je crois, que je ne leur échapperais pas lorsqu'ils m'ont vu ici, ont eu envie de se faire prier, ce qui est cause que j'ai résolu de me passer d'eux (4); et quoique je puisse trouver ici assez d'autres libraires, toutefois je ne résoudrai rien avec aucun, que je n'aie reçu de vos nouvelles, pourvu que je ne tarde point trop à en recevoir. Et si vous jugez que mes écrits puissent être imprimés à Paris plus commodément qu'ici, et qu'il vous plût d'en prendre le soin, comme vous m'avez obligé autrefois de m'offrir (5), je vous les pourrais envoyer incontinent après la vôtre reçue. (...) Et afin que vous sachiez ce que j'ai envie de faire imprimer, il y aura quatre *Traités* tous français, et le titre en général sera: *Le Projet d'une Science universelle qui puisse élever notre nature à son plus haut degré de perfection. Plus la Dioptrique, les Météores, et la Géométrie ; où les plus curieuses Matières que l'Auteur ait pu choisir, pour rendre preuve de la Science universelle qu'il propose, sont expliquées en telle sorte, que ceux mêmes qui n'ont point étudié les peuvent entendre*. En ce *Projet* je découvre une partie de ma *Méthode*, je tâche à démontrer l'existence de Dieu et de l'âme séparée du corps, et j'y ajoute plusieurs autres choses qui ne seront pas, je crois, désagréables

au lecteur." (lettre à Mersenne du mars 1636 AT I, 338-339; O VIII 1, 135; B 83).

Le 1 avril 1636 Descartes donne à lire son manuscrit à Constantin Huygens : "Je ne manquerai de me trouver demain à votre logis incontinent après votre dîner, puisqu'il vous plaît me faire la faveur de me le permettre (2); et je porterai avec moi tous ceux de mes papiers qui seront assez au net pour les pouvoir lire, afin que vous en puissiez choisir ceux dont la lecture vous sera le moins ennuyeuse, et que j'aie le bonheur de savoir au vrai le jugement que vous en ferez." (lettre à Huygens du 31 mars 1636 AT I, 605; O VIII 2, 21; B 86).

Dans le contrat d'édition avec l'imprimeur Jean Maire (Leyde, 2 décembre 1636) le titre change : "le dit DES CARTES mettra entre les mains du dit LE MAIRE toute la copie d'un livre intitulé: *La méthode etc. plus la Dioptrique, les Météores et la Géométrie"* (le contrat est publié dans Gustave Cohen, *Écrivains français en Hollande dans la première moitié du XVIIe siècle*, Paris: Champion, 1920, pp. 503-504).

L'expression "Discours de la méthode" fait sa parution dans deux lettres à Huygens et à Mersenne:

Lettre à C. Huygens du 25 février 1637: "Monsieur Golius m'avertit dernièrement de votre part que vous jugiez le mot de "discours" superflu en mon titre, et c'est l'un des sujets de remerciement que j'ai à vous faire. Mais je m'excuse sur ce que je n'ai pas eu dessein d'expliquer toute la méthode mais seulement d'en dire quelque chose, et que je n'aime pas à promettre plus que je ne donne, c'est pourquoi j'ai mis « *Discours de la Méthode* »; au lieu que j'ai mis simplement «la *Dioptrique*» et «les *Météores*», parce que j'ai tâché d'y comprendre tout ce qui faisait (6) à mon sujet. Que si cette raison ne vous contente et que vous m'obligiez de m'en faire savoir votre jugement, je le suivrai comme une loi inviolable. Il me semble aussi que je dois ôter toute la glose que j'avais mise à la fin (7) et laisser seulement ces mots « *Discours de la Méthode* etc. plus la *Dioptrique*, les *Météores* et la *Géométrie* qui sont des essais de cette méthode »." (AT I, 620-621; O VIII 2, 26; B 104).

(6) « Faire à » : convenir.

(7) Descartes avait proposé à Mersenne en mars 1636 le titre [déjà cité : *Le Projet d'une Science universelle,* etc.]

Lettre à Mersenne du 20 avril 1637: "Mais je n'ai su bien entendre ce que vous objectez touchant le titre; car je ne mets pas *Traité de la Méthode,* mais *Discours de la Méthode*, ce qui est le même que *Préface ou Avis touchant la Méthode*, pour montrer que je n'ai pas dessein de l'enseigner, mais seulement d'en parler. Car comme on peut voir de ce que j'en dis, elle consiste plus en pratique qu'en théorie, et je nomme les traités suivants des *Essais de cette Méthode*, parce que je prétends que les choses qu'ils contiennent n'ont pu être trouvées sans elle, et qu'on peut connaître par eux ce qu'elle vaut : comme aussi j'ai inséré quelque chose de métaphysique, de physique, et de médecine dans le premier discours, pour montrer qu'elle s'étend à toutes sortes de matières." (AT I, 349; O VIII 1, 139; B 83).

Le titre définitif ressemble à une œuvre de Jacopo Aconcio (1492 - 1567), *De Methodo, hoc est de recta investigandarum tradendarumque artium ac scientiarum ratione,* Basilée 1558, réimprimé en 1617 à Leyde par le même éditeur du *Discours*, mais une influence directe n'est pas démontrée.

Dans cette œuvre Descartes réutilise des écrits précédents :

La *Première partie* du *Discours* (AT VI, 1-11 [O III, 81-87]) reprend le projet d'une *Histoire de mon esprit* dont parle Guez de Balzac dans la lettre à Descartes du 30 mars 1628: "Au reste, Monsieur, souvenez-vous, s'il vous plaît, de l'*Histoire de Votre Esprit*. Elle est attendue de tous nos amis, et vous me l'avez promise en présence du Père Clitophon, qu'on appelle en langue vulgaire Monsieur de Gersan. Il y aura plaisir à lire vos diverses aventures dans la moyenne et dans la plus haute région de l'air ; à considérer vos prouesses contre les Géants de l'École, le chemin que vous avez tenu, le progrès que vous avez fait dans la vérité des choses, etc." (AT I 570; B 15).

La *Deuxième partie* (AT VI, 11-22 [O III, 88-95]) est une adaptation et une rectification des certain thèmes des *Règles*

pour la direction de l'esprit: "Pendant les dix années qui s'écoulèrent entre les deux , Descartes a très sensiblement modifié ses vues méthodologiques: les *Regulae* proposaient une mathématique universelle qui assimilait à des segments de droite — soit à une dimension spatiale — tout ce qui est susceptible de mesure, alors que la *Géométrie* achemine le lecteur vers une notion de mathématiques pures, vers une « géométrie qui est avant tout une algèbre ». Un pas décisif a été franchi, et Léon Brunschvicg (*) montre sans peine que le deuxième chapitre du *Discours* s'en trouve par là même éclairé : certains développements sont si étroitement liés qu'ils ne s'expliquent que l'un par l'autre. De même que la sixième partie est une introduction à la Dioptrique et aux Météores, la deuxième est une introduction à la Géométrie." (Gilbert Gadoffre, *La chronologie des six parties*, in : Nicolas Grimaldi et Jean-Luc Marion (éds.), *Le Discours et sa méthode*, Paris: Presses universitaires de France, 1987, p. 21.)

(*) Léon Brunschvicg, *Mathématiques et métaphysique chez Descartes*, Revue de Métaphysique et de Morale, juillet 1937, [pp. 277-324; repris dans: L. Brunschvicg, *Écrits philosophiques*, tome I, Paris, Presses Universitaires de France, 1951, pp. 11-54].

La *Troisième partie* (AT VI 22-31 [O III, 96-101]) contient la morale provisoire; sur les raison de cette inclusion, voir la lettre à Henricus Reneri pour Alphonse de Pollot d'avril ou mai 1638 : "Au reste j'ai été obligé de parler de cette résolution et fermeté touchant les actions, tant à cause qu'elle est nécessaire pour le repos de la conscience, que pour empêcher qu'on ne me blâmât de ce que j'avais écrit que, pour éviter la prévention, il faut une fois en sa vie se défaire de toutes les opinions qu'on a reçues auparavant en sa créance : car apparemment on m'eût objecté que ce doute si universel peut produire une grande irrésolution et un grand dérèglement dans les mœurs. De façon qu'il ne me semble pas avoir pu user de plus de circonspection que j'ai fait, pour placer la résolution, en tant qu'elle est une vertu, entre les deux vices qui lui sont contraires, à savoir l'indétermination et l'obstination.

Il ne me semble point que ce soit une fiction, mais une vérité, qui ne doit point être niée de personne, qu'il n'y a rien qui soit entièrement en notre pouvoir que nos pensées ; au moins en prenant le mot de pensée comme je fais, pour toutes les opérations de l'âme, en sorte que non seulement les méditations et les volontés, mais même les fonctions de voir, d'ouïr, de se déterminer à un mouvement plutôt qu'à un autre etc., en tant qu'elles dépendent d'elle, sont des pensées. Et il n'y a rien du tout que les choses qui sont comprises sous ce mot, qu'on attribue proprement à l'homme en langue de philosophe : car pour les fonctions qui appartiennent au corps seul, on dit qu'elles se font dans l'homme, et non par l'homme." (AT II, 35-36; O VIII 2, 542; B 164).

Voir aussi l'*Entretien avec Burman* :

"III. Texte 64. AT VI 22, l. 29 [O III, 96] une moral par provision, qui ne consistait qu'en trois ou quatre maximes, DONT JE VEUX BIEN VOUS FAIRE PART (que je veux bien AJOUTER À MON ÉCRIT).

L'auteur n'écrit pas volontiers touchant la morale (6), mais les Régents et autres pédants l'on contraint d'ajouter à son écrit ces règles parce que, autrement, ils prétendraient qu'il n'a ni religion ni foi, et que, par le biais de sa méthode, il veut les renverser (7)." (Burman 144; AT V, 178).

La *Quatrième partie* (AT VI, 31-40 [O III,]102-108) est dédiée à la métaphysique et utilise le *Petit traité de métaphysique* (perdu) de 1629 : "Descartes présente lui-même la Quatrième Partie du *Discours* comme un abrégé par rapport à ce manuscrit latin qui, au contraire, semble être une sorte de première rédaction par rapport aux *Méditations* ou du moins par rapport à celles qui ouvrent l'ouvrage». Ainsi il y avait dans la pensée de Descartes plus que dans son texte lorsqu'il écrivait la Quatrième Partie du *Discours*. Quant à savoir quel est ce « plus », des hypothèses différentes sont permises : ce qui est certain, c'est que, en ce qui concerne l'épreuve critique du commencement, l'évolution de la pensée n'est pas seule en cause." (Henri Gouhier, *La pensée métaphysique de Descartes*, Paris: Vrin, 1962, p. 67).

Cette partie a été ajouté au moment de l'impression : "Il est vrai que j'ai été trop obscur en ce que j'ai écrit de l'existence de Dieu dans ce traité de la *Méthode*, et bien que ce soit la pièce la plus importante, j'avoue que c'est la moins élaborée de tout l'ouvrage ; ce qui vient en partie de ce que je ne me suis résolu de l'y joindre que sur la fin, et lorsque le libraire me pressait. Mais la principale cause de son obscurité vient de ce que je n'ai osé m'étendre sur les raisons des sceptiques, ni dire toutes les choses qui sont nécessaires *ad abducendam mentem a sensibus*: car il n'est pas possible de bien connaître la certitude et l'évidence des raisons qui prouvent l'existence de Dieu selon ma façon, qu'en se souvenant distinctement de celles qui nous font remarquer de l'incertitude en toutes les connaissances que nous avons des choses matérielles; et ces pensées ne m'ont pas semblé être propres à mettre dans un livre, où j'ai voulu que les femmes mêmes pussent entendre quelque chose, et cependant que les plus subtils trouvassent aussi assez de matière pour occuper leur attention. J'avoue aussi que cette obscurité vient en partie, comme vous avez fort bien remarqué, de ce que j'ai supposé que certaines notions, que l'habitude de penser m'a rendu familières et évidentes, le devaient être aussi à un chacun; comme par exemple, que nos idées ne pouvant recevoir leurs formes ni leur être que de quelques objets extérieurs, ou de nous-mêmes, ne peuvent représenter aucune réalité ou perfection, qui ne soit en ces objets, ou bien en nous, et semblables; sur quoi je me suis proposé de donner quelque éclaircissement dans une seconde impression. (8)" (lettre à Antoine Vatier du 22 février 1638, AT I, 560; O VIII 1, 574-575; B 149).

(8) C'est dans les *Méditationes* (1641) que Descartes pourra préciser sa définition des idées.

Descartes était bien conscient des limites de sa première publication sur la métaphysique: "Pour votre seconde objection, à savoir que je n'ai pas expliqué assez au long, d'où je connais que l'âme est une substance distincte du corps, et dont la nature n'est que de penser, qui est la seule chose qui rend obscure la démonstration touchant l'existence de Dieu (3), j'avoue que ce que vous en écrivez est très vrai, et aussi que cela

rend ma démonstration touchant l'existence de Dieu malaisée à entendre. Mais je ne pouvais mieux traiter cette matière, qu'en expliquant amplement la fausseté ou l'incertitude qui se trouve en tous les jugements qui dépendent du sens ou de l'imagination, afin de montrer ensuite quels sont ceux qui ne dépendent que de l'entendement pur, et combien ils sont évidents et certains. Ce que j'ai omis tout à dessein, et par considération, et principalement à cause que j'ai écrit en langue vulgaire, de peur que les esprits faibles venant à embrasser d'abord avidement les doutes et scrupules qu'il m'eût fallu proposer ne pussent après comprendre en même façon les raisons par lesquelles j'eusse tâché de les ôter, et ainsi que je les eusse engagés dans un mauvais pas, sans peut-être les en tirer. Mais il y a environ huit ans que j'ai écrit en latin un commencement de Métaphysique (4), où cela est déduit assez au long, et si l'on fait une version latine de ce livre, comme on s'y prépare, (5) je l'y pourrai faire mettre. Cependant je me persuade que ceux qui prendront bien garde à mes raisons touchant l'existence de Dieu, les trouveront d'autant plus démonstratives, qu'ils mettront plus de peine à en chercher les défauts, et je les prétends plus claires en elles-mêmes qu'aucune des démonstrations des géomètres en sorte qu'elles ne me semblent obscures qu'au regard de ceux qui ne savent pas *abducere mentem a sensibus*, suivant ce que j'ai écrit en la page 38 (6).". (lettre à Mersenne du 20 avril 1637, AT I, 349-350; O VIII 1, 139; B 104).

(4) En 1629 (à Gibieuf, 18 juillet 1629, AT I, 17 l. 7, B17; à Mersenne, 15 avril 1630, AT I, 144 l. 19, B30).

(5) La traduction latine du *Discours* et des *Essais* (sauf la *Géométrie*), œuvre d'Étienne de Courcelles, n'apparut qu'en 1644. CM suggère qu'un projet a pu se constituer dès 1637 avec le jeune Van Schooten, qui publia en 1649 une traduction latine de la *Géométrie*.

(6) AT VI, 37 [O III, 105] (« qu'ils n'élèvent jamais leur esprit au-delà des choses sensibles »). Voir les objections soulevées par Petit (lettre des 17-27 mai 1638, AT II, 144, l. 13-21; [O VIII 1, 187] B 167).

La *Cinquième partie* (AT VI 40-60 [O III, 108-121])est un résumé du *Monde* et de ses études de physiologie, "particulièrement l'explication du mouvement du cœur" (AT VI, 1 [O III, 81]) commencés en 1629 ("je veux commencer à étudier l'anatomie", lettre à Mersenne du 18 décembre 1629, AT I, 102), après la découverte par William Harvey de la circulation du sang (*Exercitatio anatomica de motu cordis et sanguinis in animalibus,* Francfurt 1628), cfr. la référence au "médecin d'Angleterre" (AT VI, 51 [O III, 115]).

"La première mention d'un «médecin», dans la correspondance de Descartes, figure dans la lettre au Père Mersenne du 8 octobre 1629, [AT I, 25; O VIII 1, 30; B 19] où Descartes écrit: «Pour la raréfaction, je suis d'accord avec ce médecin (27), et (28) ai maintenant pris parti touchant tous les fondements de la Philosophie ; mais peut-être que je n'explique pas l'*œther* comme lui. (29)»".

(27) Selon AT (I 30n), il s'agirait du médecin Christophe Villiers (1596-1661/70); mais CM (II 302 n. 2) propose Sébastien Basson, qui introduisit dans une physique corpusculaire l'hypothèse de l'éther pour expliquer les phénomènes de raréfaction et, de façon plus générale, le vide (*Philosophiae naturalis adversus Aristotelem librì XII*, Genève, 1621). Il fut lu par Beeckman (au printemps 1623, Beeckman II 243), et par Merline (*Quaestiones in Genesim*, 1623, col. 1838 ; *Impiété des déistes*, 1624, I, p. 238) ; Descartes le cite (parmi les *novatores*, entre Giordano Bruno (Giulio Cesare Vanini) dans une lettre à Beeckman (lettre du 17 octobre 10, AT I, 158, B 34). Dans les *Regulae* (AT X, 424 l. 13), Descartes envisage au-delà de l'air un éther très pur sur le modèle de Basson. Descartes nie le vide dans le *Monde* (il y travaille à partir de la fin de 1629) et dans ses lettres de février-avril 1630. C'est probablement de lui que Descartes écrit à Huygens : « Il n’est vaillant qu'à détruire les opinions d'Aristote » 8 mars 1636, AT I, 603; [O VIII 2, 20] B 84).

(28) Clerselier Lettres : « ai pris parti là-dessus, comme sur presque tous les fondements de la Physique ».

(29) Clerselier Lettres : « Lorsque j'aurai l'honneur de vous voir, nous aurons moyen de nous en entretenir plus particulièrement », *add.*

La *Sixième partie* (AT VI 40-78 [O III, 121-133]) a été rédigée dans les derniers mois du 1635, comme préface de la *Dioptrique* et des *Météores*.

"Or comme ce n'est pas des racines, ni du tronc des arbres, qu'on cueille les fruits, mais seulement des extrémités de leurs branches, ainsi la principale utilité de la Philosophie dépend de celles de ses parties qu'on ne peut apprendre que les dernières. Mais, bien que je les ignore presque toutes, le zèle que j'ai toujours eu pour tâcher de rendre service au public est cause que je fis imprimer, il y a dix ou douze ans, quelques essais des choses qu'il me semblait avoir apprises. La première partie de ces essais fut un *Discours touchant la Méthode pour bien conduire sa raison et chercher la vérité dans les sciences*, où je mis sommairement les principales règles de la Logique et d'une Morale imparfaite, qu'on peut suivre par provision pendant qu'on n'en sait point encore de meilleure. Les autres parties furent trois traités : l'un de la *Dioptrique*, l'autre des *Météores*, et le dernier de la *Géométrie*." *Lettre-Préface* aux *Principes de philosophie* (AT IX-2, 15).

12. ———. 1637. *La Dioptrique*.

AT VI, 81-226; B Op. I, 118-311; O III, 148-262.

La *Dioptrique* est le premier essai composé par Descartes : les premières notes sur l'optique et la réfraction sont dans les *Cogitationes privatae* de 1619-20 (AT X, 242-247); en 1632 Descartes écrit à Golius "je fis tailler un verre, il y a cinq ans" lettre du 2 février 1632 (AT I, 239, note; O VIII 1, 1023, n. 36; B 50) ; la composition de la *Dioptrique* pourrait donc être initiée en 1628. (Sur les relations de *La Dioptrique* avec *Le Monde* et *L'Homme* voir les notes à ces textes).

Dans le XVII siècle avec le terme *Dioptrique* était utilisé pour la théorie de la réfraction: "La troisième [partie de l'Optique] enseigne comment nous voyons par rayons qui sont rompus, comme quand nous regardons un bâton qui est partie dans

l'eau, partie dans l'air et se nomme *Dioptrique*, ou *Mesoptrique*, parce qu'elle considère la façon par laquelle les rayons passent par les milieux divers, comme quand il traversent l'air, l'eau, et le verre en même instant: on pourrait ainsi nommer cette partie *Anaclastique*, ou *Diaclastique*. L'art de la peinture dépend de ces 3 parties." Marin Mersenne, *La Vérité des sciences contre les Septiques* [sic] *ou Pyrrhoniens,* Paris: 1625, pp. 229-230 (édition moderne: *La Vérité des sciences contre les Sceptiques ou Pyrrhoniens*. Édition et annotation par Dominique Descotes, Paris: Champion, 2003.

Descartes la cite dans une lettre à Mersenne du 25 novembre 1630: "J'y veux insérer un discours où je tâcherai d'expliquer la nature des couleurs et de la lumière, lequel m'a arrêté depuis six mois, et n'est pas encore à moitié fait ; mais aussi sera-t-il plus long que je ne pensais, et contiendra quasi une physique tout entière (8) ; en sorte que je prétends qu'elle me servira pour me dégager de la promesse que je vous ai faite, d'avoir achevé mon *Monde* dans trois ans (9), car c'en sera quasi un abrégé. Et je ne pense pas après ceci a me résoudre jamais plus de faire rien imprimer, au moins moi vivant : car la fable de mon *Monde* (10) me plaît trop pour manquer à la parachever, si Dieu me laisse vivre assez longtemps pour cela; mais je ne veux point répondre de l'avenir. Je crois que je vous enverrai ce *Discours* de la lumière, sitôt qu'il sera fait, et avant que de vous envoyer le reste de la *Dioptrique*" (AT I, 179; O VIII 1, 83; B 36).

(8) Voir à Mersenne, 13 novembre 1629 (AT I, 70 l. 6-11, B 23) et 18 décembre 1629 (AT I, 85 l. 6-86 l. 1; [O VIII 1, 33] B 25).

(9) Voir à Mersenne, 15 avril 1630 (AT I 137 l. 15-17; [O VIII 1, 68] B 30).

(10) Voir à Mersenne, 13 novembre 1629 (AT I 70; [O VIII 1, 33] B 23).

"En fait, il semble que Descartes, loin d'avoir envoyé ce Discours de la lumière « avant le reste de la Dioptrique », en ait ajourné la mise au point ; car au cours de l'année 1632, il qualifie à deux reprises de « première partie » ce qui, dans la

rédaction définitive, constitue le Discours second, consacré à la réfraction (15). Par contre, ce Discours de la lumière, qui devait être un abrégé du *Monde*, prend de telles proportions qu'il devient bientôt un Traité de la Lumière appelé à couvrir tout le champ de la Physique (16).

Dernière remarque enfin : le *Monde* est « presqu'achevé » en juillet 1633 (17), la *Dioptrique* « entièrement », dans le courant de 1635 (18), les *Météores*, repris en main une fois la *Dioptrique* terminée, en 1636 (19). Ces détails chronologiques un peu vétilleux, pour ne pas dire fastidieux, permettent d'affirmer qu'entre 1629 et 1636, Descartes a mené de front les trois traités, quitte à interrompre l'un pour se consacrer à tel autre (20)." (pp. 290-291), Simone Martinet, "Rôle du problème de la lumière dans la construction de la science cartésienne", *XVIIe siècle*, n° 136, 1982, pp. 285-309.

(15) Voir [à Golius], [janvier 1632], I, p. 235 [O VIII 1, 644-645; B 49], et à Mersenne, [juin 1632], I, p. 255 [O VIII 1, 102-103; B 55].

(16) Voir à Mersenne, 23 décembre 1630 : « Je vous dirai que je suis maintenant après à démêler le chaos pour en faire sortir de la lumière, qui est l'une des plus hautes et plus difficiles matières que je puisse jamais entreprendre, car toute la physique y est presque comprise (5)», I, p. 194 [O VIII 1, 88; B 40].

(5) Descartes est en train de rédiger son *Monde, ou Traité de la lumière* : Il insiste sur son importance à plusieurs reprises (à Mersenne, 13 novembre 1629, AT I, 70 l. 6-11, [O VIII 1, 33] B 23; 25 novembre 1630, AT I, 179 l. 10, [O VIII 1, 83] B 36, et au P. Vatier, 22 février 1638, AT I 562 l. 10 sq., [O VIII 1, 576] B 149).

(17) À Mersenne, 22 juillet 1633, AT I, p. 268 [O VIII 1, 107] B 59].

(18) Voir à Mersenne, date difficile à préciser [mars 1635 ?], AT I, p. 322 [O VIII 1, 121; B 75], et à Huygens, 1 novembre 1635, AT I, p. 591 [O VIII 2, 14; B 77].

(19) Voir à Huygens, 1 novembre 1635, AT I, p. 591 [O VIII 2, 14; B 77], et *Météores*, Disc. VI, p. 298, qui relate une observation personnelle « faite l'hiver passé 1635 ».

(20) De telle sorte qu'il n'est pas étonnant qu'il soit fait référence à la *Dioptrique*, dans le *Monde*, achevé pourtant antérieurement (cf. *Traité de la Lumière ou Monde*, ch. II, p. 9, ch. XIV, p. 102, ch. XV, p. 106) et dans les *Météores*, commencés, sinon terminés plus tôt (*Météores*, Disc. I, p. 233 et p. 234 ; Disc. V, p. 279; Disc. VIII, p. 331 et p. 337). Et que, inversement, Descartes se retranche volontiers derrière le « Traité qui contient tout le corps de [sa] Physique », soit pour justifier le statut des « suppositions « qui sont avancées au début de chacun des Essais (cf. *Discours de la méthode,* VI partie, p. 76), soit pour répondre à des questions ou à des objections qui lui sont adressées après la publication des *Essais*, cf. [à Vatier], [22 février 1638], AT I, p. 562 [O VIII 1, 575; B 149] ; à Ciermans, [23 mars 1638], AT II, p. 71 et p. 74 [B 159] ; à Morin, [13 juillet 1638], AT II, p. 201 [O VIII 2, 466-467; B 172] ; à Mersenne, 9 janv. 1639 et 19 juin 1639, AT II, p. 483 [O VIII 1, 310-311; B 200] et p. 564 O VIII 1, 336-337; B 216].

En janvier 1632 la première partie (Discours I et II) est terminée : "Au reste pour ce que vous me mandez, et que M. H[ortensius] (4) me témoigne que vous désirez voir de ma *Dioptrique*, je vous en envoi la première partie (5), ou j'ai tâché d'expliquer la matière des réfractions, sans toucher au reste de la philosophie." (lettre à Golius du janvier 1632, AT I 235; O VIII 1, 644-645; B 49).

(4) Clerselier-Lettres: "H." ; AT complète par le nome de Martin Van de Hove (Hortensius, 1605-1639), mathématicien et astronome.

(5) *Dioptrique* I et II (AT VI 81-105 [O III, 148-262])

Dans l'automne 1635 Descartes écrit : "Pour les lunettes, je vous dirai que depuis la condamnation de Galilée (4), j'ai revu et entièrement achevé le Traité que j'en avais autrefois commencé (5) ; et l'avant entièrement séparé de mon *Monde*, je

me propose de le faire imprimer seul dans peu de temps (6)." (lettre à X (Mersenne?), AT I 322 [O VIII 1, 121; B 75).

(4) Descartes est souvent revenu dans ses lettres à Mersenne sur la condamnation de Galilée (1633) : fin novembre 1633 (AT I 270-273, [O VIII 1, 107-109] B 60); février 1634 (AT I 281-282, [O VIII 1, 109-110] B 63); 15 mai 1634 (AT I 298-299, [O VIII 1, 117-118] B 66).

(5) La rédaction de la *Dioptrique*, dont Descartes a souvent entretenu Mersenne (25 novembre 1630, AT I 182 l. 13 sq., [O VIII 1, 85] B 36; juin 1632, AT I 254 l. 3 sq., [O VIII 1, 102] B 55).

(6) En effet, Descartes écrit à Golius le 16 avril 1635 [AT I 314-316; O VIII 1, 647-648; B 71] : « Monsieur de Zuylichem (4), que j'ai eu l'honneur de voir ces jours à Amsterdam (5), après avoir eu la patience d'ouïr lire une partie de ma *Dioptrique*... » et envoie à Huygens une copie du texte le 25 avril 1635 (AT I 585-586, [O VIII 2, 13-14] B 72).

(4) Descartes venait de rencontrer Constantin Huygens (Monsieur de Zuylichem) à Amsterdam, du 29 mars au 6 avril 1635 (*Dagboek* [*Dagboek Van Constantijn Huygens*, éd. J. H. W. Hunger, *Bijlage Van Oud-Holland*, IIIe année, viii-88-14-viii pages, Amsterdam 1885], p. 26).

(5) Voir à Wilhem, 23 mai 1632 (AT I, 253-254, [O VIII 2, 1] B 54), et à Huygens, 11 décembre 1635 (AT I, 597-601, [O VIII 2, 17-19] B 80).

Le texte est terminé en 1635 : lettre à Golius du 16 avril 1635, AT I 314-316; O VIII 1, 647-648; B 71.

"En la *Dioptrique*, la matière des réfractions et l'invention des lunettes, j'y parle aussi fort particulièrement de l'Œil, de la Lumière, de la Vision, et de tout ce qui appartient à la Catoptrique et à l'Optique." (lettre à Mersenne du mars 1636 AT I, 338-340; O VIII 1, 134-136; B 83).

"Par la *Dioptrique*, j'eus dessein de faire voir qu'on pouvait aller assez avant en la Philosophie, pour arriver par son moyen jusques à la connaissance des arts qui sont utiles à la vie, à

cause que l'invention des lunettes d'approche, que j'y expliquais, est l'une des plus difficiles qui aient jamais été cherchées. Par les Météores, je désirai qu'on reconnût la différence qui est entre la Philosophie que je cultive et celle qu'on enseigne dans les écoles où l'on a coutume de traiter de la même matière." *Lettre-Préface* aux *Principes de philosophie* (AT IX-2, 15).

13. ———. 1637. *Les Météores*.

AT VI, 231-376; B Op. I, 314-487; O III, 284-390.

L'origine des *Météores* est le phénomène des parhélies (faux soleils) observé a à Frascati le 20 mars 1629 par le Jésuite Christoph Scheiner (1573-1650).

"Le 20 de mars on avait vu dans cette ville cinq soleils en même temps, c'est-à-dire quatre parhélies ou faux soleils autour du Soleil. Le P. Scheiner jésuite allemand, qui était pour lors à Rome, en avait fait l'observation avec quelques autres mathématiciens du lieu ; et le cardinal Barberin qui était toujours fort zélé pour l'avancement des sciences en avait envoyé une description à M. de Peiresc conseiller au parlement de Provence, avec la figure du phénomène. Monsieur Peiresc en avait fait faire plusieurs copies, pour communiquer la chose à tous les savants de sa connaissance, et pour les exciter à donner leurs réflexions sur le phénomène." (Baillet I, 188).

"C'est à cette observation des parhélies, que le public est redevable en partie du beau traité des *Météores* que M. Descartes lui donna quelques années après. Il interrompit ses *Méditations métaphysiques*, pour examiner par ordre tous les météores ; et il travailla plusieurs jours sur cette matière, avant que d'y trouver de quoi se satisfaire. " (Baillet I, 191).

Nicolas-Claude Fabri de Peiresc (1580-1637), ayant reçu la relation directement de C. Scheiner en donna des copies à Pierre Gassendi.

Ayant reçu une copie de Gassendi, Henri Reneri la publia avec le titre *Phaenomenon rarum et illustre Romae observatum 20 Martij Anno 1629*, (Amsterdam 1629) et en envoya une copie manuscrite à Descartes en juillet 1629 : "Car je n'ai point

l'esprit assez fort, pour l'employer en même temps à plusieurs choses différentes, et comme je ne trouve jamais rien que par une longue traînée de diverses considérations, il faut que je me donne tout à une matière, lorsque j'en veux examiner quelque partie. Ce que j'ai éprouvé depuis peu, en cherchant (4) la cause de ce phénomène duquel vous m'écrivez (5) ; car il y a plus de deux mois (6) qu'un de mes amis (7) m'en a fait voir ici une description assez ample, et m'en ayant demandé mon avis, il m'a fallu interrompre ce que j'avais en main (8), pour examiner par ordre tous les Météores, auparavant que je m'y sois pu satisfaire. Mais je pense maintenant en pouvoir rendre quelque raison, et suis résolu d'en faire un petit traité (9) qui contiendra la raison (10) des couleurs de l'arc-en-ciel (11), lesquelles m'ont donné plus de peine que tout le reste, et généralement tous les phénomènes sublunaires." (lettre à Mersenne du 8 octobre 1629, AT I, 22-23; O VIII 1, 29-30; B19).

(4) Clerselier-lettres : "pour trouver".

(5) Le jésuite romain Scheiner avait observé quatre parhélies (faux soleils) à Frascati le 20 mars 1629. Ces observations ont été connue de toute l'Europe savante par le relais de Peiresc, à qui le cardinal Barberini avait fait parvenir une copie. Gassend, informé par les frères Dupuy, s'employa à les expliquer, en particulier auprès de Peiresc, et au cours de son voyage en Flandres et aux Pays-Bas (été 1629), de Beeckman et de Reneri. La « description assez ample » dont parle Descartes peut être son explication *Phaenomenon rarum et illustre Romæ observatum*, dont le texte imprimé semble n'avoir été diffusé qu'en novembre-décembre 1629, mais qui fut remis par Gassend à Reneri le 14 juillet (voir lettre de Gassend à Peiresc, 21 juillet 1629, CM II 244 et 247n).

(6) Clerselier-lettres : « trois mois ».

(7) Henri Reneri, en juillet 1629. Il s'inscrit comme étudiant à Leyde le 13 octobre 1629.

(8) Le « petit traité de métaphysique », « commencé en Frise », dont Descartes parle à plusieurs reprises (à Mersenne, 15 avril 1630; AT I 136, [O VIII 1, 67] B 30; 25 novembre 1630, AT I

182, [O VIII 1, 85] B 36; vers le 20 avril 1637 AT I 350, [O VIII 1, 139] B 104; à Gibieuf, 18 juillet 1629, AT I 17, [O VIII 2, 790] B 17) est soit une première version des *Meditationes*, soit un « traité sur la divinité » (Baillet I, 170-171 et 190).

(9) Le huitième discours des *Météores* (qui paraîtra dans les *Essais* de 1637) ; le dixième discours porte sur les parhélies.

(10) Clerselier-lettres : « l'explication ».

(11) Descartes avait pu voir en Italie les arcs-en-ciel artificiels des fontaines de Tivoli.

Descartes retourne sur le sujet dans une lettre à Mersenne du 13 novembre 1629 : "Je suis bien marri de la peine que je vous ai donnée de m'envoyer ce phénomène (2), car il est tout semblable à celui que j'avais vu. Je ne laisse pas de vous en avoir très grande obligation, et encore plus de l'offre que vous me faites de faire imprimer ce petit traité que j'ai dessein d'écrire ; mais je vous dirai qu'il ne sera prêt de plus d'un an. Car depuis le temps que je vous avais écrit il y a un mois, je n'ai rien fait du tout qu'en tracer l'argument, et au lieu d'expliquer un phénomène seulement, je me suis résolu d'expliquer tous les phénomènes de la nature c'est-à-dire toute la physique. Et le dessein que j'ai me contente plus qu'aucun autre que j'aie jamais eu, car je pense avoir trouvé un moyen pour exposer toutes mes pensées en sorte qu'elles satisferont à quelques-uns et que les autres n'auront pas occasion d'y contredire." (AT I 70; O VIII 1, 32-33; B 23).

(2) Sur les parhélies, comme sur le « petit traité », voir la lettre 4 (AT I, 23; [O VIII 1, 29] B 19.

Lettre à Constantin Huygens du 1 novembre 1635 : "J'ai dessein d'ajouter les *Météores* à la *Dioptrique*, et j'y ai travaillé assez diligemment les deux ou trois premiers mois de cet été (4), à cause que j'y trouvais plusieurs difficultés que je n'avais encore jamais examinées, et que je démêlais avec plaisir. Mais il faut que je vous fasse des plaintes de mon humeur : sitôt que je n'ai plus espéré d'y rien apprendre, ne restant plus qu'à les mettre au net, il m'a été impossible d'en prendre la peine, non plus que de faire une préface que j'y veux joindre (5); ce qui sera cause

que j'attendrai encore deux ou trois mois avant que de parler au libraire." (AT I, 592; O VIII 2, 15; B 77).

(4) Dès février 1635, il avait noté des observations sur la chute de la neige (voir F. C. Frank, « Descartes' Observations on the Amsterdam Snowfalls of 4, 5, 6 and 9 February 1635 », *Journal of Glaciology*, 13, 1974, p. 535-539).

(5) [Première allusion au *Discours de la méthode* :] Le livre envisagé devait réunir la *Dioptrìque*, les *Météores* et une préface (qui deviendra le *Discours de la méthode*). Descartes annoncera l'addition de la *Géométrie* dans la lettre à Mersenne de mars 1636 (AT I, 339 l. 16, [O VIII 1, 135; B 83) et racontera au P. Deriennes : « [...] c'est un traité que je n'ai quasi composé que pendant qu'on imprimait mes *Météores*, et même j'en ai inventé une partie pendant ce temps-là » (AT I, 457-458, à Deriennes 22 février 1638, [O VIII 2, 578-579] B 147).

"Au reste, si M. Gassendi a quelques autres remarques touchant la neige, que ce que j'ai vu dans Kepler, et remarqué encore cet hiver, *de Nive sexangula et grandine acuminata* (7), je serai bien aise de l'apprendre ; car je veux expliquer les météores le plus exactement que je pourrai (8)." (lettre à Mersenne, 4 mars 1630, AT I, 127 O VIII 1, 62; B 28).

(7) Kepler a publié en 1611 le traité *De nive sexangula et grandine acuminata*.

(8) Descartes a dû connaître (par Mersenne) l'observation de Gssend; (à la fin de son *Examen* du 4 février 1629 : voir Gassend 4 février 1629 (CM II 196-199).

Dans une lettre à Chanut du 6 mars 1646, Descartes écrit : "Une seule observation que je fis de la neige hexagone, en l'année 1635, a été cause du traité que j'en fait (5)." (AT IV, 377; O VIII 2, 668; B 545).

(5) Dans les *Météores* VI (AT VI 298 1. 8 sq. [O III, 329]); (observation du 5 février 1635 (voir AT XI, 623-624 et 626-627) ; voir à Mersenne, 4 mars 1630 (AT I, 127, [O VIII 1, 62] B 28) et 30 août 1640 (AT III 166, [O VIII 1, 404] B 269 : longue note

dans E. Lojacono (éd.), *Opere scientifiche di René Descartes*, t. 2, Turin, Classici UTET, 1983, p. 434.

Voir AT XI, p. 635 : "Par un vent du nord, avec neige et verglas la veille. Les grains de neige étaient de cette grosseur, ils ressemblaient à l'humeur cristalline de l'œil, étaient transparents, et j'en ai remarqué un ou deux qui avaient autour d'eux six rayons très-courts, tirant sur le blanc pâle, et surpassant la glace. Ce même jour, 5 février [1635], j'ai noté une grande diversité d'étoiles de neige. D'abord quelques lames solides taillées en hexagone, d'une parfaite transparence, polies et minces, de grandeurs égales." (texte en latin; traduction de Foucher de Careil, p. 81).

"Aux *Météores*, je m'arrête principalement sur la nature du Sel, les causes des Vents et du Tonnerre, les figures de la Neige, les couleurs de l'Arc-en-Ciel, où je tâche aussi à démontrer généralement quelle est la nature de chaque Couleur, et les Couronnes, ou Halones, et les Soleils, ou Parhelia, semblables à ceux qui parurent à Rome il y a six ou sept ans." (lettre à Mersenne, mars 1636, AT I 340; O VIII 1, 135; B 83).

"Par les *Météores*, je désirai qu'on reconnût la différence qui est entre la Philosophie que je cultive et celle qu'on enseigne dans les écoles où l'on a coutume de traiter de la même matière." *Lettre-Préface* aux *Principes de philosophie* (AT IX-2, 15).

René Descartes. Bibliographie Chronologique et Annotée (Troisième Partie: (1637-1644)

Bibliographie

Pour la liste des éditions de références et des abréviations voir René Descartes. Outils de recherche: Biographies, Dictionnaires et Lexiques des Ses Œuvres

1. Descartes, René. 1637. *La Géométrie*.

   AT VI, 368-485; B. Op. I, 490-653; O III, 415-512.

   Une traduction latine par Frans Van Schooten (le jeune) (1615-1661) paru à Leyde: Maire 1649.

   La *Géométrie* est le seul ouvrage mathématique publié par Descartes et résume les résultats de 19 années de recherches ; sa rédaction l'a occupé dans les premiers mois de 1637: "C'est un traité que je n'ai quasi composé que pendant qu'on imprimait mes *Météores*, et même j'en ai inventé une partie pendant ce temps-là (4); mais je n'ai pas laissé de m'y satisfaire, autant ou plus que je ne me satisfais d'ordinaire de ce que j'écris." (lettre à Jean Deriennes du 22 février 1638 (AT I, 458; O VIII 1, 578-579; B 147).

   (4) La *Dioptrique* était prête pour l'impression dès octobre 1635 (Huygens à Descartes, 28 octobre 1635, AT I, 588 l. 5-6, B 76).

   Lettre à Mersenne, fin décembre 1637: "Et je ne suis pas bien aise d'être obligé de parler avantageusement de moi-même;

mais parce qu'il y a peu de gens qui puissent entendre ma *Géométrie*, et que vous désirez que je vous mande quelle est l'opinion que j'en ai, je crois qu'il est à propos que je vous dise qu'elle est telle, que je n'y souhaite rien davantage; et que j'ai seulement tâché par la *Dioptrique* et par les *Météores* de persuader que ma méthode est meilleure que l'ordinaire, mais je prétends l'avoir démontré par ma *Géométrie*." (AT I, 477; O VIII 1, 149; B 136).

Sur la difficulté de l'œuvre voir:

l'*Avertissement* : "Jusques ici j'ai tâché de me rendre intelligible à tout le monde ; mais, pour ce traité, je crains qu'il ne pourra être lu que par ceux qui savent déjà ce qui est dans les livres de Géométrie: car, d'autant qu'ils contiennent plusieurs vérités fort bien démontrées, j'ai cru qu'il serait superflu de les répéter, et n'ai pas laissé, pour cela, de m'en servir." (AT VI 368)

et la lettre à Florimond de Beaune du 20 février 1639: "J'ai été extrêmement aise de voir vos *Notes* (*) sur ma *Géométrie* (2); et je puis dire, avec vérité, que je n'y ai pas trouvé un seul mot qui ne soit entièrement selon mon sens. En sorte que j'ai admiré que vous ayez pu reconnaître des choses que je n'y ai mises qu'obscurément (3), comme en ce qui regarde la généralité de la méthode, et la construction des lieux plans et solides, etc.

(...)

Toutefois je puis assurer que je n'ai rien omis de tout cela qu'à dessein, excepté le cas de l'asymptote que j'ai oublié. Mais j'avais prévu que certaines gens, qui se vantent de savoir tout, n'eussent pas manqué de dire que je n'avais rien écrit qu'ils n'aient su auparavant, si je me fusse rendu assez intelligible pour eux ; et je n'aurais pas eu le plaisir, que j'ai eu depuis, de voir l'impertinence de leurs objections. Outre que ce que j'ai omis ne nuit à personne ; car pour les autres, il leur sera plus profitable de tâcher à l'inventer d'eux-mêmes, que de le trouver dans un livre. Et pour moi, je ne crains pas que ceux qui s'y entendent m'imputent aucune de ces omissions à ignorance ;

car j'ai partout eu soin de mettre le plus difficile, et de laisser seulement le plus aisé." (AT II, 510-512; O VIII 2, 691-692; B 203).

(2) Voir à Mersenne, 9 février 1639 (AT II, 499 l. 20-24, [O VIII 1, 320] B 202). Les *Notes brèves* de Debeaune [dans le texte originel français] ont été publiées dans AM III 353-401 (voir aussi la lettre de Debeaune à Schooten, 1648-1649 dans AM III 321-322).

(*) [Ces *Notes* seront publiées dans la traduction latine de la *Géométrie* en 1649: *In geometriam Renati Descartes notæ breves*, Amsterdam, 1659.]

Après la publication, Descartes ne montre plus d'intérêt pour la géométrie : "Mais n'attendez plus rien de moi, s'il vous plaît, en géométrie; car vous savez qu'il y a longtemps que je proteste de ne m'y vouloir plus exercer, et je pense pouvoir honnêtement y mettre fin." (à Mersenne, 12 septembre 1638, AT II, 361-362; O VIII 1, 273-274; B 187).

"Enfin, en la *Géométrie*, je tâche à donner une façon générale pour soudre tous les problèmes qui ne l'ont encore jamais été. Et tout ceci ne fera pas, je crois, un volume plus grand que de cinquante ou soixante feuilles (8). Au reste, je n'y veux point mettre mon nom, suivant mon ancienne résolution (9), et je vous prie de n'en rien dire à personne, si ce n'est que vous jugiez à propos d'en parler à quelque libraire, afin de savoir s'il aura envie de me servir, sans toutefois achever, s'il vous plaît, de conclure avec lui, qu'après ma réponse ; et sur ce que vous me ferez la faveur de me mander, je me résoudrai." (lettre à Mersenne du mars 1636, AT I, 340; O VIII 1, 136; B 136).

(8) Le volume imprimé fera 66 feuilles, dont 10 pour le *Discours*.

(9) Voia à Mersenne, 25 novembre 1630 (AT I, 179-180; [O VIII 1, 83-64] B 36.

"Enfin, par la *Géométrie*, je prétendais démontrer que j'avais trouvé plusieurs choses qui ont été ci-devant ignorées, et ainsi donner occasion de croire qu'on en peut découvrir encore

plusieurs autres, afin d'inciter par ce moyen tous les hommes à la recherche de la vérité." *Lettre-Préface* aux *Principes de philosophie* (AT IX-2, 15).

2. ———. 1637. *Explication des engins par l'aide desquels on peut avec une petite force lever un fardeau fort pesant [Traité de mécanique].*

   AT I, 435-447; B 129; O III, 568-577.

   Le texte est annexe à la lettre à Constantin Huygens du 5 octobre 1637 ; la première édition est celle publiée en 1668 par Nicolas Poisson avec le *Compendium musicae*.

3. ———. 1638. *Calcul de Mons. Des-Cartes*.

   AT X 659-680; édition critique par Fréderic de Buzon in B Op. II, 1472-1528.

   Dans le dernier paragraphe d'une lettre à Claude Mydorge du 1 mars 1638, Descartes écrit: "Si vous désirez que je vous envoie quelques adresses particulières touchant le calcul, j'ai ici un ami qui s'offre de les écrire (27), et je m'y offrirais bien aussi, mais j'en suis moins capable que lui, à cause que je ne sais pas si bien remarquer en quoi on peut trouver de la difficulté." (AT II 23; O VIII 1, 672; B152).

   (27) Il s'agit de l'*Introduction à la Géométrie*, ou *Introduction au Calcul de Monsieur Descartes*, attribuée à Godefroid Van Haestrecht [1592/93 - 1659] (voir la présentation de F. de Buzon, in B Op. II, 1465-1529).

   De ce document, il y a trois manuscrits :

   1) H : retrouvé par Charles Adam dans la Bibliothèque Royale de Hanovre parmi les papiers de Leibniz et publié dans AT X.

   2) L : retrouvé par Cornelis de Waard en 1917 parmi les papiers de Charles Cavendish et publié dans Charles Adam et Gaston Milhaud (éds.) *René Descartes. Correspondance*, Paris, Alcan 1936-, vol. III, pp. 323-352.

   3) M : retrouvé par Frédéric de Buzon parmi les manuscrits de Marcus Meibom à la Bibliothèque Royale de La Haye et publié

dans B Op. II, 1473-1529 avec le titre: *Recueil du Calcul, qui sert à la Géométrie du Sieur Des-Cartes*.

4. ———. 1639? *De refractione*.

   AT XI, 645-646; B Op. II, 1390-1393.

   La date précise de composition est incertaine.

5. ———. 1640. *Invention de la racine cubique des nombres binomes*.

   AT III 188, l. 3 - 190, l. 19; nouvelle édition reprise de l'édition Costabel: AT V 612-615; B Op. II, 1440-1447.

   Première édition : Pierre Costabel, "Descartes et la racine cubique des nombres binômes", *Revue d'histoire des sciences*, 22, 1969, pp. 97-116 (texte au pp. 99-102); repris dans P. Costabel, *Démarches originales de Descartes savant*, Paris, Vrin, 1982, pp. 122-126.

   "Le document illustre la phase ultime du débat engagé en 1639 entre Stampioen et Waessenaer, celui-ci agissant pour le compte de Descartes. "(p. 97).

6. ———. 1641. *Meditationes de prima Philosophia in qua Dei existentia et animae immortalitas demostrantur*. Parisiis: Michaelem Soly.

   AT VII : *Epistola* 1; *Praefatio ad Lectorem* 7; *Synopsis sequentium sex Meditationum* 12; *Meditatio I-VI* 17-90; *Objectiones Primae* 91; *Responsio Authoris* 101; *Objectiones Secundae* 121; *Responsio* 128; *Rationes Dei existentia et animae a corpore distinctionem probantes, more geometrico dispositae* 160; *Objectiones Tertiae cum Responsionibus Authoris* 171; *Objectiones Quartae* 196; *Objectiones Quintae* 256; *Responsio* 347; *Disquisitio metaphysica Gassendus Sorberio* 392; *Objectiones Sextae* 412; *Responsio* 422; *Objectiones Septimae cum Notis Authoris* 464; *Epistola ad patrem Dinet* 563-603.

   B Op. I, 680-799; *Objectiones cum Responsionibus*, 800-1395.

   Les *VII Objectiones* et l' *Epistola ad patrem Dinet* sont ajoutées dans la deuxième édition.

Date de composition : octobre 1639 - mars 1640.

Première édition : 28 août 1641.

Deuxième édition revue avec le titre : *Meditationes de prima philosophia, in quibus Dei existentia, et animae humanae a corpore distinctio, demostrantur*. Amstelodami: Ludovicum Elzevirium, 1642 (réimpression anastatique Lecce, Conte Editore, 1992).

Après le *Traité de métaphysique* de 1628-29 (qui n'a pas été conservé) et la *Quatrième partie* du *Discours de la méthode* c'est le premier texte publié par Descartes sur la métaphysique (*La Recherche de la Vérité* a été publié seulement en 1684).

La première mention de l'œuvre est dans la lettre à Mersenne du 13 novembre 1639 : "Les opinions de vos Analystes, (*) touchant l'existence de Dieu et l'honneur qu'on lui doit rendre, sont, comme vous écrivez, très difficiles à guérir ; non pas qu'il n'y ait moyen de donner des raisons assez fortes pour les convaincre, mais parce que ces gens-là, pensant avoir bon esprit, sont souvent moins capables de raison que les autres. Car la partie de l'esprit qui aide le plus aux mathématiques, à savoir l'imagination, nuit plus qu'elle ne sert pour les spéculations métaphysiques. J'ai maintenant entre les mains un discours, où je tâche d'éclaircir ce que j'ai écrit ci-devant sur ce sujet ; il ne sera que de cinq ou six feuilles d'impression; mais j'espère qu'il contiendra une bonne partie de la métaphysique. Et afin de le mieux faire, mon dessein est de n'en faire imprimer que vingt ou trente exemplaires, pour les envoyer aux vingt ou trente plus savants théologiens dont je pourrai avoir connaissance, afin d'en avoir leur jugement, et apprendre d'eux ce qui sera bon d'y changer, corriger ou ajouter, avant que de le rendre public." (AT II, 622; O VIII 1, 351-352; B 224).

(*) [Les géomètres de Paris]

La rédaction est terminée en mars 1640 : "Je ne ferai point imprimer mon essai de *Métaphysique* (14) que je ne sois à Leyde, où je pense aller dans cinq ou six semaines (15)" lettre à

Mersenne, 11 mars 1640 (AT III, 35-36; O VIII 1, 367-368; B 246).

(14) Ls *Meditationes* seront imprimés à Paris en 1641, puis à Amsterdam en 1642.

(15) Descartes date de Leyde toute une série de lettres écrites entre le 7 mai 1640 et le 18 mars 1641.

En novembre 1640 le livre est envoyé à l'imprimeur: "Le peu que j'ai écrit de métaphysique est déjà en chemin pour aller à Paris (5), où je crois qu'on le fera imprimer, et il ne m'en est resté ici qu'un brouillon si plein de ratures, que j'aurais moi-même de la peine à le lire, ce qui est cause que je ne puis vous l'offrir ; mais sitôt qu'il sera imprimé, j'aurai soin de vous en envoyer des premiers, puisqu'il vous plaît me faire la faveur de le vouloir le lire, et je serai fort aise d'en apprendre votre jugement." Lettre à Colvius du 14 novembre 1640, AT III, 248; O VIII 2, 586; B 287).

(5) Voir à Mersenne, 11 novembre 1640 (AT III 238-239, [O VIII 1, 424] B 285) « [...] je vous envoie enfin mon écrit de *Métaphysique*... »

Descartes envoie une copie du manuscrit à Huygens et Mersenne :

- Constantin Huygens : "J'ai envoyé dès hier ma *Métaphysique* à Monsieur de Zuylichem pour vous l'adresser ; mais il ne l'enverra que dans huit jours, car je lui ai donné ce temps pour la voir. Je n'y ai point mis de titre, mais il me semble que le plus propre sera de mettre *Renati Descartes Meditationes de prima Philosophia*; car je ne traite point en particulier de Dieu et de l'âme, mais en général de toutes les premières choses qu'on peut connaître en philosophant. Vous verrez assez, par les lettres que j'y ai jointes, quel est mon dessein; et je n'en dirai ici autre chose, sinon que je crois qu'il n'y aura pas de mal, avant que de la faire imprimer, de stipuler avec le libraire qu'il nous en donne autant d'exemplaires que nous en aurons de besoin, et même qu'il les donne tout reliés ; car il n'y a pas plaisir d'acheter ses propres écrits, et je m'assure que le libraire pourra bien faire cela sans y perdre. Je n'aurai besoin ici que d'environ

trente exemplaires ; pour Paris, c'est à vous de juger combien il nous en faudra." Lettre à Mersenne du 11 novembre 1640 (AT III, 235-236; O VIII 1, 424; B 283).

- Marin Mersenne : "Je vous envoie enfin mon écrit de *Métaphysique*, auquel je n'ai point mis de titre, afin de vous en faire le parrain, et vous laisser la puissance de le baptiser (2). Je crois qu'on le pourra nommer, ainsi que je vous ai écrit par ma précédente, *Meditationes de prima Philosophia*; car je n'y traite pas seulement de Dieu et de l'âme, mais en général de toutes les premières choses qu'on peut connaître en philosophant par ordre. Et mon nom est connu de tant de gens que, si je ne voulais pas le mettre ici, on croirait que j'y entendrais quelque finesse, et que je le ferais plutôt par vanité que par modestie (3).

Pour la lettre à Messieurs de Sorbonne (4), si j'ai manqué au titre, ou qu'il y faille quelque souscription, ou autre cérémonie, je vous prie d'y vouloir suppléer, et je crois qu'elle sera aussi bonne, étant écrite de la main d'un autre, que de la mienne. Je vous l'envoie séparée du traité, à cause que, si toutes choses vont comme elles doivent, il me semble que le meilleur serait, après que le tout aura été vu par le P. Gibieuf (5), et, s'il vous plaît, par un ou deux autres de vos amis, qu'on imprimât le traité sans la lettre, à cause que la copie en est trop mal écrite pour être lue de plusieurs, et qu'on le présentât ainsi imprimé au Corps de la Sorbonne, avec la lettre écrite à la main; en suite de quoi il me semble que le droit du jeu sera qu'ils commettent quelques-uns d'entre eux pour l'examiner (6) ; et il leur faudra donner autant d'exemplaires pour cela qu'ils en auront besoin, ou plutôt autant qu'ils sont de docteurs (7), et s'ils trouvent quelque chose à objecter, qu'ils me l'envoient, afin que j'y réponde ; ce qu'on pourra faire imprimer à la fin du livre. Et après cela il me semble qu'ils ne pourront refuser de donner leur jugement, lequel pourra être imprimé au commencement du livre, avec la lettre que je leur écris. Mais les choses iront peut-être tout autrement que je ne pense ; c'est pourquoi je m'en remets entièrement à vous et au P. Gibieuf, que je prie par ma lettre (8) de vouloir vous aider à ménager cette affaire : car la *Vélitation* que vous savez (9) m'a fait connaître que, quelque

bon droit qu'on puisse avoir, on ne manque pas d'avoir toujours besoin d'amis pour le défendre. L'importance est en ceci que, puisque je soutiens la cause de Dieu, on ne saurait rejeter mes raisons, si ce n'est qu'on y montre du paralogisme, ce que je crois être impossible, ni les mépriser, si ce n'est qu'on en donne de meilleures, à quoi je pense qu'on aura assez de peine." Lettre du 11 novembre 1640 (AT III, 239-240; O VIII 1, 424-425; B 285).

(2) Voir à Mersenne, 18 mars 1641 (AT III 340, [O VIII 1, 457] B 305) : « vous en serez, s'il vous plaît, le parrain ».

(3) L'ouvrage, comme on sait, parut sous le titre *Renati Descartes Meditationes de prima philosophia, in qua Dei existentia et animae immortalitas demonstratur*.

(4) L'*Epistola dedicatoria* (AT VII 680-686) : en se tournant vers la faculté de théologie, Descartes montrait avoir renoncé à attendre un soutien de ses anciens maîtres jésuites.

(5) Clerselier Lettres : « Le P. G. », et ailleurs.

(6) Ce qui fut fait le 1er août 1641, avec la nomination de quatre docteurs (« commissaires »), Chastelain, Potier, Hallier et Cornet, « pour examiner la *Métaphysique* de Monsieur Descartes ». Il n'en est plus question par la suite, l'assemblée du 2 septembre se bornant à approuver les conclusions de l'assemblée précédente (l'achevé d'imprimer des *Meditationes* est du 28 août) ; voir J.-R. Armogathe, « L'approbation des *Meditationes* par la faculté de théologie de Paris 1641 », *Bulletin cartésien* XXI-XXII, p. 1-3, *Archives de philosophie* 57, 1, 1994.

(7) C'était la procédure habituelle, qu'on trouve par exemple appliquée au livre de Pierre Dabillon, *De la divinité défendue contre les athées*, Paris, 1642, approuvé quelques semaines plus tôt par la Faculté.

(8) À Gibieuf, 11 novembre 1640 (AT III, 238 l. 8-9, [O VIII 2, 792] B 284).

(9) Sur l'affaire des thèses du P. Bourdin, voir lettre 76, n. 2, p. 940 et dossier Jésuites, lettre 6, [O VIII 1, 582-591] B 261.

7. ———. 1641. *Propositio demonstrata*.

Première édition: Clerselier, III, 1667, 475-479.

AT III, 708-714 (CCXLIII bis); O III, 519-524.

La proposition démontrée est la suivante : "Étant donné une section conique quelconque et un point situé comme on veut hors de son plan, on cherche un cercle qui soit une base du cône que décrit une droite tournant, à partir du point donné comme sommet, autour de la section conique donnée; car il n'est pas douteux que la surface ainsi décrite ne soit conique, et une fois qu'on a trouvé le cercle qui est une base, cela peut se démontrer facilement."

"Entre avril et septembre 1641, Descartes rédigea (ou fit rédiger) en latin une solution à un vieux problème géométrique qui aurait été reproposé à la communauté mathématique par Desargues. Mydorge et Roberval sont censés avoir donné également chacun la leur (dont on ne sait rien aujourd'hui).

Notre Annexe X montre que Fermat s'est aussi intéressé à la question.

Le texte de cette *Propositio* a été publié pour la première fois, sous le titre indiqué plus haut, par Claude Clerselier en 1667 dans le volume III de la *Correspondance* de Descartes, pages 475-479 (en annexe à la lettre LXXXIII du 12 octobre 1648. Le manuscrit semble perdu, et nul ne sait si, par exemple, les six figures qui y sont insérées sont plus ou moins de la main de Descartes, ou fortement interprétées - et dégradés - par son éditeur.

(...)

Une nouvelle traduction française de ce texte figure dans l'Annexe I. "

8. ———. 1642. *Meditationes De Prima Philosophia, In quibus Dei existentia, et animae humanae à corpore distinctio, demonstrantur*. Amstelodami: Ludovicum Elzevirium.

   AT VII : deuxième édition de l'œuvre publiée en 1641.

   "De quelle façon maintenant convient-il d'utiliser les éditions anciennes, soit pour le contenu du présent volume, soit pour l'établissement du texte ?

   Pour le contenu, la seconde édition, celle de 1642, doit évidemment faire loi. La première édition, en effet, est incomplète : il y manque les septièmes *Objections*, qui n'avaient pas été envoyées à temps pour y figurer, et qui d'ailleurs ont été faites, non pas, comme les autres, sur une copie manuscrite adressée avant toute impression par Mersenne aux théologiens ou philosophes dont il provoquait les critiques, mais sur le volume imprimé dès le 28 août 1641, et que le P. Bourdin, auteur des septièmes Objections, étudia de lui-même à seule fin de le critiquer. Descartes ayant joint, en outre, à ces septièmes Objections, accrues de ses propres Notes, la Lettre qu'il écrivit ensuite au P. Dinet, nous ne les séparerons pas non plus dans le présent volume." (AT VII, *Avertissement* à l'édition de 1983, p. XI).

   "La différence la plus notable entre la première et la deuxième édition "est un assez long passage qui termine les *Réponses* de Descartes aux quatrièmes *Objections* d'Antoine Arnauld : ce passage très important sur l'Eucharistie, envoyé d'abord en 1640 à Mersenne, n'avait point paru dans la première édition, en 1641, sans doute afin d'obtenir plus aisément l'approbation de la Sorbonne ; il fut rétabli naturellement dans l'édition de 1642 (voir ci-après, p. 252, l. 22, à p. 256, l. 8)." (AT VII, *Avertissement* à l'édition de 1983, p. XIII).

9. ———. 1642. *[Epistola] Ad Reverendo Patri Dinet*. Amstelodami: Ludovicum Elzevirium.

   AT VII, 563-603; B Op. I 1426-1475.

   Traduction française par Claude Clerselier dans la deuxième édition des *Méditations Métaphysiques* (1661).

Nouvelle traduction par Theo Verbeek dans : René Descartes et Martin Schoock, *La Querelle d'Utrecht*, Paris: Les impressions nouvelles, 1988, pp. 131-151.

Table des matières : Jean-Luc Marion : Préface 7; Theo Verbeek: Introduction 19; Narration Historique de la manière dont la philosophie nouvelle a été soutenue d'abord, puis abolie, précédée du Témoignage de l'Académie d'Utrecht 71; René Descartes : Lettre à Dinet 125; Martin Schoock : L'Admirable Méthode 153; René Descartes : Lettre à Voet 321; René Descartes : Lettre Apologétique aux Magistrats d'Utrecht 401; Theo Verbeek : Notes 439-540.

Sur l'histoire de la *Querelle*, voit l'*Introduction* de Theo Verbeek, pp. 19-66.

Theo Verbeek a traduit en français les pièces principales de la controverse entre Descartes et Gijsbert Voet (1589-1676) dans *La Querelle d'Utrecht*, cit. :

"...d'abord la *Lettre au Père Dinet*, qui, publiée en appendice à la seconde édition des *Meditationes* (1642) déclenche, en mentionnant les attaques de G. Voet contre Regius et Descartes, un conflit ouvert ; ensuite la réplique de Schoock, suscitée par G. Voet, sous le titre de *La Méthode Admirable de la nouvelle philosophie cartésienne* (1643) qui attire, en retour, la *Lettre à G. Voet* où, pour la première fois (mai 1643), Descartes accepte le combat direct ; la réponse prendra l'aspect d'une *Narration historique* (octobre 1643), suivant de peu un arrêt pris par les magistrats d'Utrecht contre Descartes (13 septembre 1643), précédant aussi de peu une intervention en faveur de Descartes de M. de la Thuillière, Ambassadeur de France. La querelle fut cependant assez vive pour que Descartes adresse encore, un an et demi plus tard, une *Lettre apologétique aux Magistrats d'Utrecht* (juin 1645) et tienne à la publier en mars 1648. L'importance du dossier se marque au nombre des pièces qui le composent (et de nombreuses lettres pourraient s'y adjoindre), mais aussi au temps que lui consacre Descartes — pourtant si soucieux de son loisir et de son repos : pendant près de six ans, tout son temps de travail (et il s'agit des *Principia* puis des *Passions de l'âme*) sera conquis sur la

distraction et l'inquiétude d'une polémique de plus en plus âcre et dangereuse. Il paraît donc impossible, au simple vu de ces titres et de ces dates, de sous-estimer, encore plus d'ignorer, un épisode aussi important et importun de la vie de Descartes. Le travail de Theo Verbeek se justifie donc entièrement, ne fût-ce que d'un point de vue historique ; il contribuera, comme un document indispensable, à la connaissance du premier cartésianisme hollandais."

(Jean-Luc Marion, *Préface* à *La Querelle d'Utrecht,* p. 8).

"Les Jésuites semblaient être un peu plus partagés que les pères de l'Oratoire sur la philosophie de M. Descartes ; et la diversité des opinions était grande dans leur Compagnie sur ses *Méditations métaphysiques*. Les uns se contentaient de goûter ses principes et ses raisonnements, ou de louer ses bonnes intentions et ses efforts, sans aller au-delà, comme le P. Noël, le P. Fournier, le P. J. François, le P. Grandamy, le P. Dinet, qui était provincial de France à Paris, le P. Charles son parent, qui était assistant du général de la Compagnie de Rome. Le P. Dinet qui avait été autrefois son préfet à La Flèche, ayant fait un voyage à Rome sur la fin de la même année [1642], ne manqua point d'entretenir le P. Charlet du livre de ses *Méditations*; et il voulut donner avis au philosophe de tout ce qui s'était dit de plus obligeant entre eux à son sujet, par une lettre qu'il lui en écrivit de Rome vers le commencement de l'avent. M. Descartes crut devoir faire part de la joie qu'il en reçut au P. Mersenne dans le même temps des étrennes de l'année suivante. Il lui marqua aux termes du P. Dinet l'estime que le P. Charlet faisait de ses études, et qu'il avait pour sa personne ; croyant que ce père n'attendait à se déclarer ouvertement pour sa philosophie qu'après la publication de ses *Principes*."

Baillet II, chapitre VIII, 159-160.

"De plus, je ne voudrais pas qu'on me croie sur parole lorsque je parle de la vérité des écrits que je promets, mais qu'on en juge par les *Essais* que j'ai déjà donnés. Car loin d'y avoir expliqué une ou deux questions, j'en ai discuté des centaines qui auparavant n'avaient pas été traitées de la sorte. Et quoique

beaucoup de personnes aient lu mes écrits d'un œil jaloux et aient fait de leur mieux pour les réfuter, personne, autant que je sache, n'a été à même d'y trouver autre chose que de la vérité. Qu'on fasse la liste de toutes les questions qui, depuis tant de siècles où il y a des philosophies, ont été résolues par leur moyen : on n'en trouvera probablement ni beaucoup, ni de très importantes. J'ose même prétendre qu'il n'y a jamais eu de question dont je ne pourrais montrer que la solution qu'on en a donnée à partir des principes propres à la philosophie péripatéticienne est fausse et mal fondée. Qu'on en fasse l'épreuve : qu'on les propose, non pas toutes il est vrai, car je ne crois pas qu'elles vaillent la peine d'y employer beaucoup de temps, mais quelques-unes des plus spéciales. On verra que je tiendrai mes promesses (42). Ma seule restriction, que je fais pour prévenir tout sujet de chicane, est que si je dis "principes propres à la philosophie péripatéticienne", je ne veux pas parler de ces questions dont la solution est tirée soit de l'expérience commune de tous les hommes, soit de la considération des figures et du mouvement qui est le fait des mathématiciens, soit enfin de ces notions métaphysiques qui sont généralement reçues et que j'admets comme les autres : on les trouvera dans mes *Méditations*.

Qu'on me permette encore ce qui paraîtra un paradoxe : en tant que cette philosophie est jugée péripatéticienne, et différente des autres, elle ne contient rien qui ne soit pas nouveau ; et la mienne rien qui ne soit pas ancien. Car en ce qui concerne les principes, je n'admets que ceux qui, jusqu'ici, ont été partagés par tous les philosophes et qui de ce fait sont les plus anciens de tous. Et en ce qui concerne ce que j'en déduis par après, je ne fais que montrer ce que contenaient ceux-là d'une façon implicite, mais cela d'une façon tellement claire qu'on voit que cela aussi, se trouvant naturellement dans l'esprit des hommes, est en réalité très ancien. D'autre part, les principes de la philosophie ordinaire étaient de toute façon nouveaux à l'époque où ils furent inventés par Aristote ou par d'autres. Ils ne sont pas maintenant meilleurs qu'ils n'étaient jadis. On n'en déduit rien qui ne soit pas controversé, et qui ne puisse être changé ou adapté à la façon d'une École ou au gré du premier

philosophe venu. Par conséquent il n'y a rien qui soit plus nouveau, puisqu'on la renouvelle tous les jours (43)." (*Lettre à Dinet*, traduction de Theo Verbeek, *La Querelle d'Utrecht*, cit., p. 140, AT VII, 580).

(42) Voir le commentaire de Schoock, *Admiranda Methodus*, section II chap. 4.

(43) Voir pour tout ce passage, d'une part ce que dit Descartes dans son Discours (VI, AT VI, 77 ; [O III, 132-133]), d'autre part le commentaire mordant de Schoock dans l'*Admiranda Methodus*, section Π, chap. I. C'est à partir d'une notion pareille que certains cartésiens amorceront la "philosophia novantiqua", synthèse originale d'aristotélisme et de cartésianisme ; voir A. Heereboord, *Meletemata Philosophica* (Lugd. Bat., 1654) ; *Philosophia Naturalis cum commentariis Peripateticis* (Lugd. Bat., 1663) ; J. de Raei, *Clavis Philosophiae Naturalis Aristotelico-Cartesianae* (Lugd. Bat., 1654) ; *De Sapientia Veterum* (Amstel., 1669) ; et en général J. Bohatec, *Die Cartesianische Scholastik in der Philosophie und reformierten Dogmatik des 17. Jahrhunderts,* Leipzig, 1912.

10. ———. 1642. *Excerpta P. Kircher, De magnete*.

AT XI, 635-639; B Op. II 1386-1389.

Annotations à l'œuvre d'Athanasius Kircher (1602-1680) *De magnete sive de arte magnetica* Romae: L. Grigarani, 1641.

Lettre du 5 janvier 1643 à Constantin Huygens : "... j'espère qu'elle ne retardera point l'impression de ma Philosophie, en laquelle j'approche de l'endroit où je dois traiter de l'aimant (8). Si vous jugez que le gros livre que vous avez de cette matière, duquel je ne sais point le nom (9), m'y puisse servir, et qu'il vous plaise de me l'envoyer, je vous en aurai obligation" (AT III 801; O VIII 2, 107; B379)

(8) Il s'agit des §§ 133-183 des *Prìncipia* IVa (AT VIII-1 275-311).

(9) Le *Magnes* d'Athanase Kircher (Rome, 1641, 916 p. in-4° ; Cologne, 1643, 797 p. in-4°); Huygens l'envoie à Descartes avec sa réponse du 7 janvier 1643 et un commentaire acerbe contre

les jésuites : « Voici d'ailleurs l'Aimant de Kircherus, où vous trouverez plus de grimace que de bonne étoffe, qui est l'ordinaire des jésuites. Ces écrivasseurs pourtant vous peuvent servir en des choses *quæ facti sunt, non juris* [qui sont d'ordre du fait et non du droit]. Ils ont plus de loisir que vous à se pourvoir d'expériences : on se peut prévaloir au besoin de leurs rapports » (AT III 802, B380).

11. ———. 1643. *Epistola Renati Des-Cartes Ad celeberrimum Virum D. Gisbertum Voetium*. Amstelodami: Ludovicum Elzevirium.

    La première édition est suivie de la traduction néerlandaise : *Brief van Rene Des Cartes aen den vermaerden D. Gisbertus Voetius*, Amsterdam 1643.

    AT VIII-2, 1-194; B Op. I 1493-1691.

    Traduction de Victor Cousin dans son édition des *Œuvres de Descartes*, vol. XI, Paris: Levrault, 1825, pp. 3-198 ; cette traduction a été reprise par Theo Verbeek dans *La Querelle d'Utrecht*, Paris: Les impressions nouvelles, 1988, pp. 327-399, avec l'omission de la sixième partie.

    "C'est ainsi que, croyant écrire une lettre, l'abondance de la matière a produit un livre. Je l'ai divisé en neuf parties, afin que chacune pût se lire à part, et peut-être avec moins d'ennui.

    Dans la première, je réponds à l'introduction du livre sur la *Philosophie Cartésienne* [1], dans laquelle l'auteur a voulu faire l'énumération sommaire de mes vices.

    Dans la seconde, je récompense M. Voet en racontant quelques-unes de ses actions qui m'ont d'abord fait connaître ses vertus.

    Dans la troisième, je parcours le premier et le second chapitre du même livre sur la *Philosophie Cartésienne*.

    Dans la quatrième, j'expose mon sentiment sur l'usage des livres et la doctrine de Voet.

    Dans la cinquième, je traite brièvement des autres chapitres de ce livre, c'est-à-dire du reste des deux premières sections.

    Dans la sixième, j'examine le livre de la *Confrérie de la Vierge*.

Dans la septième, je considère les mérites de M. Voet, et l'exemple de charité chrétienne et de probité qu'il a donné dans cet ouvrage.

Dans la huitième, je reviens au livre sur la *Philosophie Cartésienne*, et j'en réfute la préface (que je n'avais pas encore vue) et la troisième section.

Dans la neuvième, je réponds à la quatrième et dernière section du même livre, et je montre en même temps que ses auteurs sont coupables de la calomnie la plus odieuse et la plus inexcusable."

(AT VIII-2, 11-12; *La Querelle d'Utrecht*, cit., p. 330).

[1] Martin Schoock (1614-1669, élève de Voetius), *Admiranda Methodus Novae Philosophiae Renati De Cartes*, Ultrajecti [Utrecht] : ex officina Joannis van Waesberge, 1643 (traduction française par Theo Verbeek, dans *La Querelle d'Utrecht*. cit., pp. 157-320).

"Il paraît d'abord incontestable que, dans ses trois textes polémiques, Descartes retrouve et parfois développe certaines des thèses caractéristiques de sa philosophie.

1. Il invoque, contre Voet, la *bona mens* (AT VIII-1, 45, ll. 12-13), pour la mettre en équivalence avec l'*humana sapientia* (43, ll. 15-17), sur le modèle de la *Regula I* (AT X, 359, l. 6 - 360, l. 15).

2. Cette *bona mens* définit à son tour le domaine de la lumière naturelle, où la théologie révélée ne peut intervenir (AT VII, 598, ll. 5-11), conformément à une distinction déjà fixée par la *Regula III* (AT X, 370, ll. 16-25) et le *Discours de la Méthode* (AT VI, 28, l. 16 [O III, 100]) : ce départ entre les deux lumières, naturelle (raison) et révélée (foi, volonté), devient d'ailleurs aussitôt un argument contre ceux qui prétendent censurer des thèses philosophiques au nom de l'autorité religieuse ; car Voet passe d'une *facultas* (théologie) à une autre (médecine ou philosophie) par une faute de méthode, avant tout abus de pouvoir : "... censuram tuam theologicam absque ullo rationis praetextu ad quaestiones pure philosophicas

extendere volueris..." (*) (VIII-2, 132, ll. 17-19). La *ratio naturalis* (51, l. 31) régente absolument le domaine qu'elle suffit à définir (3). Ainsi, face au décret de l'Université qui impose aux professeurs en débat théorique d'être "...contentos modica libertate disserendi in singularibus nonnullis opinionibus..." (AT VII, 593, ll. 11-12), de se contenter d'une liberté restreinte de discussion sur plus d'une opinion, il faut revendiquer sans concession la liberté philosophique, absolue dans les limites de la raison : "... liberum enim semper fuit philosophari." (AT VIII-2, 3, ll. 11-12).

3. Par suite, Descartes mentionne aussi ici sa *Methodus ad quaerendam veritatem* (53, 4-5), dans les termes mêmes de la *Regula IV*, qu'il oppose, comme le faisaient les *Regulae III* et *X*, à la logique de l'Ecole : la *bona mens* ne peut s'exprimer en syllogismes (43, 17 sq.), sauf à sombrer dans la *Sophistarum Dialectica* (46, 16), "...puerilis illa Dialectica, cujus ope olim Sophistae, nulla scientiam habentes, de qualibet re copiose disserebant ac disputant"** (50,19-22). Et, conformément à la *Regula IV*, la méthode ne disqualifie les figures du syllogisme que parce qu'elle utilise, comme autant de modèles de la vérité, les figures mathématiques (AT VII, 596, 19). Aucune "magie" (ibid.) ne peut lui être honnêtement opposée, puisque c'est elle qui élimine la magie des formes substantielles (4). Il convient aussi de noter d'autres thèses, directement liées aux *Meditationes*, dont elles offrent un commentaire indispensable. Ainsi la réponse à G. Voet nous donne-t-elle successivement une nouvelle définition de l'innéisme comme ce que "...ex proprii ingenii viribus cognoscere possimus" (AT VIII-1, 166, 24-25, et 166, 15-167, 14), une remarquable définition de *ens* "...ab essendo sive existendo..." (60, 13), une très éclairante distinction entre le *verus Deus et l'aliquis deceptor summe potens* de la *Meditatio I* (60, 16-26) (5). Enfin la cause habituelle de l'erreur trouve, dans le même texte, une détermination temporelle, qui anticipe sur la question de la liberté d'indifférence : "Si vero loquimini de diversis temporibus, quia ille qui nunc habet veram fidem, vel evidentem alicujus rei naturalis scientiam, potest alio tempore illam non habere : hoc inferi tantum infirmitatem humanae

naturae, quae semper iisdem cogitationibus non immoratur, non autem quod in ipsa scientia ullum dubium debeat esse" (AT VIII-1, 170, 8-14)***. Quelques mois plus tard, nous retrouvons en effet cet argument, d'abord dans la discussion avec le P. Mesland — " la nature de l'âme est de n'être quasi qu'un moment attentive à la même chose"—, puis dans l'entretien avec la princesse Elisabeth : "... nous ne pouvons être continuellement attentifs à la même chose, quelque claires et évidentes qu'aient été les raisons qui nous ont persuadé ci-devant quelques vérités..." (6) ; ce thème, qui provient certes de la *Meditatio V* (AT VII, 69, 18-20), trouve donc dans la polémique avec Voet un relais sur le chemin de son ultime développement. Ainsi, ces écrits de circonstances appartiennent-ils pourtant indiscutablement à l'œuvre théorique de Descartes : ils en mobilisent explicitement maints thèmes récurrents, qu'ils amplifient et qui, en retour, les confirment (7)." (Jean-Luc Marion, *Préface* à *La Querelle d'Utrecht*, cit., pp. 9-10)

(*) "...comment vous avez voulu étendre, sans l'ombre d'une raison, votre censure théologique à des questions purement philosophiques... "

(**) "cette Dialectique puérile à l'aide de laquelle les anciens Sophistes, sans posséder aucune instruction solide, dissertaient et disputaient avec une admirable faconde sur n'importe quel sujet"

(***) "Si vous voulez parler d'instants différents, entendez-vous que celui qui a, maintenant, une foi véritable ou une connaissance évidente de quelque objet naturel pourrait ne pas l'avoir à un autre moment."

(3) G. Voet ne cesse, au contraire, de passer illégitimement d'un domaine à l'autre (AT VIII-1, 32,12-13 ; 33,12-18 ; 75,4-9; 88, 8-12 ; 132,15-20 ; 133,17-22 ; 242,18-243,14). Lorsque Descartes lui reproche d'usurper le rôle d'un prophète - "Sic ergo edam Voetius inter Prophetas" (103,27) -, il reprend en fait la mise en garde du *Discours de la Méthode* à propos de la théologie, pour laquelle "...il est besoin d'avoir quelque extraordinaire assistance du ciel, et d'être plus qu'homme." (*D.M.*, AT VI, 8,

16-17 [O III, 86]), et dont il faut s'abstenir "...nisi quatenus modo extraordinario et supernaturali a Deo impellebantur" (AT VIII-1, 124, 13-14). Mais "...omnes homines sumus" (VIII-1, 91, 28), "...des hommes purement hommes..." (D.M., AT VI, 3, 21-22 [O III, 82]).

(4) Les formes substantielles sont discutées, durant la querelle d'Utrecht, en AT VII, 587, 6 sq., et AT VIII-1, 32, 10 ; 26,13 ; et 62, 18.

(5) Il faut insister sur l'importance de cette remarque pour l'interprétation des définitions successives de Dieu dans les *Meditationes* (voir notre analyse dans *Sur le prisme métaphysique de Descartes*, Paris, 1986, § 16, p. 223 sq.).

(6) Voir successivement *Á Mesland*, 2 mai 1644, AT IV, 116, 6-8 [O VIII 1, 612; B 454], et *Á Élisabeth*, 15 septembre 1645, AT IV 295, 24-28 [O VIII 2, 228; B 521].

(7) On relèvera aussi l'étonnante validation du cogito dans l'hypothèse où l'on conclurait seulement à *sibi videri existere* (AT VIII-1, 165, 11 - 166, 6).

12. ———. 1644. *Specimina philosophiae: seu Dissertatio de methodo rectè regendae rationis et veritatis in scientiis investigandae: Dioptrice, et Meteora*. Amstelodami: Ludovicum Elzeverium.

"Ex Gallico translata, et ab Auctore perlecta, variisque in locis emendata."

AT VI, 517-720.

Édition critique avec une introduction en anglais par Corinna Lucia Vermeulen, *René Descartes, Specimina philosophiae. Introduction and Critical Edition*, Utrecht, "Quaestiones Infinitae", volume 53, (2007).

"La présente édition critique remplace la seconde partie du volume VI de l'édition d'Adam et Tannery, très insuffisante et manifestement constituée avec peu de soin : C. Vermeulen y a distingué plus d'une centaine d'erreurs (cf. p. 73)." Kavier Kieft, *Bulletin cartésien* XXXVIII (2009), *Archives de philosophie*, 2010/1 (Tome 73), p. 33.

"Ces essais, que j'ai moi-même écrits en français [...] ont été, quelque temps après, traduits en latin par un de mes amis ; la version m'a été transmise afin que je puisse changer, à discrétion, tout ce qui ne me plaisait pas [...] ce que j'ai fait en plus d'un endroit ; mais, peut-être, en ai-je laissé passer beaucoup d'autres ; et ces derniers seront facilement reconnaissables, par rapport aux autres, parce que, presque partout, le traducteur fidèle s'est efforcé de faire du mot à mot, tandis que j'ai souvent changé le sens des phrases, et j'ai cherché à corriger non pas ses mots, mais mon sens." (Note de Descartes après l'*Index*, traduction par Giulia Belgioioso).

"Le sieur Elzevier voyant avancer son impression des *Principes* de M. Descartes vers la fin fit solliciter l'auteur de lui permettre d'imprimer en même temps la traduction latine de ses *Essais*, après laquelle les étrangers qui n'avaient point l'usage de la langue française aspiraient depuis la première édition de ces *Essais*. Cette traduction avait été faite depuis peu de mois par M. [Étienne] de *Courcelles*, l'ancien ministre et théologien français, retiré en Hollande comme M. Rivet, M. Desmarets, M. Blondel, M. de Saumaise, et plusieurs autres savants calvinistes de France. M. de Courcelles avait embrassé le parti des arminiens, et avait même donné lieu à quelques zélés gomaristes de le soupçonner de socinianisme. Il était originaire d'Amiens en Picardie, mais il était né à Genève le 2 de mai 1586. Après avoir été quelque temps ministre des réformés en France, il avait passé en Hollande, et avait succédé à Simon Episcopius dans la chaire en théologie des remontrants à Amsterdam, où il eut Arnaud de Poelenbourg pour successeur, | et après lui Philippe de Limborch. Il mourut à Amsterdam le 22 de mai de l'an 1659."

(...)

"Il mit en latin le *Discours de la méthode*, la *Dioptrique*, et le traité des *Météores*. Mais il ne toucha point à la *Géométrie*, soit qu'il la jugeât au-dessus de sa portée, soit qu'il eût avis que M. Schooten se fût chargé de la traduire.

M. Descartes, ayant donné son consentement pour l'impression de la traduction des trois traités, fut prié de la revoir

auparavant, pour juger de sa conformité avec son original. Il ne refusa point d'user de son droit d'auteur, et se servit de cette occasion pour y faire quelques changements, comme nous avons remarqué qu'il fît à ses *Méditations* sur la traduction française de M. le duc de Luynes. Ce fut donc sur ses propres pensées qu'il fit des corrections, plutôt que sur les paroles du traducteur latin, à qui il rendit le témoignage d'avoir été fidèle et scrupuleux, jusqu'à s'efforcer de rendre le sens de l'auteur mot pour mot. Ce témoignage de M. Descartes en faveur de M. de Courcelles se trouvant à la tête de la traduction latine a dû satisfaire toutes les personnes raisonnables, qui auraient été en peine de savoir la raison des différences qui se trouvent entre le français et le latin; et il peut servir à condamner la mauvaise foi du sieur Jacques de Rèves, dit *Revius*, (*) qui à prétendu faire un crime d'infidélité à M. de Courcelles de tous ces changements, et qui a fait injure à M. Descartes en soutenant que tous ces endroits n'exprimaient point sa pensée." (Baillet II, chapitre XIV, 213-215.)

(*) [Jakob Reefsen (1586 - 1658). Voir l'édition moderne de son œuvre éditée par Aza Goudriaan: *Jacobus Revius, A Theological Examination of Cartesian Philosophy. Early Criticisms (1647)*, Leyden, Brill 2002.]

"Le caractère propre du *Discours de la méthode* peut se rechercher aussi dans une deuxième direction : les conditions de sa réception. En effet le " projet " implique, en 1637, l'ambition d'une réception, d'autant plus qu'il s'agit d'une très large réception pour laquelle Descartes renonce au latin et se confie au français : « Et si j'écris en français, qui est la langue de mon pays, plutôt qu'en latin, qui est celle de mes précepteurs, c'est à cause que j'espère que ceux qui ne se servent que de leur raison naturelle toute pure, jugeront mieux de mes opinions, que ceux qui ne croient qu'aux livres anciens » (*Discours de la Méthode*, [AT VI] 77, 24-30 [O III, 97]).

(...)

Lors de sa première parution, rien ne laisse supposer que l'usage du français en ait accru la diffusion, bien au contraire. Ainsi, selon A. Baillet, c'est son éditeur lui-même qui suscita, en

1644, une traduction latine du *Discours* et des *Essais* (amputés de la *Géométrie*), les fameux *Specimina*.

(...)

On ne saurait mieux avouer que le vrai public scientifique - " les étrangers " -, que l'éditeur, mieux peut-être que l'auteur, connaît et devine, n'avait pas encore lu le *Discours* et les thèses avant 1644. Bref, s'il fallait encore «... traduire les Essais de sa philosophie en une langue qui put contribuer à rendre toute la terre cartésienne », c'est que, justement, le texte français n'avait pas encore suffi à rendre toute cette terre cartésienne. Cet aveu en demi-teinte trouve une indiscutable confirmation dans le nombre comparé des différentes éditions ; alors qu'entre 1637 et la fin du siècle, le *Discours* et les *Essais* ne comptent, en français, que cinq éditions (Leyde 1637 ; Paris 1657, 1658, 1668 deux fois), les *Specimina*, à partir de 1644, en connaissent dix (Amsterdam 1644, 1650, 1656 deux fois, 1664, 1672, 1685, 1692 et Francfort s/M. 1692) ; ainsi les *Specimina* ne font que retrouver l'étiage habituel des autres latins de Descartes : les *Meditationes* reçoivent quatorze éditions jusqu'en 1709 (tandis que leur traduction française n'en offre que quatre) (2). La publication du *Discours* remonte certes à 1637, mais l'on peut soutenir l'hypothèse que sa lecture et sa réception ne commencent vraiment qu'en 1644, avec les *Specimina Philosophiae seu Dissertatio de Methodo Recte regendae rationis et veritatis in scientiis investigandae ; Dioptrice et Meteora. Ex Gallico translata et ab Auctore perlecta, variisque in locis emendata*.

Cette double publication, et donc le retard qu'elle impose à la réception du Discours de la méthode et des *Essais*, produit plusieurs paradoxes qui ouvrent autant de questions à la recherche. - Les *Specimina* n'offrent pas seulement une simple traduction latine d'un texte français de référence : ils se donnent comme une édition révisée par l'auteur et par lui ?) corrigée, *ab Auctore perlecta, variisque in locis emendata*. Sans surévaluer la portée de cette indication, que son éditeur a parfaitement pu introduire sans l'avis ou la collaboration de Descartes, il faut relever certaines modifications et ajouts que

l'on peut, raisonnablement, attribuer à l'auteur ; ne serait-ce, par exemple, que la célèbre définition marginale de l'idée comme «... omni re cogitata, quatenus habet tantum esse quoddam objectivum in intellecto » [AT VI, 559]. L'étude systématique des variantes entre le texte français et sa version en latin n'a été, jusqu'ici, qu'esquissée (en particulier par E. Gilson) ; elle seule déterminera quel texte a effectivement été lu par le public philosophique." (Jean-Luc Marion, *Ouverture*, dans: Henry Méchoulan (éd.), *Problématique et réception du* Discours de la méthode *et des* Essais, Paris: Vrin 1988, pp. 18-20)

(2) Nous suivons ici les indications fournies par A. J. Guibert, *Descartes. Bibliographie des œuvres de Descartes publiées au XVIIème siècle*, Paris, C.N.R.S., 1976. Sur ces questions, on tiendra compte des remarques de P. Costabel, " Propos de bibliographie matérielle. Editions et émissions des œuvres de Descartes de 1657 à 1673 ", in *Bulletin Cartésien* V, *Archives de Philosophie*, 1976, p. 445-456.

13. ———. 1644. *Cartesius (Ms. de Leibniz).*

Bibliothèque Royale de Hanovre. MS. de Leibniz. Catalogué par Eduard Bodemann, p. 54 de son ouvrage cité p. 549 ci-avant (*), note *a* avec l'indication : « *Bl. 19-22, ohne Uebersch., fehlerhafte, z. Th. von L. corrig. Abschr.* ».

(*) [*Die Leibniz-Handschriften der Kôniglichen ôffentlichen Bibliothek zu Hannover*, von Dr. Eduard Bodemann (Hannover und Leipzig, 1895)]

AT XI, 647-653; B Op. II, 1394-1405.

Édition critique par Vincent Carraud: "Cartesius"*, Bulletin Cartésien* XV, *Archives de Philosophie*, 1985, 3, pp.1-6; "*Cartesius*, ou les pilleries de Mr. Descartes" présentation, traduction et annotation par Vincent Carraud, *Philosophie*, mai 1985, pp. 3-19.

Cette copie MS. remplit deux grandes feuilles, dont chacune est pliée en deux : soit en tout quatre feuillets, ou huit pages d'écriture. Elle comprend deux parties bien distinctes, dont la seconde seule porte un titre : *Annotationes quas videtur D. des*

Cartes in sua Principia Philosophiae scripsisse. Cette seconde partie commence au tiers environ de la 6e page, et continue jusqu'à la fin de la 8e. Tout ce qui précède, pp. 1, 2, 3, 4, 5 et 6 (premier tiers de celle-ci), se compose de pensées ou réflexions détachées, dont chacune est séparée de la suivante par un signe : deux petits traits horizontaux, barrés de deux petits traits verticaux. (Le même signe sépare encore la seconde partie de la première.) Cette première partie porte seulement en tête le nom, écrit après coup et au crayon, de *Cartesius*. Les huit pages sont de la même écriture, qui n'est plus celle de Leibniz ; mais celui-ci a fait, de sa main, quelques corrections à des endroits fautifs. Le fait qu'il ait corrigé lui-même ce texte, montre qu'il y attachait une certaine importance, et qu'il le croyait sans doute de Descartes.

Est-ce bien cependant un texte authentique de notre philosophe ? Nous n'oserions l'assurer. Toutefois, dans la première partie, la date d'une observation astronomique, *20 sept. 1642* (p. 650), serait un argument favorable, et de même quelques renvois aux *Principes*, dans la seconde partie. (Voir ci-avant, p. 545.)" (AT XI, p. 647).

"Cette série de notes, découverte tardivement, constitue une énigme pour les chercheurs. Geneviève Rodis-Lewis a plaidé énergiquement en faveur de son authenticité (166), verdict que Pierre Costabel confirme sans hésitation (167), alors que Vincent Carraud y voit un assemblage éclectique et semble incliner à croire à une série de notes de lecture que Descartes aurait prise sur d'autres auteurs (168), plutôt que vers un ensemble de pensées appartenant au corpus philosophique cartésien." (Vlad Alexandrescu, *Croisées de la Modernité. Hypostases de l'esprit et de l'individu au XVIIe siècle*, Bucarest: Zeta Books 2012, p. 110)

(166) G. Rodis-Lewis, « Cartesius », *Revue philosophique*, 2, 1971, p. 211-220.

"Avant d'aborder les points les plus originaux de ces pages, il convient donc de se demander quelle pourrait être leur provenance.

Le caractère fragmentaire des pensées, leur insertion parmi certaines observations scientifiques répondent bien au nom de miscellanea qu'emploie Leibniz, pour évoquer les registres que Clerselier lui a communiqués, ainsi qu'à « Mons. de Tschirnaus » (5). Or Tschirnhaus est l'auteur de cette copie *Cartesius*, revue et corrigée de la main de Leibniz (6). Leibniz parle de « deux volumes de miscellanea, reliés l'un en in-4°, l'autre en in-8°, où il y a beaucoup de choses physiques, des expériences et observations anatomiques de Mons. des Cartes, quelques expériences sur les métaux, et en fait de médecine (... *lacune*). Je m'étonne pourtant, ajoutait-il, qu'il n'y a rien davantage de cette nature » (7). Les indications de Leibniz correspondent parfaitement à la description du « registre en petit

quarto », coté E dans l' « Inventaire succinct des Ecrits qui se sont trouvés dans les coffres de Monsr. Descartes après son décès à Stockholm en feb. 1650 » (8) : tableau des angles de réfraction selon Vitellio, poids des métaux, remarques sur l'aimant, et plusieurs séries de feuillets sur la génération des animaux, les « remèdes et vertus des médicaments », et « prenant ledit registre de l 'autre côté, il y a seize pages d observations sur la nature des plantes et des animaux »." pp. 213-214 (Geneviève Rodis-Lewis, "Cartesius", *Revue philosophique de la France et de l'Étranger*, 2, 1971, pp. 211-220)

14. ———. 1644. *Principia philosophiae*.

AT VIII-1, 1-329; la première édition est précédée d'une lettre-dédicace à la princesse Élisabeth de Bohême (1618-1680); B Op. 1706-2211.

Traduction : *Principes de la philosophie, Première partie, sélections d'articles des parties 2, 3, et 4 et Lettre-Préface*, Texte latin de Descartes. Texte français de l'abbé Picot. Traduction nouvelle par Denis Moreau. Introduction et notes par Xavier Kieft, Paris: Vrin 2009.

Descartes utilise pour la première fois l'expression "principes de ma philosophie" dans la lettre du février 1634 à Mersenne : "Pour la cause qui fait cesser le mouvement d'une pierre qu'on a jetée, elle est manifeste ; car c'est la résistance du corps de l'air, laquelle est fort sensible. Mais la raison de ce qu'un arc retourne étant courbé est plus difficile, et je ne la puis expliquer sans les principes de ma Philosophie, desquels je pense être obligé dorénavant de me taire." (AT I, 287; O VIII 1, 112; B 65).

"Que signifie « philosophie » ? Qu'est-ce qu'un cours de philosophie ? Comme l'indique la *ratio studiorum* des collèges jésuites, et plus généralement la très grande majorité des cours de philosophie, la philosophie comprend quatre parties distinctes : la logique, la physique, la métaphysique et la morale (2). Témoignent de la quadripartition de la philosophie le cours que Descartes a choisi de lire en 1640, celui d'Eustache de

Saint-Paul, *Summa Philosophiae quadripartita de rebus Dialecticis, Moralibus, Physicis et Metaphysicis* (Paris, 1609) (3) ou encore, parmi bien d'autres en latin, le premier cours complet de philosophie en langue française, celui de Scipion Dupleix : *Corps de Philosophie contenant la Logique, la Physique, la Métaphysique et l'Ethique* (4). La philosophie dont Descartes livre les *Principia* désigne donc, conformément à son projet initial, le « corps de philosophie tout entier » (AT IX-2, 17 ; Alquié III, 782). C'est pourquoi Descartes peut l'appeler sa Philosophie (5) ou sa *Summa philosophiae* (6), selon une appellation également scolaire. Une somme ne désigne pas un traité complet et qui descend dans les détails (c'est-à-dire « approfondit ») (7), mais au contraire une présentation d'ensemble, sommaire au sens propre, un abrégé. Au demeurant, le texte de la Lettre-préface aux *Principes* attribue-t-il à la philosophie la même étendue et une répartition analogue, selon la comparaison célèbre : « Ainsi toute la philosophie est comme un arbre, dont les racines sont la Métaphysique, le tronc est la Physique, et les branches qui sortent de ce tronc sont toutes les autres sciences, qui se réduisent à trois principales, à savoir la Médecine, la Mécanique et la Morale » (AT IX-2, 14 ; Alquié III, 779-780)." (Fréderic de Buzon, Vincent Carraud, *Descartes et les « Principia » II. Corps et mouvement*, Paris: Presses universitaires de France 1994, p. 10)

(2) Voir la présentation donnée par Etienne Gilson dans ses *Commentaires au Discours de la méthode*, Paris, Vrin, 6e éd., 1987, p. 117-119.

(3) Plusieurs fois réédité jusqu'en 1626 : voir AT III, 196, et les art. Eustache de Saint-Paul (par R. Ariew et F. Ferrier) du *Dictionnaire des philosophes* et de l'*Encyclopédie philosophique*, Paris, PUF, 1993 et 1992. Pour Abra de Raconis, *Totius philosophiae, hoc est Logicae, Moralis, Physicae et Metaphysicae... tractatio*, voir AT III, 236. Pour les Conimbres, Tolet et Rubius, voir AT III, 194-196, et Etienne Gilson, *Index scolastico-cartésien*, Paris, Vrin, 1979, p. VIII-IX.

(4) Titre de 1632, qui reprend les éditions des parties séparées de 1600,1603, 1607 et 1610, souvent rééditées jusqu'en 1645. La collection du « Corpus des œuvres de philosophie en langue française » (Paris, Fayard) a publié ce *Corps de philosophie* (la logique, la physique, la métaphysique et l'éthique sont parues respectivement en 1984,1990,1992 et 1994, les trois dernières éditées par Roger Ariew). Deux motifs au moins rendent ces cours tout à fait intéressants. D'une part, ils permettent de prendre conscience de la nouveauté de la physique cartésienne et de son intérêt philosophique propre — tout en mesurant le très grand nombre de questions que Descartes ne traite pas. D'autre part, ces manuels imposent pour plusieurs siècles le vocabulaire technique de la philosophie en français. Voir les art. « Scipion Dupleix » [1569 - 1661] (par R. Ariew et J.-R. Armogathe) des dictionnaires cités ci-dessus.

(5) Par exemple dans les Lettres à Mersenne du 3 décembre 1640, ou du 2 février 1643 (AT III, 252, [O VII, 1, 429; B 289] AT III 615 [O VIII 1, 502; B 385]; Alquié III, 15).

(6) Lettre à Huygens du 31 janvier 1642 (AT III, 782; [O VIII 2, 99; B 342] Alquié II, 920).

(7) « Approfondir » ne signifie pas « remonter » aux principes, mais « descendre » dans toutes les conséquences, ou, comme dit Pascal, « pénétrer vivement et profondément les conséquences des principes » (fr. 511 [édition Lafuma des *Œuvres complètes*, coll. « L'Intégrale », Paris, Seuil, 1963]. Au demeurant Pascal « trouve bon qu'on n'approfondisse pas l'opinion de Copernic » (fr. 164). Les *Principia*, au moins dans leurs deux premières parties, n'approfondissent pas (fr. 553). Voir Vincent Carraud, *Pascal et la philosophie*, Paris, PUF, 1992, chap. III.

Dans une lettre à Mersenne du 30 septembre 1640 (avant même l'envoi du manuscrit des *Meditationes*) Descartes écrit : "Je ne ferai point encore mon voyage pour cet hiver (11) ; car, puisque je dois recevoir les objections des jésuites dans 4 ou 5 mois, je crois qu'il faut que je me tienne en posture pour les atteindre.

Et cependant j'ai envie de relire un peu leur philosophie, ce que je n'ai pas fait depuis 20 ans (12), afin de voir si elle me semblera maintenant meilleure qu'elle ne faisait autrefois. Et pour cet effet, je vous prie de me mander les noms des auteurs qui ont écrit des cours de philosophie et qui sont le plus suivis par eux, et s'ils en ont quelques nouveaux depuis 20 ans ; je ne me souviens plus que des Conimbres (13), Toletus (14) et Rubius (15).

Je voudrais bien aussi savoir s'il y a quelqu'un qui ait fait un abrégé de toute la philosophie de l'École, et qui soit suivi ; car cela m'épargnerait le temps de lire leurs gros livres. Il y avait, me semble, un Chartreux ou Feuillant qui l'avait fait ; mais je ne me souviens plus de son nom (16)." (AT III, 185; O VIII 1, 409; B 272)

(11) Voir à Mersenne, 30 juillet 1640 (AT III, 127; [O VIII 1, 389; B 262] : Descartes renonçait au voyage envisagé pendant l'été 1640.

(12) Clerselier-Lettres : « depuis 20 ans », omis.

(13) Il s'agit des *Commentaires* sur Aristote, qui constituaient un cours complet de philosophie, établis et publiés à partir de 1592 par des professeurs jésuites du collège de Coimbra, au Portugal (E. Goës, C. de Magellhães et S. Couto) sur la demande du général Claudio Aquaviva et du provincial du Portugal Pedro de Fonseca.

(14) Francisco Toledo (Toletus, 1532-1596), jésuite espagnol, en 1593, enseigna au Collège romain ; il publia à partir de 1561 de nombreux commentaires d'Aristote.

(15) Clerselier-Lettres : « Toletus et Rubius », omis. Antonio Rubio (Ruvius, 1548 - 1615), jésuite espagnol, auteur de plusieurs commentaires d'Aristote.

(16) Eustache de Saint-Paul (Asseline), religieux feuillant, *Summa Philosophica quadripartita*, Paris, 1609; voir à Mersenne, 11 novembre (AT III, 233 l. 11, [O VIII 1, 421] B 283), 3 décembre 1640 (AT III, 251 l. 15, [O VIII 1, 421] B 289 et 22 décembre 1641 (AT III, 470 l. 7 sq., [O VIII 1, 481] B 334).

Voir aussi Benoist Pierre, *La Bure et le Sceptre. La congrégation des Feuillants dans l'affirmation des États et des pouvoirs princiers (vers 1560-1660)*, Paris, 2006 (CD-Rom, annexe III).

Première annonce du livre dans la lettre du 11 novembre 1640 à Mersenne : "Pour la philosophie de l'École, je ne la tiens nullement difficile à réfuter, à cause des diversités de leurs opinions ; car on peut aisément renverser tous les fondements desquels ils sont d'accord entre eux ; et cela fait, toutes leurs disputes particulières paraissent ineptes. J'ai acheté la *Philosophie* du Frère Eustache de Saint-Paul, qui me semble le meilleur livre qui ait jamais été fait en cette matière ; je serai bien aise de savoir si l'auteur vit encore (7).

(...)

Je répondrais très volontiers à ce que vous demandez touchant la flamme d'une chandelle, et choses semblables ; je vois bien que je ne vous pourrai jamais bien satisfaire touchant cela, jusqu'à ce que vous ayez vu tous les principes de ma philosophie, et je vous dirai que je me suis résolu de les écrire avant que de partir de ce pays, et de les publier peut-être avant un an. Et mon dessein est d'écrire par ordre tout un cours de ma philosophie en forme de thèses, où, sans aucune superfluité de discours, je mettrai seulement toutes mes conclusions, avec les vraies raisons d'où je les tire, ce que je crois pouvoir faire en fort peu de mots ; et au même livre, de faire imprimer un cours de la philosophie ordinaire, tel que peut être celui du Frère Eustache, avec mes notes à la fin de chaque question, où j'ajouterai les diverses opinions des autres, et ce qu'on doit croire de toutes, et peut-être à la fin je ferai une comparaison de ces deux philosophies (9). Mais je vous supplie de ne rien encore dire à personne de ce dessein, surtout avant que ma *Métaphysique* soit imprimée ; car peut-être que, si les Régents le savaient, ils feraient leur possible pour me donner d'autres occupations, au lieu que, quand la chose sera faite, j'espère qu'ils en seront tous bien aises. Cela pourrait aussi peut-être empêcher l'approbation de la Sorbonne, que je désire, et qui me semble pouvoir extrêmement servir à mes desseins : car je vous

dirai que ce peu de métaphysique que je vous envoie contient tous les principes de ma physique.

(...)

Je verrai aussi le cours de philosophie de Monsieur de Raconis (12), qui, je crois, se trouvera ici : car s'il était plus court que l'autre (13), et aussi bien reçu, je l'aimerais mieux. Mais je ne veux rien faire en cela sur les écrits d'un homme vivant, si ce n'est avec sa permission, laquelle il me semble que je devrais aisément obtenir, lorsqu'on saura mon intention, qui sera de considérer celui que je choisirai, comme le meilleur de tous ceux qui ont écrit de la philosophie, et de ne le reprendre point plus que tous les autres. Mais il n'est point temps de parler de ceci, que ma *Métaphysique* n'ait passé." (AT III, 230-234; OT VIII, 1, 421-423; B 283)

(7) Eustache de Saint-Paul Asseline, religieux feuillant (1573 - 26 décembre 1640), est l'auteur d'une *Summa philosophica quadripartita* (Paris, 1609) (*). Sur lui, voir l'article de M. Standaert (*Dictionnaire de spiritualité*, t. 4-2, Paris, 1961, col. 1701-1705).

(9) On sait que le projet, considérablement modifié, donnera en 1644 les *Principia philosophiae*.

(12) Charles-François Abra de Raconis [1580 - 16 juillet 1646], *Totius Philosophiae hoc est Logicae, Moralis Physicae et Metaphysicae : brevis & accurata tractatio*, Paris, 1637 [première édition 1617].

(13) La *Summa* d'Eustache de Saint-Paul.

(*) [Le premier volume de la *Summa philosophica quadripartita, de rebus Dialecticis, Moralibus, Physicis et Metaphysicis*, contenait la logique et l'éthique, le second la physique et la métaphysique.]

"En réalité, les *Principia*, annoncés dans cette lettre pour la première fois, seront un livre d'une conception totalement différente. Il ne s'agit pas d'une brève série de thèses, mais d'un grand livre de 300 pages (in-4°) (2); il ne contient pas un texte de philosophie scolastique comme point de comparaison; et,

par conséquent, sa composition était un travail d'au moins trois années (3). Nous n'avons aucune idée de la raison qui conduisit Descartes à abandonner son premier projet ; sa correspondance reste silencieuse sur ce point (4). Mais sa première déclaration reste très importante, parce qu'elle nous rappelle qu'on doit lire les *Principia* comme un livre de classe, un manuel. C'était une aide-mémoire d'instruction, qui portait comme un défi à une légion (toujours croissante) de publications scolastiques contemporaines et notamment, en France, aux deux manuels dont la correspondance de Descartes signale la lecture à l'automne de 1640, avant de se mettre à écrire les *Principia*: celui du feuillant Eustache de Saint-Paul (1573-1640), et celui d'un client de Richelieu, évêque de Lavaur, François d'Abra de Raconis (mort en 1646) (5)." (Lawrence W.B. Brockliss, "Rapports de structure et de contenu entre ls *Principia* et les cours de philosophie des collèges", dans : Jean-Robert Armogathe, Giulia Belgioioso (éds.), Descartes: *Principia philosophiae* (1644-1994), Napoli, Vivarium 1996, pp. 491-492)

(2) Dans l'édition latine de 1644 in-4°.

(3) Les *Principia* ont été écrits au château d'Endegeest près de Leyde.

(4) Selon sa correspondance, il avait abandonné ce projet en décembre 1641, mais il est possible qu'il ait pris la décision beaucoup plus tôt : voyez A.T., n, p. 470: à Mersenne 22 décembre 1641.

(5) Eustache Asseline dit Eustachius de Sancto Paulo, *Summa philosophiae quadrapartita*, Paris, C. Chastellain, 1609; De Raconis, *Totius philosophiae brevis tractatio*, 4 parties en deux volumes, Paris, De la Noue, 1622. Il y avait des éditions de tous les deux à Paris jusqu'en 1640. Ils furent lus par Descartes en novembre 1640 : voyez AT III, pp. 233, 251: correspondance avec Mersenne, 11 novembre et 3 décembre [O VIII 1, 424-425; B 283; O VIII 1, 427-429; B 289].

"En résumé : les *Principia* appartiennent à une tradition bourgeonnante, une tradition toujours relativement neuve, celle du manuel de philosophie. Cependant aux mains de

Descartes, cette tradition fut développée dans une direction nouvelle. Les sciences de la philosophie étant réduites à deux, la physique devenait une science inorganique, et la méthode syllogistique, scolastique et historique était remplacée par une méthode quasi-euclidienne. Donc, les *Principia* n'étaient pas un manuel de type traditionnel. Mais, en revanche, il s'agissait certainement d'un manuel dont la structure, le contenu et la méthode d'argumentation étaient déterminés par le besoin de produire un ouvrage manifestement nouveau, mais suffisamment traditionnel pour retenir l'intérêt des lecteurs aristotéliciens et susceptible de gagner leurs esprits comme un travail plus solide et plus moderne que ses concurrents. C'est-à-dire, pour comprendre les *Principia* comme texte, on doit réaliser qu'il s'agit d'un livre étroitement associé avec la philosophie des écoles, et pas simplement parce que Descartes restait dans une certaine mesure sous l'influence d'Aristote.

Il est en effet possible qu'un événement dans l'enseignement de la philosophie puisse expliquer pourquoi Descartes a composé les *Principia* au début des années quarante. Il semble qu'il prit la décision d'écrire un manuel pendant le mois d'octobre 1640, à la suite d'une première décision de lire des livres de philosophie scolastique, annoncée à Mersenne le 30 septembre. Cependant la décision de composer un manuel n'était pas une conséquence inévitable de sa lecture d'Eustache, parce que son dessein original était seulement de se préparer mieux pour répondre à une attaque lancée par les jésuites de Paris contre sa *Dioptrique* et ses *Météores* de 1637, attaque que Descartes avait du reste provoquée (52). Il est probable que cette seconde décision peut être attribuée aux activités du médecin mécaniste à l'université d'Utrecht, Henri Regius (1598-1679). Regius se disait disciple de Descartes : il avait été autorisé à expliquer les problèmes de physique à Utrecht en mai de 1640 et le 10 juin il organisa une soutenance publique où on discuta des mérites d'une physiologie mécaniste. Son enthousiasme lui gagna l'hostilité des autres professeurs, surtout du théologien Voetius, qui croyait que la philosophie mécaniste menaçait la foi : Descartes, pendant l'été, fut obligé de défendre son acolyte devant les autorités universitaires (53). On ne peut pas douter

que Regius fût un esprit fort, qui développait le mécanisme dans une direction matérialiste et anti-cartésienne (54). En conséquence, on peut suggérer que Descartes se trouva forcé de préparer son manuel pour révéler au monde (hollandais d'abord) quelle était en réalité sa physique et pour démontrer sa compatibilité avec la foi chrétienne (calviniste ou catholique). On doit rappeler que les *Principia* furent publiés d'abord à Amsterdam en latin et que dans le paragraphe final Descartes soumettait son livre au jugement de l'Eglise, pas spécifiquement l'Eglise catholique (55)." (Lawrence W.B. Brockliss, *op. cit.*, pp. 508-510)

(52) Un jésuite parisien, Bourdin, avait organisé une soutenance au collège de Clermont à Paris où les idées de Descartes étaient critiquées, et Descartes, par Mersenne, avait demandé que la Société lui communiquât ses objections directement : voyez AT III, pp. 160-85: lettres à Mersenne, 30 août, 15 et 30 septembre [1640; O VIII 1, 401-405; B 269; O VIII 1, 405-408; B 271; O VIII 1, 408-414; B 272].

(53) AT II pp. 568-9 [lettre de Regius à Descartes du 14 juillet 1639; B 217], 616-7 [lettre de Regius à Descartes, octobre-novembre 1639; B 223] , 624-5 [lettre de Regius à Descartes du 3 décembre 1639 B 229]; III, pp. 1 [lettre de Regius et Emilius à Descartes, janvier 1640; B 238], 60-1 [lettre de Regius à Descartes du 5 mai 1640; B 251], 63-72 [lettre de Regius à Descartes du 5 mai 1640; B 251], 202-3 [lettre de Regius à Descartes du 7 octobre 1640; B 276]: correspondance entre Descartes et Regius, 1639-40.

(54) Regius continuait à soutenir une physique mécaniste à l'Université d'Utrecht en 1641 et Descartes commençait à critiquer plus fortement les idées de son admirateur : voyez AT III, pp. 365-75, 443 , 462-4. Aujourd'hui on considère Regius comme un mécaniste dont les idées se développaient indépendamment de Descartes : voyez P. Dibon, *Der Cartesianismus in den Niederlanden*, in *Der Philosophie des 17. Jahrhunderts*, hrsg. von J.-P. Schobinger, Basel, Schwabe, 1992, vol. II, pp. 357-358.

(55) AT IX-2, p. 325. Il est intéressant de constater que dans la lettre à Mersenne où Descartes annonçait son intention d'écrire un manuel (11 novembre), il passa sa colère sur Voetius et informa Mersenne de la tentative du théologien hollandais pour réduire Regius au silence : AT IX-2, p. 231.

Descartes apprend que le Père Eustache est mort : "Je suis désolé de la mort du Père Eustache ; car encore que cela me donne plus de liberté pour faire mes notes sur sa philosophie, j'eusse toutefois mieux aimé le faire avec sa permission, et de son vivant. (22)" (AT III, 286; O VIII 1, 445; B 299)

(22) Voir à Mersenne, décembre 1640 (AT III, 259, [O VIII 1, 433-434] B 291). Eustache de Saint-Paul est mort le 26 décembre 1640.

Le projet originel est abandonné dans la lettre à Mersenne du 22 décembre 1641 : "Je vous renvoie la lettre du Père Bourdin, que j'ai trouvée peu judicieuse ; mais je n'en ai pas voulu toucher un seul mot, à cause que vous me l'aviez défendu (5). Je crois bien que son Provincial l'a envoyé, pour vous demander s'il était vrai que j'écrivisse contre eux, mais non pas pour me menacer de choses qu'ils savent bien que je ne crains pas, et qui peuvent bien plus m'obliger à écrire que m'en empêcher. Il est certain que j'aurais choisi le *Compendium* du Père Eustache, comme le meilleur, si j'en avais voulu réfuter quelqu'un; mais aussi est-il vrai que j'ai entièrement perdu le dessein de réfuter cette philosophie; car je vois qu'elle est si absolument et si clairement détruite, par le seul établissement de la mienne, qu'il n'est s besoin d'autre réfutation; mais je n'ai pas voulu leur en rien écrire, ni leur rien promettre, à cause que je pourrai peut-être changer de dessein, s'ils m'en donnent occasion. Et pendant je vous prie de ne craindre pour moi aucune chose ; car je vous assure que, si j'ai quelque intérêt d'être bien avec eux, ils n'en ont peut-être pas moins d'être bien avec moi, et de ne se point opposer à mes desseins : car, s'ils le faisaient, ils m'obligeraient d'examiner quelqu'un de leur cours, et de l'examiner de telle sorte, que ce leur serait une onte à jamais." (AT III, 470; O VIII 1, 481; B 334)

(5) Le P. Bourdin avait donc remis à Mersenne un écrit confidentiel, pensant bien que Descartes en aurait connaissance ; et celui-ci envoie à Mersenne une lettre destinée à être lue par le P. Dinet (voir dossier Jésuites).

Lettre à Constantin Huygens du 29 juillet 1641 : "Pour la Physique, ou plutôt le Sommaire de toute la philosophie, dont il vous plaît me demander des nouvelles, |e ne saurais le faire si tôt imprimer à cause qu'il n'est que peu commencé (6) mais je suis résolu de n'entreprendre aucune autre chose jusqu'à ce qu'il soit achevé. L'épreuve que j'ai faite jusqu'ici des jugements et des objections qu'on me peut faire me donne espoir que je n'aurai pas beaucoup de peine à maintenir mes opinions lorsque je les aurai publiées, et que cela ne me détournera point du dessein que j'ai de continuer à chercher ce que j'ignore." (AT III, 773; O VIII 2, 95; B 323)

(6) Descartes écrivait déjà à Mersenne le 11 novembre 1640 (AT III 233, [O VIII 1,] B 283) : « Mon dessein est d'écrire par ordre tout un Cours de ma philosophie en forme de Thèses, où, sans aucune superfluité de discours, je mettrai seulement toutes mes conclusions, avec les vraies raisons d'où je les tire, ce que je crois pouvoir faire en fort peu de mots », et encore : 31 décembre 1640 (AT III 276, [O VIII 1, 441] B 293) : « J'ai résolu d'employer à écrire ma Philosophie en tel ordre quelle puisse aisément être enseignée. »".

Lettre à Constantin Huygens du 31 janvier 1642 : "Peut-être que ces guerres scolastiques seront cause que mon *Monde* se fera bientôt voir au monde (24), et je crois que ce serait dès à présent, sinon que je veux auparavant lui faire apprendre à parler latin; et je le ferai nommer *Summa Philosophiæ* (25), afin qu'il s'introduise plus aisément en la conversation des gens de l'École, qui maintenant le persécutent et tâchent à l'étouffer avant sa naissance, aussi bien les Ministres (26) que les jésuites". (AT III, 782; O VIII 2, 99-100; B 342)

(24) Le jeu de mots est de Huygens : voir à Descartes, 15 (AT II, 679, B 212) et 28 mai 1639 (AT II, 680, B 214).

(25) Voir à Mersenne, 22 décembre 1641 (AT III 465, [O VIII 1, 480-481] B 333).

René Descartes. Bibliographie Chronologique et Annotée (Quatrième Partie: (1645-1650)

Bibliographie

Pour la liste des éditions de références et des abréviations voir René Descartes. Outils de recherche: Biographies, Dictionnaires et Lexiques des Ses Œuvres

1. Descartes, René. 1645. *Lettre apologétique aux Magistrats de la ville d'Utrecht Contre Messieurs Voëtius, Père et Fils*.

   Première publication : traduction latine *Querela apologetica ad amplissimum Magistratum Ultrajectinum*, Vristadium: L. Misopodem, 1656; texte français dans: Claude Clerselier (éd.), *Lettres de Mr. Descartes* (3 vols.) Paris : Charles Angot, III : 1667, pp. 1-49.

   AT VIII-2 201-273; B Op. II, 117-193.

   "La *Lettre Apologétique*, adressée non pas exactement "aux Magistrats" mais à la Municipalité ou Corps de Ville d'Utrecht (1) est le dernier mot de Descartes sur l'affaire et la suite immédiate du procès de Groningue. D'après Baillet, en effet, Descartes "envoya incontinent ces Actes (c'est-à-dire le procès verbal de l'action contre Schoock) aux Magistrats d'Utrecht sans prétendre néanmoins leur reprocher leur mauvaise conduite, ou se constituer parti contre Voetius et Dematius, mais pour voir s'ils feraient quelque chose en réparation du passé." (Baillet, *Vie de M. Descartes*, vol. II, p. 257) (2). Mais la Municipalité, sans doute lassée de l'affaire et craignant de

nouvelles polémiques, se contenta de réitérer son interdiction de publier des écrits pour ou contre Descartes (Kernkamp I [G. W. Kernkamp, éd., *Actea et Decreta Senatus ; Vroedschapsresolutiën en andere bescheiden betreffende de Utrechtsche Academie*, vol. I, Utrect, 1936], p. 218 ; cf. Baillet II, p. 257-258) et envoya une copie de ce décret à Descartes. Cette nouvelle interdiction était dirigée contre les adversaires de Descartes : Voetius était en train de résumer l'impression de la lettre ouverte de Schoock à Descartes, apparemment afin de discréditer le jugement de Groningue (Baillet II, p. 258). Mais le geste ne fut pas compris. Descartes expédia immédiatement la *Lettre Apologétique*, prête probablement depuis longtemps. Elle arriva Utrecht le 13 juin 1645, la lettre étant datée d'Egmond le 16 juin selon le nouveau calendrier : on suivait aux Pays-Bas le style "ancien", rejetant par anti-papisme le calendrier grégorien). Dans les *Actes*, en effet, on fait état d'un "latijnse missiv van Des Cartes aen Burgermeesteren ende Vroetschap deser Stadt, gedateert t'Egmond den XVIen deser, stilo novo" ("une missive latine de Descartes au Bourgmestres et à la municipalité de cette ville, en date d'Egmond, le 11 de ce mois, selon le style nouveau" Kernkamp, I, p. 219). On demanda au Secrétaire de la traduire, non pas parce que sans cela on ne pourrait en prendre connaissance (la plupart doivent avoir bien connu le latin (3)), mais probablement pour faire traîner les choses en longueur.

Ce premier texte était en latin, et c'est également en latin que la *Lettre* fut, pour la première fois publiée, en 1656. Toutefois, en 1648, Descartes avait fait faire deux traductions, l'une en néerlandais l'autre en français, qu'il envoie encore à Utrecht où elles sont reçues le 24 mars. De ces deux textes le premier seul a été conservé. Descartes a noté sur la dernière page :

"J’ai fait traduire cet écrit en flamand ; mais pour ce que c’est une langue que j’entends fort peu, je prie ceux qui le liront, d’avoir principalement égard au français, duquel seul je puis répondre." (AT YIII-2, 275).

Cette missive aussi est ignorée, et Descartes lui-même part, tout d'abord pour la France et, en 1649, pour la Suède où il

mourra en 1650. Excepté le texte néerlandais dont nous avons parlé, les originaux envoyés à Utrecht sont perdus. Cependant Descartes en avait conservé des copies qui, dans l'inventaire dressé après sa mort, figurent ainsi :

”L.- Renati Descartes querela apologetica ad amplissimum Magistratum Ultrajectinum contra Voetium et Dematium.

O.- Un écrit contenant neuf cahiers en forme de Lettre à Messieurs... contre le Sr Voetius.” (voir AT VIII-2, vii.)

Aussi est-ce sous le titre de *Querela Apologetica* qu'on publiera en 1656 le texte latin. L'occasion de cette édition est, comme le précise la page de titre, la *Theologia Naturalis* de Paul Voet, publiée également en 1656, dans laquelle celui-ci est revenu sur des questions vieilles de dix ans. Dans cet ouvrage, en effet, Paul, pour protester une nouvelle fois de l'honneur de son père, avait publié (p. 253-264) les témoignages de l'Académie, et du Consistoire, attestant de sa probité, le décret de la Municipalité qui avait déclaré la *Lettre à Voet* un "écrit diffamatoire", un jugement des trois professeurs de droit de Leyde sur le procès de Groningue, et le jugement de la Cour d'Utrecht sur le procès de Voetius et de Dematius contre Schoock (4). C'est pour répondre à ces accusations "des Voet et des Voetiens", dont il est dit dans la *Préface* qu'ils semblent vouloir "surpasser les flammes éternelles de l'Etna et du Vésuve", qu'on publie maintenant ce petit ouvrage inconnu du public. D'après le préfacier, on satisfait ainsi un désir de Descartes qui, en quittant les Pays-Bas pour la Suède, en avait laissé une copie chez des amis avec l'intention de la faire publier, au cas où il serait impossible d'obtenir sans éclat la réparation qu'il cherchait. Cette *Préface* pose par ailleurs un problème de critique textuelle, en avançant que le texte original avait été écrit en français et que le texte latin était une traduction faite par un ami. Sur ce point, cependant, les Actes de la Municipalité sont formels : la première missive était en latin. Dès lors, ou bien l'éditeur, qui est d'ailleurs inconnu (5), se trompe, ou bien il a travaillé sur la traduction française que Descartes avait fait faire et qui se trouvait également parmi les

papiers décrits dans l'inventaire. Ainsi le texte latin pourrait bien ne pas être celui envoyé par Descartes à Utrecht.

Quant au texte français, il a été publié par Clerselier en 1667, dans le cadre de son édition des Lettres de Descartes, où la Lettre Apologétique aux Magistrats d'Utrecht figure dans le vol. III. C'est ce texte que nous avons retenu." (Theo Verbeek (éd.), René Descartes et Martin Schoock, *La Querelle d'Utrecht*, Paris: Les impressions nouvelles, 1988, pp. 403-405)

(1) C'est-à-dire Gysbertus Voetius et son fils Paul.

(2) Il s'agit du jugement du 16 mars 1642 (voir notre "Introduction" et *Narration*, p. 121-122).

(3) C'est effectivement ce qui est suggéré dans la brochure néerlandaise *Aengevangen Proceduuren* et qui a conduit Descartes à insister auprès des Etats de Groningue en 1644.

(4) Officiellement l'action contre Descartes n'a jamais été arrêtée ; on l'a étouffée pour complaire aux Etats, au Stathouder et à l'ambassadeur de France.

(5) Reneri était mort le 16 mars 1639 ; l'oraison funèbre avait été prononcée le 18 mars suivant par le professeur d'histoire Antonius Æmilius. Le texte avait été imprimé par l'imprimeur de l'Académie (des exemplaires se trouvent dans la Bibliothèque Universitaire d'Amsterdam et dans la British Library de Londres) et réimprimé dans le recueil des Orationes d'Æmilius [Antonius Æmilius, *Orationes, quarum pleraeque tractant argumentum politicum: Accedunt nonnulla eiusdem in utraque lingua Poemata*. Utrecht 1651.]

2. ———. 1647. *Les Méditations métaphysiques de René Des-Cartes touchant la première philosophie dans lesquelles l'existence de Dieu, et la distinction réelle entre l'âme et le corps de l'homme, sont démontrés*. Paris: Chez la Veuve Jean Camusat et Pierre Le Petit.

   AT IX, 1 : *Le Libraire au Lecteur* 1 ; [*Épitre*] *à Messieurs les Doyen et Docteurs de la Sacrée Faculté de Théologie de Paris* 4 ; *Abrégé des six méditations suivantes* 9 ; *Méditations touchant la première philosophie* 13 ; Premières Objections 73 ;

Réponses 81 ; Secondes Objections 96 ; Réponses 102 ; Exposé géométrique 124 ; Troisièmes Objections et Réponses 133 ; Quatrièmes Objections 153 ; Réponses 170 ; Avertissement de l'Auteur touchant les Cinquièmes Objections 198 ; Avertissement du traducteur 200 ; Lettre de Descartes à Clerselier 202 ; Sixièmes Objections 218 ; Réponses 225 ; Privilège 245-246.

B Op. I: *Avertissement de l'Auteur touchant les Cinquièmes Objections*, 1396-1397; *Lettre de Monsieur Descartes à Monsieur C.L.R.,* 1398-1411; *Avertissement du traducteur*, 1412-1413; *Le Libraire au Lecteur*, 1414-1417.

"Traduites du Latin de l'Auteur par Mr. le D.D.L.N.S. [Charles d'Albert, Duc de Luynes] Et les Objections faites contre ces Méditations par divers personnes très-doctes, avec les réponses de l'Auteur. Traduites par Mr. C.L.R. [Claude Clerselier]."

"Malgré le désir de Descartes, Clerselier avait publié les cinquièmes objections et réponses, en les rejetant à la fin du volume, après les sixièmes. Elles étaient suivies d'une lettre de Descartes répondant au recueil d'instances de Gassendi. Mais les septièmes objections et réponses et la lettre au P. Dinet ne figurèrent que dans la seconde édition française que Clerselier fit paraître en 1661. Plus exigeant que l'auteur lui-même, Clerselier avait revu et corrigé non seulement sa traduction des objections et réponses, mais aussi et surtout celle du duc de Luynes agréée pat Descartes." (Geneviève Rodis-Lewis, Introduction à R. Descartes, *Meditationes De Prima Philosophia - Méditations Métaphysiques*, Texte latin et traduction du Duc de Luynes, Paris: Vrin 1978, p. XII).

"Il [Descartes] écrivit à Chavagnes le 11 de Septembre [1644] à l'abbé Picot qui lui avait mandé dans sa dernière qu'il avait déjà traduit les deux premières parties de ses *Principes,* et il lui marqua que pour lui il n'avait pas encore trouvé depuis son départ de Paris le temps de lire la traduction française de ses *Méditations* faite par M. le duc de Luynes (5), qu'il avait apportée dans la pensée de s'en faire une occupation agréable dans le cours de son voyage." (Lettre à Picot, 11 septembre 1644; Baillet II, 220; AT IV 138; O VIII 2, 507; B464)

(5) Voir à Clerselier, 10 avril 1645 (AT IV 193, [O VIII 2, 714-715] B490)

"M. Descartes recevait de fréquentes nouvelles des grands fruits que faisait lecture de son dernier livre à Paris, où on l'assurait que personne ne s'était encore élevé contre sa doctrine (11). Ses progrès n'étaient pas moindres en Hollande : et dès le mois de Février M. de Hoogheland lui avait envoyé trois thèses différentes soutenues depuis peu à Leyde (12), et ne contenant que ses opinions. Ces succès le firent songer à faire imprimer les traductions Françaises de ses *Méditations* et de ses *Principes*. N'ayant pas remarqué tout l'empressement possible dans Elzevier pour ces éditions en notre langue (13), il prit des mesures avec Monsieur Clerselier et Monsieur Picot, pour les faire faire à Paris. Mais la version des *Principes* n'était pas encore achevée." (Lettre à Picot, 9 février 1645; Baillet II 265; AT IV 176; O VIII 2, 509; B484)

(11) Note en marge dans Baillet : « lettre MS à Picot du 9 février 1645. Lettre MS à Clerselier du même jour ».

(12) Voir à Pollot, 8 janvier 1644 (AT IV 77, [O VIII 2, 564-565] B441).

(13) Note en marge dans Baillet : « Elzevier se plaignait du peu de débit des *Principes*, comme Maire [de Leyde] s'était plaint au sujet des *Essais*. »

"Monsieur de Sorbière s'était habitué à Leyde (4) pour étudier plus particulièrement les défauts de Monsieur de Saumaise. Mais il ne s'occupait pas tellement de la considération de ce grand homme qu'il ne retournât souvent à Eyndegeest par manière de promenade, et qu'il n'en rapportât toujours quelque nouveau prétexte d'animer Monsieur Gassendi à écrire contre Monsieur Descartes. Mais pour donner un contrepoids au tort que la plume de cet excellent homme pourrait faire aux *Méditations* de Monsieur Descartes, Dieu permit qu'un Seigneur de la Cour de France entreprît de faire une traduction Française des mêmes *Méditations*, pour en faire connaître plus particulièrement le mérite dans le Royaume, et en procurer la lecture à tous ceux qui n'ayant pas l'usage de la langue des

savants, ne laisseraient pas d'avoir de l'amour et de la disposition pour la Philosophie. Il faut avouer que la fin de l'auteur de la traduction n'avait été que la satisfaction particulière qu'il trouvait à exercer son style sur de grands sujets, sans songer à rendre service au Public. Mais sa traduction ayant été recueillie et envoyée à Monsieur Descartes par sa permission, elle fut jugée propre à faire beaucoup honneur à notre Philosophe et à donner un grand relief à sa Philosophie, et Monsieur le Duc de Luynes son auteur fut prié d'en souffrir la publication (5).

Peu de jours après Monsieur Clerselier, l'un des plus zélés et des plus vertueux amis de Monsieur Descartes entreprit de traduire aussi en notre langue les objections faites à ces *Méditations* avec les réponses de Monsieur Descartes. Cette traduction était excellente aussi bien que celle de Monsieur le Duc de Luynes. Mais l'un et l'autre jugèrent que si elles devaient voir le jour, il fallait qu'elles fussent revues auparavant par l'auteur même des *Méditations*, afin qu'en les confrontant avec ses pensées il pût les mettre le plus près de leur original qu'il serait possible et leur en imprimer le caractère. Monsieur Descartes fut obligé de se rendre à un avis si important. Mais, sous prétexte de revoir ces versions, il se donna la liberté de se corriger lui-même, et d'éclaircir ses propres pensées. De sorte qu'ayant trouvé quelques endroits (6) où il croyait n'avoir pas rendu son sens assez clair dans le Latin pour toutes sortes de personnes, il entreprit de les éclaircir dans la traduction par quelques petits changements, qu'il est aisé de reconnaître à ceux qui confèrent le Français avec le Latin. Une chose qui semblait avoir donné de la peine aux traducteurs dans tout cet ouvrage, avait été la rencontre de plusieurs mots de l'art, qui paraissant rudes et barbares dans le Latin même, ne pouvaient manquer de l'être beaucoup plus dans le Français, qui est moins libre, moins hardi, et moins accoutumé à ces termes de l'École (7). Ils n'osèrent pourtant les ôter partout, parce qu'ils n'auraient pu le faire sans changer le sens dont la qualité d'interprètes devait les rendre religieux observateurs. D'un autre côté Monsieur Descartes témoigna être si satisfait de l'une et de l'autre version, qu'il ne voulut point user de la liberté qu'il

avait pour changer le style, que sa modestie et l'estime qu'il avait pour ses traducteurs lui faisait trouver meilleur que n'aurait été le sien. De sorte que par une déférence réciproque qui a retenu les traducteurs et l'auteur, il est resté dans l'ouvrage quelques-uns de ces termes scolastiques, malgré le dessein qu'on avait eu de lui ôter le goût de l'école en le faisant changer de langue. Cet éclaircissement touchant la traduction des *Méditations* et des *Objections* est nécessaire, non seulement pour justifier les traducteurs sur les changements dont l'auteur est le seul responsable, mais pour faire voir aussi que la traduction Française vaut mieux que l'original Latin, parce que Monsieur Descartes s'est servi de l'occasion de la revoir pour retoucher son original en notre langue. C'est un avantage qu'a eu aussi dans la suite la version française des *Principes* de Monsieur Descartes faite par l'Abbé Picot (8). De sorte que tous ses Français tant originaux que traduits sont préférables à ceux qui sont Latins. C'est-à-dire que toutes les traductions qu'il a revues valent mieux que ses originaux mêmes.

Pour ne rien omettre de ce qui peut regarder la traduction des *Méditations*, il suffit de remarquer qu'encore qu'elle ait été faite en 1642, néanmoins la révision ou la correction par Monsieur Descartes ne s'en fit qu'en 1645, et que la première impression qui en fut faite à Paris ne fut en état de paraître que pour les étrennes de l'an 1647." (Baillet II 171-173; AT IV 193-195; O VIII 2, 715-716; B 490)

(4) Note en marge dans Baillet : « Lettr(es) et Disc(ours) de Sorb(ière) ».

(5) Il est souvent question de cette traduction des *Meditationes* dans la correspondance : voir à Picot, 11 septembre 1644 (AT IV 138, [O VIII 2, 507] B464) et 9 février 1645 (AT IV 177, [O VIII 2, 508-509] B484); à Clerselier, 10 avril 1645 (AT IV 192-195, [O VIII 2, 714-716] B490), 20 décembre 1645 (AT IV 338-339, [O VIII 2, 716-717] B531), 12 janvier 1646 (AT IV 357-358, [O VIII 2, 717] B539), 23 février 1646 (AT IV 362, [O VIII 2, 718] B542) et 9 novembre 1646 (AT IV 563-564, [O VIII 2, 725]

B585); et enfin à Picot encore, 8 juin 1647 (AT V 63-64, [O VIII 2, 515-516] B626).

(6) Note en marge dans Baillet : « Lettr(e) MS de Desc(artes) à Clersel(ier) du 10 d'Avril 1645. »

(7) Note en marge dans Baillet : « Ibid. lettr(e) à Clerselier MS ».

(8) Voir à Picot, 17 février 1645 (AT IV 180-181, [O VIII 2, 509-510] B 486).

Michelle Beyssade et Jean-Marie Beyssade ont publié une nouvelle édition des *Méditations métaphysiques. Objection et Réponses*, Paris: Garnier-Flammarion 1979 (édition revue et corrigée 2011) :

"Les textes retenus ont été établis à partir des deux éditions Adam et Tannery (AT) et F. Alquié, mentionnées dans la bibliographie. Nous les avons vérifiés sur les éditions originales, latines (1641 et 1642) et française (1647). Pour la commodité des lecteurs, nous indiquons toujours la pagination correspondante dans l'édition AT à laquelle les commentateurs modernes font tous référence : soit que notre texte reproduise le texte d'AT, soit qu'il en donne une traduction (quand l'original latin n'a pas été traduit du vivant de Descartes, ou que la traduction n'a pas été revue et autorisée par lui, auquel cas elle ne figure pas dans l'édition AT).

Même revues et autorisées par Descartes, les traductions de Luynes et de Clerselier s'écartent souvent de l'original latin. Nous n'indiquons ni les dédoublements (deux mots français rendant un mot latin) ni les additions qui visent à expliciter une expression : nous ne signalons que les différences qui modifient le sens. Pour les *Méditations*, nos notes reprennent en caractères droits le dernier mot français qu'une traduction exacte garderait et ajoutent la suite en italiques.

Quand elles n'ont pas été revues et autorisées par Descartes, nous avons pourtant retenu de préférence les traductions de l'époque, en particulier celle de Clerselier, et nous en avons corrigé les inexactitudes les plus manifestes.

Nous avons modernisé l'orthographe, et modifié la ponctuation. Nous avons également retouché, pour le texte latin des *Méditations*, la répartition en alinéas, incertaine dans les éditions originales (dont Descartes a lui-même dénoncé de ce point de vue les insuffisances) et refaite arbitrairement dans l'édition AT. Nous avons respecté les alinéas du texte français, sauf en de rares endroits où nous avons retenu les améliorations apportées par Clerselier dans l'édition de 1661.

Aux *Méditations*, et aux *Objections et Réponses* qui les suivent, nous joignons quatre lettres, écrites par Descartes entre la rédaction des *Méditations* et l'édition latine de 1642 : elles constituent autant de réponses à des objections, qui n'ont pas trouvé place dans l'œuvre publiée." (*Note sur le texte de cette édition*, pp. 31-32)

Michelle Beyssade a donné une nouvelle traduction du texte latin : *Descartes Méditations métaphysiques. Meditationes de prima philosophia*. Texte latin accompagné de la traduction du Duc de Luynes. *Méditations de philosophie première*. Présentation et traduction de Michelle Beyssade, Paris : Le Livre de Poche, 1990.

3. ———. 1647. *Les Principes de la philosophie écrits en latin par René Descartes et traduit en François par un de ses Amis*. Paris: Henry Le Gras.

   AT IX-2, 1-325; traduction de Paul Picot (1614 - 1668).

   Lettre à Picot du 11 septembre 1644 : "Ce fut au Crévis qu'il [Descartes] apprit que les exemplaires imprimés de ses *Principes* étaient enfin arrivés de Hollande à Paris ; Monsieur Picot lui manda qu'il n'avait point trouvé d'expédient plus propre à se consoler de son absence, que la traduction française de cet ouvrage, qu'il avait commencée dès son départ de Paris sur l'exemplaire imparfait (2) qu'il avait apporté par avance de Hollande dans sa valise.

   (...)

   Il écrivit à Chavagnes le 11 de Septembre [1644] à l'abbé Picot qui lui avait mandé dans sa dernière qu'il avait déjà traduit les deux premières parties de ses *Principes*, et il lui marqua que

pour lui il n'avait pas encore su trouver depuis son départ de Paris le temps de lire la traduction française de ses *Méditations* faite par Monsieur le duc de Luynes (5), qu'il avait apportée dans la pensée de s'en faire une occupation agréable dans le cours de son voyage." (Baillet II, 219-220; AT IV, 138; O VIII 2, 507; B 464)

(2) Note en marge de Baillet : « sans figures ».

(5) Voir à Clerselier, 10 avril 1645 (AT IV, 193; [O VIII 2, 714-716] B 490).

Lettre à Picot du 8 novembre 1644 : "Après la fête de saint Simon (2), le P. Mersenne délivré de l'impression du gros recueil de pièces physiques et mathématiques qu'il intitula *Cogitata Physico-Mathematica*, et n'ayant plus rien au départ de Monsieur Descartes qui pût le retenir à la Ville, partit pour un voyage de huit ou neuf mois en Italie (3) ; et Monsieur Descartes, ayant le reste des exemplaires de ses *Principes*, sous la disposition de Picot, chez la veuve Pelé, libraire de la rue Saint-Jacques (4), prit la route de Calais pour retourner en Hollande (5). Il fut arrêté par les vents dans cette ville pendant près de quinze jours, où il ne put s'occuper d'autre chose que de la lecture de la version français que l'abbé Picot son hôte avait faite de son livre des *Principes* et dont il avait apporté les deux premières parties avec lui. Il en écrivit au traducteur le 8 de novembre pour lui marquer qu'il la trouvait excellente, et qu'il ne pouvait la souhaiter meilleure." (Baillet II, 246-247; AT IV 147; O VIII 2, 508; B 468)

(2) Le 28 octobre.

(3) Constantin Huygens recommande Mersenne à Jean-Louis Calandrini à Genève, le 30 août 1644 (*Brwg* [*De Briefwisselìng van Constantjin Huygens*, (1608-1687), 6 voll., ‘s-Gravenhage, Martinus Nijhoff, 1911-1917] 55, vol. 4, n. 3723) et le même jour (n. 3724) à J. Van Santen, lieutenant du prince d'Orange, pour lui laisser visiter le château d'Orange.

(4) Sur la veuve Pelé et ses relations avec les Elzevier, voir H.-J. Martin, *Livre, pouvoir et société à Paris au XVII siècle*, 3e éd., Genève, éd. 1999, t. I, p. 315.

(5) Note en marge dans Baillet : « lettre à Picot du 8 novembre 1644 ».

Lettre à Picot du 9 février 1645 : "L'abbé Picot ne lui [à Descartes] envoya la troisième partie (2) que le mois de Février de l'année suivante, et il n'en parut pas moins satisfait (3). L'abbé l'ayant accompagnée de quelques difficultés dont il de demandait l'explication, Monsieur Descartes en lui envoyant cette explication lui manda que ces difficultés mêmes, de la manière dont il les lui a proposées, faisaient honneur à sa traduction et montraient que le traducteur entendait parfaitement la matière ; parce qu'elles n'auraient pu tomber dans l'esprit d'une personne ne l'aurait entendue que superficiellement (4)." (Baillet II, 246-247; AT IV 147; O VIII 2, 508; B 468)

(2) De la traduction française des *Prìncipia*.

(3) Note en marge dans Baillet : « t. 3 des *Lettres* p. 612 du 17 février [c'est la lettre suivante]; item lettre MS de Descartes à Picot du 9 février 1645 ».

(4) Note en marge dans Baillet : « lettre MS à Picot du 1er juin 1645 ».

Changements dans la traduction française :

"L'historique de cette traduction se trouve a sa place dans la *Vie de Descartes*, [de Paul Adam] au dernier volume de l'ancienne édition. (*) On ne donnera donc ici que les renseignements relatifs au texte même.

L'édition française de 1647, comparée a l'édition latine de 1644, offre d'abord une particularité importante. Entre l'*Épitre* ou la Dédicace a la princesse Elisabeth, placée en tête dans l'une comme dans l'autre, et les *Principes* proprement dits, Descartes a inséré, dans la traduction, une *Lettre de l'Auteur à celui qui a traduit le Livre*, laquelle, ajoute-t-il, *peut ici servir de Préface*." (p. III)

(...)

"De qui ce texte est-il exactement ? De l'abbé Picot seul, qui est, comme on sait, « l'ami de Descartes », qui a traduit le livre des *Principes* ? Ou bien, en certains endroits, de Descartes lui-même, qui a revu la traduction ? Ou même peut-être, car on serait tenté ' aller jusque-là, de Descartes seul, qui aurait alors récrit en français, pour une partie, sinon en entier, ses *Principia Philosophiæ* ?

Pour la traduction des *Principes*, nous n'avons guère qu'une phrase, la première de la Lettre-préface à l'abbé Picot : « La version que vous avez pris la peine de faire de mes *Principes* est si nette et si accomplie, quelle me fait espérer qu'ils seront lus par plus de personnes en Français qu'en Latin, et qu'ils seront mieux entendus.» (Ci-après, p. 1, l. 5-9.)" (p. VII)

(...)

"Deux témoignages, l'un et l'autre du XVIIe siècle, semblent d'abord trancher définitivement la question. Le premier se trouve dans un vieil exemplaire de la première édition des *Principes* en français, celle de 1647 : les marges des pages donnent un assez bon nombre de notes manuscrites, de trois ou quatre écritures différentes; l'une est certainement de l'abbé Legrand, qui prépara, nous l'avons vu, une édition nouvelle des Œuvres de Descartes, mais mourut en 1704, sans avoir eu le temps de rien publier. Plusieurs de ces notes (non pas celles de Legrand, il est vrai), remontent a l'année 1659 ; c'est la date donnée par l'une d'elles, que nous reproduisons à la page 119 ci-après." (*Avertissement* aux *Principes de la philosophie*, AT 9-2, p. X)

"En regard de cet article, on lit à la marge de l'exemplaire annoté : « La version est ici de Mr D. (*Note MS. d'une première main, peut-être celle de Clerselier ? Ce qui suit est d'une autre main, surement celle de Legrand*) Ce que nous jugeons ainsi à cause de l'original que nous en avons entre les mains écrit de sa propre main (*primitivement de la propre main de Mr Desc., ces derniers mots barrés*). Et il n'est pas croyable que si cette version n'était pas de lui, il se fut donné la peine de la transcrire, lui qui d'ailleurs était si accablé d'affaires. » Cette note si importante a été discutée dans notre *Avertissement*."

Note de Paul Adam au § 41 de la Troisième partie : Que cette distance des Étoiles fixes est nécessaire pour expliquer les mouvements des Comètes (AT IX-2, p. 121)

"La première édition Adam-Tannery comportait ici la phrase :

« au premier volume de la présente édition », ce qui indiquait que l'intention initiale des éditeurs avait été de placer la *Vie de Descartes* en tête de leur publication et situait le commencement de la réaction du présent Avertissement à une époque antérieure à 1896. En fait, l'intention ne fut pas suivie d'effet, puisque la *Vie de Descartes* par Ch. Adam (datée de 1910) se trouve dans le dernier tome, numéroté XII, de ce qui est devenu maintenant l'ancienne édition Adam-Tannery.

D'où la correction introduite par nous dans le texte.

Voici l'essentiel de ce que l'on trouve au tome XII p. 360-361 concernant l'historique de la traduction évoqué en ce début de l'Avertissement des *Principes*.

« Sitôt les *Principes* publiés en latin, Picot se mit à les traduire.

Descartes était alors en France ; avant de retourner en Hollande, il avait déjà reçu la première et la seconde partie, mises en français.

Le reste vint le rejoindre à Egmond. Et à ce propos, une question encore se pose. Il a existé de cette traduction un manuscrit aujourd'hui perdu, manuscrit autographe qui commençait à l'article 41 de la troisième partie : ce manuscrit pouvait faire croire qu'a partir de là jusqu'a la fin, la traduction était de Descartes lui-même, et non de Picot ; bien mieux, ce n'était plus une traduction, mais le propre texte, et un texte français du philosophe (1). De fait, nous savons que quelques parties peut-être, ne fut-ce que celle qui est relative à l'aimant, ont été au moins résumées par lui en français pour son ami Pollot, qui ne savait pas le latin (2). Et nous savons aussi que la traduction française contient de nombreuses additions, lesquelles sans doute Picot n'eût point osé faire de son autorité, et qui, par conséquent, sont de Descartes. C'est même ce qui permet de résoudre le problème. Qui donc, en effet, pouvait

insérer, chacune à sa place, toutes ces additions dans le texte déjà traduit, sinon l'auteur, et nul autre que lui ? Et il l'aura fait en recopiant le tout de sa main, travail délicat que lui seul encore pouvait faire, ce qui explique qu'il en ait pris la peine. C'est ainsi que nous avons deux textes pour les *Principes de la Philosophie* : le texte latin, publié d'abord en 1644, et un texte français, publié en 1647, traduction du premier pour la plus grande part, et pour le reste addition de Descartes lui-même. Il ne sera pas sans intérêt de noter, chemin faisant, en quel sens ont été faites ces additions : quelle préoccupation ou arrière-pensée ne révèlent-elles pas ça et là ? »

On ne peut qu'être surpris de la différence de ton que cet « historique » (publié en 1910) présente avec les p. X a XVIII du présent *Avertissement* qui porte la signature de Ch. Adam à une date (décembre 1904) toute proche de la mort de P. Tannery (27 novembre).

Tandis que ces pages aboutissent à des conclusions très nuancées en raison des constatations concernant la traduction des règles du choc, l' « historique » se fait affirmatif pour l'attribution à Descartes lui-même de toutes les additions par rapport au texte latin. C'est donc un fait qu'entre 1904 et 1910 Ch. Adam n'a pas cru devoir conserver la prudence qui s'exprime si remarquablement à la fin de l'*Avertissement* p. XX.

Le lecteur qui suivrait l'invitation de ce premier paragraphe de l'*Avertissement* et se fierait a la version de l' « historique » telle qu'elle apparait dans le tome XII de la précédente édition Adam-Tannery, risquerait d'être induit en erreur. Les nuances et la prudence que nous soulignons comme les qualités majeures de l'*Avertissement* sont à observer soigneusement.

Conformément à la suggestion de la page XVIII et à l'attention portée par Paul Tannery aux règles du choc, la comparaison attentive du texte latin et de la version française pour les articles 43 à 52 de la IIe partie est révélatrice. Mais, tandis que pour les articles 46 à 52 les corrections et additions sont pertinentes, pour les articles 43 à 45 les modifications par rapport au texte latin introduisent des non-sens flagrants que

l'on ne saurait en aucune manière attribuer à Descartes. Cf. Pierre Costabel « Essai critique de quelques concepts de la mécanique cartésienne », *Archives Internationales d'Histoire des Sciences*, t. XX, N° 80, 1967, p. 235-252.

La critique interne impose au moins pour le passage indiqué la certitude d'une situation étrange : à savoir la juxtaposition, dans l'édition française des *Principe*s, d'éléments corrigés et d'éléments abandonnés par l'auteur au jugement infirme de son traducteur.

L'histoire de la traduction est donc encore à faire et garde ses secrets.

Pour Picot, traducteur des *Principes*, voir la notice biographique au tome IV de la *Correspondance* de Descartes par Adam et Milhaud p. 402 et pour Pollot la notice au tome I de la même publication p. 459.

Notons encore que les remarques relatives au style de Picot, que le présent *Avertissement* contient p. VIII et IX, sont confirmées par la récente découverte d'une lettre de Picot a Carcavi, du 5 août 1649. Cette lettre ou Picot est consulté en tant que commentateur autorisé des *Principes* est actuellement en cours de publication par les soins de J. Beaude pour le dernier numéro du tome XXIV (1971) de la Revue d'Histoire des Sciences (P.U.F.). [*]" (*Appendice* de Bernard Rochot à la nouvelle édition de AT 9-2, Paris: Vrin 1989, pp. 354-355)

4. ———. 1647. *Lettre de l'Auteur à celui qui a traduit le livre laquelle peut ici servir de Préface* Paris: Henry Le Gras.

Première édition : Appendice à la traduction des *Principes de la philosophie* par Paul Picot.

AT IX-2, 1-20; B Op. I, 2214-2237.

Lettre-préface des Principes de la philosophie, présentation et notes par Denis Moreau, Paris: GF-Garnier-Flammarion 1996.

La préface est annoncée dans la lettre à Étienne Charlet du 4 décembre 1646 : "Les lettres que j'ai eu l'honneur de recevoir de la part de Votre Révérence m'ont extrêmement obligé (2), et j'aurai soin d'empêcher, autant qu'il sera en mon pouvoir, qu'aucun de mes amis ne fasse rien contre les bons conseils que j'y trouve. Ce m'est beaucoup quelles m'apprennent que vous ne trouverez point mauvais, si, sans attaquer personne en particulier, on dit son sentiment, en général, de la philosophie qui s'enseigne communément partout. C'est un sujet auquel il est malaisé de s'abstenir de tomber; mais, parce que avait été commencé par un de mes amis, ne m'a pas satisfait, je l'ai prié de ne point continuer ; et afin de pouvoir mieux user de toute la circonspection et retenue qui sera requise pour faire que cela n'offense personne, je pense que je prendrai moi-même la plume, non point pour en écrire un long discours, mais pour mettre seulement par occasion, dans une préface (3), les choses dont il me semble que ma conscience m'oblige d'avertir le public. Car je puis dire, en vérité, que si je n'avais suivi que mon inclination, je n'aurais jamais rien fait imprimer, et que je n'ai point d'autre soin que de m'acquitter de mon devoir, ni d'autre passion que celle qui est excitée par le souvenir des obligations que je vous ai, et me fait être... " (AT IV, 587-588; O VIII 1, 638; B 594)

"M. Descartes partit de La Haye le 7 de juin [1647] pour Rotterdam, d'où il écrivit le lendemain à l'abbé Picot sur le point de passer à Middelbourg pour s'embarquer le jour suivant à Flessingues, dans l'espérance d'arriver au bout de quinze jours à Paris, où il fut reçu et logé par cet ami, qui depuis le premier voyage de M. Descartes en France avait quitté la rue des Écouffes pour celle de Geoffroy-l'Ânier, où il avait pris une maison conjointement avec Mme Scarron de Mandine. Son dessein était de passer en Bretagne dès le commencement de

juillet, pour régler les affaires qui servaient de prétexte à son voyage. Mais l'édition française de ses *Principes* qui s'achevait entre les mains de leur traducteur son hôte lui donna occasion de différer de quelques jours, tant pour y faire une préface, que pour voir entièrement débarrassé de cette occupation un homme qui devait être de sa compagnie dans son voyage." (Baillet II, 323)

5. ———. 1648. *Notae in programma quoddam sub finem anni 1647 in Belgio editum, cum hoc titulo: Explicatio mentis humanae, sive animae rationalis, ubi explicatur quid sit, et quid esse possit*. Amstelodami: Ex Officina Ludovici Elzevirii.

   Remarques sur une œuvre de Henricus Regius (Hendrik De Roy, 1598-1679).

   AT VIII-2, 341-369; B Op II, 2250-2287.

   Traduction française de Claude Clerselier: *Remarques de René Descartes sur un certain placard imprimé aux Pays-Bas vers la fin de l'année 1647, qui portait ce titre : Explication de l'esprit humain, ou de l'âme raisonnable : où il est montré ce qu'elle est, et ce qu'elle peut être*, dans Clerselier-Lettres, t. I, p. 434-462, repris Alquié, t. III (1643-1650), pp. 787-820.

   Descartes. Lettres à Regius et Remarques sur l'explication de l'esprit humain, Texte latin, traduction, introduction et notes par Geneviève Rodis-Lewis, Paris: Vrin 1959.

   Table des matières : Introduction 7-19; Lettres de Descartes à Regius (texte latin et traduction) [16 lettres de Descartes à Regius; 2 lettres de Regius à Descartes) 21-141; Notes sur le Placard de Regius : XIX. Lettre d'envoi de Descartes [à Hogelande ?], [décembre 1647] 142; Remarques de R. Descartes sur un certain placard... intitulé : Explication de l'Esprit humain ou de l'Ame raisonnable, où il est montré ce qu'elle Est et ce qu'elle peut être 143; Texte de Regius 146; Examen du placard 154;

   Appendice.

   I. Extraits de l'Epître de Descartes à Voet [mai 1643] (sur quelques objections à sa métaphysique)

A. 190; B. 192;

II. Textes choisis de Regius (*Philosophia naturalis*...)

A. Critique du privilège du *Cogito* 196; B. Rapports de la pensée et de l'étendue 196; C. Douter du corps n'implique pas que l'esprit en soit réellement distinct 198; D. L'âme peut aussi bien être mode corporel, attribut ou substance 200; E. L'âme ne pense pas toujours en acte : sa dépendance des conditions organiques 202; F. Certitude et révélation divine 202; G. Critique des idées innées et des preuves cartésiennes de l'existence de Dieu 206-213.

"Ces divers textes, ainsi rapprochés, sont rendus plus accessibles au grand public par la confrontation avec l'original latin d'une traduction française suffisante pour la compréhension d'ensemble du texte. Des versions anciennes utilisées (5) sont assez lâches et devraient inciter le lecteur à interpréter plus strictement le détail du latin : pour l'y aider nous les avons revues de près, mis entre crochets dans le texte français les additions et paraphrases dont Clerselier surtout est coutumier, souligné par des caractères gras, les divergences portant sur un ou deux mots, corrigé directement sans le mentionner à chaque fois quelques erreurs de détail incontestables, et indiqué en note une traduction plus précise dans les seuls cas où cette rectification pouvait embarrasser un débutant." (pp. 17-18, notes omises)

(5) Dans le premier volume des *Lettres de Descartes* publié en 1657, Clerselier donne le texte latin des lettres à Regius, qu'il nomme M. De Roy : lettres n° 81-99, suivies pour les « Remarques sur un certain placard... » par une version « faite autrefois » (préface), sans le texte original. C'est cette traduction des *Notae* qui est ici reproduite et pour les lettres à Regius, celle des éditeurs parisiens de 1724-1725, t. II, p. 228-482, 1. no· 12-30 (cf. notre édition des *Lettres à Arnauld et Morus*, Vrin, 1953, Introduction, p. 8-9). Pour les deux passages de l'*Epistola ad Voetium*, qui n'avait jamais été traduite avant l'édition V. Cousin (1825, t. II), la parenté du style des éditions anciennes avec celui de Descartes ne jouant

plus, nous proposons notre propre version, comme pour les textes de Regius traduite en *Appendice*.

Une traduction inédite du texte latin sous la direction de Denis Moreau est disponible à l'adresse : caphi.univ-nantes.fr/Traduction-inedite-du-texte-latin

"« Opuscule des plus rares, dont L. Elzevier a été l'éditeur, mais qui sort des presses de Fr. Hackius à Leyde », ajoute Alphonse Willems, p. 269-270 de son ouvrage, *Les Elzevier* (Bruxelles, 1880).

Dès 1650, le même texte fut reproduit, au volume des *Méditations* en latin, après les sixièmes *Objections et Réponses*, dans les cinq éditions successives des Elzevier, 1650, 1654, 1663, 1670 et 1678, et plus tard dans celles des Blaeu, à Amsterdam, à partir de 1683. (Voir notre t. VII, p. IX-XII.)

Cependant Clerselier avait donné, au tome I, p. [542-571], de ses Lettres de Mr Descartes, 1657, à la suite de la lettre 99, une version française des *Notæ in Programma*, sous le titre suivant : REMARQUES DE RENÉ DESCARTES, Sur un certain Placard imprimé aux Pays-Bas vers la fin de l'année 1647, qui portait ce titre : *Explication de l'Esprit humain, ou de l'Ame raisonnable, où il est montré ce qu'elle est et ce qu'elle peut être. Version*. Clerselier avertit, dans la Préface de ce tome I, qu'il a fait autrefois cette version lui-même. (Voir notre t. V, p. 625, l. 25-28.) N'étant donc qu'une version de Clerselier, elle n'a pas à figurer dans une édition des *Œuvres* de Descartes, et nous n'avons à nous occuper que de l'original, qui est le texte latin." (AT VIII, 2, *Avertissement*, p. XI.)

"Sur la fin de l'année 1647 l'on vit paraître en Hollande deux écrits latins auxquels il semblait que M. Descartes ne devait point se montrer indifférent. Le premier était directement contre lui, et était intitulé *Considération sur la méthode de la philosophie cartésienne*. Il avait pour auteur ce Revius théologien de Leyde qui, n'ayant pu réussir à faire condamner les écrits de M. Descartes, n'avait su faire autre chose que d'appliquer à ses chagrins le remède qu'il avait entre ses mains, et de prendre la voie des satires et des libelles, pour se donner

une satisfaction, qu'il n'avait pu recevoir de ses supérieurs. M. Descartes ayant remarqué que ce libelle n'était rempli que de *cavillations inutiles*, et de calomnies trop noircies pour pouvoir être crues de personne, jugea qu'il devait plutôt en rendre grâce à son auteur que de s'en tourmenter, parce que cet auteur montrait assez par là qu'il n'avait rien trouvé dans ses écrits qu'il pût reprendre avec quelque apparence de justice, et qu'ainsi il en confirmait mieux la vérité, que s'il avait entrepris de les louer publiquement.

L'autre écrit latin qui parut en même temps le toucha davantage, quoiqu'il ne s'adressât à lui qu'indirectement, et qu'il pût dissimuler la chose sans intéresser sa réputation. Il avait pour titre *Explication de l'Esprit humain ou de l'Ame raisonnable, où l'on montre ce qu'elle est et ce qu'elle peut être*. Il fut imprimé à Utrecht, premièrement en forme de petit livre sous le nom de M. Regius son ancien disciple, et ensuite en feuille étendue par manière de programme ou placard pour être affiché dans les places et les rues, sans nom d'auteur ni d'imprimeur. M. Descartes l'ayant reçu de cette seconde forme reconnut aussitôt l'auteur par le style et par le bruit commun. Il y remarqua plusieurs opinions qu'il jugeait fausses et pernicieuses ; et parce qu'on était encore assez communément persuadé que M. Regius était toujours dans les sentiments qu'il lui avait inspirés autrefois, il se crut obligé de découvrir les erreurs de cet écrit, de peur qu'elles ne lui fussent imputées par ceux qui, n'ayant pas lu ses , et surtout ses *Méditations*, tomberaient par hasard sur la lecture de cet écrit de Regius. Il en composa la réfutation en latin sur la fin du mois de décembre, et elle fut imprimée à Amsterdam avant qu'il en sût (a) rien, et sans sa participation, avec des vers et une préface qui n'eurent point son approbation, quoique les vers fussent de son ami M. Heydanus (b) qui n'avait pas jugé à propos d'y mettre son nom (c). Nous avons aujourd'hui cette réfutation traduite en français au premier volume de ses lettres précédée de l'écrit ou placard de M. Regius, contenant vingt et un articles ou assertions par manière de thèses sur l'Ame raisonnable, où cet auteur avait mis pour conclusion ce que M. Descartes avait dit autrefois dans l'Épître dédicatoire de ses *Principes*, qu'*il n'y*

a point de gens qui parviennent plus aisément à une haute réputation de piété que les superstitieux et les hypocrites. M. Regius fit une réponse assez modeste aux observations que M. Descartes avait faites sur son placard. Mais toute sa modération ne fut point capable d'attirer une réplique de M. Descartes." (Baillet II, 334-335)

(a) a. Sous le titre de *Nota in Programma quoddam*, etc.

(b) Je croirais que c'est plutôt M. Huyghens.

(c) Tome I, p. 434, 439.

(p. 656).

6. ———. 1647/1648. *La description du corps humain et de toutes ses fonctions*.

Première publication : Clerselier 1664, pp. 99-154 avec le titre "*La formation du fœtus*", qui est de Clerselier: voir l'*Avertissement* dans AT XI p. 219.

AT XI 223-286; B Op. II, 510-597.

Préface de Claude Clerselier aux éditions 1664 et 1677 du *Monde* et de l'*Homme*, AT XI, pp. XI-XXIV; B Op. II, 598-669.

Première partie : Préface 223 ; Seconde partie : Du mouvement du Cœur et du Sang 228 ; Troisième partie : De la Nutrition 246 ; Digression, dans laquelle il est traité de la formation de l'Animal. Quatrième partie : Des parties qui se forment dans la semence 253 ; Cinquième partie : De la formation des parties solides 273-286.

L'*Inventaire de Stockholm*, à la lettre *G* donne cette description du manuscrit : "Un traité intitulé *La Description du corps humain*, où il y a quatre feuillets de suite, et deux autres feuillets dont la suite ne se trouve point jointe, aussi un (en blanc), contenant le titre des chapitres d'un traité à faire de la nature de l'homme et des animaux. A cette liasse ont été joints dix ou douze feuillets, en partie interrompus, qui traitent du même sujet, mais sans qu'il paraisse de liaison avec les précédents." (AT X, 9-10).

"L'inventaire des papiers de Descartes indique, à la lettre G, un Traité MS. intitulé : *La Description du corps humain*. Voir t. X, p. 9, l. 17.) Une lettre MS. de Clerselier, que nous avons aussi imprimée (*ibid*. p. 13-14) , en donne le commencement.

Or ce commencement est identique aux premières pages d'un Traité que Clerselier a publié, dans son volume de 1664, à la suite du *Traité de l'Homme*, sous le même titre initial de *La Description du Corps humain*, bien qu'il imprime en haut des pages ce titre différent *De la Formation du Fœtus*.

L'authenticité de cette publication est donc assurée incontestablement.

A vrai dire, ce double titre de Clerselier demande explication. Mais c'est que le Traité, d'ailleurs inachevé, comprend aussi deux parties distinctes : la première, en effet, entreprend une description du corps humain, ou plutôt de ses fonctions, avec un programme complet que s'était tracé Descartes (p. 112-113, édit. Clerselier), et qu'il n'a fait qu'entamer ; la seconde

apparaît comme une digression, et c'est bien ainsi que Clerselier la présente (ibid., p. 137) ; elle explique la formation de l'animal. Mais entre les deux la soudure existe, et non pas une soudure artificielle : Descartes l'a faite lui-même de sa main.

Toutefois le second titre de Clerselier : *De la Formation du Fœtus*, semble bien être de l'éditeur ; outre qu'il ne convient pas à l'ensemble du traité, et ne désigne réellement que la seconde partie, la « digression » , Descartes aurait intitulé celle-ci *De la Formation de l'animal*; et c'est aussi le titre que nous mettrons en haut des pages, pour cette seconde partie, réservant pour la première : *Description du Corps humain*." (AT XII, 219-220)

Lettre à la princesse Élisabeth du 31 janvier 1648 : "... j'ai maintenant un autre écrit entre les mains, que j'espère pouvoir être plus agréable à Votre Altesse : c'est la description des fonctions de l'animal et de l'homme." (AT V, 112 = Baillet II, 337-338; O VIII 2, 292; B642).

7. ———. 1648. *Projets d'une école des arts et métiers (Extraits de Baillet).*

   Baillet II 433-434; AT XI, 659-660; B Op. II, 918-921.

   "Une offre d'un autre ami, M. d'Alibert lui plut davantage. Celui-ci songeait à fonder une École des arts et métiers, dont il aurait fourni les frais, et qui devait être ouverte en dehors des heures ou des jours de travail, aux artisans et ouvriers désireux de s'instruire. L'idée répondait bien aux vues de Descartes sur l'union de la théorie et de la pratique, ou de la science et de ses applications : la science toute seule reste sans effets utiles, et l'art ou le métier, sans la science, n'est qu'une routine aveugle, incapable de se perfectionner." (Charles Adam, *Vie et œuvres de Descartes*, Paris: Cerf, 1910, p. 470.)

8. ———. 1648. *[Entretien avec Burman] Responsiones Renati Des Cartes ad quasdam difficultates ex Meditationibus ejus, etc., ab ipso haustae.*

   Première édition dans : *Revue Bourguignonne de l'Enseignement supérieur*, 1896, pp. 1-52.

AT V, 146-179; B Op. II, 1246-1307.

Éditions utilisées par Burman :

Renati Descartes, *Meditationes De Prima Philosophia, In quibus Dei existentia et animae humanae a corpore distinctio demonstrantur. His adiunctae sunt variae objectiones doctorum virorum in istas de Deo et anima demonstrationes; Cum Responsionibus Authoris. Secunda editio septimis objectionibus antehac non visis aucta*. Amstelodami, Apud Ludovicum Elzevirium, 1642);

Renati Des-Cartes, *Principia Philosophiae*, Amstelodami, Apud Ludovicum Elzevirium, Anno 1644);

Renati Descartes, *Notae in Programma quoddam, sub finem anni 1647 in Belgio editum cum hoc titulo: Explicatio mentis humanae sive animae rationalis, ubi explicatur quid sit et quid esse possit,* Amstelodami, Apud Ludovicum Elzevirium, 1648

Renati Des Cartes, *Specimina Philosophiae seu Dissertatio De Methodo*... Amstelodami, apud Ludovicum Elzevirium 1644).

"Ce sont donc des difficultés proposées de vive voix à Descartes par Burman, avec les réponses recueillies par le même Burman de la propre bouche du philosophe, à Egmond, le 16 avril 1648. Quelques mots du feuillet 88, recto, I. 6-7, permettent de reconstituer la scène : ce fut une conversation pendant le repas ; on était à table et ou causait en mangeant (*jam ego concipio et cogito simul me loqui et edere*, dit Descartes donnant comme exemple ce qu'il fait en ce moment). Ailleurs, ayant à citer, (f. 36 verso, l. 5) deux noms de ville, les premiers qui lui viennent è l'esprit sont Alcmaer, la ville la plus proche d'Egmond, et Leyde, la ville natale de sou interlocuteur.

François Burman, en effet, était né à Leyde, en 1688. Fils de pasteur, il devint lui-même pasteur ; on le trouve un an à Hanovre, en cette qualité, puis un an à Leyde sous-régent au collège des Etats, enfin professeur de théologie à Utrecbt où il mourut le 21 novembre 1679 ; son oraison funèbre fut prononcée par Grævius, dont nous avons rencontré le nom tout à l'heure, dans le même cahier, avec la date de 1691. Burman était donc un tout jeune homme en 1648 : il n'avait que vingt ans, et ou ne sait ce qu'on doit le plus admirer des difficultés qu'il propose à cet âge ou de la complaisance avec laquelle lui répond le philosophe, âgé de cinquante-deux ans déjà, et de plus auteur du *Discours de la méthode*, des *Méditations métaphysiques* et des *Principes de Philosophie*. Peut-être aussi Descartes avait-il connu le père à Leyde ; on s'expliquerait alors qu'il causât eu toute liberté devant le fils d'un ami. Il parle, en effet, sans ménagement aucun, des théologiens et même de Saint Thomas ; il dit son mot sur Aristote et sur la Bible ; il met enfin ce petit étudiant dans la confidence de ses derniers travaux, l'hiver de 1647-1648, et même de son régime de vie, régime intellectuel (s'occuper de physique surtout, bien plutôt que de métaphysique) et régime du corps ; bien des détails intimes et tout personnels viennent ainsi confirmer ou compléter ceux que l'on connaissait déjà sur Descartes.

De retour à Amsterdam, Burman y rencontre Clauberg, qui, né en 1623, n'était sou ainé que de six ans, et lui fait part de cette conversation. Avait-elle été rédigée déjà, séance tenante, par Burman seul ? ou bien les deux jeunes gens s'entendirent-ils pour la rédiger ensemble, le 10 avril, c'est-à-dire quatre jours après la date même de la conversation, qui avait eu lieu le 16 avril ?

Sont-ce enfin les propres paroles de Descartes, en quelque sorte sténographiées par son interlocuteur, ou seulement le souvenir qu'il en avait gardé, et qu'il a peut-être arrangé avec un ami préoccupé comme lui des doctrines cartésiennes ? Les mots : *responsiones Renati des Cartes... ab ipso haustœ* réponses recueillies de la bouche même de Descartes, et pour ainsi dire puisées à la source), ainsi que l'indication exacte de plus de soixante pages ou articles avec une ligne de chacun textuellement citée rendent la première supposition des plus vraisemblables. Eu tout cas Clauberg prit lui-même copie du texte ainsi rédigé, et c'est la copie de Clauberg qui a été copiée ensuite à Dordrecht, le 13 et 14 juillet, on ne sait en quelle année ni par qui. Clauberg mourut à Duisbourg, le 31 janvier 1665 ; en 1691, parut à Amsterdam une édition de ses *Opera philosophica*, 2 vol. in-4, où ne se trouve pas cette conversation de Descartes et de Burman. Faut-il conjecturer de là qu'elle aurait été copiée pour compléter l'édition, et vers le même temps, cette année 1691 étant aussi mentionnée dans le cahier manuscrit, au feuillet 21, comme date d'une lettre à Grævius ? Le cahier ne serait d'ailleurs entré que plus tard dans la bibliothèque de Crusius [*] (né lui-même en 1715, peut-être seulement à la date de 1751, inscrite, nous l'avons vu, en haut de la première page." (Charles Adam, "Manuscrit de Gottingen. Descartes (Méditations, Principes, Méthode)", *Revue Bourguignonne de l'Enseignement supérieur*, 1896, pp. 2-3)

"Le MS. est paginé seulement au recto des feuilles ; f. 27 à f. 43 inclus. Il comprend trois parties : objections et réponses, 1° sur les *Méditations*, 2° sur les *Principes*, 3° sur le *Discours de la Méthode*.

Les passages sont indiqués avec renvois aux pages de la seconde édition latine des *Méditations* (Amsterdam, Louis Elsevier, 1642), aux articles de chaque livre des *Principes*, et aux pages de la traduction latine du *Discours de la Méthode*, etc. (Amsterdam, Louis Elsevier, 1644). Après l'indication de chaque passage se trouve ordinairement une objection, puis la réponse de Descartes, puis une nouvelle objection, puis une nouvelle réponse, etc. Les réponses sont le plus souvent annoncées par la lettre R, tandis que rien n'annonce les objections. Cela n'a pas d'inconvénient, lorsqu'il n'y a qu'une objection et aussi qu'une réponse à la suite. Mais, s'il y a deux, ou trois, ou même quatre objections successives, il a fallu trouver l'endroit où chacune d'elles commence et se détache de la réponse qui précède. Nous avons indiqué cet endroit par la lettre O entre crochets (O désignant les objections, comme R les réponses). (Charles Adam, AT V, 150).

[*] "Le cahier catalogué à Göttingen Cod. Ms. philol. 264, fit partie de la bibliothèque d'un Crusius (on lit au verso du premier feuillet : « Ex Bibl. M. Crusii »).

"Adam (2), suivi par John Cottingham (3) et Jean-Marie Beyssade (4), estime qu'il doit s'agir de Christian August Crusius (1715-1775), adversaire de Leibniz et Wolff, qui devint professeur de théologie à Leipzig en 1750. Mais en réalité, comme l'indique Hans Werner Arndt (5), il doit plus vraisemblablement s'agir de Magnus Crusius (1697-1751), le livre paraissant être entré dans l'actuelle Niedersächsische Staats und Universitätsbibliothek où M. Crusius était théologien, l'année même de sa mort, comme l'atteste la date 1751 inscrite sur le premier feuillet où apparaît également un cachet Ex Bibliotheca Acad. Georgiæ Augustæ - George Auguste étant le nom de l'Université, fondée en 1737." (Xavier Kieft, "L'Entretien de Descartes avec Burman : un malentendu historico-philosophique", *Klesis. Revue philosophique,* 11, 2009, pp. 108–134)

(5) R. Descartes, *Gespräch mit Burman*, Übersetzt und herausgegeben von H. W. Arndt, Hambourg, Meiner, 1982 (désormais cité « Arndt »), p. I et pp. XXVII-XXVIII. Arndt pense même avoir identifié l'écriture du dit Magnus Crusius.

Johannes Clauberg cite un passage de l'*Entretien avec Burman* (AT V 177) dans le chapitre XVIII de sa *Defensio cartesiana*, Amstelodami, 1652 (repris dans *Opera Omnia Philosophica*, Amstelodami 1691, p. 1000, réedition Hildeshein: Georg Olms 1968)

9. ———. 1648. *[Traité de l'érudition].*

Dans une lettre à Descartes du 5 décembre 1647 Élisabeth de Bohême, princesse Palatine, écrivait :

"Cela vous montre combien le monde a besoin du *Traité de l'Érudition*, que vous avez autrefois voulu faire. Je sais que vous êtes trop charitable pour refuser une chose si utile au public, et que, pour cela, je n'ai pas besoin de vous faire souvenir de la parole que vous [m']en avez donnée." (AT V 97, 4-19 = Baillet II, 337; B636).

Le 31 janvier 1648 Descartes répond :

"J'ai reçu les lettres de votre Altesse du 23 décembre presque aussitôt que les précédentes, et j'avoue que je suis en peine touchant ce que je dois répondre à ces précédentes, à cause que votre Altesse y témoigne vouloir que j'écrive le *Traité de l'Érudition*, dont j'ai eu autrefois l'honneur de lui parler. Et il n'y a rien que je souhaite avec plus de zèle, que d'obéir à vos commandements ; mais je dirai ici les raisons qui sont cause que j'avais laissé le dessein de ce traité, et si elles ne satisfont à votre Altesse, je ne manquerai pas de le reprendre. (2) La première est que je n'y saurais mettre toutes les vérités qui y devraient être, sans animer trop contre moi les gens de l'École, et que je ne me trouve point en telle condition que je puisse entièrement mépriser leur haine (3). La seconde est que j'ai déjà touché quelque chose de ce que j'avais envie d'y mettre

dans une préface qui est au-devant de la traduction française de mes *Principes*, laquelle je pense que votre Altesse a maintenant reçue. La troisième est que j'ai maintenant un autre écrit entre les mains, que j'espère pouvoir être plus agréable à Votre Altesse : c'est la description des fonctions de l'animal et de l'homme." (AT V, 111-112 = Baillet II, 337-338; O VIII 2, 292; B642).

(2) On peut se demander s'il ne s'agit pas ici des *Regulae* (voir Descartes, *Écrits de jeunesse*, éd. V. Carraud, Paris, 2013).

(3) Allusion à ses démêlés à Leyde (avec Revius) et à Utrecht (avec Voet).

10. ———. 1649. *Les passions de l'âme*. Paris: Henry Le Gras.

AT XI, 301-488; B Op. I, 2300-2527.

Traduction latine : *Passiones animae per Renatum Des-Cartes: Gallice ab ipso concriptae, nunc autem in exterorum gratiam Latina civitate donatae ab H.D.M.I.V.L.*, Amstelodami apud L Elzevirium, 1650 (la traduction est de Henricus Des-Marets, fils de Samuel Desmarets (1599-1673); voir : Paul Dibon, "La Traduction latine des Passions de l'âme", dans *Regards sur la Hollande du siècle d'or*, Napoli, Vivarium, 1990, pp. 523-550.)

Premières références au thème des "passions de l'âme" dans les écrits de Descartes :

"En ce qui concerne la variété des passions que la musique peut exciter par la variété de la mesure, je dis qu’en général une mesure lente excite en nous également des passions lentes, comme le sont la langueur, la tristesse, la crainte, l’orgueil, etc., et que la mesure rapide fait naître aussi des passions rapides, comme la joie, etc. Il faut en dire autant des deux genres de battue : la mesure carrée, qui se résout toujours en membres égaux, est plus lente que celle qui est battue en triplât, c’est-à-dire celle qui se compose de trois parties égales. La raison en est que celle-ci occupe davantage le sens parce qu’il y a en elle plus de membres à remarquer — à savoir trois —, tandis qu’il n’y en a que deux dans l’autre. Mais une recherche plus exacte de cette question dépend d’une excellente connaissance des

mouvements de l’âme, et je n’en dirai pas davantage." (AT X 95; traduction du latin par Frédéric de Buzon, *Abrégé de Musique. Compendium Musicae*, Paris: Presses Universitaires de France, 1987, 62).

"A la suite de cela, il faudrait maintenant parler des diverses vertus des consonances à exciter les passions ; mais une recherche plus exacte de cette manière peut être tirée de ce qui a été dit, et dépasserait les limites d’un abrégé. Car ces vertus sont si variées et dépendent de circonstances si légères qu’un volume entier ne suffirait pas à épuiser la question." (AT X, 111; *Abrégé de Musique cit.*, 88)

"De là, et d’autres choses semblables on pourrait déduire plusieurs choses concernant la nature des degrés, mais cela serait long. Il suit que je devrais traiter maintenant de chaque mouvement de l’âme qui peut être excité par la musique, et je pourrais montrer par quels degrés, consonances, rythmes et choses semblables ils doivent être excités ; mais cela dépasserait les limites d’un abrégé." (AT X, 140; *Abrégé de Musique, cit.*, 138)

"Il y a dans tout esprit certaines parties qui, touchées même légèrement, excitent des passions fortes.

Ainsi un enfant qui a l'âme généreuse, si on le gronde, ne pleurera pas, mais il s’emportera ; un autre versera des larmes.

Si l’on nous dit que de grands malheurs sont arrivés, nous nous attristerons ; si l’on ajoute qu’il y avait en cause quelque méchant, nous nous mettrons en colère. Le passage d une passion à une autre se fait par les passions voisines ; quelquefois pourtant il y a des passages violents par les contraires : supposez par exemple que la nouvelle d’un grand malheur se répande tout à coup au milieu de la joie d’un festin.

De même que l’imagination se sert des figures pour concevoir les corps ; de même l’intelligence emploie certains corps sensibles pour figurer les choses spirituelles, comme le vent, la lumière. Une philosophie plus profonde peut élever l’esprit par la connaissance à des hauteurs sublimes." (*Cogitationes*

privatæ, AT X 217 (traduction du latin par Foucher de Careil, I, 11).

"Premièrement, pour ce qui est des esprits animaux, ils peuvent être ou moins abondants, et leurs parties plus ou moins grosses, et plus ou moins agitées, et plus ou moins égales entre elles une fois que l'autre (138) ; et c'est par le moyen de ces quatre différences, que toutes les diverses humeurs ou inclinations naturelles (139) qui sont en nous (au moins en tant qu'elles ne dépendent point de la constitution du cerveau, ni des affections particulières de l'âme) sont représentées en cette machine. Car, si ces esprits sont plus abondants que de coutume, ils sont propres à exciter en elle des mouvements tout semblables à ceux qui témoignent en nous de la *bonté*, de la *libéralité* et de l'*amour*; et de semblables à ceux qui témoignent en nous de la *confiance* ou de la *hardiesse*, si leurs parties sont plus fortes et plus grosses ; et de la *constance*, si avec cela elles sont plus égales en figure, en force, et en grosseur ; et de la *promptitude*, de la *diligence*, et du *désir*, si elles sont plus agitées ; et de la *tranquillité d'esprit*, si elles sont plus égales en leur agitation. Comme, au contraire, ces mêmes esprits sont propres à exciter en elles des mouvements tout semblables à ceux qui témoignent en nous de la *malignité*, de la *timidité*, de l'*inconstance,* de la *tardiveté* (a), et de l'*inquiétude*, si ces mêmes qualités leur défaillent (b).

Et sachez que toutes les autres humeurs ou inclinations naturelles sont dépendantes de celles-ci (140). Comme l'*humeur joyeuse* est composée de la promptitude et de la tranquillité d'esprit ; et la bonté et la confiance servent à la rendre plus parfaite. L'*humeur triste* est composée de la tardiveté et de l'inquiétude, et peut être augmentée par la malignité et la timidité. L'*humeur colérique* est composée de la promptitude et de l'inquiétude, et la malignité et la confiance la fortifient. Enfin, comme je viens de dire, la libéralité, la bonté, et l'amour dépendent de l'abondance des esprits, et forment en nous cette humeur qui nous rend complaisants et bienfaisants à tout le monde. La curiosité et les autres désirs dépendent de l'agitation de leurs parties ; et ainsi des autres." (AT XI, 166-167; *Le Monde, l'Homme*, Introduction de Annie Bitbol-

Hespériès; textes établis et annotés par Annie Bitbol-Hespériès et Jean-Pierre Verdet, Paris: Seuil, 1996, pp. 146-147)

Le 11 juin 1640 Descartes écrit à Mersenne : "J'écrirai à Monsieur de Zuylichem (84) pour lui demander le livre de Monsieur de la Chambre (85) et vous en dirai mon sentiment." (AT III 87; O VIII 1, 383; B 255).

(84) Lettre à Huygens perdue (Huygens était alors en campagne militaire en Flandre).

(85) Marin Cureau de La Chambre [1594 - 1669], *Les Caractères des passions*, 1640 (privilège du 15 décembre 1639) ; il s'agit des *Passions pour le bien*; un second volume, *Les Passions courageuses*, paraîtra en 1645.

Lettre à Mersenne du 28 janvier 1641 : "J'ai reçu, il y a déjà quelques semaines, le livre de Monsieur de la N. (9), et un autre du dixième livre d'Euclide mis en français (10). Mais pour vous avouer la vérité, sur ce que Monsieur de Zuylichem m'avait dit, avant de me les envoyer, qu'ils ne contenaient rien de fort exquis, et que j'avais d'autres occupations, je les ai laissé reposer, après avoir lu deux ou trois heures dans le premier, sans rien y trouver que des paroles."

(9) Peut-être les *Caractères* de Marin Cureau de La Chambre, dont il est déjà question dans à Mersenne, 11 juin 1640 (AT III 87, [O VIII 1, 383] B 255) et 28 octobre 1640 (AT III 207, [O VIII 1, 415-416] B 278).

(10) Le *Traité des quantités* de J.-A. Le Tenneur.

En 1645 Descartes suggère à la princesse Élisabeth de lire le *De vita beata* de Sénèque (lettre du 21 juillet, (AT IV 253; O VIII 2, 208; B511) ; voir aussi les lettre du 4 août 1645 : "Lorsque j'ai choisi le livre de Sénèque *De vita beata*, pour le proposer à Votre Altesse comme un entretien qui lui pourrait être agréable, j'ai eu seulement égard à la réputation de l'auteur et à la dignité de la matière, sans penser à la façon dont il la traite, laquelle ayant depuis considérée, je ne la trouve pas assez exacte pour mériter d'être suivie." (AT IV, 263, [O VIII 2, 209] B 514), et du 18 août 1645 : "J'ai dit ci-devant ce qu'il me

semblait que Sénèque eût dû traiter en son livre ; j'examinerai maintenant ce qu'il traite." (AT IV, 271-272; O VIII 2, 224; B 517).

Descartes expose les premières esquisses de sa théorie des passions dans trois lettres à Élisabeth : 1 septembre 1645 (AT IV 281-287; O VIII 2, 219-223; B 524) ; 15 septembre 1645 (AT IV, 290-296; O VIII 2, 225-2231; B 519) ; 6 octobre 1645 (AT IV, 304-317; O VIII 2, 231-239; B526).

Le commencement du livre est annoncé dans la lettre à la princesse du 3 novembre 1645 : "J'ai pensé ces jours au nombre et à l'ordre de toutes ces passions, afin de pouvoir plus particulièrement examiner leur nature ; mais je n'ai pas encore assez digéré mes opinions, touchant ce sujet, pour les oser écrire à Votre Altesse, et je ne manquerai de m'en acquitter de plus tôt qu'il me sera possible." (AT IV, 331; O VIII 2, 242; B 529).

Un première version du livre est terminée au début de 1646 (lettre d'Élisabeth du 25 avril) : "Cela m'a empêché jusqu'ici de me prévaloir de la permission, que vous m'avez donnée, de vous proposer les obscurités que ma stupidité me fait trouver en votre *Traité des passions* (3), quoiqu'elles sont [sic] en petit nombre, puisqu'il faudrait être impassible, pour ne point comprendre que l'ordre, la définition et les distinctions que vous donnez aux passions, et enfin toute la partie morale du traité, passent tout ce qu'on a jamais dit sur ce sujet." (AT IV 404; O VIII 2, 252; B 554).

(3) Descartes s'était rendu le 7 mars à La Haye (à Chanut, 6 mars 1646, AT IV, 376 l. 11, [O VIII 2, 252] B 545) et avait pu y laisser à la princesse une copie manuscrite de son *Traité des passions de l'âme*.

Voir aussi la lettre à Élisabeth du mai 1646: "Je reconnais, par expérience, que j'ai eu raison de mettre la gloire au nombre des passions (2) ; car je ne puis m'empêcher d'être touché, en voyant le favorable jugement que fait Votre Altesse du petit traité que j'en ai écrit (3) Et je ne suis nullement surpris de ce qu'elle y remarque aussi des défauts, parce que je n'ai point

douté qu'il n'y en eût en grand nombre, étant matière que je n'avais jamais ci-devant étudiée, et dont je n'ai fait que tirer le premier crayon (4), sans y ajouter les couleurs et les ornements qui seraient requis pour la faire paraître à yeux moins clairvoyants que ceux de Votre Altesse." (AT IV 407; [O VIII 2, 254] B 556).

(2) *Passions de l'âme* III § 204 (AT XI, 482).

(3) Voir lettre à Élisabeth, 25 avril 1646 (AT IV, 404; [O VIII 2, 252] B 554).

(4) Au sens d' « esquisse ».

Le 20 novembre 1647 Descartes envoi une copie manuscrite de son livre à la Reine Christine de Suède : "J'ai appris de Monsieur Chanut (2) qu'il plaît à Votre Majesté que j'aie l'honneur de lui exposer l'opinion que j'ai touchant le Souverain Bien, considéré au sens que les philosophes anciens en ont parlé ; et je tiens ce commandement pour une si grande faveur, que le désir que j'ai d'y obéir me détourne de toute autre pensée, et fait que, sans excuser mon insuffisance, je mettrai ici, en peu de mots, tout ce que je pourrai savoir sur cette matière." (AT V, 81-82; O VIII 2, 311; B 631).

(...)

"J'omets encore ici beaucoup d'autres choses, parce que, me représentant le nombre des affaires qui se rencontrent en la conduite d'un grand royaume, et dont Votre Majesté prend elle-même les soins, je n'ose lui demander plus long audience. Mais j'envoie à Monsieur Chanut quelques écrits (4), où j'ai mis mes sentiments plus au long touchant la même matière, afin que, s'il plaît à Votre Majesté de les voir, il m'oblige de les lui présenter, et que cela aide à témoigner avec combien de zèle et de dévotion, je suis..." (AT V 87-88; O VIII 2, 314; B 631).

(2) Voir lettre de Chanut, 21 septembre 1647 (AT V, 89-90, B 628; lettre résumée par Descartes à Élisabeth, 20 novembre 1647, AT V 89-92, [O, VIII, 2, 289-290] B633).

(4) Les *Passions de l'âme* et plusieurs lettres envoyées à Élisabeth (21 juillet 1645, AT IV 251-253, [O VIII 2, 207-209]

B511 ; 4 août 1645, AT IV 263-268, [O VIII 2, 209-212] B514; 18 août 1645, AT IV 271-278, [O VIII 2, 214-218] B517; 1er septembre 1645, AT IV, 281-287, [O VIII 2, 219-223] B517; 15 septembre 1645, AT IV, 290-296, [O VIII 2, 225-229] B521, et, en partie, 6 octobre 1645, AT IV, 304-317, [O VIII 2, 231-239] B 526); à Élisabeth, 20 novembre 1647 (AT V, 90 l. 25-91 l. 3, [O VIII 2, 289-290] B 633).

Descartes fait ses dernières modifications entre avril et août 1649 : "Pour le traité des *Passions*, je n'espère pas qu'il soit imprimé qu'après que je serai en Suède (3); car j'ai été négligent à le revoir et y ajouter les choses que vous avez jugé y manquer, lesquelles l'augmenteront d'un tiers ; car il contiendra trois parties, dont la première sera des passions en général, et par occasion de la nature de l'âme, etc., la seconde des six passions primitives, et la troisième de toutes les autres." (AT V, 354; O VIII 2, 725; B 697).

"L'accroissement d'environ un tiers n'implique pas nécessairement que le contenu de la troisième partie y ait été ajouté en totalité : les développements sur la générosité, et les conclusions générales du *Traité* n'étaient-ils pas au moins ébauchés dans cette « partie morale » qui satisfaisait si fort Élisabeth (3) ? Mais les observations de détail de la Princesse concernaient essentiellement la seconde partie actuelle (4)." (Genèvieve Rodis-Lewis, *Introduction* à son édition de *Les passions de l'âme*, Paris: Vrin, 2010, p. 26 (première édition 1994).

(3) 25 avril 1646, AT IV, 404 [O VIII 2, 252; B 554].

(4) Ch. Adam avait d'abord rapporté une remarque d'Élisabeth à l'art. 170 (AT IV, 414, note), mais la langueur est déjà évoquée dans les articles 119 à 121 (AT XI, 298). La seconde partie, sous sa forme définitive, amorce plusieurs renvois à la troisième, précisément à propos de la générosité (art. 83, 145).

11. ———. 1649. *La naissance de la paix. Ballet*.

Texte d'un ballet dansé au château royal de Stockholm le jour de la naissance de Christine de Suède le 18 décembre 1649.

AT (nouvelle édition) V 616-627; B op. II, 1412-1435.

La première édition (Stockholm, Jean Janssonius, 1649 disponible à l'adresse : diglib.hab.de/wdb.php?dir=drucke/20-4-quod-2f-6) à été découverte par Johan Nordström dans la *Bibliotheca Carolina Rediviva* de Uppsala et publiée par lui et Albert Thibaudet avec le titre: *Un Ballet de Descartes. La Naissance de la Paix*, Revue de Genève, pp. 173-185 (avec une introduction de A. Thibaudet (pp. 161-170) et une note de J. Nordström (pp. 171-172).

L'authenticité de cet écrit a été déniée par Richard A. Watson, "René Descartes n'est pas l'auteur de la Naissance de la paix", *Archives de Philosophie*, 53, 1990, pp. 389-401 et *Descartes's Ballet. His Doctrine Of the Will and His Political Philosophy*, St. Augustine's Press, South Bend, 2007 (avec la traduction du texte) et par Matthijs van Otegem, *A Bibliography of the Works of Descartes (1637-1704)*, Utrecht: Proefschrift Universiteit, 2002, vol. II, pp. 731-735.

Geneviève Rodis-Lewis a défendu l'authenticité de l'œuvre (*contra* Watson) dans: "Gli ultimi scritti di Descartes", traduit en italien par Leon Ginzburg, *Discipline Filosofiche*, 1993, pp. 15-42, version française dans : G. Rodis-Lewis, *Le développement de la pensée de Descartes,* (recueil d'articles), Paris: Vrin, 1997, pp. 203-223.

12. ———. 1649. *Projet de comédie (Extraits de Baillet)*.

Baillet II, 407-408 (le texte est perdu); AT XI 661-662; B Op II, 922-923.

"Nous avons pareillement une espèce de Comédie française, qu'il fit en prose mêlée de quelques vers, pendant son séjour à la Cour de Suède. Ce fut l'un des fruits de l'oisiveté où la Reine le retint durant l'absence de l'Ambassadeur de France, dont elle attendait le retour. La pièce est imparfaite, et le quatrième Acte ne paraît pas même achevé. Elle a tout l'air d'une Pastorale ou Fable bocagère. Mais quoiqu'il semble avoir voulu envelopper l'amour de la Sagesse, la recherche de la Vérité, et l'étude de la Philosophie, sous les discours figurez de les personnages ; on peut dire que tous ces mystères seront assez peu importants au Public, tant qu'il jouira des autres écrits, où M. Descartes s'est expliqué sans mystères. » (Baillet II, 407)

13. ———. 1650. *Projet d'une académie à Stockholm (Extraits de Baillet).*

    AT XI 663-665; Baillet II, 411-413; B Op. II, 925-929.

    C'est le dernier écrit de Descartes (1 février 1650).

    "...La Reine, qui ne songeait à rien moins qu'à l'incommoder, l'obligea, dans le fort de la maladie de M. l'Ambassadeur, de retourner encore au Palais après-midi pendant quelques jours, pour prendre avec elle la communication d'un dessein de Conférence ou d'Assemblée de Savants, qu'elle voulait établir en forme d'Académie, dont elle devait être le chef et la protectrice. Elle regarda M. Descartes comme l'homme du meilleur conseil qu'on put écouter sur cet établissement, et elle le choisit pour en dresser le plan et pour en faire les règlements. Il lui porta le mémoire qu'il en avait fait, le premier jour de Février, qui fut le dernier qu'il eut l'honneur de voir la Reine." (Baillet II, p. 411).

René Descartes. Outils de Recherche en Français

Introduction

Cette page contient une liste annotée des biographies, dictionnaires, concordances et répertoires bibliographiques sur Descartes en langue Français e; pour les études en anglais voir:

Descartes. Bibliographies, Concordances, Dictionaries, Lexica

Abréviations

Note su les éditions de la Correspondance de Descartes:

L'édition Adam-Tannery est devenue obsolète après la publication de nouvelles éditions par G. Belgioioso (texte original latin ou Français et traduction italienne, lettres dans l'ordre chronologique) et par J.-R. Armogathe (lettres en latin publiées en traduction Français e, groupées par correspondant), pour un total de 735 lettres; cette édition donne seulement "la correspondance active (les lettres de Descartes), en donnant en note les éléments de correspondance passive (parfois des lettres entières) nécessaires à la bonne compréhension." (O VIII, 1, p. 22)

Je cite les lettres de Descartes après l'édition de Armogathe (O VIII, 1 et 2), mais je donne aussi la référence à l'édition Adam-Tannery (AT I-V, X: *Supplément à la Correspondance*, pp. 538-632) et le numéro de la lettre dans l'édition Belgioioso (B); pour la correspondance passive, je cite le texte de l'édition Belgioioso, avec la référence à l'édition AT.

- CM = Marin Mersenne, *Correspondnce du P. Marin Mersenne, réligieux minime*, commencée par Mme Paul Tannery, publiée et annotée par Cornelis De Waard, 17 vol. Paris: CNRS, 1932-1988.
- CO = Vincent Carraud, Gilles Olivo (éds.), *René Descartes, Étude du bon sens, La recherche de la vérité et autres écrits de jeunesse (1616-1631)*, Paris: Presses Universitaires de France 2013.

  "Le présent ouvrage réunit donc l'ensemble des écrits de Descartes, de 1616 à 1631, excepté, bien sûr, les œuvres qui lui ont été attribuées mais dont nous ne connaissons que le titre, ou au contraire celles qui ont déjà fait l'objet d'éditions et de commentaires séparés, mais dont des pages signets marquent simplement l'emplacement: le *Compendium musicae*, le *De solidorum elementis* et les *Regulae ad directionem ingenii*.

Portant sur la genèse de la pensée philosophique de Descartes, il n'inclut pas davantage ses essais scientifiques, que d'autres, plus compétents que nous en la matière, éditeront de leur côté. Il comprend donc les écrits philosophiques du jeune Descartes, précédés, pour des raisons que l'originalité de sa dédicace fera apparaître en son lieu propre, du placard de sa licence en droit, soit:

— un ensemble de notes que l'on peut attribuer ou rattacher aux diverses parties du *Registre de 1619*;

— les *Olympica*, qui font mémoire de la découverte des «fondements de la science admirable»;

— le *Studium bonae mentis*, essai de restitution;

— la *Censura quarumdam Epistolarum Domini Balzacii*, texte latin et traduction Français e de Clerselier;

— *La recherche de la vérité par la lumière naturelle*, fragment Français conservé dans les papiers de Leibniz, traduction néerlandaise de 1684, première traduction Français e de la traduction néerlandaise, traduction latine de 1701." p. 8.

Biographies anciennes (jusq'au 1950)

1. Beeckman, Isaac. 1939. *Journal tenu par Isaac Beeckman de 1604 à 1634, publié avec une introduction et des notes*. The Hague: Martinus Nijhoff.

   Le *Journal tenu par Isaac Beeckman de 1604 à 1634*, a été publié en quatre volumes par Cornelis de Waard, La Haye: Martinus Nijhoff, 1939-1953: Tome I: 1604-1619; (1939) Tome II: 1619-1627 (1942); Tome III: 1627-1634 [1635] (1945); Tome IV: Supplément (1953).

   Les passages sur Descartes ont été publiés dans l'édition Adam-Tannery des *Œuvres de Descartes*:

   I. Varia: 15 extraits (AT X, 41-66); II. Physico-Mathematica: 1) Aquae comprimentis in vase ratio reddita à D. Des Cartes (AT 67-74; 2) Lapis in vacuo versus terrae centrum cadens quantum singulis momentis motu crescat, ratio Des Cartes (AT X, 75-78).

Voir aussi dans AT X. *Beeckman et Descartes (1618-1619). Avertissement* (1905), par Adam Tannery, pp. 17-39.

Lettres de Descartes à Beeckman:

1619: I. 24 janvier, II. 26 mars, III. 20 avril, IV. 23 avril, V. 29 avril;

1630: VI. septembre, VII. 17 octobre;

1634: VIII. 22 août.

Lettre de Beeckman à Descartes:

1619: 6 mai.

Édition de la correspondance entre Descartes, Beeckman et Mersenne: Giulia Belgioioso et Jean-Robert Armogathe (éds.), *René Descartes, Isaac Beeckman, Marin Mersenne. Lettere 1619-1648*, édition intégrale avec traduction italienne en face, Milan: Bompiani, 2015.

2. Lipstorp, Daniel. 1653. *Specimina philosophiae cartesianae, quibus accedit eiusdem authoris Copernicus redivivus, seu de vero mundi systemate liber singularis*. Lugduni Batavorum: Elsevier.

   Contient la première biographie de Descartes.

   "Au défaut d'une Vie parfaite, il s'est trouvé des auteurs qui ont au moins tenté d'en donner des abrégés ou des fragments. Celui qui semble y avoir le moins mal réussi est le sieur Daniel Lipstorpius de Lübeck professeur dans l'université de son pays. Cet auteur, n'ayant pas voulu laisser perdre les particularités de la vie de M. Descartes qu'il avait apprises en Hollande tant de M. Schooten l'ancien que de M. de Raey docteur en médecine, nous a donné en deux feuilles d'impression plus que l'on aurait dû attendre d'un étranger qui n'a travaillé que sur des relations subreptices. Quoique ce soit très peu de chose par rapport à la vie de M. Descartes, on doit lui savoir gré de ce qu'il a dit, sans lui reprocher ses omissions ou ses négligences. Quelque grand que soit le nombre de ses fautes, il est louable de n'en avoir pas fait encore davantage. C'est à M. de Raey qu'il était particulièrement redevable de tout ce qu'il a dit de meilleur;

mais parce qu'il a oublié de le reconnaître au moins publiquement, je me crois obligé de suppléer à ce défaut, et de rendre à M. de Raey la justice qui lui était due par M. Lipstorpius. Il est bon que l'on sache que 'a été à l'insu de M. de Raey et sans sa participation que M. Lipstorpius a publié ce qu'il en avait appris touchant la vie de M. Descartes. M. de Raey avait un disciple nommé M. van Berhel jeune homme de beaucoup d'esprit et de grande capacité, à qui il avait donné divers petits mémoires curieux. M. Lipstorpius, ayant reu de M. van Berhel quelques-uns de ces mémoires qui regardaient M. Descartes, les avait donnés de bonne foi au public, sans examiner s'il avait besoin du consentement de M. de Raey, ou s'il devait les autoriser de son nom.

Ce fragment de la Vie de M. Descartes fut imprimé à Leyde l'an 1653 parmi les Essais de D. Lipstorpius touchant la philosophie cartésienne."

Adrien Baillet, *La vie de Monsieur Descartes*, (1691), Préface, pp. XIII-XV.

"Au tome I, Lipstorp donne, dans un *Appendix*, une courte biographie de Descartes, p. 69-94; encore les cinq dernières pages sont-elles remplies par le texte des inscriptions ou épitaphes en l'honneur du philosophe, si bien que quinze pages et demie tout au plus sont consacrées au récit de sa vie." (Charles Adam, *Vie et Œuvres de Descartes. Étude historique*, Paris: Léopold Cerf, 1910, p. VI).

"En dehors de la France, Daniel Lipstorpius, professeur à l'Université de Lubeck, a publié en 1653 un fragment sur la vie de Descartes dans ses *Specimina philosophiae* in-4° Ludg.-Batav., et Jean Tepelius a fait paraître à Nuremberg, en 1664, *Historia philosophiae cartesianae*, in-12, qui n'est qu'une brochure et dont un seul chapitre, fort incomplet comme tout le reste, est consacré à la vie de Descartes."

Francisque Bouillier, *Histoire de la Philosophie Cartésienne*, Paris, 1868, p. 31.

"Le volume se divise en trois parties, auxquelles il faut ajouter l'essai conclusif en forme de défense de la théorie

copernicienne: le *Copernicus redivivus*. Les trois parties qui composent les *Specimina* contiennent, respectivement, une justification de la méthode mathématique suivie par Descartes, une exposition des règles du mouvement *more geometrico demonstratas*, et, enfin, un traité sur l'air."

Massimiliano Savini, *Johannes Clauberg*. Methodus cartesiana *et ontologie*, Paris: Vrin, 2011, p. 281. (voir aussi *Les* Specimina philosophiae cartesianae *de Daniel Lipstorp*, pp. 281-292.)

3. Borel, Pierre. 1656. *Vitae Renati Cartesii, Summi philosophi compendium*. Paris: Ioannem Billaine et Mathurini Dupuis.

"Mais sur la fin de la même année [1653] l'on vit paraître à Castres en Languedoc une espèce d'abrégé de la même Vie composé par le sieur Pierre Borel médecin du roi, et dédié à M. Pélisson. Il fut réimprimé à Paris trois ans après; puis à Francfort et à Leipzig en 1670 et en 1676. Et enfin inséré parmi les Mémoires du sieur Henning Witte imprimés à Francfort l'an 1677. Il paraît que l'auteur de ce petit Abrégé n'a écrit que sur ce qu'il pouvait avoir appris de son ami M. de Villebressieu qui avait demeuré pendant quelque temps avec M. Descartes. De sorte que si on en excepte quelques faits généraux, comme sont ordinairement ceux qu'on ne retient qu'en gros pour les choses passées dont on ne tient point de registre, il semble qu'il n'y ait point de sûreté dans tout le reste. L'auteur ne s'est pas fort embarrassé des circonstances particulières qui pouvaient servir à vérifier ses faits. Il ne s'est assujetti à aucun ordre ni pour les temps ni pour les espèces. Il n'a donné à son écrit ni style ni forme; et la manière dont il a confondu toutes choses peut nous faire juger qu'il n'y a rien dans son Abrégé qui soit plus remarquable que l'industrie avec laquelle il a su entasser tant de fautes dans un si petit espace.

M. Borel s'est fait la justice de ne regarder son écrit que comme une ébauche imparfaite et comme un simple prélude d'une juste histoire qu'il semblait promettre, au cas qu'il se trouvât suffisamment pourvu de facultés, et du secours nécessaires à un ouvrage de cette nature. Et M. Lipstorpius a eu la modestie de s'excuser d'une semblable entreprise sur les difficultés qu'il y trouvait tant de son côté que de celui de M. Descartes.

Mais vingt ans après il s'est rencontré un autre Allemand plus courageux, qui sans s'épouvanter des obstacles qui rebutaient les autres, a voulu enfin donner au public le grand ouvrage qu'on attendait depuis tant de temps. Il le fit paraître à Nuremberg l'an 1674 sous le titre magnifique de M. Johannis Tepelii *Historia Philosophia Cartesiana*. C'est un ouvrage de quatre petites feuilles d'impression, divisé en six chapitres, dont il n'y a que le premier qui regarde précisément la vie de M. Descartes. Il serait peut-être plus utile s'il était moins superficiel, ou s'il avait pu se garantir des fautes de ceux qu'il a copiés. Mais on ne peut disconvenir que le sieur Gérard de Vries n'ait eu très grande raison de l'estimer très peu, et de regarder ce petit écrit comme une pièce tout à fait indigne de son grand titre. M. Tepelius a cru peut-être en rehausser l'éclat par une pompeuse dédicace, dont le seul titre occupe six pages pour étaler les noms et qualités de cinq officiers de justice à la tête de son épître. Ce qui nous fait regarder tout le corps de l'ouvrage comme un petit monstre plus capable de nous faire rire que de nous effrayer. "

Adrien Baillet, *La vie de Monsieur Descartes*, (1691), Préface, pp. XV-XVII.

"Avant Baillet, un autre Français , Pierre Borel, médecin de Castres, avait écrit une vie de Descartes: Renati Cartesii summi phîlosophi Compendium, publié à Castres en 1653. Mais cette vie est très-courte, incomplète, sans ordre; elle a été rédigée sur oui dire et n'a de remarquable que l'enthousiasme de l'auteur pour Descartes."

Francisque Bouillier, *Histoire de la Philosophie Cartésienne*, Paris, 1868, p. 31

Cette première édition n'est pas citée dans la liste de ses œuvres que Borel a publié dans son *Trésor de recherches et antiquitez gauloises et franoises réduites en ordre alphabétique* (1655); en outre à p. 26 et p. 47 Borel cite l'ouvrage de Lipstorp (1653) et d'autres ouvrages datés de 1654: la première édition est donc très probablement celle de 1656.

Repris dans Roger Ariew, Daniel Garber (eds.), *Descartes in Seventeenth-Century England*, Bristol: Thoemmes, 2002, vol. 3: *Biographies of Descartes*: Pierre Borel, *A Summary or Compendium, of the Life of the Most Famous Philosopher Renatus Descartes* (1670); Marcus Zurius Boxhorn, *Epitome of the Life of Descartes*, in: Pierre Borel, *A Summary or Compendium, of the Life of the Most Famous Philosopher Renatus Descartes* (1670); Adrien Baillet, *The Life of Monsieur Des Cartes* (1693).

Le livre contient la première édition de l'inventaire des manuscrits de Descartes retrouvés à Stockholm après sa mort: *Elenchus manuscriptorum Cartesii Stocholmi repertorum post Eius obitum anno 1650* (pp. 16-19).

"Si cette biographie se ressent des lacunes de sa documentation, elle vaut toutefois par sa date même de parution, un an avant les publications de Clerselier, comme par ses annexes, puisque, à côté des épitaphes de la tombe de Descartes à Stockholm, on y trouve la liste des ouvrages imprimés ou manuscrits de Descartes, ainsi qu'une dizaine de lettres au P. Mersenne et deux à l'Électeur Palatin." (Pierre Chabbert, *Pierre Borel (1620 ?-1671)*. In: *Revue d'histoire des sciences et de leurs applications*, tome 21, n°4, 1968. pp. 303-343).

4. Baillet, Adrien. 1691. *La vie de monsieur Des-Cartes*. Paris: D. Horthmels.

   Deux volumes.

   Réimpression anastatique: Hildesheim: Georg Olms, 1972; Genève: Slatkine Reprints, 2010; nouvelle édition en un volume: *La vie de monsieur Descartes par Adrien Baillet* suivi de *Abrégé de la vie de M. Baillet par Bernard de La Monnoye*, Paris: Les Cinquante / Éditions des Malassis, 2012. [l'auteur de la vie de de Baillet est son neveu, Augustin Frion: cfr. Jean-Pierre Niceron, *Mémoires pour servir à l'histoire des hommes illustres dans la république des lettres avec un catalogue raisonné des leurs Ouvrages*, Paris: Briasson, 1730, vol X, p. 127]

Sur Baillet voir: Leonard J. Wang, *The Life and Works of Adrien Baillet*, [1649-1706] thèse inédite, Columbia University, 1955, 298 pages (disponible en format PDF chez ProQuest Dissertation Express, ref. n. 0012074).

"Pour moi j'avoue l'intention que j'ai eue de faire tout sérieusement la vie de M. Descartes, et même l'histoire du cartésianisme jusqu'à la mort de son auteur; et je comprends aisément que j'aurais mauvaise raison de vouloir décliner le jugement de ceux qui voudront examiner mon ouvrage sur toutes les règles d'une vraie histoire.

Afin de leur faciliter les voies, je crois devoir leur montrer du doigt les sources où j'ai puisé, et leur indiquer les personnes qui pourraient garantir ce qui m'est venu par leur canal. Je déclare d'abord que je n'ai donné l'exclusion à aucun livre imprimé tel qu'il pût être; et que je me suis servi aussi utilement des écrits composés par les ennemis et les adversaires de M. Descartes, que des ouvrages faits par ses amis et ses sectateurs. Mais on me permettra de dire que rien ne s'est trouvé plus à mon usage que les œuvres même de notre philosophe; et que parmi ces œuvres il n'y en a point eu de plus propres à mon dessein que les trois volumes de ses lettres (*) avec son *Discours de la méthode*. J'ai retiré aussi de grands avantages des manuscrits qu'il avait laissés en mourant entre les mains de l'ambassadeur de France en Suède; et de plusieurs autres papiers qui se sont heureusement conservés chez quelques-uns de ses amis. J'ai tâché de mettre en œuvre les témoignages de tous ceux qui ont eu quelques relations avec M. Descartes, et surtout des personnes de probité, qui ayant vu et connu notre philosophe à Paris, en Hollande, et en Suède, sont encore au monde pour pouvoir prêter leur ministère à la vérité."

Adrien Baillet, *La vie de Monsieur Descartes*, (1691), Préface, pp. XX-XXI.

(*) Claude Clerselier. *Lettres de Mr Descartes*, 3 vols., Paris, Charles Angot, 1657, 1659, 1667 (réimpression anastatique de la troisième édition (1666-1667) de l'exemplaire de l'Institut de France avec les annotations autographes de Jean-Baptiste

Legrand et Adrien Baillet, par les soins de Jean-Robert Armogathe et Giulia Belgioioso, Lecce: Conte Editore, 2005).

"Baillet a publié eu 1691 une *Vie de Descartes,* en 2 vol. in-4°, dont il a donné l'année suivante un abrégé en 1 vol. in-12. Baillet est de beaucoup le meilleur et le plus complet de tous les biographes de Descartes.

Il a eu le concours de tous les amis de Descartes; il a puisé aux sources les plus sûres et dans les pièces originales. Aussi son histoire abonde-t-elle- en détails intéressants, en renseignements précieux sur la vie, sur la personne et sur les ouvrages de Descartes. Mais malheureusement Baillet, qui est tout à fait dépourvu d'esprit philosophique et de sens critique, mêle à son récit une foule do hors-d'œuvre, de plates réflexions, de minuties, tandis que souvent il omet ce qu'il nous importerait le plus de savoir pour l'histoire de la philosophie de Descartes. Nous ne dirons donc pas avec M. Cousin que l'ouvrage de Baillet est excellent, mais, d'un autre côté, nous ne saurions approuver ce jugement trop sévère qu'en porte Malebranche: « La Vie de M. Descartes par M. Baillet n'est propre qu'à rendre ridicules ce philosophe et sa philosophie. » (Correspondance inédite publiée par l'abbé Blampignon, p. 13.) (**)"

Francisque Bouillier, *Histoire de la Philosophie Cartésienne*, Paris, 1868, p. 31.

(**) Nicolas Malebranche, *Œuvres complètes*, sous la direction d'André Robinet, Paris: Vrin, 1978, vol. XIX, *Correspondance et actes (1690-1715)*, p. 561.

5. ———. 1692. *La vie de mr. Des-Cartes. Réduite en abrégé*. Paris: G. de Luynes.

   Deuxième édition révisée, Paris, 1693.

   Édition moderne: *Vie de Monsieur Descartes*, Paris, La Table Ronde, 1946, réimpression 1992). Cette édition omit l' *épitre à Monseigneur le Chancelier* et l' *Avertissement*, pp. 1-2.

   English translation: *Life of Monsieur Descartes, Containing the History of His Philosophy and Works*, London: R. Simpson,

1693.

Traduzione italiana di Lelia Pezzillo: *Vita di Monsieur Descartes*, Milano, Adelphi, 1996.

"Je ne me suis pas contenté de suivre dans cet *Abrégé* l'ordre que je m'étais prescrit dans l'histoire de la vie de M. Descartes, et d'en observer l'économie dans la même division des livres et des chapitres. Je me suis encore assujetti autant que j'ai pu à ne le composer que des mêmes expressions, afin qu'on y puisse retrouver la vie de M. Descartes toute entière, mais en petit, comme une miniature représente un portrait qui se trouve ailleurs dans un grand tableau."

Adrien Baillet, *Avertissement*.

"M. Baillet était déterminé à laisser en repos ses *Auteurs déguisés*, aussi bien que la suite de ses *Jugements des savants*, en attendant que la Providence lui présentât l'occasion indispensable d'en continuer la publication, lorsque M. l'abbé Legrand l'engagea avec quelques autres intéressés à ranger par ordre les mémoires qu'il avait recueillis sur la vie et la philosophie du célèbre philosophe de nos jours M. Descartes. En bien moins d'un an elle fut mise sous la presse, dès le 19 février 1691 le libraire Hortemels chargé de ce livre trouva fort son compte avec les étrangers, et en trois mois de temps il leur envoya plus de la moitié de l'édition. Si la mort ne l'avait enlevé, il se flattait d'en donner une seconde. Cependant comme on était bien aise d'avoir en France une *Vie de Descartes* qui fut courte et à bon marché, et qu'on menaait de réduire en abrégé celle qui y paraissait dans une juste étendue, M. Baillet, docile aux remontrances de ses amis, se mit à renfermer en un petit in-12 les deux in-4° de la vie de son philosophe."

Augustin Frion (neveu de Baillet), *Abrégé de la vie de M. Baillet*, dans le premier volume de Adrien Baillet, *Jugemens des savans sur les principaux ouvrages des auteurs,* revus, corrigés et augmentés par M. [Bernard] de La Monnoye, Paris: C. Moette, 1722, Amsterdam 1726, pp. 19-20.

6. Millet, Joseph. 1867. *Histoire de Descartes avant 1637; suivi de L'analyse du Discours de la méthode et des Essais de philosophie*. Paris: Didier.

   "La vie de Descartes, esquissée d'abord d'une manière imparfaite et tout à fait insuffisante par Lipstorpius (1) et Borel (2), a été écrite ensuite par Baillet (3) d'une manière beaucoup moins incomplète, mais d'un style lourd, prétentieux, emphatique, qui seul justifierait notre tentative.

   Cet ouvrage a d'autres défauts: « il renferme beaucoup d'inutilités et de minuties (4), il est rempli d'anachronismes (5), et Huyghens (6) en a relevé quelques-uns. Leibniz (7) a également signalé plusieurs erreurs dans ce travail dont l'auteur « est dépourvu de sens critique et d'esprit philosophique (8).» L'auteur, fort ignorant en toutes choses, est surtout effrayé des épines de l'Algèbre; la Géométrie est pour lui lettre close, et il est incapable de discuter les idées métaphysiques de Descartes, il néglige une chose qui est cependant de la plus haute importance quand on écrit la biographie d'un savant inventeur et d'un philosophe: il oublie de nous donner la filiation des idées et des inventions, de retracer l'histoire psychologique du penseur et du chercheur. Ce travail était donc à faire: la beauté et la grandeur du su jet nous ont tentés, et sans nous laisser décourager par les difficultés et les périls de l'entreprise, nous avons voulu reproduire d'une manière complète et exacte, et replacer sous les yeux de tous, avec sa physionomie vraie, l'une des plus grandes figures du XVIIe siècle et de tous les siècles. Descartes est l'un des pères de la pensée moderne, nul n'a fait plus que lui pour renouveler et transformer nos idées sur le monde et sur Dieu; ce sera donc un spectacle curieux et instructif que d'assister à l'évolution de son génie.

   Pour écrire cette histoire rien ne nous a été plus utile que les ouvrages mêmes de Descartes, particulièrement les lettres et les ouvrages de sa jeunesse publiés en 1860 par M. Foucher de Careil (9). Nous mettrons en seconde ligne Baillet lui-même, dont l'ouvrage est une mine où il faut savoir puiser. Nous avons emprunté aussi quelques détails à Lipstorpius et à Borel.

Lipstorpius tenait tous ses renseignements de Raey, ami de Descartes, et de Van Berhel, disciple de Raey.

Pierre Borel avait appris ce qu'il nous a donné de M. de Villebressieux, dont nous parlerons plusieurs fois, qui avait connu Descartes à Paris, et avait été demeurer avec lui pendant plusieurs années en Hollande. Je n'ai pu me procurer l'ouvrage de Tépelius: *Historia Philosophiae cartesianae*, qui n'était du reste, selon Baillet, qu'un ouvrage superficiel et tout à fait indigne de son titre." (XVII-XIX)

Ce deuxième volume a aujourd'hui seulement un intérêt historique.

"Nous touchons au terme de la carrière que nous voulions parcourir. Nous avons fait connaître, autant que cela a dépendu

de nous, l’âme et la doctrine de Descartes. Mais comme les détails en toute chose font d’ordinaire perdre la vue de l’ensemble, il nous reste à réunir les traits épars de cette physionomie à la fois énergique et tendre, héroïque et méditative, à rassembler dans un cadre restreint les éléments essentiels de cette philosophie et à en apprécier la valeur et le rôle historique.

Les deux traits dominants de l’âme de Descartes sont la force de la volonté et l’étendue de la raison. Cette force de volonté enfante les résolutions énergiques et persévérantes, et d’abord la résolution mère et inspiratrice de toutes les autres celle de bâtir en philosophie sur des fondements nouveaux, de refondre complètement et comme d’un seul jet la science tout entière. Cette entreprise, l’une des plus vastes qui aient jamais été tentées, il la poursuit sans relâche depuis sa seizième année jusqu’à sa mort; nul accident ne l’arrête ou ne le fait dévier, nul obstacle ne le rebute, nul mauvais vouloir, nulle persécution n’est capable de l’ébranler, ni seulement d’altérer la calme sérénité de son âme. De là vient la sincérité, parfois un peu rude, et la loyauté absolue de son caractère. Qu’aurait-il à cacher, ne voulant que le vrai et le bien, et le voulant avec résolution? L’âme de Descartes est d’une sincérité parfaite avec les autres et, ce qui est plus rare, avec elle-même. (pp. 355-356).

8. Adam, Charles. 1910. *Vie et Œuvres de Descartes. Étude historique*. Paris: Léopold Cerf.

   Supplément à l'édition Adam-Tannery des œuvres de Descartes.

   Nouvelle édition, abrégée et révisée, Paris: Boivin & Cie, 1937.

   "Comme cette édition est à l'usage de ceux que l'histoire de la philosophie intéresse, nous en avons fait un instrument de travail aussi utile que possible, n'hésitant pas à y prodiguer les renseignements sans compter: chaque lecteur saura bien y choisir ce qui lui convient, et laisser là le reste. Néanmoins, quantité de documents n'ont pu être utilisés de la sorte, qui méritaient d'être publiés aussi; leur place était donc indiquée dans une *Étude sur la vie et les œuvres de Descartes*.

Ce titre a paru préférable à tout autre. C'est, en effet, une étude sur Descartes seulement, que nous avons voulu donner, et non pas sur le Cartésianisme. Aussi n'avions nous que faire de cette longue liste de livres qui se sont succédé depuis plus de deux siècles et demi, et qui ont pour objet le commentaire ou la critique de la philosophie cartésienne, sans ajouter un document à ceux que possédait déjà le XVIIe siècle sur la personne de Descartes: chacun de ces livres nous expose la pensée, sans doute fort intéressante, de son auteur propre, bien plus que celle du philosophe lui-même, et sous une apparence historique, il a toujours en réalité un caractère plus ou moins dogmatique. (Et nous craignons bien de n'apporter aussi, en dépit de nos efforts, qu'un livre de plus qui ne sera pas exempt de cet inévitable défaut, un livre à prétentions objectives, mais qui sera seulement peut-être un peu moins subjectif que les précédents.) Pourtant nous étudierons, non pas l'œuvre de Descartes, son œuvre de philosophe, ou son influence sur les siècles suivants et qui dure encore aujourd'hui, mais plutôt ses ouvrages, et les conditions et circonstances dans lesquelles chacun a été composé et publié.

Le présent volume n'est pas un livre de philosophie, à proprement parler, mais un livre d'histoire: ajoutons, si l'on veut, d'histoire de la philosophie, et aussi de la science, ou plus simplement une contribution à l'histoire des idées en France et de l'esprit Français au XVIIe siècle.

La seule *Vie de Descartes*, un peu complète, que l'on eût jusqu'alors, était celle d'Adrien Baillet; et elle date de 1691 (1). Lui-même raconte, dans sa *Préface*, que Chanut, bien mieux que personne, eût écrit cette vie, et après Chanut, Clerselier, qui avait aussi connu « intérieurement » le philosophe. Après eux, il nomme un Oratorien, le P. Nicolas Poisson, qui en fut vivement sollicité par la reine Christine et par Clerselier lui-même, et qui se contenta de donner, en 1670, un petit livre de *Commentaires ou Remarques sur la Méthode de René Descartes*. Enfin, il nomme encore l'abbé Jean-Baptiste Legrand, devenu, après la mort de Clerselier en 1684, le dépositaire des papiers du philosophe, et qui préparait une nouvelle édition de ses œuvres; Legrand s'empressa de mettre à

la disposition de Baillet tous les documents qu'il avait recueillis déjà. (2)

Nous pouvons dire que les deux tomes publiés par Baillet sont passés presque en entier dans les onze volumes de notre édition et dans ce volume XII. C'était, pour une bonne part, un assemblage de documents, dont les originaux sont maintenant perdus, et que nous ne connaissons que par les extraits qu'il en a imprimés: bien des pages ont été découpées, pour être mises chacune à sa place au cours de la correspondance ou des œuvres, comme il a été dit dans l'Introduction du tome I (3)." (pp. II-IV)

(...)

"La principale différence entre l'œuvre de Baillet et la nôtre sera dans l'esprit général qui anime chacune d'elles.

Mais les grandes lignes restent à peu près les mêmes, et de nombreux détails se trouvent confirmés, avec d'autres qui s'y ajoutent, grâce à une documentation nouvelle.

Celle-ci consiste d'abord dans des pièces d'archives, publiques et privées, notamment sur la famille de Descartes: bon nombre ont été découvertes et publiées, ces cinquante dernières années, par des érudits de Touraine, de Poitou, de Bretagne. Quelques-unes ont été recueillies en Hollande. On les trouvera, chacune à sa place, avec l'indication de leur provenance. Puis nous avions la correspondance complète (ou peu s'en faut) du philosophe, et surtout rétablie dans l'ordre chronologique, ce qui la rend bien plus instructive, et permet de suivre pus à pas la marche de sa pensée. En outre, plusieurs collections de lettres ont été retrouvées et imprimées, que Baillet n'a point connues: lettres de Pollot (publiées en 1869), et de la princesse Elisabeth (en 1879), lettres de Constantin Huygens le père, de Brégy, de Chanut, de Brasset, de Beeckman, la plupart publiées dans cette édition pour la première fois.

Sans doute la physionomie générale de Descartes n'en est point changée du tout au tout; mais elle est mieux éclairée, et bien des particularités curieuses s'y révèlent ou y apparaissent dans un meilleur jour." (pp. IX-X)

9. Cohen, Gustave. 1921. *Écrivains Français en Hollande dans la première moitié du XVIIe siècle*. Paris: Champion.

   Reprint Geneva: Slatkine, 1976.

   Table des matières: Introduction 7; Livre I: Régiments Français au service des États 14; Livre II: Professeurs et étudiants Français à l'université de Leyde (1575 à 1648) 141; Livre III: La philosophie indépendante. René Descartes en Hollande 357; Pièces justificatives 693; Index 721-756.

   Le livre III contient une biographie complète de Descartes, pp. 357-691.

   "Que Descartes ait séjourné en Hollande, c'est un fait connu de tous nos écoliers, qu'il n'a pas laissé de surprendre un peu, mais l'étonnement des étudiants hollandais, en l'apprenant, n'était pas moindre, surtout en entendant parler des endroits choisis par le grand philosophe pour les plus longs de ses séjours: Franeker, Endegeest, Egmond, lieux si éloignés des centres de la vie néerlandaise qu'ils n'éveillaient en leur esprit que des

souvenirs assez vagues et beaucoup d'entre eux ne les connaissaient souvent même que de nom.

Pourquoi Descartes les avait préférés, ces lieux et d'autres, au cours de sa vie errante, quelle trace il y avait laissée de son passage, voilà ce qu'il importait de rechercher. Partout je me suis efforcé de le suivre; j'ai refait pieusement toute la série des pèlerinages cartésiens: parfois, comme à Egmond ou à Franeker, je n'ai plus même trouvé les pierres de sa maison, mais à Endegeest, je me suis arrêté quelques minutes dans la salle où peut-être il a rêvé. En tout cas, le cadre est resté le même, l'aspect du site n'a point changé, et l'on peut laisser errer ses regards sur les champs où sa pensée flotta.

Certes, bien des faits que l'on trouvera dans ce Livre III ne sont pas une révélation: c'est à l'active et ingénieuse patience de M. Adam, de ses collaborateurs et de ses prédécesseurs qu'on les doit. A lui et à M. Tannery revient l'honneur de nous avoir dotés d'une édition monumentale de Descartes mais, justement parce qu'elle est un monument dans tous les sens du mot, ses treize gros in-4° demeurent inaccessibles au grand public, voire aux lettrés et aux savants qui n'ont pas une bibliothèque à leur disposition. Pourtant, quelle œuvre magistrale que cette biographie de Descartes par M. Ch. Adam, qu'on lit au tome XII.

C'est une étude presque définitive, on n'aura pas la vanité de la recommencer ici, mais, en même temps qu'une biographie, elle est surtout une analyse de l'œuvre et cette œuvre, en tant qu'elle ne traite pas proprement de la Hollande ou qu'elle n'est pas déterminée directement par elle, ne nous concerne point.

C'est d'ailleurs souvent un inconvénient de mêler l'œuvre et la vie. Nous voudrions nous borner uniquement à celle-ci, et dans celle-ci, avant tout, à ses périodes hollandaises, les principales et les décisives il est vrai, ce qui, par conséquent, ne sera peut-être pas sans utilité.

Et d'abord, s'il est infiniment précieux et fécond de repenser les systèmes des philosophes, il ne l'est pas moins, car l'histoire de la philosophie n'est parfois que l'histoire des philosophes, de

revivre leur existence, de tâcher de s'ennoblir par elle, surtout quand ils l'ont exclusivement consacrée à la perfection de leur intelligence et à la recherche de la vérité.

Ensuite, à étudier les séjours en Hollande de Descartes, non pas séparément, ce qui les fait prendre pour une fantaisie incompréhensible, mais dans le cadre des présentes études, consacrées à l'attraction qu'a exercée sur tous les Français de la fin du XVIe et du commencement du XVIIe siècles la République des Provinces-Unies, ces séjours semblent tout à fait naturels, presque nécessaires, ces voyages et cet établissement apparaissent comme une marche presque attendue vers le pays de la Liberté.

Le fait que Descartes est et veut rester catholique (nous aurons à y insister encore) souligne la valeur et l'extension de cette liberté: c'est le moment de renouveler cette affirmation que la Hollande n'est pas seulement le Refuge protestant, qu'elle est aussi le refuge catholique, ou, si l'on préfère, le Refuge de la pensée indépendante. Aussi aura-t-elle offert asile à deux des plus grands créateurs de systèmes du XVIIe, un Français : René Descartes, et un juif d'origine espagnole: Baruch d'Espinoza. Ce n'est pas le moindre prestige de cette terre féconde en miracles." (pp. 357-358).

10. Sirven, Jacques. 1928. *Les années d'apprentissage de Descartes (1596-1628)*. Albi: Imprimerie Coopérative du Sud-Ouest.

    Reprint: New York, Garland, 1987.

    Table des matières: Préface 9; I. Les premières influences 23; II. Les premiers écrits de Descartes 56; III. L'orientation décisive du cartésianisme 114; IV. L'orientation décisive du cartésianisme (suite) 169; V. L'orientation décisive du cartésianisme (suite et fin) 226; VI. Tentatives nouvelles 290; VII. Le *Regulae* 342; Conclusion 443; Bibliographie 463; Table des noms propres 491-496.

    "Il est presque de règle, dans l'histoire de la philosophie et dans celle des sciences, d'affirmer que Descartes ne doit rien ou à

peu près rien à ses devanciers. Ce « postulat » est admis sans contestation, même par des philosophes très avertis.

(...)

'y a-t-il pas là, comme l'ont déjà remarqué un certain nombre de penseurs, un de ces « préjugés » qu'on accepte d'autorité sur la foi d'une tradition scolaire? N'y a-t-il pas là encore une manifestation de cette tendance intellectuelle vers le moindre effort qui explique la tyrannie rigide que les systèmes font peser sur les individus? Le cas qui nous occupe vaut la peine d'être examiné avec le plus grand soin, en tenant compte de toutes les ressources que les historiens et les penseurs modernes mettent à notre disposition. Mais il n'est pas possible de le faire avec fruit, sans avoir résolu auparavant un ensemble de problèmes historiques dont quelques-uns ont à peine été abordés. C'est pourquoi il nous semble inutile pour l'instant d'examiner les raisons sur lesquelles on a pu se fonder pour faire du cartésianisme une exception aussi considérable dans l'histoire des idées. Il vaut mieux avouer que ces thèses générales méconnaissent beaucoup trop d'aspects d'une réalité infiniment complexe, qui n'est jamais débrouillée qu'en partie.

Au fond, le travail le plus utile consiste à rechercher comment se sont transmises les diverses théories philosophiques ou scientifiques, à suivre les fils d'une trame ininterrompue sur bien des points et à noter les endroits où elle a pu se briser. La tâche qui s'impose à nous de ce point de vue plus modeste et en procédant par ordre, comme l'eût recommandé Descartes, sera donc de bien voir les liens qui unissent le système cartésien à la pensée des auteurs qui l'ont influencé. Nous n'envisagerons même pas l'ensemble de ce système, mais seulement la première forme qu'il a revêtue, jusqu'au moment où notre philosophe s'est retiré en Hollande pour en établir les principes définitifs. Notre sujet ainsi délimité, il nous reste à fixer la marche à suivre pour dégager la véritable originalité de Descartes, durant ces années de méditations fécondes où son esprit conut le dessein d'une science universelle et fit à proprement parler l'apprentissage de ses forces. (pp. 9-10)

(...)

"Dans le cas qui nous occupe, il nous faudra surtout examiner les rapports de Descartes avec les scolastiques, et, lorsque nous parlerons de l'École ou de la scolastique, nous n'entendrons pas l'ensemble des philosophes qui ont vécu au Moyen-Âge, mais seulement les auteurs que Descartes a connus. C'est pourquoi nous citerons les manuels qui étaient utilisés dans les classes des PP. Jésuites à son époque, plutôt que saint Thomas ou les philosophes antérieurs (3). Il semble bien en effet que Descartes n'ait consulté saint Thomas qu'après 1628, au moment où il voulait achever sa métaphysique, et pour recourir à la source des conceptions qu'on lui avait enseignées durant ses études.

Nous laisserons de côté par suite la question de savoir si ces manuels reproduisent exactement le thomisme: c'est un problème tout à fait en dehors de notre point de vue. Il faut d'ailleurs reconnaître que ces manuels sont plus fidèles qu'on ne le reconnaît d'ordinaire à l'esprit de saint Thomas et que les anathèmes lancés parfois contre « la scolastique décadente des XVe et XVIe siècles » seraient à réviser sur bien des points. Quoi qu'il en soit, il nous reste maintenant à examiner quels textes nous serviront comme sources de notre exposé historique et pourquoi nous avons limité cet exposé à l'année 1628. (pp. 15-16)

(3) A moins que nous n'ayons évidemment à légitimer un emprunt direct à quelqu'un de ces philosophes.

"En révisant *La Pensée religieuse de Descartes* en vue d'une seconde édition, nous avons été frappé par l'obscurité qui enveloppe « les années d'apprentissage de Descartes », même après l'intéressant ouvrage de l'abbé J. Sirven. De là l'idée d'écrire une *Jeunesse de Descartes*. Mais, pour mériter ce titre, l'ouvrage devrait comprendre deux gros chapitres pour lesquels le temps et la compétence nous feraient défaut; il faudrait, en effet, reprendre l'étude des enseignements philosophiques et littéraires au Collège de La Flèche, puis celle des milieux scientifiques parisiens pendant le premier tiers du XVIIe siècle. Le présent ouvrage apportera simplement des matériaux à cette *Jeunesse de Descartes* dont nos lacunes mêmes feront sentir la nécessité.

Une exégèse des premiers textes, une critique de quelques sources biographiques, des indications pour situer certains personnages de l'histoire, peut-être trouvera-t-on le livre bien gros pour des questions aussi particulières et pour des réponses aussi hypothétiques. C'est pourtant ainsi que se fait l'histoire des présocratiques ou des anciens stoïciens. Les méthodes qui ont été éprouvées en histoire de la philosophie ancienne doivent être bonnes en histoire de la philosophie moderne, lorsque les textes modernes posent les mêmes questions que les textes anciens: restitution d'ouvrages perdus, établissement de chronologie, critique des traditions et de témoignages qui ne sont pas ceux de témoins.

Une telle étude sera, en un sens, un commentaire des trois premières parties du *Discours de la Méthode*. Il n'est certes pas question de présenter le jeune Descartes tel que le voit, ou le veut faire voir le philosophe de 1637. Bien au contraire, il s'agit de montrer d'où vient l'auteur du *Discours* et des *Méditations*: pour connaître l'homme qui cherche « le chemin de sa vie », on commencera donc par oublier ce qu'il a trouvé au bout du chemin. D'ailleurs, les trois premières parties du *Discours* ne ressemblent ni à des mémoires ni à des confessions: Descartes raconte « l'histoire de son esprit »; il écarte volontairement les anecdotes et les scènes de la vie privée; d'autre part, de « l'histoire de son esprit », il extrait ce qui lui paraît essentiel à la lumière de l'œuvre déjà accomplie, il efface donc les ratures,

coupe les longueurs, oublie les hésitations. Ceci admis, il reste pourtant qu'il travaille une matière faite de souvenirs: une méthode comparative est alors requise pour faire apparaître ce qui vient de la mémoire dans la vision rétrospective et détacher ce que la biographie peut retenir de l'arrangement autobiographique (1).

Il ne suffît d'ailleurs pas de retrouver les faits et les pensées dans leur vérité originelle, pré-cartésienne, avant que la mémoire du philosophe ne les ait organisés: il y a aussi une autre mémoire à considérer, la tradition qui les conduit jusqu'à nous. L'historien commence aujourd'hui sa recherche non pas dans le monde où respirait René Descartes mais dans celui où la bibliographie le conduit et le guide; là le philosophe ne chemine plus au milieu de ses contemporains; il dialogue avec les philosophes qui l'ont interprété, avec les historiens qui l'ont expliqué. Ainsi, les faits ont maintenant pour contexte autant la vie posthume de Descartes que sa vie réelle; les pensées ne sont plus liées à des paroles prononcées pour certains hommes d'une certaine époque, mais leur universalité a en quelque sorte dé-temporalisé leur expression; nous les recevons à travers un langage historiquement usé, que les premiers lecteurs comprenaient à la lumière de leurs souvenirs scolaires et de l'actualité littéraire, religieuse ou sociale, mais que, trois siècles plus tard, les lecteurs comprennent dans la mesure où justement il paraît capable de communiquer des idées sans date. L'histoire de l'histoire sera ici partie importante de la critique historique.

En tête d'un ouvrage qui doit tant à ceux de ses prédécesseurs, est-il besoin de prévenir un contre-sens? Essayer de retrouver en histoire des données aussi immédiates que possible est une chose; faire table rase de tout le travail des interprètes et des chercheurs en est une autre. La première est une exigence méthodologique; la seconde ne serait qu'une absurdité. L'histoire doit simplement tenir compte d'un fait indiscutable: le philosophe ne survit pas dans le monde où il a vécu." (pp. 5-6)

Traduction anglaise: *Descartes. His Life and Thought*, translated by Jane Marie Todd, Ithaca: Cornell University Press, 1998.

Traduction italienne: *Cartesio. Una biografia*, traduzione di Gennaro Auletta e Mathilde Anquetil, Roma: Editori Riuniti, 1997.

"Une biographie du philosophe doit éclairer certains points, proprement historiques et souvent mal connus, mais aussi s'efforcer d'approcher cette personnalité exceptionnelle. Vigoureux et rigoureux, sûr de lui jusqu'à mépriser trop souvent ceux qui refusent ses interprétations, Descartes s'est aussi montré patient, capable de surmonter les différends dès qu'une bonne volonté se manifeste, accueillant aux gens de condition modeste, désirant s'instruire, chaleureux en quelques profondes amitiés, tout en fuyant comme importuns les curieux et les conversations purement mondaines. La « franchise » qu'il fait « profession d'observer en toutes ses actions », « sans aucune dissimulation ni artifice », vient après cet aveu: sa « principale finesse » est de n'en point avoir (a).

Son abondante correspondance, au ton parfois très libre, est la meilleure source pour mieux dévoiler ce caractère complexe, avec ses enthousiasmes et ses violences, sa patience aussi et ses réserves quand il éprouve quelque défiance. Nous en avons multiplié les citations. Leurs références, appelées par des lettres (a, b...') figurent au bas des pages, afin de permettre aux curieux d'en voir éventuellement le contexte, sans que ce soit nécessaire. Et nous avons reporté à la fin du volume des notes (appelées par des chiffres) qui permettront d'approfondir, voire de discuter, certains points: elles sont plutôt destinées aux spécialistes, mais aussi à ceux qu'embarrasserait un détail. Il serait préférable de les réserver pour une seconde lecture, et de suivre d'abord le conseil de Descartes, quand il a préfacé la traduction Français e des *Principes de la philosophie*, son ouvrage le plus technique, exposant l'essentiel de sa métaphysique et les principales questions de la physique: le parcourir « d'abord tout entier ainsi qu'un roman, sans forcer beaucoup son attention, ni s'arrêter aux difficultés qu'on y peut

rencontrer »; puis, si on a « la curiosité » d'en savoir plus, on peut le reprendre en soulignant les difficultés, dont de nouvelles lectures apporteront sans doute la solution". (pp. 8-9)

(a) À Élisabeth, janvier 1646; AT IV, 357.

L'enseignement au temps de Descartes

1. Rochemonteix, Camille de. 1889. *Un collège de jésuites aux XVIIe & XVIIIe siècles: le Collège Henri IV de La Flèche*. Le Mans: Leguicheux.

   Tome I: Préface I-IV; Première partie: Histoire; Pièces justificatives 201-309;

   Tome II: Chapitre I: Pensionnat et externat: *Ratio studiorum* 1; Chapitre II: Éducation religieuse 103; Pièces justificatives 175-332;

   Tome III: Chapitre I: Enseignement littéraire à La Flèche, principalement du Latin et du Grec 1; Chapitre II: La langue Français e à la Flèche 131; Pièces justificatives 215-353;

   Tome IV: Chapitre I: Théologie, philosophie, sciences, histoire et géographie à la Flèche 1; Chapitre II: Séances théologiques, philosophiques, littéraires, dramatiques; examens, distributions des prix 149: Chapitre III: Action religieuse en dehors du collège 213; Chapitre IV: Expulsion des Jésuites du collège de La Flèche en 1762 285; Pièces justificatives 321-441.

   Index détaillé du tome IV, Chapitre I: Théologie, philosophie, sciences, histoire et géographie à La Flèche: Aristote et saint Thomas. Circulaires de St. Franois de Borgia et d'Aquaviva.- Enseignement de la théologie à La Flèche; principaux professeurs. Le P. Philippe Thibault. Cours de philosophie: sa durée, inscription des élèves. - Exercices divers: leons, répétitions, sabbatines, *menstruales*, disputes philosophiques. Programme des trois années de philosophie. - Les Pères Gandillon, Challemoux, Le Breton, Gaultruche, Pajot. René Descartes à La Flèche: ses œuvres philosophiques, ses partisans et ses adversaires. - Les Jésuites et Descartes; les Pères Véron, Noël, Charlet, Binet, Bourdin, Vatier, Denis Mesland, etc. -

Ouvrages de Descartes et de Malebranche mis à l'Index. Le Malebranchisme dans la Compagnie de Jésus. Les Pères André et du Tertre à La Flèche. Les trente propositions du P. Michel-Ange Tamburini. Étude et progrès des Sciences mathématiques, de l'Histoire et de la Géographie.

"Nous nous proposons de faire connaître un collège de Jésuites aux XVIIe et au XVIIIe siècles, d'en reproduire la physionomie. Nous dirons comment il se fondait, quelle éducation on y recevait, quels usages et quel règlement on y suivait, ce qu'on y enseignait. Aucun livre de ce genre n'a été composé; les preuves et les documents peu connus ou nouveaux, que nous apportons à l'appui de ce travail, seront lus avec plaisir, croyons-nous, de ceux qui s'intéressent aux questions d'instruction publique. Raconter les faits, éviter, autant que possible, de les discuter et de les apprécier, telle sera notre ligne de conduite; la simple exposition de la vérité historique a plus de force et d'empire sur les esprits pour les éclairer et les convaincre, que l'écrit polémique où la passion s'insinue, presque toujours par quelque endroit." (tome I, p. II.)

"Nous avons vu les conditions d'admission des pensionnaires au collège royal de La Flèche; suivons-les maintenant pas à pas dans leur vie de chaque jour. Le règlement différait sensiblement de celui de nos internats actuels; la journée de l'écolier n'était pas celle d'aujourd'hui.

En arrivant au collège, le pensionnaire, s'il était fils de famille, déposait son épée dans la chambre des armes. A chaque épée on attachait une fiche de bois, portant le nom du propriétaire; le P. Ministre avait dans sa chambre un jeton semblable, et ce jeton servait d' *exeat* les jours de sortie.

Le gentilhomme, en quittant l'épée, faisait oublier sa naissance. Plus de distinction entre le noble, le bourgeois et le roturier, car il y avait là aussi quelques roturiers, dont la pension était payée par des prélats ou de grands seigneurs, et qui se destinaient à l'état ecclésiastique. Pas d'autre supériorité entre ces jeunes gens de toutes les classes sociales que celle du mérite et du succès. Descartes, qui vécut plus de huit ans dans ce milieu, garda toujours le souvenir du remarquable esprit d'égalité qu'il

y vit régner, et du fond de la Hollande, trente ans après, il écrivait à un de ses amis : « Il y a à La Flèche quantité de jeunes gens de tous les quartiers de la France. L'égalité que les Jésuites mettent entre eux, en ne traitant guère d'autre faon les plus relevés que les moindres, est une invention extrêmement bonne pour leur ôter la tendresse et les autres défauts qu'ils peuvent avoir acquis par la coutume d'être chéris dans les maisons de leurs parents (*). » (tome II, pp. 27-28)

(*) *Vie de Descartes*, par Adrien Baillet. Paris, 1691, p. 33. [lettre à un ami inconnu du 12 septembre 1638, AT II, 377-379; B 190].

2. *Actes du Colloque Universitaire de la Flèche "La Formation de Descartes"*. 1997. La Flèche: Prytanée National Militaire.

   Table des matières: Avant-propos 3; Programme du colloque 4;

   Première partie: Allocutions d'ouverture 7;

   Deuxième partie: Actes du Colloque 21,

   Geneviève Rodis-Lewis: Un élève du Collège jésuite de La Flèche: René Descartes 25; Yves-Marie Bercé: Vocation militaire, vie dans les armées au temps de Descartes 37; Jean-Louis Vieillard-Baron: Le problème de l'ego chez Bérulle, Descartes et Poussin 55; Antonella Romano: L'enseignement des mathématiques à La Flèche dans les années de la formation de Descartes 75; Laurence Renault: Descartes et la scolastique ou la critique cartésienne du *thaumazein* 105; Frédéric de Buzon: La formation musicale de Descartes et sa première œuvre, le *Compendium musicae* 149; Pierre Lefebvre: Dans quelle mesure Descartes influena-t-il la médecine de son temps? 163; Denise Leduc-Fayette: Descartes et l'idée de Dieu 179; Luce Giard: Le système éducatif des jésuites à l'époque de Descartes 199;

   Allocution de clôture du *Colloque Descartes* à La Flèche 227;

   Troisième partie:

   Daniel Potron: La Flèche, aperu historique 239; Jean Petit: La Flèche, Descartes et le Prytanée 243; Épitaphe latine de Descartes 245; Traduction Français e de l'épitaphe latine 246.

Index et Concordances

1. Gilson, Étienne. 1979. *Index scholastico-cartésien*. Paris: Vrin.

   Seconde édition revue et augmentée, avec un *Supplément* (pp. 337-357) et une *Postface* (1966, pp. 358-370), seule autorisée par l'auteur (Première édition 1913).

   "Il convient de remarquer d'abord que cet ouvrage ne porte pas comme titre: L'influence de la scolastique sur Descartes; ni même: Descartes et la scolastique. C'est qu'en effet nous ne nous proposons ni de mesurer cette influence ni de chercher les rapports de la philosophie cartésienne avec celle de l'École. Un travail de ce genre ne pourrait être entrepris que partiellement et, pour dire toute notre pensée sur ce point, il ne conduirait à aucun résultat définitif ni surtout complet. Pour expliquer historiquement la pensée de Descartes il est nécessaire de la considérer à la fois en elle-même, dans ses rapports avec la scolastique, et aussi dans ses rapports avec certaines sources théologiques qui ne sont pas toujours d'origine scolastique. C'est pourquoi un travail qui supposerait comme base unique les rapports de la philosophie cartésienne avec celle de l'École serait nécessairement unilatéral et plus propre à voiler la vérité historique qu'à la découvrir.

   (...)

   Notre but pourrait donc se définir de la faon suivante: donner un relevé aussi complet que possible des expressions et conceptions qui-sont passées de la philosophie scolastique dans le texte de Descartes.

   (...)

   Nous ajouterons qu'il voudrait être un instrument de travail utile. A cet égard nous avons eu une double préoccupation: lui assurer une valeur historique, et le rendre pratique.

   En ce qui concerne le premier point la voie était toute tracée. On sait que pour la théologie la base de l'enseignement de la Flèche était saint Thomas, et que, d'ailleurs, Descartes n'a jamais cessé de le consulter. C'est donc dans l'enseignement de

saint Thomas que nous avons cherché les textes théologiques qu'il convenait de rapprocher de ceux de Descartes [Voir sur ce point G. de Rochemonteix, *Le collège Henri IV de la Flèche*, tome IV, passim]. En ce qui concerne la philosophie proprement dite nous avions à consulter, outre saint Thomas qui là encore était le maître à peu près incontesté, Suárez. Nous avons rappelé ailleurs que Descartes en a connu quelque chose, et à coup sûr il en a été influencé indirectement. Les *Metaphysicæ disputationes* étaient pour la métaphysique le « livre du maître » des professeurs de Descartes; c'est pourquoi nous avons cru nécessaire d'y recourir [Pour les éditions des ouvrages écrits par des PP. Jésuites nous renvoyons à Sommervogel (*), dont il nous a semblé inutile de transcrire ici les longues colonnes]. Une source plus importante est cependant sans conteste l'ensemble des commentaires ou manuels alors utilisés dans l'enseignement. Descartes en cite un certain nombre qu'il dit avoir connus à la Flèche [AT III, 185, 11-18] : ce sont les *Commentarii collegii conimbricensis*, et les commentaires de Toletus et Ruvio [Voir Sommervogel, aux articles cités]. A ces ouvrages composés par des Pères de la Compagnie il convient de joindre le petit manuel du Feuillant E. de saint Paul que Descartes a connu et qui résume fidèlement, et surtout avec une concision rare pour l'époque, l'enseignement de l'École." (pp. II-V).

(*) Carlos Sommervogel, *Bibliothèque de la Compagnie de Jésus*, (9 volumes), Bruxelles - Paris, 1890-1900.

2. Janowski, Zbigniew. 2000. *Index Augustino-Cartésien. Textes et Commentaire*. Paris: Vrin.

"Notre travail ne consiste pas à restituer les conditions de la réception de la philosophie de Descartes parmi ses contemporains, ni à déterminer la ressemblance conceptuelle entre la métaphysique cartésienne et la théologie augustinienne. Il s'agit plutôt de voir quelle influence réelle et directe la lecture des œuvres de saint Augustin a exercé sur Descartes et sur la formation de sa métaphysique. Aussi notre travail est-il tributaire des études d'Etienne Gilson (22) et d'Alfred Espinas (23) qui ont initié l'enquête sur le rapport entre Descartes et saint Augustin. La thèse de Gilson, qui

consistait avant tout à démontrer l'existence d'un lien entre certains thèmes cartésiens et l'augustinisme du Cardinal Pierre de Bérulle, a été soumise aux critiques d'Henri Gouhier (24) et, plus récemment, à celles de Jean-Luc Marion (25)." (p. 16)

(...)

"C'est précisément cette question d'un emprunt possible que nous allons poser à notre tour afin d'établir jusqu'à quel point l'existence d'une telle relation est avérée. C'est dans ce cadre que s'inscrit l'index que nous avons établi des passages des œuvres de saint Augustin qui trouvent un écho dans la métaphysique de Descartes. Une des principales difficultés de ce travail réside dans la détermination certaine des arguments, concepts ou fragments que Descartes a empruntés aux œuvres de saint Augustin; à ce propos, il est important de souligner que, fréquemment, ce qui, chez ce dernier, occupe quelques dizaines de pages, ne représente chez Descartes qu'un seul paragraphe ou une seule phrase. Et inversement, ce qui, chez saint Augustin, est une phrase ou une remarque faite en passant, prend chez Descartes la forme d'un argument élaboré. Par ailleurs, on ne peut pas négliger le fait que la pensée de Descartes est postérieure de douze siècles à celle de saint Augustin, et qu'entre temps, le méticuleux travail philosophique des penseurs scolastiques a transformé le latin parlé en un langage technique et précis. De plus, saint Augustin n'était pas philosophe, au sens scolastique du terme: son langage est souvent vague et manque de cette précision si caractéristique des penseurs scolastiques et de Descartes lui-même. Il est ainsi difficile de déterminer jusqu'à quel point certaines idées de Descartes ne sont pas la transcription, en un latin cartésien technique, de termes augustiniens. Pour notre part, nous nous en sommes tenus, dans l'index, aux fragments dont nous pouvons affirmer avec certitude que Descartes les connaissait." (p. 17)

(...)

"Nous avons divisé l'index en deux parties: la première correspond aux emprunts incontestables; la seconde, à ceux qui ne le sont pas. La première partie ne comprend quasiment que

des citations littérales. En ce qui concerne les emprunts possibles, nous les avons insérés dans la section « Des additions ». Puisque le plus grand nombre des emprunts de saint Augustin se retrouve presque exclusivement dans les *Méditations*, ou plus exactement dans la Première, Deuxième, Quatrième, et Sixième Méditation, nous avons créé un index qui correspond à l'ordre numérique des *Méditations*, en intégrant la doctrine des vérités éternelles, et à la pagination de ces mêmes *Méditations*. Une telle classification, par opposition à la structure thématique, permet de mesurer, avec le plus de précision possible, l'influence de saint Augustin sur Descartes alors qu'il rédigeait son œuvre principale. Nous avons fait cependant quelques exceptions à cette classification: nous avons, par exemple, inclus quelques fragments des *Principes* (1644) ou des lettres de Descartes, mais uniquement en tant que ces fragments renvoyaient à des arguments déjà présents dans les *Méditations*." 3. Armogathe, Jean-Robert, and Marion, Jean-Luc, eds. 1976. *Index des Regulae ad directionem ingenii de René Descartes*. Roma: Edizioni dell'Ateneo.

Lessico Intellettuale Europeo, vol. 10.

"L'Index des *Regulae ad directionem ingenii* est le premier instrument de travail publié par l'Equipe Descartes (C.N.R.S.), qui poursuit depuis plusieurs années des recherches sur l'œuvre de Descartes.

(...)

La méthode suivie est celle que le Laboratoire d'Analyse Statistique des Langues Anciennes (L.A.S.L.A., Liège, Belgique) a employée, depuis plusieurs années, pour produire de nombreux index d'auteurs classiques, en particulier de textes de Sénèque. Rappelons brièvement qu'à partir d'un enregistrement du texte en lecture continue (mots et ponctuation), l'ordinateur propose pour chaque item un lemme (3) et une analyse grammaticale codée." (p. XI)

(3) Par lemme, nous entendons le mot tel qu'il figure au dictionnaire.

"L'édition critique d'Adam et Tannery, parue en 1908 dans le tome X des *Œuvres de Descartes*, reposait sur deux sources du traité: un manuscrit conservé à la Königliche öffentliche Bibliothek (actuellement Niedersächsische Landesbibliothek) de Hanovre (H), qui avait appartenu à Leibniz, et l' *editio princeps* du traité dans les *Opuscula posthuma physica et mathematica* de Descartes, parus à Amsterdam en 1701 chez P. et J. Blaev. La version hollandaise établie par J. H. Glazemaker publiée en 1684, c'est-à-dire plus de quinze ans avant le texte original latin, dans le tome III des *R. Descartes Brieven* chez J. Rieuwertsz d'Amsterdam, bien que connue des éditeurs des *Œuvres* de Descartes, n'avait jamais été prise en considération.

Nous avons tenté dans le passé de reconstruire les phases du travail préparatoire de Charles Adam pour l'édition de 1908 (5), édition qui est à la base de l' *Index verborum* que nous présentons; cette recherche nous a permis d'une part d'en relever les défauts et les limites, presque inévitables dans une entreprise aussi vaste et complexe que celle d'une édition moderne intégrale des écrits de Descartes, et d'autre part de tirer des indications utiles pour une nouvelle édition critique.

L’édition que nous avons établie (6), parue en 1966 en même temps que la réédition du tome X des *Œuvres* de Descartes (7) repose essentiellement sur une nouvelle collation directe des deux sources H et A, avec la rectification de quelques attributions erronées et la récupération de variantes qui avaient échappé à Adam, sur la distinction entre les leons originales du manuscrit (H) et les interventions dues à la main de Leibniz, qui corrigeait les formes erronées ou qu’il jugeait telles ou encore essayait de remédier aux omissions et aux lacunes, sans recourir directement à une autre source (L) (Adam note rarement la distinction et n’identifie jamais les interventions comme étant de Leibniz), et sur l’exploitation, jamais faite jusqu’alors, de la version hollandaise de Glazemaker (N), qui d’ailleurs grâce à un examen comparatif avec H et A permet de remonter à l’existence d’un manuscrit différent de H et de celui sur lequel reposait l’ *editio princeps*. (G. Crapulli)" (pp. XV-XVI)

(5) G. Crapulli, *Note all'edizione critica di Adam-Tannery delle ‘Regulae ad directionem ingenij’ di Descartes*, “Rivista critica di storia della filosofia”, XIX (1964), I, pp. 54-61.

(6) R. Descartes, Regulae ad directionem ingenii, texte critique établi par Giovanni Crapulli avec la version hollandaise du XVIIème siècle (“Archives Internationales d’Histoire des Idées”, 12), La Haye 1966.

(7) Le texte et l’apparat critique restent les mêmes que ceux de l’édition de 1908. Dans un Appendice dû à M. Bernard Rochot et au R. P. Pierre Costabel sont rectifiées quelques notes de l’apparat critique et sont présentées quelques modifications au texte d’Adam sur la base de remarques d’Hamelin, Gouhier, Le Roy, Alquié.

4. Cahné, Pierre-Alain, ed. 1977. *Index du Discours de la Méthode de René Descartes*. Roma: Edizioni dell'Ateneo.

   Lessico Intellettuale Europeo, vol. 12.

   "L’Equipe Descartes (1) poursuit, avec la publication de l’index lemmatisé du *Discours de la Méthode*, le travail d’indexation des œuvres de Descartes commencé avec la publication, dans la

même collection, de l'index des *Regulae ad directionem ingenii*. En raison des difficultés que l'on rencontre lors de l'établissement d'un tel index sur texte Français , une brève présentation s'impose.

1 - Le *Discours de la Méthode* a d'abord fait l'objet d'une indexation automatique des formes, sur les programmes du Centre de lexicologie politique de l'École Normale Supérieure de Saint-Cloud, Equipe de Recherches Associée au C.N.R.S. n° 56 (Pierre Lafon, ingénieur). Le texte retenu était celui publié par Adam et Tannery au tome 6 des *Œuvres* de Descartes (1ère édition 1902; édition revue par B. Rochot: 1973). Le traitement informatique a été fait à la Maison des Sciences de l'Homme (Paris), sur un terminal relié à l'ordinateur IBM 370-168 du centre de calculs d'Orsay.

2 - A partir de cette liste alphabétique des formes, accompagnées du total de leurs occurrences et de leurs références, une lemmatisation manuelle a été pratiquée selon les principes suivants:

a. en raison des variations orthographiques constatées dans les textes du XVIIème siècle, il a été décidé de suivre, pour les lemmes, l'orthographe des entrées du *Dictionnaire alphabétique et analogique de la langue Français e* de Paul Robert. Les formes sont pour leur part reproduites dans l'orthographe de l'édition de référence (2).

b. les substantifs sont lemmatisés sous le masculin singulier; les verbes sous l'infinitif; les adjectifs sous le masculin singulier; les comparatifs et superlatifs synthétiques doivent être recherchés sous l'adjectif au -positif; les pronoms personnels déclinés se trouvent sous le cas sujet.

c. nous avons lemmatisé certaines locutions conjonctives dont les éléments sont disjoints. Ainsi on trouvera Si... que, encore ... que ...

d. nous avons établi un glossaire de mots à prédicativité faible ou nulle, pour lesquels nous ne donnons que le nombre total d'occurrences. Ce glossaire a été établi en fonction de la spécificité du texte étudié: nous avons estimé qu'ÊTRE, pour

trois de nos usages, méritait de figurer parmi les mots prédicatifs, donc avec toutes les références. De même les 864 occurrences du pronom personnel de la première personne du singulier ont été données (3).

e. les homographes sont distingués par un indice numérique; ils sont présentés dans l'ordre suivant: substantif, adjectif, adverbe, préposition, conjonction. Ainsi PRATIQUE 1 est le substantif, tandis que PRATIQUE 2 est l'adjectif; BIEN 1 est le substantif, BIEN 2 est l'adverbe, etc. Six homographes parmi les items fonctionnalisés, n'ont pas été désambiguïsés: en, le, ou, que, qui, un.

Cinq emplois d'ÊTRE ont été distingués:

ÊTRE 1: emploi nominal

ÊTRE 2: emploi absolu

ÊTRE 3: emploi locatif

ÊTRE 4: auxiliaire

ÊTRE 5: copule

ÊTRE 4 et ÊTRE 5 figurent dans le glossaire.

Pour SI, nous avons séparé l'emploi de SI, adverbe d'intensité, de celui de SI adverbe engagé dans une relation consécutive:

SI 1: conjonction de subordination introduisant l'interrogation indirecte

SI 2: adverbe d'intensité

SI 3: conjonction introduisant l'hypothèse Les formes sous le lemme sont rangées dans l'ordre alphabétique (4).

f. le texte indexé contient 22.688 formes regroupées en 1630 lemmes." (pp. IX-X)

(1) Equipe associée à l'Equipe de recherches 56 du C.N.R.S. (Histoire des Sciences et des Techniques), directeur: M. le professeur René Taton.

(2) Le lemme, créé par la nécessité de l'indexation, n'appartient pas au texte cartésien: notre solution s'impose donc et sur le plan pratique et sur le plan théorique.

(3) L'Equipe Descartes peut fournir, sur demande, les références pour toutes les occurrences des mots du glossaire.

(4) Les difficultés de la lemmatisation manuelle ont introduit quelques rares exceptions à ce principe.

5. Marion, Jean-Luc, Massonie, J.-Ph., Monat, P., and Ucciani, L., eds. 1996. *Index des Meditationes de prima Philosophia de R. Descartes*. Besanon: Annales Littéraires de l'Université de Franche-Comté.

   Sommaire: J.-L. Marion: Préface IX-XIII; L. Ucciani: Avant-propos XV-XVII; Texte des Méditations 1-89; Index lemmatisé 91-211; Concordances partielles 213-252; J.-Ph. Massonie: Édition électronique 253-275.

   "Puisque Descartes pense qu'il faut faire un index, nous en avons fait un - celui des *Meditationes*. Ce n'est évidemment pas le premier. Sans remonter à *Paraphrasis in Cartesii Meditationes* de Clauberg (Duisbourg, 1657), ni au *Lexicon rationale sive Thesaurus philosophicus* de Chauvin (Rotterdam, 1692), on doit reconnaître un rôle de pionnier à E. Gilson, dont l' *Index scolastico-cartésien* parut au début du siècle (Alcan, Paris, 1913, nouvelle édition J. Vrin, 1979): encore manuel, donc sélectif, il offre pourtant la première esquisse d'une indexation par concepts de l'œuvre entière de Descartes, correspondance comprise; il remplit aujourd'hui encore, en sus des comparaisons qu'il voulait permettre avec les scolastiques, une fonction d'indexation purement cartésienne. Mais les premiers indices automatiques (sauf la lemmatisation, manuelle ou contrôlée manuellement) n'apparurent que récemment. D'abord J.-R. Armogathe et J.-L. Marion, *Index des Regulae ad directionem ingenii* de René Descartes, Lessico Intellettuale Europeo X, Corpus Cartesianum 1, Edizioni dell'Ateneo, Rome, 1976, XXII-163 p., élaboré avec la collaboration du LASLA (Prof. L. Delatte, Université de Liège) et du Prof. G. Crapulli (voir «Bulletin Cartésien VII», Archives de Philosophie, 1997/3, p. 15). Puis P.-A. Cahné, *Index du*

Discours de la Méthode de René Descartes, Lessico Intellettuale Europeo XII, Corpus Cartesianum 2, Edizioni dell'Ateneo, Rome, 1977, X-90 p., qui avait bénéficié du programme d'indexation automatique élaboré par P. Lafon (Centre de lexicologie politique, E.N.S. Saint-Cloud, E.R.A. - C.N.R.S. 56, voir «Bulletin Cartésien VIII», Archives de Philosophie, 1979/4, p.26-27). Dans les deux cas, aucune concordance ni liste de co-occurrences n'accompagnait l'index (1).

On doit à A. Robinet (CNRS/Université Libre de Bruxelles) d'avoir tenté à la fois de dépasser cette limitation et de s'appliquer aux *Meditationes* - ou plutôt, et c'est qui rendait encore insatisfaisant ce travail pourtant précieux, les *Méditations Métaphysiques*. En effet, il ne s'agissait dans *«Cogito 75». René Descartes. Méditations Métaphysiques* (Paris, J. Vrin, 1976) que de traiter la traduction du duc de Luynes, parue en 1647, voire sa révision par F. Alquié: malgré le sous-titre, le texte utilisé, à la lettre non cartésien, n'avait donc rien de «définitif» : il ne suivait d'ailleurs même pas la pagination d'AT IX-1 (nouvelle mise en page et numérotation continue des lignes par Méditation). Néanmoins, à condition de remonter au latin de 1641/2 par AT VII et d'y contrôler le Français , ce lexique devenait très utile, augmenté qu'il était d'un choix d'une dizaine de concordances, de cooccurrences et de listes de fréquences. Le traitement du texte latin des *Meditationes*, entrepris dès 1978 par l'Équipe Descartes (essentiellement par J.-R. Armogathe) et par d'autres centres devait longtemps buter sur des difficultés diverses (de lemmatisation surtout). Il vient enfin d'aboutir avec la récente *Concordance to Descartes' Meditationes de Prima Philosophia*. Prepared by Katzuzo Murakami, Meguru Sasaki and Tetsuichi Nishimura. Preface by Takefumi Tokoro, qui vient de paraître chez Olms/Weidmann, Hildesheim, 1995[2]. Seul l'usage montrera les mérites de ce magnifique outil de travail; on notera cependant ses deux options massives: il se borne au support papier, donc se ferme à l'exploration d'un hyper-texte, il privilégie fortement la concordance sur l'index. Deviendront-elles ses deux limites? La tentative de l'Université de Besanon

se caractérise au contraire (comme l'indique L. Ucciani) par 1) le privilège accordé au lexique, exhaustif et lemmatisé, suivant à la fois la pagination et les lignes d'AT VII et une numérotation continue de ces mêmes lignes afin de faciliter le repérage; 2) des co-occurrences, en nombre limité, mais où l'on a privilégié des termes à forte technicité métaphysique; 3) le complément du support-papier par une disquette (consultable avec HyperCard sur Macintosh), ouvrant ainsi des possibilités d'interrogation beaucoup plus nombreuses et souples; 4) l'économie de moyens (donc de coût), qui devrait permettre à un public individuel (et non pas seulement institutionnel) d'utiliser cet outil d'accès privilégié au texte de Descartes. Nous espérons que ces caractéristiques permettront à cet index - qu'il fallait donc faire - de tenir son rôle, parmi ceux qui sont déjà disponibles et surtout ceux, plus nombreux, qui viendront très vite s'y adjoindre." (pp. IX-XI)

(1) Des esquisses de résultats accompagnèrent ces publications: P. Costabel et P.-A. Cahné, «L'étude textuelle automatique appliquée aux œuvres de Descartes: état présent des travaux», «Bulletin Cartésien III», Archives de Philosophie, 1974/3, p. 453-8; J.-L. Marion, «A propos d'une sémantique de la méthode». Revue internationale de Philosophie, 103/5, 1975; P. Costabel et J.-R. Armogathe, «Premiers résultats de l'Équipe Descartes», I° Colloquio Internationale del Lessico Intellettuale Europeo. Atti a cura di Marta Fattori e Massimo Bianchi, Rome, 1976; Equipe Descartes, «Sémantèse d'ordre-ordo chez Descartes», II° Colloquio Internationale del Lessico Intellettuale Europeo. Atti a cura di Marta Fattori e Massimo Bianchi, Rome, 1979, p. 282 sq.

(2) Un utile travail l'avait d'ailleurs préparée: T. Tokoro, Les textes des «Meditationes», Cuo U.P., Tokyo, 1994, qui collationne non seulement les éditions de 1641, 1642 et les corrections de Descartes (AT V, 36-37), mais celles d'AT 1904, d'AT 1973, de G. Rodis-Lewis 1945 et d'Alquié 1967.

6. Robinet, André, ed. 1976. *Cogito 75. René Descartes. Méditations métaphysiques*. Paris: Vrin.

   Table des matières: André Robinet: Introduction I-VIII;

Les Méditations métaphysiques par René Descartes 1;

INDEX I: Index statistique 66; INDEX II: Index des occurrences 68; INDEX III: Index de fréquence décroissante des formes 115; INDEX IV: Index des coefficients de fréquence 117; INDEX V: Extraits des tables de concordance 121; INDEX VI: Tableaux de co-occurrences 133-140.

"Après, MONADO 74, (*) voici une nouvelle opération informatique appliquée aux textes de philosophie: COGITO 75. Nos premiers balisages prenaient pour cible deux textes célèbres de Leibniz: les présents dépouillement concernent les *Méditations métaphysiques* de Descartes.

Nous présentons plusieurs résultats portant sur l'examen lexicographique du texte Français . Nous avons suivi pour ce faire l'édition classique qu'a fait paraître Monsieur Alquié, car elle reconstitue le Français ancien en orthographe moderne. Cependant, nous avons maintenu les majuscules qui figurent dans la reproduction de l'original par Adam-Tannery (Soleil, Géométrie etc...), ainsi que certaines locution qui ne nous paraissaient pas devoir être modernisées (pour ce que...; ou bien des imparfaits mis à la place des passés simples originaux). Cette traduction date de 1647; elle fut l'œuvre du duc de Luynes et reut approbation et correction de la part de Descartes. La référence au texte latin de 1640 reste nécessaire si l'on approfondit les question soulevées dans ces deux écrits, dont les reliefs lexicographiques ne sont pas exactement les mêmes. La frappe de ce texte a été effectuée de manière à permettre la perforation ligne à ligne qui conduit nos index à diriger le consultant vers le repérage précis des termes recherchés." (pp. V-VI)

8. ———. 2001. "Concordances lemmatisées du texte Français ." In *La recherche de la vérité par la lumière naturelle de René Descartes*, édité par Lojacono, Ettore, 66-288. Milano: Franco Angeli.

   Textes établis par Erik Jan Bos; lemmatisation et concordances du texte Français par Franco A. Meschini; index et concordances du texte latin et néerlandais par Francesco Saita.

   "Le texte Français lemmatisé est celui qu'Erik-Jan Bos a établi pour le présent volume. Cette édition a été la première à prendre en considération, dans la phase de *recensio*, la traduction néerlandaise (Amsterdam, 1684). Elle constitue un précieux instrument pour le spécialiste de Descartes, en tant qu'elle présente en plusieurs endroits une lecture nouvelle par rapport au texte édité par Charles Adam en 1906 (2)."

   (...)

   "Le présent travail est publié vingt-quatre ans après l'index du *Discours de la méthode* dans la collection *Corpus cartesianum* du *Lessico Intellettuale Europeo* (3); ayant parfois pris des options différentes, nous devons au lecteur quelques explications. Pour être, nous avons distingué seulement trois lemmes (verbe-copule, verbe auxiliaire et substantif). Nous n'avons pas retenu comme lemmes ni les locutions conjonctives ni les locutions prépositives, mais nous les avons décomposées par éléments. À la différence des travaux du *Corpus*

cartesianum qui se limitent à un *index verborum* lemmatisé, nous présentons ici les concordances lemmatisées.

Pour le reste, nous avons suivi les mêmes critères que ceux établis dans les volumes de J.R. Armogathe et J.L. Marion (pour les *Regulae*), P.A. Cahné (pour le *Discours*) et moi-même (pour les *Principia*) dans la même collection (4) l'entrée du lemme (ou lexème, qui est une abstraction par rapport au texte) a été prise dans un dictionnaire de référence, le *Dictionnaire alphabétique et analogique de la langue Français e* de Paul Robert (5), les formes étant celles du texte de Descartes (6). Nous donnons la totalité des occurrences pour chaque lemme, ainsi que les formes suivies de leur quantité (nombre d'occurrences) et de leur adresse (page et ligne)."

(...)

"Le texte indexé contient 4943 occurrences, le total des formes est de 1269, réparti entre 796 lemmes."

(...)

"L'intérêt lexical de la *Recherche* est multiple: à commencer par la métaphore du gué pour désigner la méthode, inconnue - me semble-t-il -du reste du corpus, qui peut être une réminiscence de Montaigne (11) et fait penser, plus directement, au *vadum* des *Septimae objectiones et responsiones*, expression comme «la consummation (sic!) des siècles», expression inusité dans le discours cartésien, qui semble provenir d'un emprunt ou d'une influence, et qui peut fournir un indice de lecture ou de citation, utile éventuellement pour aider à la datation. Autre *hapax* cartésien, enfin, *personne neutre*, qui rappelle le fréquent emploi de *neuter* chez le P. Bourdin. Dans le même contexte des *Objectiones septimae*, rappelons, dans la partie de notre texte traduit du Français en latin, le mot *battologia*.

A un lecteur attentif, le lexique de la *Recherche* donne l'impression d'avoir intégré des matériaux pour ainsi dire étrangers ou hétérogènes. Cela ne doit pas sembler étrange: nous retrouvons le même phénomène dans les *Responsiones*, dont le genre littéraire appelle la contagion avec des termes utilisés par les objecteurs, ou bien encore les *Météores*, où la

présence d' *hapax* cartésiens signale les emprunts opérés par Descartes.

La clé de la *Recherche*, et la *vexata quaestio* de sa datation, semblent devoir être cherchées en dehors de Descartes, mais non pas, comme l'ont proposé d'illustres interprètes, dans les circonstances ou rencontres biographiques de Descartes, mais peut-être dans les pages de ses interlocuteurs."

(2) Dans cette note je ne prends en considération que le texte Français , mais la *collatio* du texte latin et du texte néerlandais a donné des résultats tout aussi intéressants pour la partie parvenue uniquement dans la traduction, pour lesquels cfr. les notes de Bos en bas du texte latin, son introduction dans le présent volume et son article (*La première publication de* La Recherche de la Vérité en 1684), publié dans «Nouvelles de la République des Lettres », 1999, 1, pp. 13-26. Sur un point où je m'écarte de l'interprétation de Bos cfr. *Postilla cartesiana. Note di lessicologia e filologia cartesiana*, dans «Physis», 2000 (1), pp. 151-165: 160-163.

Resources bibliographiques

1. "Bulletin cartésien." 1972. *Archives de Philosophie*.

   Fondé en 1972 par l'équipe Descartes dirigée par Pierre Costable, est publié dans la revue *Archives de Philosophie* chaque année et vise à dresser une liste de tous les ouvrages et articles sur Descartes offrant une recension plus ou moins détaillée selon l'importance du texte enregistré.

   "Pour la période 1800-1960, les chercheurs disposent de la *Bibliographia Cartesiana* de Gregor Sebba (Nijhoff: La Haye 1964). Ce Bulletin annuel va tenter de remédier à l'absence de bibliographie courante des études sur Descartes. Nous ne pouvons envisager pour l'instant de répertorier systématiquement tous les philosophes « cartésiens»: notre but essentiel étant de rendre service, notre méthode sera plus souple que rigoureuse en dehors des études sur Descartes lui-même. Nous avons renoncé à couvrir la décennie 1960-1969, sans perdre pour autant l'espoir de publier une bibliographie de cette période, avec la collaboration de Gregor Sebba et Wolfgang Rod.

   A quelques exceptions près, nous n'avons retenu ici que des études et des textes publiés en 1970; nous avons suivi dans la présentation un ordre thématique, l'ordre alphabétique étant rétabli dans la Table publiée au 4e cahier des *Archives*." (*Archives de Philosophie* 35, 1972, 263)

2. Guibert, Albert-Jean. 1976. *Bibliographie des œuvres de René Descartes au XVIIe siècle*. Paris: Éditions du CNRS.

"Une Bibliographie est une création continue. A peine l'ouvrage est-il publié qu'apparaissent miraculeusement ici et là des éditions jusqu'alors inconnues que leurs propriétaires signalent à l'attention de l'auteur.

Ces éditions, enfouies dans les bibliothèques privées, peuvent ne jamais voir le jour. Mais, si par suite de circonstances familiales malheureuses, une vente publique vient disperser tout ou partie de ces livres, pourtant jalousement conservés depuis plusieurs générations, on voit alors surgir des éditions du plus haut intérêt.

Il en est de même lorsque, par bonheur, le possesseur est un bibliophile ou un collectionneur lettré. Il se fait alors un devoir de les signaler et souvent même de les communiquer.

C'est exactement ce qui s'est passé pour les Bibliographies de J.B.P. Molière et de Jean Racine. Il en résulte qu'un travail de ce genre n'est presque jamais complet lorsqu'il est publié pour la première fois.

La Bibliographie de Descartes que nous proposons n'échappe pas à la règle. Néanmoins, nous nous sommes efforcé, avec les matériaux que nous possédons ou que nous avons pu consulter, de rassembler en un tout cohérent tous les travaux de Descartes publiés au XVIIe siècle.

(...)

Or, notre ambition, bien que limitée aux ouvrages publiés au XVIIe siècle, était de créer un ensemble ordonné et le plus complet possible de toutes les éditions tant Français es que latines éditées à cette époque.

Nous nous sommes gardé de céder à la tentation d'empiéter sur le domaine littéraire, scientifique ou philosophique, ce qui n'est pas le rôle d'un bibliographe. Ce domaine immense de synthèse et d'analyse a été admirablement étudié par Messieurs Adam et Tannery dans leur édition monumentale de 1910 rééditée tout récemment par les soins du C.N.R.S. et par d'éminents

philosophes. Il ne nous appartenait pas d'y revenir sinon de nous y reporter pour certaines particularités.

La Bibliographie que nous proposons est en réalité la première des Œuvres de Descartes. Elle s'arrête au début du XVIIIe siècle car nous estimons que les publications ultérieures, dont nous ne méconnaissons pas l'importance et l'efficacité, ne présentent pas aux yeux du bibliophile ou de l'homme de sciences ou de lettres le même intérêt que celles éditées du vivant de l'auteur ou de ses contemporains.

Nous voulons donc croire et espérer que ce travail suscitera d'heureuses vocations et incitera les possesseurs d'éditions inconnues à nous révéler leur existence et à enrichir ainsi notre patrimoine bibliographique." (*Introduction*, pp. 9-10).

3. Armogathe, Jean-Robert, and Carraud, Vincent. 2003. *Bibliographie cartésienne (1960-1996)*. Lecce: Conte Editore.

   Avec la collaboration de Michaël Devaux et Massimiliano Savini.

   "Le présent ouvrage a pour objet de continuer la présentation bibliographique raisonnée des travaux sur Descartes entreprise par Gregor Sebba pour la période antérieure à 1960 (*Bibliographia cartesiana*, La Haye, 1964). Livres et articles ont été répertoriés et indexés par des mots clés permettant des enquêtes bibliographiques précises.

   (...)

   La Bibliographie cartésienne est divisée en trois sections: *Opera, Thesaurus* et *Corpus*.

   La première section: *Opera*

   Un souci d'utilité pour l'usager a conduit à retirer du *Corpus*, pour les présenter à part, les écrits de Descartes (éditions et traductions), qui constituent la première section (*Opera*). Nous avons éliminé de cette section les publications à usage scolaire et les morceaux choisis. Pour les traductions, nous avons essayé de présenter une sélection d'ouvrages, ne retenant que ceux qui sont tenus pour "classiques" dans les différentes langues. Par commodité, enfin, nous avons joint à cette section

Opera quelques instruments bibliographiques et lexicologiques (qui ne figurent donc pas dans le *Corpus*). Un Index particulier renvoie aux œuvres publiées ou traduites dans cette section.

La seconde section: *Thesaurus*

Une bibliographie de grande taille peut se révéler totalement inutilisable si des indications sur l'importance relative des items ne sont pas données au lecteur candide. Au fil des quatre mille références, nous avons retenu celles qui nous ont semblé devoir faire l'objet d'une mention particulière. Il ne s'agit pas d'un palmarès; le choix du *Thesaurus* réunit 323 items qu'il nous a semblé utile de signaler. Un critère décisif fut la réception et l'influence des ouvrages ou articles dans la communauté scientifique. Ces items se trouvent donc mentionnés à deux reprises: dans le *Thesaurus*, d'une part, mais aussi, à leur place alphabétique dans le *Corpus*. C'est cependant dans le *Corpus* seul que l'on trouvera, en outre, les discussions auxquelles les items retenus dans le *Thesaurus* ont donné lieu, ainsi que leurs traductions.

Les items retenus dans cette section ont fait l'objet d'un dépouillement plus poussé, avec l'établissement d'un plus grand nombre de mots clefs pour chaque titre analysé. Leur numéro est celui de leur ordre dans le *Corpus*, il est imprimé en chiffres gras dans l'index des mots clés, permettant ainsi de retrouver, pour une recherche rapide, les principales références.

La troisième section: *Corpus*

Cette section réunit par ordre alphabétique (d'auteurs et de titres pour les collectifs) plus de quatre mille items, ouvrages et articles, complétant la *Bibliographia cartesiana* de Gregor Sebba jusqu'à l'année 1996 incluse, la date du quatrième centenaire de la naissance de Descartes représentant un terminus *ad quem* symbolique et bibliographique pertinent. L'année 1996 semble être une date charnière (3): le nombre annuel de publications est resté extrêmement élevé dans les années suivantes.

(3) Une idée de l'importance numérique des publications qui ont suivi l'année 1996 peut être tirée de l'inventaire établi par Michaël Devaux, "Le quatrième centenaire de la naissance de Descartes: présentation des colloques et des communications", *Bulletin cartésien* XXVI, *Archives de philosophie*, 1998, 1, pp. 1-25.

The Philosophy of Descartes. A List of Bibliographical Tools in English

Introduction

This page gives a list of the main biographies, dictionaries, lexica and bibliographies on Descartes in English; for the resources in French see:

Descartes: Biographies, Bibliographies, Dictionnaires, Lexiques

Ancient biographies

1. Boxhorn, Marcus Zuerius. 1670. *A Summary or Compendium of the Life of the Most Famous Philosopher Renatus Descartes, written originally in Latin by Peter Borellus ... ; to which is also added an epitome of his life by Marcus Zurius Boxbornius* London: George Palmer.

   Translation of Pierre Borel, *Vitae Renati Cartesii, Summi philosophi compendium*, Paris, 1656.

   Epitome by Marcus Zuerius Boxhorn (1612-1653) pp. 58-107.

   "This Translation, or rather Collection, out of Peter Borellus, Physician to the French King; and Marcus Zurius Boxhornius Historiographer in the University of Leyden, presents you with the Life of the Famous Monsieur Descartes, giving you an account of his Parentage and Education, during his Minority, as well as the Course and Method of his Study, in his Riper Years; together, with an exact Catalogue of all his Manuscripts, which were found at Stockholm in Sweden, after his Death; and the names of all his Books that have been Published, with the

Places where they were Printed; as also the several Epitaphs that were bestowed upon him by his Contemporaries, after his Decease. If this Epitome receive a kind entertainment; 'tis very probable (when the Author, according to promise, exposed a larger Treatise to public View, concerning this Subject) that it may be also taught to speak English, for the satisfaction of those who want the advantage of the Latin, and are only skilled in our Mother-Tongue. This Compendious Discourse of the Life of so Eminent a Person, and great a Light in the Firmament of Learning, is all that we can furnish you with at present, till we meet with an opportunity to gratify you with a more Complete Relation in a larger Volume."(orthography slightly modernized)

Pierre Bayle dedied to Boxhorn the article "Zuerius Borxhonius" in his *Dictionnaire historique et critique*, fifth edition, Amsterdam, 1740, vol. IV, pp. 560-568.

Reprinted in Roger Ariew, Daniel Garber (eds.), *Descartes in Seventeenth-Century England*, Bristol: Thoemmes, 2002, vol. 3: *Biographies of Descartes*: Pierre Borel, *A Summary or Compendium, of the Life of the Most Famous Philosopher Renatus Descartes* (1670); Marcus Zurius Boxhorn, *Epitome of the Life of Descartes*, in: Pierre Borel, *A Summary or Compendium, of the Life of the Most Famous Philosopher Renatus Descartes* (1670); Adrien Baillet, *The Life of Monsieur Des Cartes* (1693).

2. Baillet, Adrien. 1693. *The life of Monsieur Des Cartes containing the history of his philosophy and works: as also the most remarkable things that befell him during the whole course of his life*. London: R. Simpson.

   English translation of Adrien Baillet, *La vie de mr. Des-Cartes. Réduite en abregé*, Paris, 1692.

3. Sebba, Gregor. 1982. "Adrien Baillet and the Genesis of His *Vie de M. Des-Cartes*." In *Problems of Cartesianism*, edited by Lennon, Thomas M., Nicholas, John M. and Davis, John W., 9-60. Kingston & Montreal: McGill's Queens University Press.

   "The story of the *Vie de M. Des-Cartes* begins with the unexpected death of Descartes in Stockholm in 1650, when the

French ambassador Chanut his friend and host, took possession of the philosopher's unpublished manuscripts. He later turned them over to Claude Clerselier who published three volumes of correspondence, with enough manuscript left over to make one more. At his death in 1684 he left his material to Abbé Legrand with a sum of money for publishing this volume. (94) Instead of doing so, Legrand planned a new complete edition of the works and correspondence of Descartes.

A Life was to be added presumably a relatively brief one since it was to be part of this edition, Adam has described Legrand's editorial work in detail, using the information given in Baillet's preface. Legrand made a thorough and quite successful search for missing correspondence and sought out persons who had known Descartes. There is no indication that his biographical work went beyond writing minutes of the information he collected. Legrand seems to have been an excellent, careful editor, but he could never come to an end.

He worked for twenty years, died in 1704, and still nothing had been published.

The biography would have shared the fate of Legrand’s edition had it not been lifted out of its status as an introductory piece. The idea of making it an independent work cannot have come from Legrand, judging from his way of working. He had no sense for what was urgently needed at the time, or else he would have published Descartes’s *inedita* without delay, following them up with the Life of Descartes. There is no doubt that Cartesians of all types kept abreast of Legrand's plans and work. Unlike Legrand they were not concerned with editorial problems. A new edition including material as yet unknown would be a philosophical event, but the event took its time and the need for action was pressing. Somehow Descartes needed to be disengaged from the theological entanglement he had so carefully avoided in his own lifetime. When, where, and how the answer was found we do not know. But we can say what it was: the germ of an idea, embedded in a technicality. Detach the "Vie de Mr. Descartes" from the "Œuvres de Descartes" and make it a book in its own right, in the language and spirit of the

Discours de la méthode not of the *Meditationes de prima philosophia*. Taking the biography out of the context of the "Œuvres" changed the concept and function of the proposed life of Descartes. The change made it necessary to find a swifter writer than Legrand." (pp. 48-49)

(...)

"Thanks to Baillet's hints, the pieces begin to fall into place. We know already from Frion that Baillet did the actual writing in "less than a year" before giving the manuscript to the printer at the end of February 1691; since it had to be submitted to the censor, actual writing would have begun between January and March 1690. He was able to complete the writing in such a short time thanks to his systematic way of putting "un peu d'ordre" into the material he had accumulated, so that the writing task consisted chiefly in producing a continuous narrative. The preparation of the material while waiting for information must have taken much longer than the writing itself." (p. 51)

"Perhaps it is not amiss to close with a word about the auteur *malgré lui*. Baillet preserved invaluable texts and information that would have been lost without him, but he preserved them in his own fashion. A thorough study of his style, his manner of translating and paraphrasing, and his scholarship is needed in attempting to reconstruct lost texts for which he is the only source. This requires following his development from the Jugemens to the Vie. As to his so-called hagiographic bias, we need to quote only one text. It stands in the second volume of the *Vie de Mr. Des-Cartes*, on p. 381. Speaking of Pascal, he says : "... au lieu de borner ses vues à la recherche de tout ce qui peut contribuer à la félicité temporelle de cette vie, comme avoit fait M. Descartes, il s'éleva ... jusqu'à celle des vérités de notre Religion, où M. Descartes ne s'était jamais jugé capable d'atteindre." It is as simple as that. One cannot rise to the "verities of our Religion" without putting the "temporal felicity of this life" down where it belongs. To the peasant scholar from Beauvais this was an indisputable fact, but he had enough discipline to make his confession of faith where nobody would

look for it, instead of allowing his religious radicalism to distort his portrait of Descartes." (pp. 59-60)

(94) See Adam's summary in AT 1 XLII ff. and Baillet, *Vie de M. Des-Cartes*, I :XXII.

Adam's judgment of the value of Baillet's work is still the best we have (AT, I :XLV).

The mass of detail piled up by Baillet "sans faire grâce aux lecteurs de tant de menus faits" has become invaluable to the modem historian because of "ce souci minutieux du réel qui caracterise Baillet". This is a very different tone from that of Ménage, La Monnoye, and Boschet, but Baillet had learned meticulous scholarship in the hard school of the *Jugemens*. He now knew what to guard against.

Modern biographies

1. Haldane, Elizabeth Sanderson. 1905. *Descartes. His Life and Times*. London: J. Murray.

   Reprint Bristol: Thoemmes Press, 1992.

   "Any Life of Descartes is, of course, mainly dependent upon his very considerable correspondence, principally written and framed with a view to future publication.

   Of Descartes' *Letters* as MM. Adam and Tannery tell us, the first important edition is that of Clerselier, in three volumes, published at Paris by Charles Angot in 1657-67. Clerselier had at his disposal Descartes' manuscripts, copies of many of his letters and notes, taken by him to Sweden and enumerated in a catalogue made just after his death. These had been given to Chanut, the French ambassador in Sweden, and Descartes' great friend, who contemplated publishing them. This task, however, he handed over to Clerselier, his brother-in-law, and likewise the author's friend. The packet was duly dispatched to France, which, after many delays, it reached in 1653. It travelled by Rouen, and was entrusted to a vessel which made its way to Paris by river. Unluckily, near Paris, the boat was wrecked, and for three days the precious manuscripts remained

submerged in water. Wonderful to relate, "by Divine permission," the papers were recovered some distance off, and were duly hung up in various rooms to dry; but since this was done by unintelligent servants, much confusion resulted, as can easily be imagined. (*) In endeavouring to rearrange the manuscripts, the greatest difficulty was experienced; and more especially was this so in reference to the *Letters*. The papers, all of which had not been used, were finally bequeathed by Clerselier, in 1684, to Legrand, who assisted Baillet in writing his *Life of Descartes*. Baillet and Legrand set about their work of writing the Life with the greatest vigour. Legrand, not content with handing over to Baillet Descartes' manuscripts and Clerselier's memoirs, made it his business, Baillet tells us, to go to see everyone in Paris from whom he might receive the slightest help.

He wrote to Brittany, Touraine, Languedoc, Holland, Sweden, and Germany, in order to interest his friends and relations in the project, and recovered certain communications from Regius of Utrecht, and the greater part of those from Descartes to the Abbé Picot, to Clerselier, to Tobie d'André; as also some from Princess Elisabeth of Bohemia, Chanut, etc. Baillet also acknowledges the help received from Descartes' nephews, M. de Kerleau and M. de Chavagne (both Descartes' brothers being dead), and also from his niece, M.lle Catherine Descartes. These provided family papers regarding the philosopher's ancestry and private life, while the sons of Clerselier and Chanut supplied all that they could of what was useful in their fathers' manuscripts. M. le Vasseur, son of Seigneur d'Etioles, the relative, friend, and host of Descartes while in Paris, supplied what material he could, as did many others whose names Baillet gratefully quotes in his Preface." (*Prefatory note,* pp. VIII-IX)

(...)

For a Life of Descartes, besides the Letters and the most interesting bit of autobiography in the " Method," the *Life* of Baillet is naturally the source from which all others have been derived, and its value is largely due to its simplicity and

accuracy. Baillet tells us that he aimed at saying what he had to say simply, telling just what his subject thought, saw, and did without adornment, and this is exactly what he accomplished. He does not aspire to criticise, but tries to tell his tale with exactitude and fidelity, not indulging in over-much laudation nor concealing faults where present. Baillet has no false estimation of his own powers. He regrets deeply that Chanut, who knew Descartes so well, and who was, in his eyes, so well fitted for the work, did not see his way to undertake the writing of Descartes' life. Failing Chanut, Baillet would have liked Clerselier to undertake the task. Clerselier knew Descartes; he had the material and leisure necessary, besides the ability, but he did not do more than collect and preserve his writings. The Queen of Sweden, seeing- that these two refused, endeavoured to procure the services of Père Poisson of the Oratory, who had written on the " Method." Clerselier offered to assist him as far as material was concerned, but the plan fell through." (pp. X-XI)

(...)

"The only English life of Descartes of any importance is the excellent little book by Professor [John Pentland] Mahaffy, [*Descartes*] published as one of Blackwood's Philosophical Classics in 1880. Norman Smith's *Studies in Cartesianism*, 1903, is an acute criticism of his philosophy; and there is, of course, besides, the well-known article on *Cartesianism* in the Encyclopedia Britannica, by the Master of Balliol." (p. XI)

(*) *Vie de M. Descartes* par Adrien Baillet, 1691, vol. II., p. 428.

2. Shea, William R. 1991. *The Magic of Numbers and Motion. The Scientific Career of René Descartes*. Canton (MA): Science History Publications.

   Contents: Preface IX-X; 1. The young man from Poitou 1; 2. The early physics 15; 3. The Mathematical Breakthrough 35; 4. The Quest for musical harmony 69; 5. Descartes and the Rosicrucian enlightenment 93; 6. The Search for method and Rules for Direction 121; 7. The Optical triumph (1625-1628) 149; 8. Metaphysical Meditations 165; 9. Unweaving the rainbow 191; 10. The Action of Light 227; 11. Matter and motion

Appendix: Chronology or Descartes' life 351; Bibliography 355; index 365-371.

"My goal has been to follow Descartes in his journey, and to provide a comprehensive, but by no means exhaustive, survey of his scientific career from his student days at the Jesuit College of La Flèche to his departure for Sweden where he had been summoned by Queen Christina. I have tried to follow Descartes' injunction to be clear (but not clear at all costs), and I am sanguine enough to hope that the reader will be sufficiently stimulated and intrigued by what he finds in this book to turn to Descartes' own works. I have kept my discussion of mathematics in Chapter Three as simple as possible, but anyone who wishes to skip this section at first reading has not only my sympathy, but the assurance that the gist is summarized in a few pages at the end. A chronology of the main events of Descartes' life will be found in the Appendix.

My work could not have been undertaken without the pioneering efforts of Gaston Milhaud (*Descartes Savant,* 1921), Paul Mouy (*Le Développement de la Physique Cartésienne*, 1934), and J. F. Scott, (*The Scientific Work of René Descartes*, 1952)." (pp. IX-X).

(...)

"We have seen how Descartes called upon God to vouchsafe the reliability of our knowledge of the external world. Likewise he appealed to the simplicity and immutability of God's action to justify his laws of nature. The Second Law, for instance, "only depends on God conserving each thing by his continuous action, hence at the very instant that he conserves it. It so happens that among motions, only straight motion is entirely simple and such that its nature is comprised in an instant." (25) I believe that it is in passages such as these that we gain our best insight into Descartes' deeply entrenched belief in the basic unity of science, metaphysics, and natural theology. Whatever change is brought about in the world, it is caused by

mechanical action, but this does not make it less marvelous. God implants simple and self-evident notions of matter and motion in the human mind at the very instant that he creates it. Likewise God produces and sustains the motion of bodies at each and every instant that they are moving. Without these God-given notions, we would be unable to perceive motion, and without God's direct intervention, there would be no motion to be perceived. The magic of numbers and motion is rooted in the transcendental rationality of the Ultimate Mind." (p. 349)

   "I have a vivid and happy memory of my first reading of Descartes, for it was with unbounded enthusiasm that I devoured the Discourse on Method, sitting in the shade of a tree in the Borghese Gardens in Rome in the summer of 1970, just before I started studying philosophy at university. But I cannot honestly say that my enthusiasm was fuelled by my subsequent undergraduate courses on Descartes, which simply followed the trade winds, in an obsessive but completely de-contextualized way, through the tired old questions of the cogito and the foundations for knowledge. So it was that my interest in the early seventeenth century came to be stimulated by Galileo rather than Descartes, and it was to Galileo that I devoted my main attention while a research student at Cambridge in the mid-1970s. While there, however, Gerd Buchdahl and John Schuster revealed to me a different

Descartes, a more authentic and vastly more engaging one, whom I only began to explore properly ten years later. It is this Descartes who is the subject of this book, and I warn readers—if 'warn' is the right word, as some may breathe a sigh of relief—that it is not the Descartes from whom philosophers have made such a good living for decades that they will find here. But I have not simply set out to write the history of science or cultural history. Descartes is, after all, the figure who stands at the beginning of modern philosophy, just as Plato stands at the beginning of ancient philosophy. While I shall argue that his philosophical achievements are much more intimately linked to his interest in what subsequently have been considered 'scientific' questions than is commonly realized, my aim is not thereby to take Descartes out of the realm of philosophy, but rather to throw light on how he did philosophy.

It is with some trepidation that I pursued this goal through the genre of intellectual biography, even though my own early interest in philosophy had been fired by Simone de Beauvoir's incomparable intellectual autobiography. People read intellectual biographies with different expectations, from the naïve attempt to understand, at a distance as it were, how a 'great mind' works, to attempts to model one's own thought and career on that of someone one admires. Perhaps the most famous example of modelling is Thomas Mann, who evidently tried to mirror in his own intellectual development the stages in Goethe's intellectual development, although I think there are very many less explicit cases, and that biography generally has played an important role in 'self-fashioning' since the nineteenth century. This makes it a rather delicate genre, both from the point of the view of the reader and from that of the writer. Self-fashioning is part of the rationale behind reading, and perhaps behind writing, intellectual biographies, but any self-fashioning will have to be very indirect in the present case. While the thesis of Jacques Le Goff, that modernity did not begin and the Middle Ages did not effectively cease until the French and Industrial Revolutions, is stronger than anything I would wish to argue in this book, I have no doubt that the culture in which Descartes lived and worked is much more

remote from our own than is commonly recognized. This has consequences for biography, because a biography explores the emotional life of its subject, and the more removed from our own culture our subject is, the deeper the problems about how we are to succeed in this exploration. I have tried to be more responsive than my predecessors to the difficulties that these issues raise, with the result that there is much greater concentration on the culture in which Descartes worked than one finds in earlier biographies. But I am also very conscious of the problems of over-contextualization, and I have tried to make sure that neither the subject of my biography, nor his contribution, slips out of focus." (*Preface,* pp. VII-VII)

4. Watson, Richard. 2002. *Cogito, Ergo Sum. The Life of René Descartes*. Boston: Godin.

   "There are two main traditions of Descartes biography. In his *La Vie de Monsieur Des-Cartes* (1691), Adrien Baillet started the French Catholic apologetic tradition, the goal of which is to establish that Descartes's life is worthy of the Great Metaphysician. It has been continued most recently by Geneviève Rodis-Lewis in her *Descartes: His Life and Thought* (1998). Baillet was recommended by the fact that he was undertaking a seventeen-volume *Lives of the Saints*. He demurred that he knew little about Descartes, but then he threw himself into the task with the zeal of a full-fledged member of the Saint Descartes Protection Society. The founder of this society (this joke probably goes back at least to Descartes's death in Stockholm in 1650) was the French ambassador to Sweden, Hector-Pierre Chanut, who refused to allow Descartes's remains to be buried in a Lutheran cemetery. Descartes's reputation was then managed for many years by Chanut's brother-in-law, Claude Clerselier.

   Clerselier edited Descartes's letters, deleting passages that conflict with church doctrine and adding passages of his own composition where they were most needed to illustrate the faith proper to a pious Catholic philosopher. This can be checked, however, only against a few letters of which there are independent copies, for none of the original manuscripts, papers, notes, and letters that Clerselier and Baillet had are

extant today. They were given to Jean-Baptist Legrand, and after he died, to his mother in 1706. Despite many searches, that is the last we ever hear of them.

The second main line of Descartes biography has most recently been continued by Stephen Gaukroger in his *Descartes: An Intellectual biography* (1995). In this tradition, the stress is on the analysis of Descartes's works to show him as the Great Scientist who founded not only Modern Philosophy but also Modern Science.

The present work belongs to neither the religious nor the scientific apologetic tradition. Given how much paper has been lost since the seventeenth century, I cannot look at original sources for much of the story I tell, but must depend on editors and chroniclers such as Clerselier and Baillet, who are not fully trustworthy. The result is a skeptical biography, as full of doubt about tradition and authority as was Descartes himself.

Here. then, is the life of René Descartes. It is the first biography of Descartes since 1920 that is based on substantial new research, and the only one ever written for general readers. It is the story of the man, not of the monument." (pp. 22-23)

Descartes Lived 421; Notes 425; Bibliography 489; Index 503-507.

"Descartes died in Sweden in 1650, a few weeks before his fifty-fourth birthday. He had spent most of his adult life in relative seclusion in what is now the Netherlands, while the Thirty Years' War waxed and waned around him. By 1667, when some French Cartesians arranged for the return of his remains to Paris, they had begun to publicize his works, to develop a characteristically Cartesian philosophy, and to be identified by critics as a 'sect'. These early supporters included many philosophers who, apart from Nicolas Malebranche, are probably remembered today only as marginal figures in the history of Western thought. The name of Descartes, however, remains readily recognizable. He has entered the canon of Western philosophy so securely that that there is no longer any dispute about his significance.

Why was he important? Hardly for the phrase by which he is popularly remembered today, both by students of philosophy and by other readers: ' *I think, therefore I am*'. This was not an original insight on his part, and it had a relatively minor role in his work. During the past century, Descartes has often been read as a metaphysician or, perhaps as frequently, as a philosopher who took seriously the arguments of sceptics. Alternatively, he is classified as a philosopher of subjectivity, as someone who outlined an internal map of the human mind and defended the irreducibility of conscious experiences. Finally, there are those, especially feminist critics, who think of Descartes as having exaggerated the significance and capacity of reason at the expense of the emotional life. For them, Descartes was a mere 'rationalist'.

Descartes' life reveals a much more complex and interesting character than any of these labels suggests. As an intellectual in the early seventeenth century, he might have directed his energies toward political philosophy (as Hobbes did), to theological disputes (as Pascal did), or to the renewal of humanistic and classical learning for which Erasmus had earlier provided an outstanding model. Alternatively, he might

have channeled his genius exclusively into mathematics (as his contemporaries Fermat and Roberval did); had he done so, he would surely have exceeded by far the novelty and ambition of their achievements. Although all these interests featured to some extent in his life, Descartes' primary focus was elsewhere. He is best characterized as a philosopher of the Scientific Revolution." (pp. 1-2)

6. Nadler, Steven. 2013. *The Philosopher, the Priest, and the Painter: A Portrait of Descartes*. Princeton: Princeton University Press.

   Contents: Illustrations IX; Acknowledgments XIII; 1. Prologue: A Tale of Two Paintings 1; 2. The Philosopher [René Descartes] 8; 3. The Priest [Augustijn Alsten Bloemaert, (1585-1659)] 36; 4. The Painter [Frans Hals, (1580-1666)] 55; 5. "Once in a Lifetime" 87; 6. A New Philosophy 111; 7. God in Haarlem 143; 8. The Portrait 174; Notes 199; Bibliography 219; Index 227-230.

   "Exploring such art historical and biographical questions about a painting [*] might seem an odd way to frame a book about a philosopher. But Hals's image of Descartes, now the image of Descartes (primarily by way of the Louvre copy), has become quite familiar. Indeed, it has become too familiar. While Descartes's famous phrase "I think, therefore I am" has been transformed by overuse, parody, and misunderstanding into a kind of all purpose slogan easily adapted for a variety of occasions, philosophical and otherwise, Hals's depiction of the philosopher has been devalued almost to the point of anonymity by seemingly endless reproduction and caricature in a wide variety of media: innumerable book covers, works of fine and decorative art, commercial and editorial illustrations, even lowbrow entertainment.

   One of the goals of this book is to restore to Hals's portrait of Descartes some of its originality and luster by reconstructing the biographical and historical contexts of its production. At the same time, such a project is a prime opportunity for presenting Descartes and his philosophy to a broad audience. The true story behind Hals's painting, as familiar as that image has

become, can well serve as the scaffolding for an accessible study of Descartes himself. Just as “I think, therefore I am” represents only the starting point of a grand philosophical project that became the dominant intellectual paradigm of the seventeenth century, Hals’s small painting can provide entrée to the life and mind of the ambitious thinker it so effectively portrays.

This is not a biography in the conventional sense. Most of Descartes’s life, including much that happened during the decade on which this book is focused, lies outside the scope of its story. Nor is this book intended to be another detailed analytic study of Descartes’s philosophy. There are many scholarly monographs exploring Descartes’s work in epistemology, metaphysics, natural philosophy, and mathematics; there are also a number of fine general introductions to his thought, as well as several recent biographies. As valuable as such academic studies are, I would rather take my lead from Hals. The Haarlem artist has given us a small, intimate portrait of a great thinker. I want to do the same: a presentation of Descartes and his ideas in the form of a small, intimate portrait, a rendering of those years that culminated in some groundbreaking philosophical doctrines and a modest but intriguing work of art.

Descartes belongs as much to the intellectual culture of the Dutch Golden Age as he does to the grand history of Western philosophy whose development he so strongly influenced. It thus seems perfectly appropriate, if a bit unorthodox, to use a seventeenth-century Dutch painting as a portal into his world." (pp. 6-7)

[*] The portrait of Descartes made by Frans Hals in 1649.

Dictionaries, lexica and concordances

1. Cottingham, John. 1993. *A Descartes Dictionary*. Oxford: Blackwell.

   Contents: Preface VII; Note on the use of this book 1; Abbreviations 3; Introduction: Descartes' Life and Works 5;

DICTIONARY ENTRIES A-Z 11; Bibliography 170; Index 175-187.

"The secondary literature on Descartes is gigantic. Since almost all the topics covered in the entries that follow have been the subject of scores of learned articles, if not entire books, any attempt to aim for completeness in discussing the issues involved would be self-defeating. In what follows I have tried to trace out the main outlines of Descartes' thought, attempting as far as possible to let the Cartesian texts speak for themselves (though specialist readers will be well aware of the compression and selectivity that the demands of concision have inevitably required). Although Descartes is an astonishingly lucid writer, that very lucidity can be a pitfall, since terms whose sense at first appears transparent may in fact carry connotations or presuppositions whose import is far from straightforward; in such cases I have tried to show something of the intellectual background which shaped Descartes' ideas, despite his claim to be 'starting afresh'. Apart from citations from such early sources, and some writings from contemporaries or near contemporaries of Descartes, individual entries have been kept clear of references to the works of commentators and critics; a selection of some of the most important of these secondary works will be found in the Bibliography." (p. 1)

2. Ariew, Roger, Des Chene, Dennis, Jesseph, Douglas M., Schmaltz, Tad M., and Verbeek, Theo. 2003. *Historical Dictionary of Descartes and Cartesian Philosophy*. Lanham: Scarecow Press.

   Reprinted in 2010 with the title: *The A to Z of Descartes and Cartesian Philosophy*.

   Contents: Jon Woronoff: Editor's Foreword IX; Preface XI; Chronology XIII; Introduction 1; THE DICTIONARY 13; Bibliography: Introduction 261; Texts and Editions: Descartes 265; Texts and Editions: Other Writers 267; Works on Descartes 281; Works on Cartesians and Other 17th-Century Figures 293; About the Authors 303.

   "This *Historical Dictionary of Descartes and Cartesian Philosophy*, as befits a dictionary, includes many entries on

Descartes's writings, concepts, and findings. Since it is historical, there are other entries on those who supported him, those who criticized him, those who corrected him, and those who together formed one of the major movements in philosophy: Cartesianism. To better understand the period, there is a brief chronology, and to see how Descartes and Cartesianism fit into the general picture, there is a helpful introduction and a biography. Since everything cannot be summed up in one volume, there is an ample bibliography that directs readers to numerous other sources on issues of particular interest." (p. IX)

3. Smith, Kurt, ed. 2015. *The Descartes Dictionary*. London: Bloomsbury.

   Contents: Acknowledgments VI; About this dictionary VII; Introduction 1; A sketch of Descartes's life 1; A sketch of Descartes's philosophical system 5; Descartes in the classroom 24; Terms and names 29; Bibliography 123-131.

   "This dictionary has been geared specifically for undergraduate students. The terms and philosophical concepts included are those that have typically proven difficult for students coming to Descartes's writings for the first time.

   Descartes's philosophical career spanned almost his entire adult life. He was a living, breathing human being, warts and all. We need to remind ourselves of this because human beings, real human beings, change and grow. This includes what they think about, how they think about those things, and so on. It would be unreasonable, then, when examining the entire span of Descartes's philosophical writings to expect to find a single, unified, perfectly consistent view.

   We must allow for the likelihood of a change in mind. It would be equally unreasonable to expect to find just one set of terms whose meanings remained the same over that same span of work. An important aim of this dictionary is to track these sorts of changes if and when they occur.

   (...)

When provoked by critics, Descartes (on occasion) admits that he was using certain philosophical terms differently from how they were used in the Schools. Johannes Caterus (1590–1657), for example, author of the First Set of Objections of the *Meditations*, expressed concerns over what he took to be Descartes's odd use of certain terms. He asks Descartes, for instance, to explain what he had meant by the terms "idea," "objective being," and "nothing." Later in the First Set of Objections, he expresses concern over Descartes's use of "real distinction." Caterus complains that Descartes uses these terms very differently from the way the Schools used them.

Descartes's replies to such critics are not always that illuminating, for he will sometimes simply shrug off the concern, or simply admit that he is using a term differently than it had been used by others.

Even so, he usually says enough in other places that allow us to figure out what he meant by the term in question. In light of this, where appropriate, the then-standard usage of a term will be noted in an entry, so as to help the reader better understand the import of Descartes's change in its usage.

Since Descartes wrote almost exclusively in Latin and in French (though he wrote some letters in Dutch), it is sometimes helpful to the English reader to see the actual words he used. To this end, when helpful, this dictionary will include the Latin and French terms that Descartes actually used. They will be provided directly following the term to be defined, and in many cases they will appear in the entry itself. Concerning "definitions," it should be noted that it is rare that a one-liner will suffice. In many cases, if not most, determining what a term means requires some discussion of other texts. Even in cases where Descartes provides an actual definition, simply repeating it will not be enough to understand the full philosophical import of the term defined. So, the reader should think of each entry not so much as a definition proper, but as a discussion of the term in question.

The following entries are based entirely on Descartes's writings —on the actual texts. Even so, the entries have been informed

(and improved!) by looking to the secondary literature. It is worth noting that a careful study of the secondary literature reveals that there is, not surprisingly, no ultimate consensus on Descartes's views. Rather, one finds many interesting interpretations in scholarly competition with one another. With this in mind, and in trying to provide the reader with some sense of the array of interpretations available, the relevant secondary literature has been incorporated into certain entries, these influences provided at the end of each entry. But even here, these references are not definitive. They are only suggestions about where one might begin the next step in one's research." (pp. VII-IX)

4. Nolan, Lawrence, ed. 2016. *The Cambridge Descartes Lexicon*. Cambridge: Cambridge University Press.

   Contents: List of Figures XIV; List of Contributors XVII; Abbreviations XXIII; Introduction and Notes on How to Use This Work XXV; Acknowledgments XXIX; Chronology XXXI; Descartes' Life and Works XXXV; Annotated Bibliography LXVII-LXVIII; Entries 1-767; Index 769-778.

   "The *Cambridge Descartes Lexicon* is more like an encyclopedia or a compendium than a traditional dictionary, both in its scope and in its content. Many of the entries are fairly lengthy, especially those devoted to important subject terms such as "Cogito Ergo Sum," "Free Will," "God," "Human Being," "Idea," "Law of Nature," and "Representation." Most of the subject entries are also "scholarly" in the sense that they introduce readers to debates in the secondary literature. The authors of these entries sometimes present these debates without defending their own views, but in many cases they take an interpretive stand. Authors of overlapping entries were encouraged to stake out opposing positions (see, e.g., "Body," "Individuation," and "Substance"). The result is that by reading just a few pages, readers can familiarize themselves with almost any given scholarly dispute and get a sense of the arguments and textual evidence for various interpretations.

   (...)

In addition to the 149 subject entries – which include articles on Descartes' individual works such as the *Discourse on Method* and the *Principles of Philosophy* – there are 107 intellectual biographies of various figures, including official objectors to the *Meditations* such as Arnauld, Gassendi, and Hobbes; notable contemporaries and immediate successors such as Leibniz, Locke, Newton, and Spinoza; medieval and Scholastic predecessors such as Augustine, Aquinas, Eustachius, Scotus, and Suárez; important correspondents such as Princess Elisabeth, Constantijn Huygens, and Mersenne; and followers such as Desgabets and Régis. The intellectual biographies briefly sketch each figure's life and accomplishments and then discuss the relation of that person's thought to Descartes'. They also trace Descartes' influences, record the reception of his ideas by critics, and discuss the ways in which his acolytes developed or adapted his views. All of the entries are written in a lucid style and thus accessible to a wide audience, including philosophers generally, those working in related disciplines, and students. Written by the largest and most distinguished team of Cartesian scholars ever assembled for a collaborative research project (ninety-one contributors from ten countries), the *Cambridge Descartes Lexicon* aspires to serve as the definitive and most comprehensive reference source on Descartes and Cartesianism." (pp. XXV-XXVI)

5. Murakami, Katsuzo, Sasaki, Meguro, and Tetsuichi, Nishimura., eds. 1995. *Concordance to Descartes' Meditationes de Prima Philosophia*. Hildesheim: Olms-Weidmann.

   Preface by Takefumi Tokoro.

   "The present volume is a Concordance-Index to Descartes' *Meditationes* (*Meditationes de Prima Philosophia*, in Volume VII of the *Œuvres de Descartes*, published by Charles Adam & Paul Tannery), accompanied by a brief grammatical analysis of its text.

   This Concordance-Index, for the main body of its text, relies basically on the standard edition of Descartes' works, the one just cited above (hereafter abbreviated as AT). Assisted by First Computer, Tokyo (Yoshiaki YOSHIDA), we first translated it

into machine-readable form, and then, using the OCP (Oxford Concordance Program) in operation at the Computer Centre, Tokyo University, made various attempts to obtain a series of outputs. This enabled us to base our further treatment of the text on a version which, while on the whole remaining that of the AT edition, is superior to it in a number of respects. The strategy we adopted might be in need of some explication.

It must be emphasized in the first place that conformity to the AT text does not necessarily mean conformity to the work of Descartes himself. As is well known, a simple comparison of the AT text with several editions of the *Meditationes* published in the seventeenth century suffices for illustrating many points where the former departs from the latter. This is particularly noticeable as regards indentation and punctuation. (The AT creates many new paragraphs of its own and has a tendency to cut Descartes' long sentences into a number of shorter sentences.) And, of course, differences in indentation and punctuation result in differences in the use of capital letters. Furthermore, the use of diacritics even within the AT text falls short of being consequent in itself (for instance, no rule seems to govern the distinction of *multo* and *multò*, both used as adverbs). In the second place, however, we did not consider that these facts should prevent us from choosing the AT text as the basis of our project. On the contrary, in the absence of a rigorous critical edition of the *Meditationes*, upon a thoroughly exhaustive comparison of its First and Second editions, the AT text rightly remains the standard reference for every serious student of Descartes and no other choice could be reasonably conceived. It is thus hoped that the present Concordance-Index will prove itself to be an indispensable tool for the preparation of a future revised edition of the *Meditationes*. These are the considerations behind our strategy.

Almost every inflectional word, as well as every indeclinable word judged to be of some interest to students of Descartes, are presented in context. Indeclinable words judged otherwise are presented in the word index format, i. e., without their contexts. Thus, in refusing to omit any word-forms actually occurring in *Meditationes*, we hope that the present volume

will be useful to students not only of philosophy but also of language. Each word is accompanied by a brief grammatical comment, placed at the context headings of its inflectional variants. It is noted through a system of abbreviation and following an order of rank according to which these variants are arranged. The system of abbreviation and the rules governing the order of rank will be stated in the *Explanatory Notes*.

In the actual process of grammatical analysis, our first concern was to be as rigorous and precise as possible, to distinguish, for instance, the first person singular form of the future indicative from that of the present subjunctive, or the nominative case from the accusative case even when, for some verbs, nouns and adjectives, they happen morphologically to be the same. But after having kept unwaveringly to this principle, we finally decided to temper this rigour in the style of exposition, lest the inevitable subtleties it sometimes leads to should hinder, rather than help the reader, from having easy and natural access to our work. Thus, regarding nouns, adjectives and relatives, we give no indication to the case in which they are put in a given context, retaining the distinction only of number for nouns, and only of gender for adjectives and relatives. The distinction of degree is noted for adverbs only. With verbs, we had to be even more sparing of grammatical distinctions. For each verb entered as a lemma (except for SVM - see below), all of its occurrences are arranged in the simple order of their appearances within the text of *Meditationes*." (pp. I-II)

6. Janowski, Zbigniew. 2004. *Augustinian Cartesian Index. Texts and Commentary*. South Bend: St. Augustine Press.

   Expanded English translation of: *Index Augustino-Cartésien. Textes et Commentaire*.

   Augmented Augustinian citations, and added indices and commentaries for Saint Thomas Aquinas, John Duns Scotus, Francis Bacon, and Montaigne.

   "The present work was intended as a literal translation from the French original. I however, as I was working on it, I realized the considerable impact the Works of Francis Bacon have had on the formation of Cartesian philosophy. Although *The*

Augustinian-Cartesian Index is, as the title suggests, devoted to Augustine's influence on Descartes, it is at the same time a work that is primarily concerned with the study of the sources of Descartes's philosophy. The inclusion of an appendix on Bacon is only consistent with the character of such a work. (In Appendix 4, I have included most of the passages identified by André Laland in his seminal article, "Sur quelques textes de Bacon et de Descartes," in *Revue de Métaphysique et de Morale*, 1911 [19, pp. 296 - 311]. These are marked as XI-XVI.) Likewise, the inclusion of an appendix on Montaigne seemed to me justified. In contradistinction to St. Augustine or Bacon, Montaigne's influence on Descartes has been recognized for a long time. A number of passages have been identified by Cartesian scholars in the past. However, they are dispersed through learned books and journals, and have never been collet led in a handy form for comparative purposes.

While working on *The Augustinian-Cartesian Index*, I was finishing my *Cartesian Theodicy: Descartes' Quest for Certitude*, (*) in which I present an Augustinian reading of Descartes's Meditations. Although the topic and scope of the two works are different, I have included a few fragments from *The Cartesian Theodicy* in my commentary to the *Index*." (p. XI).

(*) Dordrecht: Kluwer, 2000.

Bibliographies

1. Sebba, Gregor. 1964. *Bibliographia Cartesiana. A Critical Guide to the Descartes Literature, 1800-1960*. The Hague: Martinus Nijhoff.

   Contents: Notes to the User VII; Preface IX; From the Preface to *Descartes and his Philosophy* (1959) XIII; Acknowledgments XV;

   PART ONE. INTRODUCTION TO DESCARTES STUDIES [1-562] 1; PART TWO. ALPHABETICAL BIBLIOGRAPHY 1800-1960 [1001-3612] 149; PART THREE. INDICES 419;

Systematic Index 421; Analytical Index 434; Abbreviations 502-510.

"This book offers a new type of working tool for Cartesian studies. It presents the literature of the last 160 years in alphabetical order (Part Two), combined with a systematic analytical survey (Part One) and a detailed topical index to the whole (Part Three). This organization makes it possible to turn bibliography from a repository of references into a workshop of research. The systematic survey of Part One and the topical index of Part Three, together, offer a *mise au point* of Descartes studies over their full historical and topical range.

The results have often been surprising and illuminating to the author, and if his experience is any guide, the reader, too, will begin to wonder about certain seemingly well-settled points, or marvel at the Protean shapes which our elusive philosopher assumes when mighty commentators force him to reveal his true nature.

(...)

Part I (*Introduction to Descartes Studies*) divides the field into eleven broad areas.

It offers critical notices and references to the bulk of significant contributions, covering as much as one-fifth of the whole literature. Other useful items which could not be incorporated in Part I for technical or other reasons will be found annotated in Part II; they are of course fully indexed. Each main title in Part I is annotated; in addition I have listed all reviews I could locate, discussions in books and articles as well as book reviews proper; condensed but detailed tables of content indicate the scope of works that cover a great variety of topics. If I could rewrite Part I in the light of the understanding I gained by making the detailed topical index, selection and emphasis as well as my evaluations of some contributions would be different. But the changes would not be decisive. Part I would still include every undoubtedly indispensable work, and most of the works I did select as being exceptionally useful. I would still add important older works of no great current value because

they give the necessary historical perspective to the picture of Descartes scholarship. And I would still emphasize contributions neglected because they appeared where the Descartes scholar would hardly look for them, because they were written in a minor language, or because they just had bad luck. Nor would I tone down the language of my notices: I do not think that grey is the only color suitable for painting the Cartesian rainbow.

As to my critical evaluations, they are no better than my judgment: *caveat emptor*. The user will form his own better judgment anyway, and to him the literature will look different, if only because there will be even more of it: "majoremque habemus rerum experientiam," as Descartes said when he was a very young man.

Part II (*Alphabetical Bibliography*) is a comprehensive listing of all the literature on Descartes from 1800 to 1960 which I could locate, including the material contained in Part I. The total is close to 3000. I doubt that anything of major significance has been overlooked, but complete coverage cannot be claimed; besides, the limits of this type of compilation cannot be precisely drawn.

Part III contains the indices that serve as key to the material presented in Part I and II. The Systematic Index gives a synopsis of the Analytical Index and draws attention to useful entries that might be overlooked. The Analytical Index is quite detailed. Every topic that appears in a title, notice, or table of contents (but not under reviews) has been indexed, with extremely few exceptions (*minima non curat praetor*). In addition, many books and articles of importance have been indexed from the original, including major works by Alquié, Bouillier, Gilson, Gouhier, Gueroult, Norman Kemp Smith, Thijssen-Schoute and others." (pp. (IX-X)

2. Chappell, Vere, and Doney, Willis, eds. 1987. *Twenty-Five Years of Descartes Scholarship, 1960-1984. A Bibliography*. New York: Garland.

   Contents: Introduction VI; Sources XI; Abbreviations XIII; Twenty-Five Years of Descartes Scholarship; Appendix:

Editions and Translations of Descartes's Own Writings 163; Index 175-183.

"Scholarly interest in the work of René Descartes has burgeoned in the last twenty-five years. Much of the resulting literature has been produced by philosophers, who have approached Descartes not only as historians concerned to understand and interpret the Cartesian texts, but also as metaphysicians and epistemologists preoccupied with the same problems that confronted Descartes. But Descartes was not just a philosopher in the restricted twentieth-century sense of the word. He also made important contributions to the sciences—mathematics, physics, and biology. And his writings have influenced dramatists, poets, and novelists. Thus Cartesian studies have been pursued by recent historians of science and literary scholars as well as by philosophers.

Our aim in this bibliography has been to document the entire scholarly literature on Descartes, from 1960 through 1984, in most of the languages in which it has been produced and in all of the fields in which Descartes is currently a subject of interest. We took 1960 as our starting point because that is the last year covered by Gregor Sebba in his monumental *Bibliographia Cartesiana*. Our reason for stopping with 1984 is simply that we had collected enough items by then to fill a sizeable volume.

The items we have included are written in Danish, Dutch, English, French, German, Italian, Norwegian, Portuguese, Spanish, and Swedish. We have listed a few items in other languages in cases where a published translation into one of the above-mentioned languages exists. In the course of our investigations, we found references to a number of works on Descartes in Polish, Russian, and Japanese; to a few in other Slavic languages; and to one or two each in Hungarian, Romanian, Greek, Hebrew, and Arabic. We have also been told of some recent studies in Chinese. Since we lacked the resources to verify these references, however, we have left them out of our list." (p. VI)

(...)

"It is interesting to note that, during our period, more items of Cartesian scholarship were published in English than in any other language. Of the 2,502 entries in our main list, 1,141 or 46% are in English. The next most prevalent language is French, with 747 entries (29%). Then come German, Italian, and Spanish, with 215, 214, and 116 (9%, 9%, and 4%), respectively.

The work of Descartes had a strong impact on the philosophers, scientists, and writers who succeeded him. A good deal of Cartesian scholarship deals with these later “Cartesians” as well as, or instead of, with Descartes himself. It is impossible to draw a clear line between studies which are primarily devoted to Descartes himself and those in which the primary emphasis is on some other Cartesian thinker or thinkers. But we have sought to include everything that might reasonably be thought to belong in the former category; and we have deliberately excluded some items that we judged to fall in the latter. We have not in any case made a systematic survey of works in which Cartesian writers other than Descartes himself are the main object of concern." (p. VII)

3. Van Otegem, Matthijs. 2002. *A Bibliography of the Works of Descartes (1637-1704)*. Utrecht: Zeno institut for Philosophy.

   Two volumes.

   "With this thesis a complete bibliography has become available of all works of Descartes published in the seventeenth century, regardless the country or the language the book was published in. Most of the texts are not preserved in manuscript so there was a strong need of a bibliography of the printed works. Half of the seventeenth-century editions of Descartes were published in the Netherlands. Descartes spent most of his philosophical career in the Low Countries and in this period Dutch printers controlled the larger part of the European book trade. Naturally, many of Descartes’ works were published in France as well, but also editions were printed in England, Italy and Germany.

   In this bibliography not only editions are described as such but also features of individual copies are recorded. By making

detailed descriptions of the copies textual differences are discovered in the texts preserved, which is of interest to the study of Descartes' philosophy. Van Otegem not only visited Dutch libraries, but also libraries in England, France, Germany and Italy. Each text of Descartes' published separately is described in its own chapter, in which all editions are listed and their mutual relationships are determined. Each chapter starts with an introduction dealing with the historical context.

The results of this research are threefold. Firstly, the bibliography offers a complete survey of all editions of Descartes published in the seventeenth century. 15 previously unknown editions were found; 14 published in Latin and 1 in French. Secondly, the historical context is stressed in which all editions came about. New facts are unveiled about the involvement of Descartes and others in the printing of his works and about Descartes efforts to stimulate the reception of his works by distributing presentation copies. Finally, many variants are found between the collated copies, not only offering insight in the printing practices in the seventeenth century but also providing new leads for the study of the texts themselves. It has become clear that new scholarly editions are needed of some of Descartes' works." (From the Summary of the dissertation)

Theory and History of Ontology

Raul Corazzon || e-mail: rc@ontology

Choix Bibliographique des études en Français sur la philosophie de René Descartes

Introduction

Après une section introductive, cette bibliographie est divisée en deux parties: la première suit la chronologie des œuvres de Descartes, la deuxième un ordre thématique :

- Études d'ensemble sur la philosophie de Descartes ;

Première partie :

- 1616-1619: Premiers écrits : *Licence end Droit*, *Compendium musicae*, *Extraits de Baillet* ;
- 1620-1628: *Regulae ad directionem ingenii* : La recherche de la *mathesis universalis* ;
- 1629-1636: *Le Monde*, *L'Homme* et autres écrits biologiques, *La Recherche de la Vérité* ;
- 1637: *Discours de la méthode* ; le *cogito* ;
- 1637-1639: *Essais de cette méthode* et autres écrits scientifiques ;
- 1640-1643: *Meditationes de prima philosophia* ;
- 1644-1648: *Principia philosophiae* et écrits polémiques ;
- 1649-1650: *Les passions de l'âme* ; derniers écrits.

Deuxième partie :

- La défi su scepticisme ;
- L'argument ontologique ;
- La notion de substance ;
- La vérité ;
- La généalogie du sujet moderne.

Bibliographie

Études d'ensemble sur la philosophie de Descartes

1. *Descartes. Cahiers de Royaumont*. 1957. Paris: Les Éditions de Minuit.

   Reprint New York: Garland 1987.

   Table des matières: Introduction de MM. Gueroult et Gouhier 7; F. Alquié: Expérience ontologique et déduction systématique dans la constitution de la métaphysique de Descartes 10; Discussion: MM. Gueroult, Alquié, Leslie, Beck, Mme Prenant, Mlle Hersch, MM. Jean Wahl, Brandestein, Goldschmidt et Goldmann 32; Fin de la discussion générale portant sur le cogito: MM. Jean Wahl, Alquié, Gueroult, MMmes Rodis-Lewis, Prenant et M. Gouhier 58; H. Gouhier: L'ordre des raisons selon Descartes 72; Discussion: MM. Gueroult, Gouhier, Mme Prenant, MM. Perelman, Leslie Beck, Alquié, Hyppolite, Lefebvre, Boehm et Mlle Hersch 88; M. Gueroult: La vérité de la science et la vérité de la chose dans les preuves de l'existence de Dieu 108; Discussion: MM. Gouhier, Gueroult, Hyppolite, Jean Wahl, Vuillemin, Mmes Prenant et Rodis-Lewis, MM. Alquié, Mesnard et Goldmann 121; E. W. Beth: Le savoir déductif dans la pensée cartésienne 141; Discussion: MM. Perelman, Beth, Leslie Beck, Mme Prenant, M. Gueroult 154; J. Hyppolite: Du sens de la géométrie de Descartes dans son œuvre 121; Discussion: MM. Perelman, Beth, Leslie Beck, Mme Prenant, M. Gueroult 154; Discussion: MM. Lenoble, Hyppolite, Beaufret, Gouhier, Gueroult, Mme Prenant, M. Lefebvre 178; 492; Mlle G. Dreyfus: Physique et Géométrie chez

Descaries et chez Malebranche 187; Discussion: M. Perelman, Mlle Dreyfus, MM. Beaufret et Lenoble 200; G. Rodis-Lewis: Maîtrise des Passions et Sagesse chez Descartes 208; Discussion: M. Mesnard, Mme Rodis-Lewis, M. Guéroult 228; H. Lefebvre: De la morale provisoire à la générosité 237; Discussion : MM. Béra, Goldmann, Lefebvre, Dreyfus, Alquié, Mlle Dreyfus, M. Mesnard, Mlle Hersch, MMmes Rodis-Lewis et Prenant 257; Th. Spoerri: La puissance métaphorique de Descartes 273; Discussion: MM. Perelman, Spoerri, Lefebvre, Goldmann, Gueroult, Béra, Morel, Beth, Zeraffa, Amrouche, Mlle Dreyfus, M. Alquié, Mlle Hersch, M. Boehm 288; R. Lenoble : Liberté cartésienne ou liberté sartrienne 302; Discussion: Mme Rodis-Lewis, M. Lenoble, Mme Prenant, Mlle Dreyfus, MM. Alquié, Gueroult, MM. Vuillemin, Mesnard, Perelman, Jean Wahl 325; P. Mesnard: L'arbre de la sagesse 336; Discussion: MM. Lenoble, Gueroult, Beth, Mesnard, Lefebvre, Perelman, Alquié, Mme Rodis-Lewis, M. Goldmann 350; J. Wahl: Exemple d'une régie inconnue: le verbe « être » chez Descaries; *Deuxième, Troisième et Quatrième Méditations* 360; A. Banfi : Galilée, Descartes et Vico 376; L. Beck: L'unité de la pensée et de la méthode 393; L. Prenant: Rôle et limite de la psychologie dans la méthode et la philosophie de Descartes 412; M. Roland-Manuel: Descartes et le Problème de l'expression musicale 438; Discussion générale: MM. Perelman, Spoerri, Alquié, Gueroult, Lefebvre, Goldmann, Mesnard, Collé, Hyppolite, Mlle Antonelli, MM. Gouhier et Jean Wahl 443; (Nous regrettons de ne pouvoir donner ici l'exposé de M. Castelli, ni la discussion qui a suivi, la transcription des textes ayant été rendue impossible par suite d'incidents techniques.).

2. *Descartes et son œuvre aujourd'hui*. 1998. Bruxelles: Pierre Mardaga.

   Table des matières: Bernard Bru et Michel Schreiber: Préface 5; Jean Frézal: Introduction 11; Chapitre 1. Geneviève Rodis-Lewis: Descartes à la recherche de la vérité 17; Chapitre 2. Annie Bitbol-Hespériès: Descartes, Harvey et la tradition médicale 29; Chapitre 3. Enrico Giusti: La révolution cartésienne en géométrie 47; Chapitre 4. Olivier Houdé:

L’esprit, le cerveau et le corps. Descartes face aux sciences cognitives 63; Chapitre 5. Jacques Bouveresse: La mécanique, la physiologie et l’âme 83-120.

    Avec une préface de Jean Dagen.

En deux sections. La première, traduite de l'italien par Martin Rueff, constitue la version augmentée du livre *Immagini di Descartes nell'*Encyclopédie; la seconde et les scolies sont complètement nouvelles. Martin Rueff a tout révisé en collaboration avec l'auteur.

21. ———. 2015. *Descartes. La règle de la raison*. Paris: Vrin.

22. Suoual, Philippe, and Veto, Miklos, eds. 1997. *Chemins de Descartes. Colloque de Poitiers*. Paris: L'Harmattan.

    Table des matières: Mikios Vetö: Introduction 7; G. Rodis-Lewis: Descartes, l'homme et le développement de la pensée 13; A. Tranoy: René Descartes, étudiant à Poitiers 33; M. Kobayashi: Réception et critique de Descartes au Japon - Le cas de Kitarô Nishida 41; D. Garber: Descartes et la physique métaphysique 57; J.-L. Marion: Notes sur les modalités de l'ego 81; D. Kambouchner: Descartes et la perfection de la morale 95; J.-M. Beyssade: Descartes politique? 119; Index 139.

    "Ce volume reproduit le plus souvent les communications, en leur laissant dans leur style oral, comme elles ont été prononcées. Ces textes eux-mêmes sont très différents selon la taille et la conception. Ils vont de la courte note sur *René Descartes, étudiant poitevin* jusqu'à des études relativement longues sur la morale ou sur la fondation métaphysique de la physique. Quant à l'apparat d'érudition, *Descartes politique* est une méditation décantée, allégée quasiment de toute référence savante tandis que les *Notes sur les Modalités de l'ego* se livrent à une permanente analyse textuelle. Finalement, quant à l'ordre selon lequel les sept articles se suivent, il ne reproduit pas celui de leur succession effective lors du colloque. Nous avons modifié cet ordre et ce fut d'ailleurs l'unique changement que nous nous sommes permis d'effectuer dans la présentation de ce recueil." (p. 8)

    "De tous les élèves de ce collège, René Descartes est le plus célèbre: tentons de préciser comment ces années studieuses ont contribué à orienter sa pensée. Le collège de La Flèche fut ouvert par les Jésuites au début de 1604: Henri IV leur avait donné à cette intention le « Châteauneuf » qui venait de sa grand-mère et où lui-même avait fait plusieurs séjours.

    (...)

    Contre les erreurs de Baillet et d'Adam (au T. XII des *Œuvres Complètes*, non réimprimé) nous avons bien établi (en faisant vérifier dans les archives des jésuites que le P. Charlet est arrivé à La Flèche seulement en octobre 1606) son entrée à Pâques 1607: à cause de sa santé fragile « on avait attendu la fin de l'hiver et du carême », mais Charles Adam avait d'abord suivi Baillet qui croyait que René avait ainsi suivi de peu son aîné Pierre, entré dès l'ouverture du collège au début de 1604.

    Puis dans les additions et corrections, voyant enfin que les dates de Baillet sont contestables, pourquoi Adam retient-il Pâques 1606 à 1614 après avoir mentionné entre parenthèses « (sinon peut-être de Pâques 1607 à 1615) » sans jamais réexaminer ce dernier point ?

    Il pouvait savoir par Sommervogel que Charlet avait encore prêché à Paris en 1606, probablement pendant le carême, ce qui exclut qu'il ait pu être à La Flèche pour Pâques. Adam savait aussi (c'est dans une note sans commentaire) que Pierre Descartes, sorti en 1612, avait passé la même semaine à Poitiers en 1613, baccalauréat et licence en droit; il ne se demandait pas alors pourquoi René ne l'y aurait pas suivi; et pour ce dernier, il sait (ce qu'ignorait Baillet) qu'il a passé ces deux examens la même semaine en novembre 1616. Si, comme il le suppose, le jeune homme est resté deux ans à Poitiers, n'aurait-il pas

acquis séparément ces deux grades en 1615 et 1616 ? Adam suggère que durant ces deux années, Descartes aurait pu commencer à étudier la médecine, alors qu'on n'a aucun signe d'intérêt pour cette discipline avant qu'à la fin de I629 où il commence à étudier l'anatomie, pour construire la science des vivants. Quand il rencontre Beeckman à l'automne de 1618, celui-ci vient d'être reu Docteur en médecine (à Caen): il n'en est jamais question entre eux... Tout concorde donc pour ne plus remettre en question ces dates.

Ainsi, les trois dernières années étant consacrées, selon l'usage, à la philosophie, les élèves ont eu pour professeur le Père Étienne Noël auquel Descartes envoie dès le 14 juin 1637 le *Discours de la méthode*, avec une lettre personnelle qui le remercie de son enseignement: il lui offre ce « fruit (...) duquel vous avez jeté les premières semences en mon esprit, comme je dois aussi à ceux de votre Ordre tout le peu de connaissance que j'ai des bonnes lettres » (I, 823). Quand ils anticipaient de trois ans sa scolarité, et parce que le nom de Noël, alors recteur de La Flèche, convenait bien au destinataire que l'auteur priait de faire lire ce livre par ceux « qui en avaient le plus de loisir », Adam et Tannery supposaient que Descartes aurait connu Noël comme simple « répétiteur » (en se trompant d'ailleurs sur celui qui aurait enseigné la philosophie en 1609-1612). Une seconde lettre en octobre le remercie de son « souvenir » et de son « affection ». Quand il reporte enfin à 1611-1614 ces trois dernières années à La Flèche, Adam (dans l'édition Adam et Milhaud de la *Correspondance*, avec traduction des lettres latines, revient à l'enseignant qui précédait Noël, le Père Fournet (repris également par F. Alquié). Mais cela fait double emploi avec l'exemplaire que Descartes lui avait fait remettre par Plemp (Plemp à Descartes, 15 septembre 1637; I, 399) sans avoir eu les mêmes relations personnelles qu'avec son propre professeur, Descartes l'avait connu lors des discussions mensuelles qui réunissaient les élèves des trois classes de philosophie (1)." (p. 27-29)

    Seconde édition, revue et augmentée (première édition 2002).

    English Summary: "Descartes, the awakening of a mathematician.

    This paper is devoted to the young Descartes and to the development of his mathematical thought from 1618 to 1629, since the meeting with Beeckman until his departure towards Holland. His period of dreaming, that has been crucial in the development of his personality, is also evoked. One can distinguish various steps in the progressive maturation of the

mathematical thought of Descartes in these earlier Cartesian mathematics, previous to the *Géométrie*. The mathematical features of some Cartesian texts of the time are examined: "the" letter to Beeckman and the *Cogitationes Privatae,* then the Rules for the direction of the mind (*Regulae*), and finally the discovery of the *construction of the solutions* of equations of the third and fourth degree, which as been conclusive for the "awakening" of Descartes as a mathematician. A figure of thought, the so-called "medium term" which is central in young Descartes, as well as three of his mathematical embodiments, proportional means, Cartesian compasses, and "ruler-and-slide", are especially highlited. The following papers III, IV, V), dealing with three Cartesian discoveries and using modern mathematic symbolism, complete this paper." (p. 43)

    "Lorsque je parle ici de Descartes « l'homme », je m'emploierai à approcher sa personne, et non à l'étudier dans le sens de son ouvrage intitulé « L'Homme ». C'est à partir de la biographie que j'ai publiée fin 1995 que je voudrais présenter, de faon beaucoup plus simple que les très belles méditations que vous venez d'écouter, quelques problèmes pour lesquels je présente des hypothèses, (en soulignant que ce ne sont que des hypothèses, ou assez exceptionnellement des rectifications d'erreurs trop souvent répétées par des gens éminents), et ceci malgré certaines corrections de la grande *Vie de Descartes* par Baillet: elle reste irremplaable par les documents qui ont depuis disparu et qu'il nous a transmis; mais il n'a pas assez distingué ce qui est sûr et ce qui est contestable ou même faux." 30. Vannier, Marie-Anne. 1997. "Les anticipations du cogito chez S. Augustin." *Revista Agustiniana* no. 115-116:665-679.

    "Descartes devait connaître les textes où Augustin esquisse les linéaments du Cogito; de manière paradoxale, il a mieux saisi le dynamisme de la pensée d'Augustin que les augustiniens du XVIIe siècle. Descartes a radicalement montré que la pensée est la certitude première et qu'elle implique l'existence. Il a distingué nettement substance pensante et substance étendue et surtout, il a fait du Cogito la clef de voûte, le principe de son système, alors que celui-ci contribuait surtout chez Augustin à l'avènement du sujet en dialogue avec son créateur. Cependant, Augustin reste à l'origine de l'idée de constitution du sujet."

1637-1639: *Essais de cette méthode* et autres écrits scientifiques

1. Allard, Jean-Louis. 1963. *Le Mathématisme de Descartes*. Ottawa: Éditions de l'Université d'Ottawa.

    Table des matières: Avant-propos 7; Introduction. Chapitre I: L'évolution intellectuelle de Descartes : des mathématiques au mathématisme 11; Première partie. Le mathèmatisme méthodologique: La méthode universelle de caractère mathématique. Chapitre II: Conception mathématique de la connaissance scientifique 35; Chapitre III: La méthode de la

science. L'essence de la méthode : l'ordre 65; Deuxième partie: La science universelle de type mathématique: La preuve et l'épreuve de la méthode de Descartes. Chapitre IV: La métaphysique, fondement de la science 91; Chapitre V: Les mathématiques, domaine privilégié de la méthode 141; Chapitre VI: La physique géométrique, épreuve décisive de la méthode cartésienne 163; Conclusion. Chapitre VII: La source première de l'échec de la philosophie de Descartes 201-222.

"Nous nous proposons tout simplement d'offrir au lecteur une synthèse des éléments essentiels du *Mathématisme de Descartes*, c'est-à-dire de la tentative cartésienne de construire une science universelle de caractère mathématique à partir d'une méthode qui se présente comme une généralisation de la méthode mathématique (2).

(...)

Afin de mieux situer le mathématisme cartésien, notre étude sera précédée d'une brève esquisse de la vie intellectuelle de Descartes : 1° son évolution intellectuelle à partir du premier « enchantement de son esprit » lorsqu'il apprenait les mathématiques au Collège de La Flèche jusqu'à l'envoûtement qui s'exprime dans le songe où Descartes prend conscience de sa vocation, à savoir la réalisation d'une science universelle de caractère mathématique pour le bien de l'humanité; 2° les grandes étapes parcourues par Descartes dans la réalisation de ce projet.

L'étude historique sera suivie d'une critique de structure et d'un jugement de valeur qui signaleront les difficultés congénitales du mathématisme cartésien.

Vu l'ampleur d'une telle étude, nous avons dû nous limiter à l'essentiel et passer sous silence plusieurs problèmes importants. Nous avons conscience aussi du caractère quelque peu schématique inhérent à toute synthèse. Nous savons de plus que la pensée de Descartes contient des richesses et des virtualités qui dépassent les cadres du système cartésien comme tel; il n'était pas dans notre propos d'en faire l'inventaire. Seul le mathématisme cartésien, la philosophie de

Descartes considérée comme système, a fait l'objet de notre étude et de notre critique.

En effet, considérée de ce point de vue, la philosophie cartésienne « universellement baignée d'une clarté mathématique (6) » est le premier exemple — et peut-être le plus évident — dans l'histoire de la pensée moderne, de l'insuffisance d'une philosophie qui tente arbitrairement de réduire la pensée humaine à l'une ou l'autre de ses dimensions." (pp. 7-8)

(2) Dans le cinquième chapitre de son ouvrage *The Unity of Philosophical Experience* (New-York, Scribner, 1952, p. 125-151), M. Gilson pose d'une faon précise, quoique succincte, le problème du mathématisme de Descartes. C'est dans le même esprit que celui de cet éminent historien de la philosophie, que nous voulons poursuivre le présent travail.

41. ———. 2000. "Dieu trompeur et malin génie." In *Genèse de la raison classique de Charron à Descartes*, 291-347. Paris: Presses Universitaires de France.

    Préface de Jean-Robert Armogathe, traduction de l'italien par Marilène Raiola.

    “Ne concerne directement le cartésianisme que le célèbre article « Dieu trompeur et malin génie » [Chapitre X]. En se référant à des thèses développées par Gabriel Biel et Grégoire de Rimini (mentionnées par Mersenne, AT VII, 125, elles sont aujourd’hui rendues accessibles en Français dans Olivier

Boulnois (éd.), *La Puissance et son Ombre. De Pierre Lombard à Luther*, Paris, Aubier, 1994), l'Auteur donne un contenu précis à la *vetus opinio* mentionnée dans la *Meditatio Ia*: *Deum esse qui potest omnia*. Ceci permet de repenser à nouveaux frais le rapport entre Dieu trompeur et malin génie, et montre s'il le fallait encore qu'une connaissance précise des traditions médiévales est indispensable à la bonne intelligence de l'*ordo rationum*." (Edouard Mehl, Bulletin Cartésien, XXXI).

    "Il ne faut ni surestimer, ni sous-estimer l'importance de la réflexion menée par Mersenne pour élaborer une définition vraiment cohérente du concept de métaphysique. Ne pas la surestimer : Mersenne, nous le verrons, reprend pour l'essentiel des positions traditionnelles, issues de la scolastique thomiste par l'intermédiaire de Suárez, le plus souvent comme des évidences mentionnées sans aucune source ni discussion, tant elles paraissent aller de soi. D'ailleurs ces positions n'ont rien d'original, si l'on les compare, ne fût-ce que rapidement, à celles d'autres contemporains, surtout parmi les *minores*. Mais c'est paradoxalement pour ces mêmes raisons qu'il ne faut pas sous-estimer la contribution de Mersenne. Au double titre d'ancien élève de La Flèche et de correspondant principal, voire presque unique durant les premières années, de Descartes, il apparaît un témoin privilégié pour mesurer à sa juste dimension l'originalité en progrès de l'auteur des *Meditationes*. En offrant un état de la question d'une définition du concept de métaphysique, Mersenne permet d'abord une description équilibrée de l'opinion philosophique dominante au début du siècle et, ensuite, par ses hésitations et ses contradictions, un diagnostic sur la difficulté du problème ainsi désigné. Car il faut bien reconnaître ici une réelle aporie, qui rend seule intelligible l'originalité de la solution cartésienne."

    "Descartes présente la doctrine de la 'fausseté matérielle' des idées dans sa *Troisième Méditation* (TM). Dans ses quatrièmes objections Arnauld critiquera cette doctrine, qui va disparaître dans les ouvrages de Descartes. Les interprétations récentes se sont concentrées sur le problème de la cohérence de la théorie et de la compatibilité entre la formulation de la TM et celle des réponses aux objections. Cet article reprend ce sujet à la lumière de la discussion scolastique de la vérité et de la fausseté. La doctrine de Descartes, telle qu'elle est présentée dans la TM, manifeste, sous plusieurs aspects, son incompatibilité avec la formulation des réponses à Arnauld. Ce qui amène à conclure dans le sens d'une incompatibilité des deux formulations de la 'fausseté matérielle'. Et pourtant, il paraît insoutenable qu'il faille rechercher la raison du changement de Descartes dans la force des objections elles-mêmes, étant donné que le cadre conceptuel de la doctrine scolastique de la représentation, dont les objections d'Arnauld s'inspirent, fournissait à Descartes les moyens de défendre sa propre doctrine sans la modifier. D'où l'hypothèse qu'il faut rechercher les raisons de ce changement ailleurs, et notamment dans la volonté de Descartes d'éviter les dangereuses conséquences pour la fondation de la science impliquées dans la formulation de la doctrine de la fausseté matérielle telle qu'elle paraissait dans le texte de la TM."

   "Descartes's view of modality is analyzed by contrast to two earlier models: the ancient realist one, defended by Boethius, where possibility and necessity are connected to natural potency, and the modern intensionalist one, which dissociates necessary and possible truths from any ontological foundation, treating them as conceptual, a priori given preconditions for any intellect. The emergence of this view is traced from Gilbert of Poitiers to Duns Scotus, Ockham and Suarez. The Cartesian theory of the creation of eternal truths, it is argued, involves a rejection of this idea of absolute conceivability and can be seen as a constructivist view of intelligibility and rationality."

5. ———. 1992. "Descartes and the Tree of Knowledge." *Synthese* no. 92:101-116.

   "Descartes' image of the tree of knowledge from the preface to the French edition of the *Principles of Philosophy* is usually taken to represent Descartes' break with the past and with the fragmentation of knowledge of the schools. But if Descartes' tree of knowledge is analyzed in its proper context, another interpretation emerges. A series of contrasts with other classifications of knowledge from the seventeenth and eighteenth centuries raises some puzzles: claims of originality and radical break from the past do not seem warranted. Further contrasts with Descartes' unpublished writings and with school doctrines lead to the ironic conclusion that, in the famous passage, Descartes is attempting to appeal to conventional wisdom and trying to avoid sounding novel."

Moderns in Quest for the Unity of Knowledge, edited by Alexandrescu, Vlad, 95-115. Bucarest: Zeta Books.

Abstract: "I discuss the various principles of individuation promulgated by G. W. Leibniz, in his 1663 bachelor's thesis at Leipzig, *Disputatio Metaphysica de Principio Individui,* in his early treatise on transubstantiation, and in his mature work (*Nouveaux Essais*, etc.). I compare these treatments with René Descartes' principle of individuation for ensouled creatures, from the *Letters to Mesland* on transubstantiation, and with the theses of various late scholastics (those of Scipion Dupleix, Antoine Goudin, René de Ceriziers, and Théophraste Bouju, among others). I conclude that whatever might have appeared novel in the proposals of Descartes and Leibniz for the principle of individuation were also traditional options; in this respect, the difference between early modern and medieval philosophy does not seem to have been philosophical at bottom."

12. ———. 2010. "Descartes and Humanism: Historical Method, Anti-Syllogism, and (Neo) Stoic Ethics in the *Discourse On Method*." *Revue Roumaine de Philosophie* no. 54:163-174.

    "I discuss René Descartes' relation to some key characteristics of Renaissance Humanism, from the espousal of an historical method to the rejection of scholastic or Aristotelian logic, to the revival of Stoic ethics. Basically, this discussion corresponds with topics treated by Descartes in the first half (or first three parts) of his *Discourse on Method*. I conclude that, in all three cases, Descartes' adoption of Humanistic method is only partial. He flirts with humanistic views in his battles against scholasticism, but does not adopt them fully. "

20. Ashworth, Earline Jennifer. 1972. "Descartes' Theory of Clear and Distinct Ideas." In *Cartesian Studies*, edited by Butler, Ronald Joseph, 89-105. Oxford: Basil Blackwell.

    "It is widely agreed that Descartes took ideas to be the objects of knowledge and that his theory of clear and distinct ideas arose from his attempt to find a way of picking out those ideas whose truth was so certain and self-evident that the thinker could be said to know them with certainty. To say of an idea that it is clear and distinct was, he believed, to say of it both that it was certainly true and that any claim to know it was justified. No other criterion need be appealed to. It is at this point, however, that most of those who set out to expound Descartes' theory of knowledge are brought to a standstill. The part played by clear ideas is obvious enough, but what did Descartes mean by `clear and distinct'? This paper is an attempt, not to make an original contribution to the study of Descartes, but to elucidate his terms and evaluate his criterion in the light of what both he and others have written." (p. 89)

    (...)

"The fact that Descartes adopted the word ‘idea’ is itself significant. When scholastic philosophers discussed human cognition, they spoke of the mind as containing concepts (*species, intentiones*). They claimed that these concepts originated through our sense perceptions, and hence that they stood in some relation to external objects. The term ‘concept’ was contrasted with the term ‘idea’. Ideas were the eternal essences or archetypes contemplated by God, and the question of their external reference did not arise. They were an integral part of God’s mind. God could create instances of one of his ideas, but his idea was in no way dependent upon the existence of such instances. Descartes took the word ‘idea’ and applied it to the contents of the human mind because he wanted to escape the suggestion that these contents must be in some sense dependent on the external world as a causal agent. (9) He wished to establish the logical possibility that a mind and the ideas contained within it are unrelated to other existents, and can be discussed in isolation from them.

Descartes saw the term ‘idea’ as having a very wide extension.

He said “ . . . I take the term idea to stand for whatever the mind directly perceives,”(10) where the verb ‘perceive’ refers to any possible cognitive activity, including sensing, imagining and conceiving.(11) Thus a sense datum, a memory, an image, and a concept can all be called ideas. This, of course, leads to the blurring of distinctions. For Descartes, “I have an idea of red” may mean that I am now sensing something red, or that I have a concept of the colour red, even if I am not now picking out an instance of that concept. Moreover, when Descartes speaks of an idea, he may be taking it as representative of some object or quality in the physical world, as when he says “I have an idea of the sky and stars,” or he may be referring to the meaning he assigns to a word, as when he says “I have an idea of substance.” Nor does he make any distinction between “having an idea” and “entertaining a proposition.” Such statements as “Nothing comes from nothing” and “The three angles of a triangle are equal to two right angles” are categorized as ‘common notions’,(12) and are included among the contents of the mind. Descartes does remark that in some

cases an idea may be expressed by a name, in other cases by a proposition,(13) but he does not bother to pursue this line of inquiry.

One of the characteristics of an idea is 'objective reality', a scholastic phrase which Descartes adopted, but used in a new way. In scholastic writings the terms 'subjective' and 'objective' have meanings which are the reverse of the modem meanings. An object like a table exists subjectively or as a subject if it has spatio-temporal existence, if it is real or actual. In contrast, the concept of a table can be looked at as having two kinds of existence. The concept *qua* concept has formal existence, but the concept as having some specifiable content is said to have objective existence, or existence as an object of thought. The concepts of a table and of a chair are formally similar but objectively different. So far as subjective realities were concerned, the scholastics assigned them different grades of reality according to their perfection and causal power. For instance, a substance is more perfect and causally more efficacious than an accident, hence a man has a higher grade of reality than the colour red.

It was also held that every effect had a cause with either an equal or a higher grade of reality. These doctrines were not seen as having any relevance to concepts. As formally existent, a concept has of course to have some cause, but the content of the concept was not seen as having any independent reality. Descartes, however, felt that the objective reality could be considered independently of its formal reality, and that it must be graded just as subjective reality was graded. The idea of a man, he felt, has more objective reality than the idea of a colour. Moreover, the cause of the idea containing a certain degree of objective reality must have an equal or greater degree of subjective reality. For instance, the idea of God has so high a degree of objective reality that only God himself is perfect enough to be the cause of such an idea.(14)" (pp. 91-93)

(...)

"Although Descartes struggled to defend his criterion, his struggles ended in an impasse. He had made the mistake of

trying to prove too much. He had wanted to develop an introspective technique by which he could be sure of recognizing those ideas which were objects of certain knowledge; but such an enterprise was doomed from the start. He could only escape from the objection that nothing about an idea can justify us in making judgment about its external reference by entering into an uneasy and unjustifiable alliance with God; and by such an alliance he negated his claim that a single criterion for true and knowable ideas could be found." (p. 105)

21. ———. 1975. "Descartes' Theory of Objective Reality." *New Scholasticism* no. 49:331-340.

"In the *Third Meditation* Descartes, who is at the beginning sure only of his own existence, presents a complex proof for the existence of God which is based on the fact that he finds within himself an idea of God. I intend to ignore the supplementary proof which deals with the conservation of his existence, and to focus on his discussion of the properties of ideas, for it is here that Descartes is most difficult to comprehend yet most vulnerable to criticism. With the exception of Gassendi's remarks in the *fifth objection*, I shall concentrate upon what Descartes himself had to say, for a thorough survey of all the secondary sources often serves only to obscure the main issue." (p. 331)

(...)

"Descartes reinforced his arguments with various claims about the nature of predicates and the way in which we come to understand them. He thought, mistakenly, that one could not only distinguish between negative and positive predicates, but that one could demonstrate the logical priority of such positive predicates as 'infinite' or 'perfect' by showing that one can only understand the finite or imperfect in the light of a prior acquaintance with the infinite or perfect. (29) However, although he seems now to be talking about epistemology rather than ontology, it turns out that his claims rest upon the same assumptions about the content and causation of ideas as are involved in the main proof, so they do not need to be discussed further.

However liberal one is in granting Descartes his desired premises, I think it is fair to conclude that his arguments do not prove what they purport to prove. This seems to be a strong indication that one will lose nothing by being illiberal from the very beginning." (p. 340)

22. ———. 1998. "Antonius Rubius on Objective Being and Analogy: One of the Routes from Early Fourteenth-Century Discussions to Descartes's *Third Meditation*." In *Meetings of the Minds. The Relation between Medieval and Classical Modern European Philosophy*, edited by Brown, Stephen F., 43-62. Turnhout: Brepols.

"In this paper I shall use Rubius's tract on analogy to show how a rich medieval tradition survived into the seventeenth century and to shed some light on the problem of Descartes's sources for the notion of an idea's objective reality. I shall proceed as follows. First, I shall state the problem as it has been set out in recent secondary literature. Second, I shall trace the distinction between formal and objective concepts from the early fourteenth century to the early seventeenth century in the context of the discussion of analogical terms. Third, I shall examine the analogical use of terms as it was presented by Rubius. Fourth, I shall explain why a theory of language use

and a theory of concepts carne to be linked together. Finally, I shall discuss what Rubius had to say about formal and objective concepts, and I shall suggest a relationship between this account and Descartes's own attitude towards mental contents and simple natures."

24. ———. 2009. "The Hyperbolic Way to the Truth from Balzac to Descartes: "Toute Hyperbole tend là, de Nous Amener à la Vérité par l'excès de la Vérité, c'est-à-dire par le Mensonge" " In *Skepticism in the Modern Age: Building on the Work of Richard Popkin*, edited by Maia Neto, José Raimundo; Paganini, Gianni; Lursen, John Christian, 269-294. Leiden: Brill.

    "The Latin word “hyperbole” comes from the Greek verb υπερ-βάλλω, a composite form of hypér (behind) and bállein (throw, throw further, behind and therefore to go further).

    The goal of the essay is to clarify the use and the meaning of this concept in the XVIIth century especially considering the figures of René Descartes (1596-1650) and one of his most famous correspondents, the French writer Louis Guez de Balzac (1597-1654). The essay is divided into four parties. In the first one, it focuses on the relationships between Descartes and Balzac and their intellectual formation. In the second part, some relevant examples of definitions given in the XVIIth century of geometrical and rhetorical hyperboles are proposed. The third part of the essay is devoted to the transformation of the figure of the hyperboles achieved by Guez de Balzac. In the fourth part of the essay is analysed the uses of the hyperboles in Descartes; a particular attention is here devoted to the texts of the Third and Fourth Replies to Hobbes and Arnauld, in connection to the final part of the Sixth Meditation."

    "The article discusses the decline of Aristotelian physics at the University of Paris in the seventeenth and early eighteenth centuries. A course of physics remained essentially Aristotelian until the final decade of the seventeenth century, when it came under the influence of Descartes. But the history of physics teaching over this period cannot be properly appreciated if it is simply seen in terms of the replacement of one physical philosophy by another. Long before the 1690s, the traditional Aristotelianism of the Schools had been forced to come to terms with the New Science to some degree, while the Cartesianism of the early eighteenth century was always alive to the challenges to Descartes's particular physical theories. Except in the early seventeenth century the physics course at Paris was always in a state of change. The replacement of Aristotelian by Cartesian physics too involved the development of a novel epistemology.

Although both Aristotelian and Cartesian professors believed that natural philosophy was a science of causes based upon a priori principles, the latter had a far more probabilist conception of physics."

Seventeenth-Century Thinkers on Demonstrative Knowledge from First Principles*, edited by Sorell, Tom, Rogers, G.A.J. and Kraye, Jill, 1-17. Dordrecht: Springer.

    "Something very important happened in our knowledge of the physical world in the seventeenth century. A number of very smart people made discoveries about the natural world that fundamentally changed our way of looking at things. But as important as the individual accomplishments of individual seventeenth-century scientists were, an important part of the story lies in the disciplinary and institutional history of that important century. What was new and important was not only Copernicus and Kepler, Descartes and Galileo, Leibniz and Newton, but the changes that happened in the larger framework in which they work. In particular, I think that there was a major change in what might be called the disciplinary geography, the way in which the disciplines that deal with our knowledge of the natural world changed in their relations with respect to one another. This involves not only intellectual changes, but, perhaps as importantly, changes in the institutions that involve the investigation of nature and the dissemination of new knowledge and points of view.

    The story is very big and very complex, and I cannot hope to tell it all in a single article. But in this short essay I would like to give a bare outline of what the whole story might look like. I will begin with an overview the state of the disciplines that are concerned with the natural world ca. 1600. I will then trace through the way in which the disciplinary geography changes over the course of the century."

"Contemporary discussions on the literary format of Descartes's Meditations typically focus on two issues. The first is whether Descartes's text resembles and is possibly influenced by the genre of religious devotional exercises, and the second is whether the stylistic devices employed by Descartes are philosophically significant. Building upon the efforts of Gary Hatfield, Bradley Rubidge, and Martial Gueroult, I argue that Descartes is influenced by an Augustinian tradition of spiritual

exercise and that this influence is philosophically important for how we understand the cogito. I examine, in particular, the relevance of Marin Mersenne's recently rediscovered treatise *L'usage de la raison* (1623). This work exhibits features of an Augustinian style of religious meditation, and it is a text that can be easily connected to Descartes."

"The author proposes that the anonymous letter dated May 19, 1641, which Mersenne delivered to Descartes, should be attributed to Thomas Hobbes. Although the text is known, it is usually considered not so much in itself as for Descartes's two replies, which contain important clarifications on the proof of God's existence. Hobbes' hand is revealed by various thematic, conceptual, and lexical analogies and, above all, by the presence of two doctrines characteristic of his thought: 1) the denial of the existence of intellectual ideas; 2) the assertion that the nature of God can only be described by the proposition "God exists". Attribution to Hobbes of the May 19th 1641 letter throws new light on the debate that followed Descartes's Meditations as well as on Mersenne's role."

"Although we now dismiss Kant's suggestion that logic was already essentially a completed science, we ourselves embrace its ghost, the idea that the conception of logical inference with which we are most familiar is just the common conception of our illustrious philosophical ancestors. This ghost works

mischief. It causes us to think whiggishly of the history of logic and so lends respectability to the thought that only since 1879 has there been great logic. More concretely, I shall argue here, the idea that were is and always has been a single dominant conception of valid inference (ours) blinds us to part of Descartes's project. By setting that project against its medieval background I hope to revive our sense of both its strangeness and its possibilities."

106. ———. 2011. "The Quarrel over Ancient and Modern Scepticism: Some Reflections on Descartes and His Context." *Revista Estudos Hum(e)anos* no. 2:32-50.

    Abstract. "Like every original and fruitful research programme, that of Richard Popkin has inspired other interpretations that ended up by appearing as rivals to the History of Skepticism. It is certainly not by chance that only after Popkin had rediscovered the importance played by the rebirth of skepticism, an intense debate rose about the differences, the values and the possible superiority of the moderns over the ancients concerning the extent of doubt: a kind of a *querelle des anciens et des modernes* in order to establish whether and how the former or the latter outdid each other in coherence and radicality. One could object that this dispute has already been articulated in our modern philosophical archetypes, going back at least to Hegel and his critic Kierkegaard: the first, as is well known, supported the ancients, claiming in his Lectures on the History of Philosophy that Greek skepticism had been much deeper and all- encompassing than Cartesian doubt, whereas the second, starting with Johannes Climacus's pseudoepigraphic work, backed up the moderns, stressing the break between the era of modern and the astonishment or

immediacy typical of the Greeks. *De omnibus dubitandum est*: by this Cartesian quote Kierkegaard characterized the modern age whose novelty could be summarized for him in three sentences: “1) Philosophy starts in doubt; 2) Doubt is required in order to practice philosophy: 3) Modern philosophy begins in doubt”."

    "Descartes famously claimed that a human soul is a single substance without any parts. But he also affirmed that the soul has two faculties, namely intellect and will, which act as ‘two concurrent causes’. This looks quite puzzling. How can there be two causes in a single and indivisible substance? What is their ontological status? And how do they act? This chapter discusses these questions, paying particular attention to Descartes' scholastic background. It argues that there was no unified scholastic doctrine. Descartes rejected Suárez's theory, which took faculties to be really distinct parts and inner agents of the soul, while defending Ockham's theory, which considered them to be mere ways of acting of a single soul. The two explanatory models gave rise to different accounts of the unity of the soul."

    "One of the chief concerns of the young Descartes was with what he, and others, termed "physico-mathematics". This signalled a questioning of the Scholastic Aristotelian view of the mixed mathematical sciences as subordinate to natural philosophy, non explanatory, and merely instrumental. Somehow, the mixed mathematical disciplines were now to become intimately related to natural philosophical issues of matter and cause. That is, they were to become more 'physicalised', more closely intertwined with natural philosophising, regardless of which species of natural philosophy one advocated. A curious, short-lived yet portentous epistemological conceit lay at the core of Descartes' physico-

mathematics—the belief that solid geometrical results in the mixed mathematical sciences literally offered windows into the realm of natural philosophical causation—that in such cases one could literally “see the causes”. Optics took pride of place within Descartes’ physico-mathematics project, because he believed it offered unique possibilities for the successful vision of causes. This paper traces Descartes’ early physico-mathematical program in optics, its origins, pitfalls and its successes, which were crucial in providing Descartes resources for his later work in systematic natural philosophy. It explores how Descartes exploited his discovery of the law of refraction of light—an achievement well within the bounds of traditional mixed mathematical optics—in order to derive—in the manner of physico-mathematics—causal knowledge about light, and indeed insight about the principles of a “dynamics” that would provide the laws of corpuscular motion and tendency to motion in his natural philosophical system."

    "In view of some recent research, (1) the stage would seem to be set to make a beginning with a long-standing suggestion of Professor Gilson to compare Descartes' doctrine on distinctions with that of Francis Suarez. (2) Accordingly, one would expect that the immediate point of departure for such a comparison would be their respective interpretations of the formal distinction of Duns Scotus. This would then introduce the more formal discussion of distinctions in each man. A closing consideration should then be devoted to the doctrine of each on essence and existence since this is the context in which Descartes frames a very important statement of his position on distinctions. In short, then, one should confront Descartes on

Scotus, then on distinctions and finally on essence and existence. The same confrontation should then be made with Suarez." (p. 104)

(...)

"In regard to Descartes, the primary focus will be first on his reply to the objections of Caterus to his *Meditations*; (4) then on his *Principles* (5) and finally on one of Descartes' letters. (6)" (p. 105)

(1) T. J. Cronin, S.J., "Eternal Truths in the Thought of Suarez and of Descartes," *The Modern Schoolman*, XXVIII (1961), 269-288; XXXIX (1961), 23-38. See also his briefer statement "Eternal Truths in the Thought of Descartes and of His Adversary," *Journal of the History of Idea*s, XXI (1960), 553-559. My own article, "Descartes and the Scholastics Briefly Revisited," *The New Scholasticism*, XXXV (1961), 172-190 goes behind Suarez to the Thomistae. Leonhard Gillen, S.J., "Uber die Beziehungen Descartes' zur zeitgenössischen Scholastik," *Scholastik*, XXXII (1957), 41-66. These articles concern Descartes' knowledge of Suarez and Scholasticism. Another article of mine "Suarez, Historian and Critic of the Modal Distinction Between Essential Being and Existential Being," *The New Scholasticis*m, XXXVI (1962), 419-444, contains information on Suarez' ambiguous position in regard to Scotus' formal-modal distinction. This is important for any ultimate comparison with Descartes' attitude on the same question and for his doctrine on distinction in general.

(2) *Index scolastico-cartésien*, (Paris: Alcan, 1913), p. 87, where, in the context of the term, *Distinction*, wherein Descartes has insisted that the formal distinction of Scotus "non differre a modali" and following a text of Suarez on this point in Scotus, Professor Gilson notes: "C'est sans aucun doute à cette interprétation de la distinction formelle de Duns Scot qu'il faut rapporter le texte [AT] IV, 350, 13-16, où Descartes pose trois distinctions: 'Realem, Modalem et Formalem, sivc rationis ratiocinatae,' Si l'on remarque en outre qu'au texte [AT] VII, 120, 15 et 24-25, Descartes réduit comme Suarez cette même distinction formelle à la distinction modale; si l'on

remarque enfin que, parmi toutes les classifications possibles des distinctions. Descartes choisit précisément celle de Suarez, on sera conduit à penser que Suarez peut être considéré comme la source probable de Descartes en ce qui concerne la doctrine des distinctions...".

Christian Wolff's Ontology: Existence as "Complement of Possibility"

Being and Existence

"Let us open Wolff's *Ontology* and read his *Preface*: "Prime Philosophy (namely, metaphysics) was first laden by the Scholastics with enviable praise, but, ever after the success of Cartesian philosophy, it fell into disrepute and has become a laughing stock to all." (10) What Wolff clearly sees then is that, since the time when Descartes "grew weary of metaphysics," there still may have been metaphysicians, but there has been no metaphysics. As a distinct science, metaphysics has simply ceased to be. And Kant himself was only echoing Wolff when he wrote in his *Preface* to the first edition of the *Critique of Pure Reason*: "There was a time when metaphysics used to be called the queen of sciences ... Now, in our own century, it is quite fashionable to show contempt for it." Our own century here is the eighteenth century, which was the century of both Wolff and Kant.

When he made up his mind to put a stop to that technical decadence in the field of philosophy, Wolff was keenly conscious of carrying on the work of the great Scholastics. What they had done was not perfect, but that was the thing to do, and, since it could be done better, Wolff himself was going to do it all over again. Let us be as precise as possible. Wolff did not wish to be reproached with bringing back a Scholastic philosophy that was dead. In point of fact, that was not what he wanted to do. But he was claiming the right to retain at least Scholastic terminology, for all there was to be done

about it was, keeping the same terms, to build up better definitions and more exactly determined propositions. (11)

This is what Wolff set about doing first with the term "being," and it is typical of his attitude that he can reach it only through the notion of possibility. "Being," Wolff says, "is what can exist and, consequently, that with which existence is not incompatible: *Ens dicitur quod existere potest, consequenter cui existentia non repugnat*. (12) In other words, what is possible is a being: *Quod possible est, ens est*. (13) Besides, Wolff adds, this is a metaphysical notion which is accepted by all, and which exactly tallies with common language. "Being," "something," "possible;" here are so many words that are practically synonymous, and metaphysics does nothing more than bring their implicit meanings out in the open. True enough, what is commonly called a "being" is something that exists, but he who understands that a A is being because it exists will as easily understand that, if A exists, it is because it can exist.(14) Possibility then is the very root of existence, and this is why the possibles are commonly called beings. The proof of it is that we commonly speak of beings past or future, that is, of beings that no longer exist or that do not yet exist. In any case, their being has nothing to do with actual existence; it is, though a merely possible being, yet a being.

In order to probe more deeply into the knowledge of being, what we have to do is to inquire into the causes of its possibility. The first one is, of course, the one we have already mentioned, namely, the absence of inner contradiction; but this is not enough. In order to posit a being, one must ascribe to its notion such constituent parts as are not only compatible among themselves, but are its primary constituent parts. The primary constituents of a being are those which are neither determined by some element foreign to that being, nor determined by any one of the other constituent elements of the same being. If an element supposedly foreign to some being were determining with respect to any one of those elements which enter its constitution, then it would not be foreign to it; it would be one of its constituent elements. On the other hand, if some of the constituent elements of a being determine each other, then we must retain only the determining elements as constituent parts of that being.(15) In short, every being is made up of such elements as are

both compatible and prime. Such elements shall be called the "essentials" of being (*essentialia*), because they constitute the very essence. Hence this conclusion, whose full significance it is superfluous to stress: Essence is what is conceived of being in the first place and, without it, being cannot be.(16) Thus, the essence of the equilateral triangle is made up of the number three and of the equality of its sides; again, the essence of virtue is made up of a habit (*habitus*) of the will and of the conformity with natural law of the acts which follow from that habit. Let any one of those conditions be altered, there is left neither equilateral triangle nor virtue; let them be all posited, then there is equilateral triangle and virtue. The presence of the "essentials" of the thing is therefore both necessary and sufficient to define its essence. Those "essentials" always entail certain properties which are inseparable from them and, since a thing never is without its "essentials," it is also inseparable from the thing. Such properties are called the "attributes" of being. As to its "modes," they are such ulterior determinations which are neither determined by the essence nor contradictory with it. The attributes of a being are always given with it, but not its modes, which are what the Scholastics used to call "accidents."

In a being so conceived, the "essentials" obviously are the very core of reality. Taken as non-contradictory, they ensure the possibility of being. It is through its "essentials" that a being is possible: *Per essentialia ens possibile est*. Now, since the essence of being is one with its possibility, he who acknowledges the intrinsic possibility of a thing knows also its essence. We are saying "acknowledges," and rightly so, for it is possible to account for the attributes of being from the "essentials" of that being, but there is no accounting for the fact that those "essentials" belong to it. Since they are prime, there is nothing above them from which they could be deduced. As to the modes, they cannot be deduced from their essence either. For, what makes up an essence accounts for the fact that such and such a mode may belong to a certain being; it does not account for the fact that such a mode actually does belong to it. The reason for the actual presence of modes in a given being must always be looked for outside that being. We call "external" those beings which constitute the sufficient reason for the actual presence, in a given being, of modes which cannot be sufficiently accounted for by its essence alone. The

essence then is for any being the sufficient reason for the actual presence of its attributes and of the possible presence of its modes(17) Hence its nominal definition: "Essence is that which is conceived of a being in the first place, and in which is to be found the sufficient reason why all the rest either actually belongs to it or else may belong to it: *Essentia definiri potest per id quod primum de ente concipitur et in quo ratio continetur sufficiens, cur caetera vel actu insint, vel finesse possint*." (18)

The scrupulously exacting method which Wolff was using in his determination of being was entirely his own, but the results achieved by that method had really nothing new. And Wolff himself was clearly aware of it." (pp. 114-116)

References

Christian Wolff, *Philosophia prima sive Ontologia methodo scientifica pertractata ua omnis cognitionis humanae principia continentur*, edit. nova (Veronae, 1789), [first edition 1730].

From: Etienne Gilson, *Being and Some Philosophers*, Toronto: Pontifical Institute of Mediaeval Studies 1952 (Second edition corrected and enlarged; first edition 1949).

"In Christian Wolff we have a Leibniz purged of poetry, but also purged of some exaggerated conceptions, for example, the drowsy or slumbering monads, and the phenomenal character of space. All is built into an immense, systematic exposition, magnificent in its formal rigour and clarity, and building on, though also improving, the ontological, cosmological, and theological doctrines of the Aristotelian schoolmen and, in particular, of Suárez. (The improvements are possibly due to Platonizing influences, which modified the ingrained love of the individual instance so characteristic of the Aristotelians.) Christian Wolff expounded his systematization both in a German version (the *Logic, Metaphysics, Ethics, Politics, Natural Theology*, etc.), and also in a Latin version (a *Logic* (1728), an *Ontology* (1730), a *Cosmology* (1731), a *Psychology* (1732 and 1734), a *Natural Theology* (1736-7), and a *Universal Practical Philosophy* (1738-9)). There are also many political writings of interest. To this vast system, with its innumerable Epigonoi -- Bilfinger, Meier, Rüdiger, Baumgarten, Tetens, Crusius, and so on -- Kant made his great emendations, which have been exaggerated into the idealisms, and later the positivisms, by which the thought and even the public policy of Europe has been bemused. What is, however, amazing is the immense volume and solid merit of Wolff's works, and the almost total misunderstanding and neglect that has since enshrouded them, so that copies of Wolffian books are hardly to be found in libraries outside of Germany.

(...)

Wolff's Ontology begins (27) with the assertion of the two laws of contradiction and sufficient reason, both fundamental to the assertion that something is, or that it is not. The former requires that what is must be free from inner conflict, the latter that, if it does not, like a necessary being, have a reason for being in its own nature, it must depend on such a reason in something other than itself. The law of causation, as we ordinarily understand it, is for Wolff only a special form of the law of sufficient reason, pertinent to temporal, changeable things and their states (71). From these principles Wolff proceeds to the consideration of the metaphysical modalities, of which the most fundamental is the possible, the negation of the self-contradictory, or logically impossible. Everything actual, he holds, is

by the law of contradiction possible, but he here embraces some invalid theorems, for instance, that a possible consequence can only have possible premisses. Obviously, modal logic is still insecure, though Wolff's treatment of apagogic proof in 98 is of some interest. From Wolffian principles it follows that the notion of an entity not wholly determinate is 'imaginary', and that the indeterminate is only what is for us determinable, and that it will have to be determined by a sufficient reason (111, 117). There is no room in Wolffianism, any more than in Leibnizianism, for radical alternativity: Kant, however, will diverge from this position under the influence of Crusius.

All this leads, however, to Wolff's treatment of what he calls an entity: an entity is defined as any thing which can exist, to which existence is not repugnant. Thus warmth in this stone is a something, an entity, since a stone certainly can be warm or a warm stone can exist. There does not need to be any actual stone-warmth for us to have an entity before us. An entity is, however, rightly called fictitious or imaginary, if it lacks existence, which does not, however, make it less of an entity. These near-Meinongian positions are of great contemporary interest, and form the spring-board for much of Kant's later criticisms of the ontological proof, which is Wolffian enough to treat 100 possible dollars as if they certainly vere something. Wolff goes on to draw the distinctions of essential features and attributes, on the one hand, which always must belong to an entity, and its modes, on the other hand, which are merely the characters that it can have and also can not have. Obviously, however, something must be added to possibility to raise it to full existence, and this Wolff is simply content to call the possibility-complement (174). It rather resembles the modal moment of Meinong. He proposes to deal with this possibility-complement separately in his discussions of different spheres, for example, theology, cosmology, and psychology, since the intrinsically sufficient reason which makes God an actual existent is not at all like the extrinsically sufficient reason which underlies existence in the cosmological sphere. It is deeply characteristic, and deeply interesting, that Wolff should make actuality a mere enrichment of the possible, not the latter an impoverished abstraction from the former. The efforts of Wittgenstein, Carnap, Ryle, Quine, and so on have shown the hopelessness of trying to elucidate the possible in

terms of the actual: the traditional priority may well prove more successful. Both tendencies are of course manifest in Kant's treatments of possibility, the 'modern' in, for example, the Postulates of Empirical Thought, and the Wolffian in many 'transcendental' contexts. Individuation does not, for Wolff, represent a going beyond the possible. It merely occurs where we have the complete determination which the logico-ontological laws require, and there are, accordingly, imaginary and fictitious as well as real ones. The latter may be far more determinate than any characters in fiction, but they will still lack a final nuance of determination. There are, likewise, incompletely determinate specific and generic properties of individuals, all of which must rank among imaginary entities, though some, connected with actual instances, will obviously be less imaginary than others. Wolff has here developed points which Meinong was later to develop in his doctrine of complete and incomplete objects, and there are also many anticipations of the modern theory of possible worlds." (pp. 38-41)

From: John Niemeyer Findlay, *Kant and the Transcendental Object. A Hermeneutic Study*, Oxford: Clarendon Press 1981.

"One cannot plunge directly into Wolffian natural theology, however, since it must be viewed within the closely knit context of a certain conception of philosophy and ontology. From Wolff's opening definition of philosophy as 'the science of possibles, in so far as they can be' or have an essential nature, it is evident that his is a system of possibility and essence in which the role of existence is a subordinate one. It is not a totally de-existentialized philosophy; it is one in which knowable and systematically exploitable being primarily means the possible essence and in which existence is admitted only by virtue of some correlation it has with this essence. What does not stand out so clearly is the reason why Wolff settled upon this essentialist viewpoint and yet never totally submerged the distinctive reality of existence.

Part of the explanation comes from Wolff's complex intellectual heritage. He was just as thoroughly familiar with the critical work of the skeptics and empiricists as with the rationalist tradition. The skeptical arguments convinced him of the impossibility of demonstratively defending our knowledge of the existing external

world, either through a rationalist deduction or through an empiricist inference. Hence he concluded that it was too risky to base his philosophy upon the thesis of the reality of the material universe; his fundamental definitions remained deliberately neutral about the independent existence of a world corresponding with our ideas. This skeptically generated neutrality inclined him to focus upon the essential and the possible, without making any primary commitments about sensible existents. Nevertheless, the British scientists and philosophers also convinced him of the danger of entirely ignoring the existential aspect.

As a compromise, Wolff calls for a union in holy matrimony of three kinds of human knowledge: historical, philosophical, and mathematical. Historical knowledge means the empirical assurance, gained mainly through sense experience and experiments, that certain things exist or occur. Wolff hails it as the foundation of all philosophy and the constant guide of all inferential reasoning. Yet he wavers between saying that empirical knowledge assures us indubitably that certain things actually do exist and saying that it merely makes us reflectively aware of having the ideas of things that can exist or come to be. This ambiguity about the import of sense experience stems from his basic epistemological neutrality and leads him to depreciate its certainty. Experiential certainty concerns the bare fact (real or ideal) and does not extend to the sufficient reason for the fact. Hence philosophical certainty must be non-experiential in its own proper form. Every ounce of it (to use Wolff's own emphatic phrase) derives from the use of the mathematical method, which risks nothing on the real existent but concentrates upon the determinate quantity of possible objects and essential relations. This method enables philosophy to determine with perfect certainty the reasons why objects may come to be or why being is possible. Hence philosophy is primarily a study of the internal essentialia, or essential components, and the external reasons, or causes of the possibility of these essential components. Existence is studied properly in philosophy only to the extent that it can be drawn out with certainty from the known essential structure.

Wolff never removes the radical dichotomy between empirical and mathematico-philosophical certainties, between knowledge of fact and of possible essence. Their matrimonial bond is not based upon

some unifying doctrinal principle but rests solely upon Wolff's personal awareness of the need for both approaches. His desire to found philosophy on an existential basis in experience is blocked by the skeptical critique, and he is thereby forced to locate philosophical certainty in the possible essences and their sufficient reasons. And yet he is also unwilling to follow 'Leibniz in overcoming the distinction between truth's of fact and truths of essence by means of the principle of sufficient reason. Leibniz accords the primacy to this principle, since it expresses the dynamic law of quasi-autonomous essences, to which God must give a consent decree governing His creation of the existing world. For Wolff, however,,the essences are unequivocally grounded in the divine intellect and enjoy no quasi-independence. Hence the principle of sufficient reason can give essential connections or reasons for facts, but it cannot furnish any deductive certitude concerning the actual facts themselves or existential productions of the divine will, There is no objectively determining ground which shapes God's existential decisions and closes the gap in man's philosophical system. Hence the principle of sufficient reason must remain subordinate to the principle of contradiction, which provides an indubitable certainty, at least, about the internal consistency and possibility of the essential traits as such.

In conformity with this view of philosophy, Wolff then defines ontology as the science of being, i.e., of that which can exist or that to which existence is not repugnant. In the main, it is the science of essence, namely, "that which is first of all conceived about being, and in which is contained the sufficient reason why other aspects either actually belong to it or can belong to it." Ontology is a strict science precisely because it confines itself to a general study of being as possible or essentially constituted -- he sphere where a mathematically rigorous certitude is obtainable. Existence figures in ontology either obliquely, as the complement of possibility, or negatively, as the furnisher of a norm of non-repugnance. As the directly known act of a thing, it does not come within the scope of ontology, which remains a nonexistential discipline. Because of the nonexistential character of ontology or general metaphysics, Wolff requires three special parts of metaphysics to determine the principles of the possibility of existence in the three main areas of

being. Cosmology studies the reasons of being in the contingent, material world; psychology deduces the soul as the sufficient reason for the existence of mental acts; natural theology demonstrates God as the ground of existence for His own attributes and modes, as well as for the existence of the world. Natural theology presupposes these other sciences. From ontology, it draws its general principles and orientation; from cosmology, a factual basis in the material world; from psychology, a basis in the soul and also some special insight into the spiritual perfections which help us to know God's nature.". (pp. 134-136, notes omitted)

An overview of Philosophia prima sive ontologia

"Wolff's *Ontology* is a long, systematic treatise of what had been generally called before him "metaphysics" or "first philosophy." The term 'ontology' to refer to this rather traditional discipline had antecedents before Wolff used it in the title of his book, however. In 1647 Clauvergius [Johannes Clauberg] published a treatise with the title *Elementa philosophiae sive ontosophia* in which he explicitly argued in favor of a more precise name for what was generally called "metaphysics." The primary reason behind the shift of terminology had to do with the object of study of the discipline, which Clauvergius identified with being in general.(10) Wolff, following suit, titled his book *Philosophia prima sive ontologia* (1729), defining the subject of study as the science of being in general, that is, of being insofar as it is being.(11)

The *Ontology*, in comparison with the extensive systematic metaphysical treatises of late Scholastics, is fairly short. It is divided into three sections: a section entitled "Prolegomena" and two parts. The Prolegomena deals with the nature of ontology and of the terms and notions with which it concerns itself. In the first of the two parts into which the rest of the treatise is divided, Wolff discusses the notion of being in general and the properties that follow from it. In the second part, he is concerned with the various species of being. The first part is divided in turn into three subsections, dealing

respectively with the principles of ontology, the essence and existence of being, and the general attributes of being. After Wolff discusses identity and similarity in Chapter 1, he then deals with singular and universal being in Chapter 2. Thus, the discussion of singularity, which for Wolff is equivalent to individuality, precedes the discussion of necessity, contingency, quantity, quality, relation, truth, perfections, and related notions.(12) It is also worthy of note that in the chapter devoted to individuality and universality, individuality is listed and discussed first.

The relative position that individuality occupies in relation to other fundamental metaphysical notions, including universality, indicates the importance that Wolff attached to it as well as its more fundamental and central role in the *Ontology*. Not that such importance and central role were something new. Throughout the Middle Ages there had been a progressive shift of emphasis from universality to individuality, which is clearly evident as early as the thirteenth century when Duns Scotus discussed universals in the context of individuals in the *Opus oxoniense*, contrary to what had been customary before him. This shift is most evident in Suárez's *Disputationes metaphysicae*, where individuality is given separate, prior, and more extensive treatment than all the other common properties of being.

What is most significant and different structurally speaking about Wolff's *Ontology,* vis-à-vis the later Scholastic tradition, is something else, namely, the epistemic and methodological considerations that are contained in the beginning of the work. They are found in two places. In the Preface Wolff presents some general statements about his modus operandi, indicating among other things that his aim is to make clear notions that are only confusedly found in common as well as in previous philosophical discourse, and also pointing out that he intends to follow the rigorous mathematical method popular among other modern philosophers. In Section 1, he begins the discussion with an examination of the methodological principles that guide his investigation. The principles in question are the "principle of contradiction" and the "principle of sufficient reason." The methodological concerns expressed both in the Preface and in Section 1 are certainly an indication of the epistemic bent that Wolff gave to the *Ontology* and that do not seem to have affected the

work of many late Scholastics. Suárez's *Disputationes*, for example, go directly from a discussion on the nature of metaphysics to the discussion of the common properties of being and do not contain in the Preface the kind of procedural comments that characterize the *Ontology*. What distinguishes Wolff's *Ontology*, then, is that between the discussion of the nature of metaphysics and of the common properties of being he adds a section on methodological principles and that he prefaces the whole work with a series of remarks on the same topic.

Thus, although the *Ontology* aims to be a work of metaphysics, from its very beginning we are confronted with epistemic and methodological considerations. Does this mean that its contents suffered from the epistemologism that characterize most other modern metaphysical works? I argue yes at least as far as individuation is concerned." (pp. 222-223)

Notes

(10) Etienne Gilson has discussed at length the implications that Clauvergius's definition of metaphysics and change of terminology had for the discipline in *Being and Some Philosophers* (Toronto: Pontifical Institute of Mediaeval Studies, 1952), pp. 112ff.

(11) *Ontologia*, par. 1, p. 1: "*Ontologia* seu *Philosophia prima* est scientia entis in genere, seu quatenus ens est." The emphasis in all Latin texts is that of Wolff.

(12) Not all authors use the terms 'singularity' and 'individuality' interchangeably. As far back as the early Middle Ages, Gilbert of Poitiers and others introduced distinctions in their meaning. See my *Introduction to the Problem of Individuation in the early Meddle Ages*, Munich, Philosophia Verlag, 1986, Chapter 3.

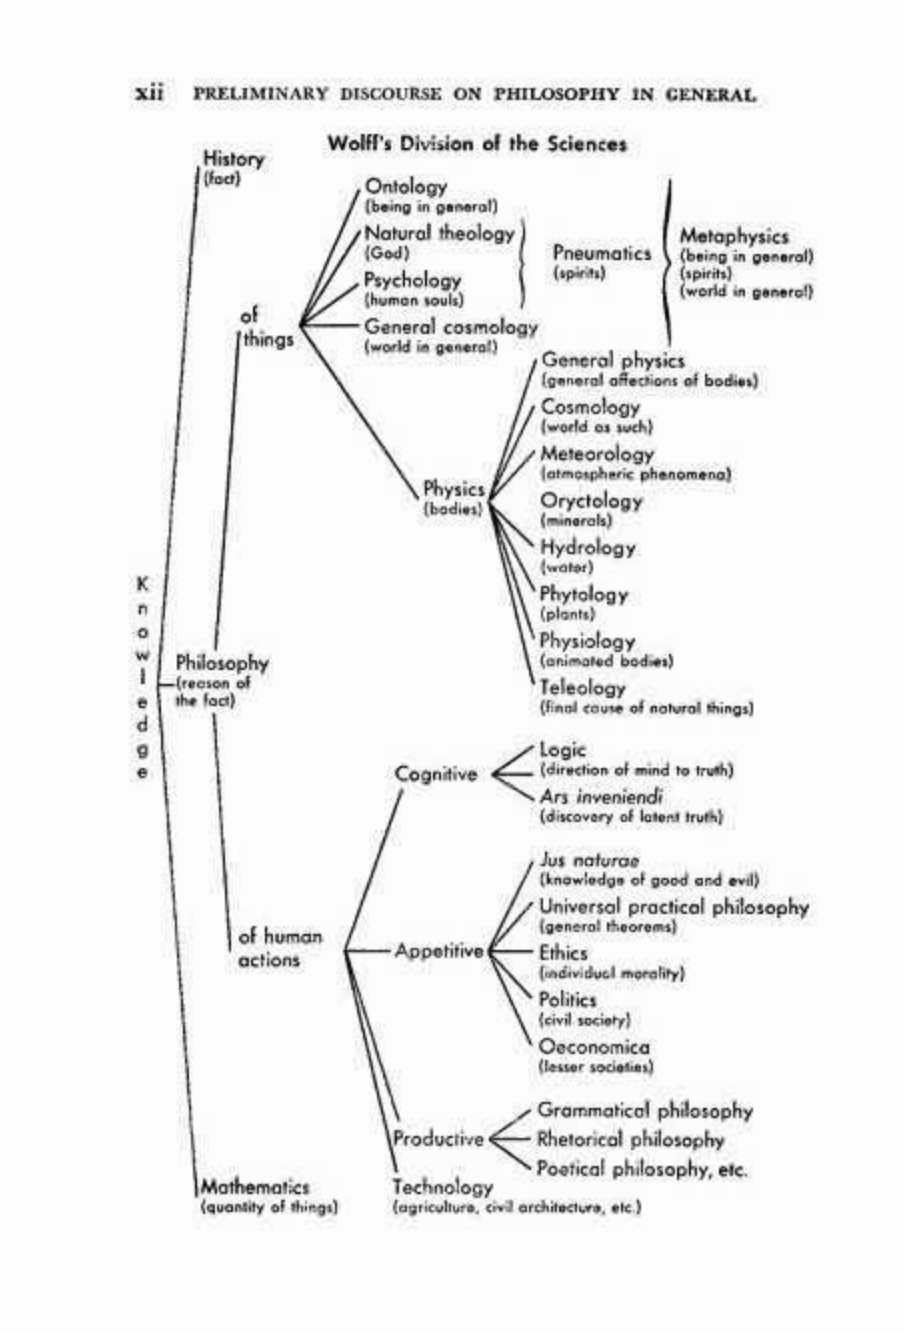
Christian Wolff - *Philosophia prima sive Ontologia* (1730)

The Preliminary Discourse on the Philosophy in General (1728)

"The *Preliminary Discourse on Philosophy in General* presents Wolff's master plan for the synthesis of knowledge. Written in 1728, it was intended to serve as the general introduction to his Latin survey of the branches of systematic philosophy, with subsequent volumes on logic, cosmology, empirical psychology, rational psychology, ontology, natural theology, and moral philosophy. Though in writing the *Preliminary Discourse* Wolff used many notions he intended to develop more fully in these later volumes, the book nevertheless is a basically self-contained discussion; in fact, this work contains Wolff's clearest presentation of his theory of the division and method of the sciences, and its main historical interest lies along these lines.

The overall outline of Wolff's theory is presented in Chapter One of the Preliminary Discourse. He defines history as knowledge of the facts pertaining to both the material world and the world of consciousness, and as such, history provides the empirical foundation of the sciences. But as Aristotle had pointed out centuries earlier, knowledge of the facts is one thing and knowledge of the



reason of the facts is quite another thing. This latter constitutes the proper province of philosophy. His third major division of natural knowledge, namely, mathematics, which deals with our knowledge of the quantity of things, employs a method of extraordinary power which is applicable to philosophy; insofar as philosophy shares in the values of mathematical method, it attains to complete certitude. Thus Wolff recognizes the importance of both the empirical methods of historical knowledge and the rational methods of the mathematical sciences. And for him, philosophy is the common meeting ground of these two methods.

The definition of philosophy presented in Chapter Two is of considerable interest. As the science of the possibles insofar as they can be, philosophy must concern itself both with the intelligibility of the world of the possibles and also with the reasons why certain of these possibles become actual. The former is governed by the Principle of Contradiction while the latter is controlled by the Principle of Sufficient Reason. What this means in brief is that for something to be possible it must be internally consistent. The criterion for determining this mutual consistency and intelligibility of the component elements of a possible is the Principle of Contradiction. However, this principle alone does not explain the fact that some possibles are actual while others are not; the mere internal consistency of a possible does not confer actuality upon it. A full understanding of the actual must go beyond the Principle of Contradiction to include an explanation of why this possible rather than another is actual. This further explanation is what is demanded by the Principle of Sufficient Reason. Furthermore, existence is understood by Wolff to be the final complement in the order of possibility." As a result, all philosophical problems for Wolff deal with the constitution and ordering of possibilities or essences. The two great principles are adequate to govern all of these essentialistic relationships, and the door is thus opened for the casting of the entire philosophical enterprise into the formal, deductive pattern outlined in Chapter Four.

Both the order of demonstration within each individual science and the proper subordination of the various sciences to each other are determined by the demands of one continuous deductive sequence. Wolff explains these relationships in great detail in Chapters Three

and Four. The individual parts of philosophy are distinguished exclusively on the basis of subject matter or material object divisions, as is clear from the summary on the following page, and each branch of philosophy is carefully located in its proper place of subordination to the more basic disciplines. Further, according to Wolff, the methods of deductive logic apply universally to all these disciplines." (pp. IX-XI)

Christian Wolff's Classification of Sciences in the *Preliminary Discourse to Philosophy in General* (1728).

Twin pillars of philosophy: the principles of contradiction and sufficient reason

Wolff's explicit presentation of the Principle of Sufficient Reason occurs at the beginning of his *Ontologia*. (44) His approach to this

Principle and the Principle of Contradiction is not by way of the notion of being and a deduction therefrom, although a cursory glance at the arrangement of his text might lead one to think so, especially after familiarity with later manuals which follow this development. Rather, Wolff makes these "twin pillars of philosophy" more intuitional than deductive; they are the *given* of the rationalistic mind generating its own data and starting points.(45)

Systematically, the Principle of Sufficient Reason is preceded by the Principle of Contradiction, and Wolff places the foundation of this latter in an obvious experience of mental life: *While we are judging something to be, it is impossible at the same time to judge it not to be(*46) From this conscious experience of the nature of our minds, we concede without need of proof the proposition enunciated in general terms as the Principle of Contradiction: *It cannot happen that one and the same thing be and at the same time not be*. Or, another form of the same: *If A is B, it is false that the same A is not B*.(47)

To demonstrate the fecundity of this basic axiom, Wolff explores its logical implications and leaves little doubt that the principle for him is a purely formal one, a kind of *aliquid* to which subsequent concepts in his system may be tied. If it were not a true principle, he argues, then the same predicate could and could not pertain to the same subject under the same determinations, and the same proposition could be both false and true at the same time.(48) Besides "contradiction is simultaneity in affirming and denying,"(49) it is contained in two propositions, of which "one takes away what the other posits."

The important point is that the process of building concepts and working out demonstrations is insured by this principle against logical failure. Negatively, it is important to note that while this treatment is placed under ontology and the subject of being in general, yet with no systematic reference to or involvement of existential judgment or sensation, it is not possible to denote this principle as anything more than logical.

Proceeding next to the Principle of Sufficient Reason, Wolff does not make any detailed reference to the question of its relation to the Principle of Contradiction. To anyone following through within the

system itself, the question of whether it reduces to the Principle of Contradiction is answered by the fact that the latter is the one systematically prior, and this priority makes reduction possible.(50)

Clearly, the dual sovereignty granted these principles by Leibniz no longer holds. Leibniz had located the relation between the Principle of Contradiction and the Principle of Sufficient Reason in the realm of the rational through his distinction between necessary and contingent truths. Wolff unified that realm of the rational around the Principle of Contradiction.(51) Again we can note the lack of existential reference in the fact that this realm remained distinct from that of the singular concrete sensible data of experience. Under the influence of Locke and the rise of empirical science, Wolff and his successors heightened the reality of this latter realm and deepened the realization and the value of its experience. But the systematic failure to incorporate it into an existential union with the realm of the rational will continue to haunt modern philosophy.

Unity in the order of essence, however, is impressively systematic. The possible as the non-contradictory, we shall see, gives to the Principle of Contradiction a primacy which it can share with no other. The *ratio* or reason whereby things are understood is ultimately explicable in terms of the opposition between "nothing" and "something," the latter being the systematic coherence of clear and distinct ideas whose right to, and precise determination of, a place in the system ultimately depends on the Principle of Contradiction. The Non-Contradictory is "something."(52)

This application of the primacy of essence to a theory of method grants priority to the Principle of Contradiction over the Principle of Sufficient Reason, and to the Principle of Sufficient Reason over causality. In other words, when Wolff has defined philosophy in terms of possibles rather than causes, he must use *ratio* instead of *causa* to describe the object of the metaphysical search, and it is one of the inevitabilities of such a system that "reasons grow more rational and logical; causes, more empirical and real."(53) The deductive method of mathematics becomes the unique method of philosophy, and here-and-now existential reference is obtained by "common sense" joined sometimes with a pious use of Sacred Scripture.

By "Sufficient Reason," Wolff meant whatever explains why something is; it is "that whence it is understood why anything is." (54) He gives two examples: The three sides of the triangle, or rather, its three-sidedness is sufficient reason for the three angles because this suffices for us to understand the triangle as having three angles. (55) In the order of motivation and action he further instances the case of a man rising to his feet out of respect for some person who has just entered the room. From the fact of this entry, plus the reverence due the newcomer, it can be understood why the man in the room rises to his feet and hence a sufficient reason for the action is assigned.

In keeping with his methodology of building notions and demonstrations from previously established concepts, it is now necessary to define the meaning of "nothing" and "something" as involved in the notion of "sufficient reason." This is very simply managed in terms of the basic building block itself, the notion or concept. We call that "nothing" to which no notion corresponds. And "something" is that to which some notion can be attributed or corresponds.(56)" (pp. 35-38)

Notes

(44) Wolff, *Philosophia prima*, No. 70 ff.

(45) Part I of the *Ontologia* bears the title, "Concerning Being in General and the Properties Which Flow Therefrom." But this first part immediately divides into two parts: Section 1, "Concerning the Principles of First Philosophy," and Section II, "Concerning Essence and Existence and certain related notions of being." Section I is composed of two chapters devoted to the two Principles, Contradiction and Sufficient Reason. It is only in Section II that he takes up the discussion of being and its notions, a discussion which proceeds by way of the possible and impossible, determined and indetermined, to Chapter III, "Concerning the Notion of Being."

It is within this framework as taken over by the successors of Wolff that we see the Principle of Sufficient Reason migrate back and forth as to relative position in the subject matter. In Bü1lfinger (*Dilucidationes*), for instance, the Principles come after the treatment of the possible-impossible, necessary and contingent. In

John G. Feder's *lnstitutiones logicae et metaphysicae* (Editio quarta; Gottingen: J. Dietrich, 1797 preface 1777), No. 63, they appear in the Logic, part II, "Concerning the right use of the intellect in seeking truth," Chapter I, "Concerning the principles of truth and the various modes of knowing them." To this migratory characteristic of the Principle of Sufficient Reason we shall return in Chapter Six.

(46) Wolff, *Philosophia prima, sive ontologia*, No. 27. So also with the Principle of Sufficient Reason, as we shall see below.

(47) "Naturae igitur mentis nostrae nobis conscii ad exempla attendentes sine probatione concedimus propositionem terminis generalibus enunciatem: *Fieri non potest, ut idem simul sit & non sit, seu quod perinde est, si A sit B, falsum est idem A non esse B*, sive A denotet ens absolute consideratum, sive sub data conditione spectatum." Ibid., No. 28. "Propositio haec: Fieri non potest, ut idem simul sit & non sit, dicitur *Principium Contradictionis*, ob rationem mox adducendam. *Principium* autem *Contradictionis* jam olim adhibuit Aristoteles *eodem usi sunt Scholastici in philosophia prima instar axiomatis generalis*." Ibid., No. 29.

(48) Ibid., Nos. 30, 31.

(50) Wilbur Urban, "The History of the Principle of Sufficient Reason: Its Metaphysical and Logical Formulations,"*Princeton Contributions to Philosophy*, I, No. 3 April, 1900, p. 27. Urban sees in paragraphs Nos. 66-70 a statement of the Principle of Sufficient Reason as a logical law by means of deduction from the law of contradiction; he finds Wolff, in confusing real grounds with the grounds of knowledge, guilty of a *petitio principii.* Hans Pichler, *Über Christian Wolff's Ontologie* (Leipzig, Durr'schen Buchhandlung, 1910), p. 7, calls Wolff's proof a word-play.

(51) Émile Bréhier, *Histoire de la philosophie* (Paris: Alcan, 1934), Vol. II, part II, 361.

(52) Wolff, *Philosophia prima*, Nos. 59-59.

(53) Norman Wilde, *Friedrich Henrich Jacobi: A Study in the Origin of German Realism* (New York: Columbia College, 1894), p. 27.

(54) Wolff, *Philosophia prima*, No. 56.

(55) The triangle example is reminiscent of Spinoza, and a favorite example with rationalists. Like Leibniz, Wolff was still faced with the threat of Spinozism. With no systematic distinction between the true and the real that is supported by existential reference, his only escape from being pushed into Spinoza's universe-version of "everything that exists has a cause or reason why it exists" was to *assert* as a starting point the reality of the possible. The primacy of *essence* has a way of becoming the *primacy of the logically necessary*, where what is not *impossible* is *necessary*, i.e., *is*.

From: John Edwin Gurr, *The Principle of Sufficient Reason in some Scholastic Systems 1750-1900*, Milwaukee: Marquette University Press 1959.

Existence is a mode of finite beings

"Because the being of Wolff's metaphysics is possible being, existence is not one of its essential determinants. In fact, Wolff defines existence as "... The complement of possibility. And existence is also called Actuality." (44) Because existence is neither an essential of being nor an attribute inseparable from it, existence must be regarded as a mode. Hence it will depend upon a cause outside the being which possesses it. Therefore, as Gilson observes, in the philosophy of Christian Wolff, "the sufficient reason for the actual existence of any finite being is never to be found in that being itself; it always is to be found in another one." (45)

All this is necessary for a proper understanding of Wolff's definition of substance as a subject which is modifiable and perdurable. Because substance in Wolff's ontology is a possible being, it can be readily seen why Wolff calls it a subject which is modifiable rather than modified. The being of Wolff's metaphysics is possible being, not actual or existent being. Modes are characteristics or determinations of existent being, consequently while a substance is conceived as capable of having modes (capax aliorum), these

accidental determinations are never actually possessed by it in its ontological or possible existence."

"And this is why, in the philosophy of Christian Wolff, existence is completely excluded from the field of ontology. There are special sciences to deal with all the problems related to existence and none of them is ontology. Are we interested in finding out the sufficient reason for the existence of God or for that of the world? Natural theology will give the answer. Do we want to know how those beings which make up the material world are, though contingent, yet determined? Cosmology will inform us about it. Are we wondering how, in the human mind, the possibles are drawn from potency to act? Psychology holds the key to that problem. When today we make use of the term, 'ontology,' what it means to us is just the same as 'metaphysics.' Not so in the philosophy of Wolff, who needed a new word to designate a new thing. Strictly speaking, an ontology is a metaphysics without natural theology, because it is a metaphysics without existence." (pp. 28-29)

4. Anderson, R. Lanier. 2008. "The Wolffian paradigm and its discontents: Kant's containment definition of analyticity in historical context." *Archiv für Geschichte der Philosophie* no. 87:22-74.

   "I defend Kant's definition of analyticity in terms of concept "containment", which has engendered widespread skepticism. Kant deployed a clear, technical notion of containment based on ideas standard within traditional logic, notably genus/species hierarchies formed via logical division. Kant's analytic/synthetic distinction thereby undermines the logico-metaphysical system of Christian Wolff, showing that the Wolffian paradigm lacks the expressive power even to represent essential knowledge, including elementary mathematics, and so cannot provide an adequate system of philosophy. The results clarify the extent to which analyticity *sensu* Kant can illuminate the problem of a priori knowledge generally."

6. ———. 2003. "Dans quelle mesure l'Ontologie est-elle fondamentale dans la *Métaphysique allemande* de Wolff?" *Revue Philosophique de la France et de l'Étranger* no. 128:323-336.

   "The first chapter of the *German Metaphysics* gathers only nine paragraphs and seems to represent but some kind of a preamble. Hence one may feel that metaphysics begins only with paragraph 10 opening the ontological part of the text with the contradiction principle.

   Yet Wolff already mentions a few considerations in this first part that are extremely close to the beginning of his philosophy:

he presents from the start something very similar to a cogito. Moreover the assets of this first chapter are recaptured whenever every one of the five following chapters opens. Would there be therein sufficient matter at stake to evidence that the Wolffian Metaphysics is grounded in a psychological experience?

Hence the author tests here such a hypothesis through the successive analysis of the status of Ontology, of Logics and of empirical Psychology, through a joint reading of the *German Metaphysics* and of the *German Logics*."

27. Burns, John V. 1966. *Dynamism in the cosmology of Christian Wolff. A study in pre-critical rationalism*. New York: Exposition Press.

    Contents: Introduction 9; I. Substance 17; II. Bodies 51; III. The elements 83; IV Conclusion 101; Bibliography 111; Index of proper names 115; Subject index 117-122.

    "Dynamsim is the theory that bodies are composed of inextended points of force. In the manuals of Scholastic philosophy this theory is listed and refuted as a fallacious attempt to account for the constitution of bodies by explaining away matter. The theory of Dynamism "culminates in the system of Leibniz, who reduced corporeal substance to units of a spiritual character *(monads)* analogous to souls. For Leibniz, extension, indeed sensible reality as a whole, is nothing more than an appearance or a symbol, and the corporeal world as such is absorbed in the spiritual.." (1)

    In this analysis it is our intention to present a study of Christian Wolff's dynamic theory of substance and in particular his metaphysical foundations of the material universe.

    To realize this purpose we intend first to treat Wolff's notion of *(a)* substance, *(b)* simple substance and its characteristics, and *(c)* composed being or compound substance and its characteristics, especially as these are in contrast with the characteristics of simple substance.

    The second chapter will deal with bodies and their apparent constituents: matter and motor force, as these are explained by Christian Wolff.

    The third chapter will be devoted to the "elements," which Wolff contends are the true and ultimate constituent principles of bodies." p. 17

"Ce recueil est la reprise du numéro spécial que la revue *Il Cannochiale* a consacré à Wolff en 1989 (no 2-3), à l'initiative de deux jeunes chercheurs italiens: Sonia Carboncini et Luigi Cataldi Madonna (...).

Il a trouvé tout naturellement sa place dans la troisième série de notre réédition des Gesammelte Werke de Wolff qui, à côté des études les plus importantes publiées de son temps, en contiennent d'autres plus récentes. Car il est composé de douze articles aussi intéressants que variés répartis en trois sections intitulées: Le système et la méthode, La philosophie théorique, La philosophie pratique. Sept ont trait à sa métaphysique, deux à sa morale, les trois autres respectivement à sa méthode, à sa physique et à sa conception de la société. Le tout est précédé d'une introduction dans laquelle Sonia Carboncini et Luigi Cataldi Madonna retracent l'histoire de cette réédition et celle de la partie philosophique de son oeuvre, dont ils présentent de façon claire et précise les grandes lignes dans leurs rapports avec celles de ses prédécesseurs et de ses successeurs.

Ces articles, qui ont pour auteurs sept allemands, trois italiens, un hollandais et un français, appartenant à des horizons philosophiques fort différents, attestent que l'actuel regain d'intérêt pour la pensée de Wolff n'est pas seulement le fait de

quelques rares spécialistes isolés. Et l'on peut voir là le signe qu'après avoir été éclipsée par la philosophie kantienne et postkantienne, celle de Wolff, sans jamais plus connaître l'énorme succès qu'elle eut de son vivant et immédiatement après sa mort, est enfin en train de trouver sa juste place dans l'histoire des idées.

C'est en tous les cas grâce à de tels travaux qu'elle y parviendra pleinement. Et il est à souhaiter qu'ils continuent à se multiplier, afin qu'elle soit de mieux en mieux connue et qu'en particulier, pour ce qui ce du domaine métaphysique, `on cesse d'en parler à partir des critiques de Kant qui ne connaissait guère celui-ci qu'a travers les exposés trop succincts et souvent déformants des Wolffiens infidèles que sont Baumgarten, Baumeister et Gottsched."

Et c'est dire que le champ des recherches sur Wolff, loin d'être clos, reste largement ouvert, d'autant que son oeuvre est immense et véritablement encyclopédique." (From the Preface by Jean École).

45. Corr, Charles A. 1970. "Certitude and utility in the philosophy of Christian Wolff." *Southwestern Journal of Philosophy* no. 1:133-142.

    "Christian Wolff is frequently caricatured as a pedant wholly devoted to rational clarity and certitude. My thesis is that Wolff's obvious interest in mathematical method, the "natural logic" of the human mind, and the rehabilitation of the categorical syllogism is in terms of their service to practical and scientific utility. This contention is supported by the way in which Wolff finds room for probability and the hypothesis in philosophy. The present article sets forth these themes."

46. ———. 1972. "Christian Wolff's treatment of scientific discovery." *Journal of the History of Philosophy* no. 10:323-334.

    "Recent interest in a 'logic of discovery' recalls similar themes in the early 18th century. One philosopher who discussed such a problem was Christian Wolff (1679-1754). Wolff sought to formulate an 'ars inveniendi' or art of discovery to supplement his logic. This article describes Wolff's incomplete notion of an art of discovery and suggests that, although he did not achieve his goal, his sensitivity to the many dimensions of the problem may continue to be helpful today."

47. ———. 1973. "The existence of God, natural theology, and Christian Wolff." *International Journal for Philosophy of Religion* no. 4:105-118.

    "This article examines some elements of 'natural theology' as conceived by one of its principal proponents, the German philosopher Christian Wolff. Topics considered are Wolff's explicit comments on the character of this discipline and its role in his philosophy, together with his twin a posteriori and a priori proofs of the existence of God. The intention is both historical, in elucidating Wolff's philosophy and some of its implications for the thought of other philosophers of his time,

and problematical, in terms of the adequacy of the natural theology paradigm for a contemporary philosophical approach to the existence of God."

49. ———. 1975. "Christian Wolff and Leibniz." *Journal of the History of Ideas* no. 36:241-262.

    "This article contends that the familiar stereotype of Christian Wolff as little more than a systematizer and popularizer of the doctrines of Leibniz is unsatisfactory both in itself and in the light of the available evidence. This thesis is argued by citing Wolff's own statements concerning his relationship to Leibniz, by noting some historical evidence involving the two men, and by surveying a variety of doctrinal points of difference, largely taken from Wolff's methodology and metaphysics. The effect is not so much to settle the matter but to describe the state of the problem and to call for further study."

"This essay narrates chronologically the life of Christian Wolff (1679-1754), arguably the most eminent German philosopher between Leibniz and Kant, and an important figure in the development of thought about the state and its tasks as well as about the national economy. It is the first longer biographical sketch of Wolff in English, other than skeletal encyclopedia entries, since 1934, and the first original English one since 1910. Special attention is paid to Wolff"s formal honors, academic calls, salary questions, and the political, historical, and academic background, and particularly to his ennoblement, as Wolff may well have been the first scholar to receive such a high Imperial recognition on the basis of his scholarly work alone."

66. ———. 2019. "Mereology and mathematics: Christian Wolff's foundational programme." *British Journal for the History of Philosophy* no. 27:1151-1172.

    Abstract: "How did the traditional doctrine of parts and wholes evolve into contemporary formal mereology? This paper argues that a crucial missing link may lie in the early modern and especially Wolffian transformation of mereology into a systematic sub-discipline of ontology devoted to quantity. After some remarks on the traditional scholastic approach to parts and wholes (Sect. 1), Wolff's mature mereology is reconstructed as an attempt to provide an ontological foundation for mathematics (Sects. 2–3). On the basis of Wolff's earlier mereologies (Sect. 4), the origin of this foundational project is traced back to one of Wolff's private conversations with Leibniz (Sect. 5) and especially to the former's appropriation of the latter's notion of similarity as a means to define quantity (Sect. 6). Despite some hesitancy concerning the ultimate characterization of quantity (Sect. 7), Wolff's contribution was historically significant and influential. By developing a quantitative, extensional account of mereological relations, Wolff departed from the received doctrine and paved the way for the later revival of mereology at the intersection of ontology and mathematics."

    "Lo studio offre un esempio di storia comparata dei concetti, esaminando l’origine e l’uso del termine tedesco «Weltweisheit», posto in alternativa al successivo «Philosophie», partendo dalle prime occorrenze in Lutero e, poi, in Wolff, per giungere a Kant, agli idealisti speculativi e, infine, a Bolzano e a Husserl. Una volta che si è affermato il prestito dal greco, quando si incontra «Weltweisheit» è perché è stata compiuta una precisa scelta lessicale: perché ci si vuole riferire (più o meno polemicamente) all’uso linguistico precedente o in particolare alla filosofia wolffiana; oppure perché si vuole porre l’accento sulla filosofia come indagine del mondo, e quindi usa «Weltweisheit» come sinonimo di filosofia (idealista) della natura, per il riferimento alla «Welt» che si perde in «Philosophie»; o ancora perché si intende evidenziare l’aspetto pratico o sapienziale, e a tal fine «Weisheit» risponde allo scopo tanto nella sua valenza prevalente di saggezza, quanto in quella comunque presente di sapienza.

76. Gómez Tutor, Juan Ignacio. 2004. *Die wissenschaftliche Methode bei Christian Wolff*. Hildesheim: Georg Olms.

"The scientific method stands at the centre of all Wolff's work. It forms the programme which gives his whole philosophy its decisive characteristics. This monograph offers the first comprehensive analysis of Wolff's method. It enables us to

understand that Wolff's conception of his scientific method was the result of a long process which was still not complete even in his later works. Such a finding contradicts both the prevalent myth of Wolff as a monolithic figure who never underwent any intellectual development and the easy verdict of much scholarship that Wolff's Latin works are simply a repetition of his German ones. At the same time this book emphasises Wolff's importance for the theory of method and broadens our current perspective on the scientific method."

    "The major works of XVIIIth century German metaphysics (Wolff, Crusius, Bilfinger, Baumgarten, Meier, Lambert) have not been recently translated into French. The translation of those texts must first take into account the circulation between languages (Latin, German, French) which characterizes them but, above all, should let the proper metaphysical meaning of the notions surge. Thus, one should be led to specify more precisely the meaning of *Deutlichkeit* and *Evidenz*, to distinguish between *Vermögen* and *Kraft*, and to tell whether *Beschaffenheit* means something like *Wesen* or something like *Natur*. One will also have to ponder over *Zusammenhang, Erklärung, auseinandersetzen*, etc. Such is the price to be paid so as to be able to drag away Wolff and others like him from the unfair disrepute they fell."

82. Gracia, Jorge J.E. 1993. "Christian Wolff on individuation." *History of Philosophy Quarterly* no. 10:147-164.

    Reprinted in: Kenneth F. Barber and Jorge J. E. Gracia (eds.) - *Individuation and identity in early modern philosophy* - Albany, State University of New York Press, 1994 pp. 219-244.

    "This article is divided into three parts. First, I examine briefly the nature of Wolff's "Ontology", its method, and the place that the discussion of individuality and individuation occupies in the overall structure of the text. Second, I present and characterize Wolff's view of individuation. Finally, I explore the extent to which Wolff's theory of individuation displays the influence of the epistemologism prevalent in modern philosophy. I defend two main theses. First, I claim that Wolff's theory of individuation is a bundle view with a strong accidental component. Second, I argue that the

    influence of the epistemologism of modern philosophy is one of the factors that led Wolff to adopt the view of individuation that he did."

    The point of departure in Leibniz and Wolff, pp. 11-49.

    "In this treatment of Wolff we will consider his use of the Principle of Sufficient Reason under three general headings suggested by his own arrangement of the matter, especially in the *Ontology*. 1. We shall see it presented as one of the twin pillars of philosophy, functioning as an axiom basic to his system, but subordinate to the Principle of Contradiction, and with the ultimate meaning of *ratio* derived from the system itself. 2. This will be followed by a quick glance at Wolff's history of the Principle and his theory of its origin. 3. The

analysis will conclude with a view of the Principle in the overall context of Wolff's metaphysics and method." (p. 35)

    "This paper analyzes how experience, both a priori and a posteriori knowledge, are articulated in Christian Wolff's work. It thus shows that the pattern opposing rationalism to empiricism cannot be applied to the latter. After having studied Tschirnhaus' influence, then Leibniz' on Wolff, the research carries forward on how the latter considers intuitive knowledge. Thus does appear the part played according to Wolff by perception in the building of notions and the status he grants to the latters. Hence the status of both meaning of, and part played by, the "non pure" reason."

115. ———. 2003. "Dieu dans le miroir. Leibniz, Wolff et l'actualisation du monde." *Études Philosophiques* no. 66:371-387.

    "This study aims to show how Wolff differs from Leibniz, in the context of *Deutsche Metaphysik* regarding the theme of world actualization. In this new context, the mirror metaphor must be applied more traditionally to all creatures, and the workings of

the best of all possible worlds principle must be reviewed. It is on the basis of these transformations that the theory of universal harmony and the causality problem were transmitted to Kant."

    "Wolff's philosophy is often defined by commentators as 'dogmatic Leibnizism'. However, if we try to read the expression in a positive light, we discover what exactly distinguishes Wolff's metaphysics from that of Leibniz, thereby establishing Wolff's real contribution to the history of thought. First of all, the notion of 'dogma' presented in Wolff's philosophy is analyzed. This notion recalls the demonstrative model provided by mathematics and especially, Euclid's *Elements*. According to axiomatic patterns, ontology is thought of as the 'first philosophy'. This aspect cannot be separated from the function of a posteriori knowledge in Wolff's thinking. This permits us to comprehend the function of ontology, Wolff's cosmology, and his invention of the notion of 'teleology'."

    "Was the rejection by Wolff of the classification of the "Leibniz-wolffian philosophy" justified? This article draws attention to the notion of "contingency" in Wolff as distinguishing him from Leibniz. The "possible worlds" of Leibniz are overpopulated with events, those of Wolff are empty. For Leibniz contingent existence is the highest grade of possibility, for Wolff it needs, however, a "complementum possibilitatis." Wolff is not a pure rationalist but he defends the "marriage between ratio and experience"."

"Cosa ha a che fare la logica con l'esperienza umana? Nulla, è la risposta che più ci si aspetta, poiché la logica è una scienza riguardante esclusivamente le proprietà formali della consistenza e dell'implicazione e dunque interamente a priori, mentre l'esperienza umana è contingente e soggettiva e può essere conosciuta solo a posteriori. Voler a tutti i costi legare le due cose porta con sé la costituzione di una prospettiva non solo impervia, ma anche di cattiva fama: lo psicologismo. Eppure, dal punto di vista della psicologia, la logica è una teoria del tutto legittima, una teoria del ragionamento (1). A sua volta, il ragionamento non è altro che l'attività di organismi intelligenti e dei loro strumenti, che sono poi le loro facoltà; e arrivo così all'oggetto che ho indicato dal titolo e al ruolo svolto da Christian Wolff nel proporne una considerazione logica. Il periodo coperto da questo contributo va dal 1690, l'anno di nascita, nello Essay concerning Human Under standing, di quella che si suole definire la logica delle facoltà (*facultatìve logic*), fino al 1800, l'anno di pubblicazione della kantiana *Logik* a cura di Gottlob Benjamin Jäsche. Il primo paragrafo parte dalle definizioni, si potrebbe dire "metafisiche", delle facoltà date da Wolff nella *Psychologia empirica* e nella

Psychologia rationalis, due testi degli anni trenta, il secondo considera Locke e Thomasius come fonti di Wolff, il terzo e il quarto si occupano della “logica” delle facoltà, rispettivamente, nella logica tedesca e nella logica latina; il quinto paragrafo, infine, offre uno sguardo conclusivo sui pensatori dell’illuminismo tedesco più influenzati da Wolff, ovvero Baumgarten, Meier e, appunto, Kant."

"In his late writing, *The Progresses of Metaphysics* (1791) Kant is summarizing all his metaphysics whilst criticizing traditional metaphysics and, above all, the Leibniz-Wolff's system (which is, according to him, its summit). Because *finiteness* of human thinking is occurring, traditional metaphysics -- affair of reason and logic -- is revealed to be *void*. Kant then refunds

metaphysics on that what is *given* (the pure intuitions, the moral law of liberty and, in a certain sense, the empiricism of sensible world) for to hinder its "sinking into the nothing". He distinguishes three states of metaphysics: its "sure progress" in critical transcendental "ontology", its "skeptical stop" in speculative cosmology and its moral practical progress to the supersensible ideas (before all of God and immorality). Metaphysics, elevating so itself to the supersensible and considering from it the sensible world, is then proving itself to be a knowledge which is fundamentally *different* from all ontical empirical knowledge."

159. Senn, Peter. 1997. "What is the place of Christian Wolff in the history of the social sciences?" *European Journal of Law and Economics* no. 4:147-232.

    Reprinted in: Jürgen Backhaus (ed.) - *Christian Wolff and Law and Economics. The Heilbronn Symposium* - Hildesheim, Georg Olms, 1998, pp. 37-122.

    "This paper explores the place of Christian Wolff in the history of social science in English. The "Introduction" places Wolff in the context of the pre-history of modern social science. Samples are given of the great range of subjects on which he wrote. The importance of the German context is stressed. The second part is devoted to a sample of what the literature contains by and about Wolff. It emphasizes philosophy and science. Part three is a survey of works in the history of the social sciences that mention Wolff. He has a substantial place in political science and psychology, a much smaller place in economics and history, virtually none in anthropology, geography, and sociology. In the applied social sciences, he is found in the history of education. Possible reasons are given. Part four is devoted to the relationships of philosophy and philosophers in the pre-history of the social sciences. They were important in several different ways because they both shaped and reflected how many people thought about science and social problems. The "Summary and Conclusion" describes the present status. His contributions are summarized. He was a pivotal figure in the making of the German conception of social science. This is a preliminary study emphasizing the issues and problems that a

more detailed examination would require. Several conventional judgments are challenged and possibilities for further research suggested."

"Émile Ravier, auteur de la celebre bibliographie de Leibniz, a laissé un très riche ensemble de manuscrits sur Wolff, ainsi qu'une traduction complete en français de l'ouvrage de Mariano Campo, *Cristiano Wolff e il razionalismo precritico*. On a montré les rapports de Wolff à Leibniz d'apres les manuscrits d'Émile Ravier, qui revelent que Wolff ne voulut jamais être le porte-parole de la pensée leibnizienne en Allemagne. Il serait possible à partir de là de detruire le mythe du "leibniziano-wolffisme" dont parle Kant pour le refuter."

172. Vitadello, Anna Maria. 1973. "Experience et raison dans la psychologie de Christian Wolff." *Revue Philosophique de Louvain* no. 71:488-511.

"Cet éxposé de la psychologie de Christian Wolff adopte un point de vue descriptif et épistémologique. Le but de l'auteur fut de saisir la psychologie wolffienne dans l'intentionalité de son langage, qui, tout en restant philosophique et même substantialiste, laisse entrevoir une direction assez nette dans l'ensemble. Celle-ci prefigure, d'une façon lointaine mais significative, la psychologie de laboratoire; c'est-a-dire une science qui traite empiriquement de l'expérience psychologique au moyen de l'introspection et sur le modèle des sciences de la nature, en s'appuyant sur un dualisme tranché. Tout en suggerant les apories où s'engage une methode introspective en

psychologie, cette analyse s'est tenue cependant a un propos introductif."

    Two articles from H. Zendler's *Universal-Lexicon aller Wissenschaften und Künste* (Leipzig and Halle 1748). Preface by Jean École.

176. Zingari, Guido. 1980. "Die philosophie von Leibniz und die "Deutsche Logik" von Christian Wolff." *Studia Leibnitiana* no. 12:265-278.

    "In this paper the possibility of comparing some speculative positions of Leibniz and Wolff concerning logic and theory of knowledge is considered on the basis of a reading of the *Deutsche Logik* especially as it refers to Leibniz. The affinities and above all the diversities of the conclusion, to which the two philosophers come, emerge from this reading. Theoretical presuppositions, such as the reduction of the critical exigency to Wolff's method or the method of analysis in Leibniz, are to be seen against Cartesian teaching. While undeniably ignoring the most original acquisitions of Leibniz's logic and theory of knowledge, from the symbolic assumption to implicit thoughts, and under the influence of English empiricism, Wolff elaborates a complex notion of experience which aims at is own autonomous validity."

Wolffiana: A mult-volume collection of Essays on Christian Wolff

1. Cataldi Madonna, Luigi, ed. 2005. *Wolffiana I. Macht und Bescheidenheit der Vernunft*. Hildesheim: Georg Olms.

Beiträge zur Philosophie Christian Wolffs. Gedenkband für Hans Werner Arndt, mit acht Rariora.

Vorwort; Hans Werner Arndt: Nachruf; Einleitung; Ehrenpromotion von Jean École; Plenums- und Abendvorträge.

"Christian Wolff to whom Hans Werner Arndt devoted an important part of his life's work provides the thematic frame for this collection of commemorative essays. The articles deal with the role Wolff played in the history of philosophy, and various aspects of his metaphysics, logic, epistemology and practical philosophy. Thus, the collection becomes part of the Wolff revival initiated by Hans Werner Arndt about two decades ago.

The authors, who share Arndt's commitment to the German philosopher, pay tribute to Arndt for the rediscovery of Christian Wolff and his work, which he made available to philosophical research.

The supplement of this volume consists of eight lesser-known essays by Arndt. They are to demonstrate the scope of his interest in philosophy, which went far beyond Christian Wolff."

   Atti del seminario internazionale di studi, Verona, 13-14 maggio 2005.

"The comparison of *Psychologia empirica* and *Psychologia rationalis* is one of the themes which are of fundamental importance to the understanding of Christian Wolff's philosophy. As is generally known, the terms themselves go back to the two major Latin works first published in 1732 and 1734. Contrary to the prevalent opinion which has viewed the difference between *Psychologia empirica* and *Psychologia rationalis* as purely a matter of tradition, here it is viewed rather as a distinction formulated in a specific way for Wolff and arising from the encounter between modern metaphysics and new scientific methods. Following the celebrations in 2004 to mark the 250th anniversary of Wolff's death, a scholarly conference took place at the University of Verona in 2005 with the aim of reconstructing this theme for the interpretation of a way of thinking which is too easily interpreted as the clearest example of an abstract and dogmatic rationalism. In the essays published here attention is drawn instead to the central role of experience which allows a continual comparison of psychic facts and philosophical considerations. From this comes the importance of the comparison with Locke and Malebranche, as well as analyses of what are known as ideales sensuales or typical processes of imagination and of symbolic language, and the possibility of the application of mathematics to psychometrics. Historically-based comparisons (Alsted, Baumgarten, Meier, Kant, Herbart) are also present, illuminating the afterlife of a way of thinking which surely prepared the ground for the development of a new philosophical anthropology."

8. Fabbianelli, Faustino, Goubet, Jean-François, and Rudolph, Oliver-Pierre, eds. 2011. *Wolffiana IV. Zwischen Grundsãtzen und Gegestãnden. Untersuchungen zur Ontologie Christian Wolffs*. Hildesheim: Georg Olms.

   "This volume embodies the new and lively interest in Christian Wolff which has been continuously developing over recent decades. It also bears witness to the rediscovery of ontology, a field of knowledge which has become increasingly visible, especially in recent years, in international philosophical reflection. The volume contains papers in German, French and Italian given at the international conference "Età dei Lumi e filosofia. L'ontologia di Christian Wolff", held in Parma from 19-21 February 2009. It is divided into six sections: "Structure and properties of Wolff's ontology", "'Signs'", "'Designation' and 'Ficta'", "Ontology in Wolff's thought", "Ontological debates", "The fate of Wolff's ontology" and "Wolff's ontology in the 20th century". The essays are complemented by an editors' introduction, an extensive bibliography and an index of names and subjects."

Selected Bibliography of Jan A. Aertsen. Writings in English

Introduction

Jan Adrianus Aertsen (Amsterdam, 1938 - 2016), formerly professor of Medieval Philosophy and Modern Catholic Philosophy at the Free University of Amsterdam (since 1984), was the director of the *Thomas Institute* in Cologne (Germany) until 2003; his areas of interest were the history of transcendentals, the philosophy of Thomas Aquinas and Meister Eckhart.

A complete bibliography of his writings up to 2002 was published by Sabine Folger-Fonfara in:

Martin Pickavé (ed.), *Die Logik des Transzendentalen. Festschrift für Jan A. Aertsen zum 65. Geburstag*, Berlin: Walter de Gruyter, 2003, (Miscellanea Mediaevalia, 30), pp. XXIII-XXXII.

I give an updated bibliography with the omission of the publications in Dutch and of some minor writings.

Books authored

1. Aertsen, Jan A. 1984. *Medieval Reflections on Truth. Adaequatio rei et intellectus*. Amsterdam: VU Boekhandel.

   Inaugural address on the occasion of his taking up the chair of Medieval philosophy of the Free University in Amsterdam on November 9, 1984.

   "There are certain basic words which form the undertone of our thinking and of the manner in which we experience things.

These basic words are not unchangeable; they often receive a different content . . . One such basic word is 'truth'."

This is the start of the report of the Synod of the Reformed Churches in the Netherlands, issued in 1981, "On the nature of the authority of Scripture".(1) How does it happen that the Bible is read so differently? In searching for an answer to this problem, the report adopts a course remarkable within the. Reformed tradition. It poses a truly philosophical question: "What is truth?" That the Bible is read differently is related to the fact that not all people mean the same by what they call "truth".

If I want to raise this same question today, then I am in good company - though I must add at once that it is the matter rather than the company that motivates me. From the outset, that is, as early as with the Greeks, philosophy and truth are seen in an intimate connection. Aristotle, for example, describes philosophy as the "theory" of truth.(2) It is in the Middle Ages, however, that for the first time treatises appear under the title of *De veritate,* where truth itself is explicitly made the object of reflection. I would like to draw your attention to medieval observations on the query about truth.

'Adaequatio rei et intellectus' as the medieval formula of truth and the criticism of it.

Is an exposition on this theme worthwhile, though? Do we not already know what truth was in the Middle Ages? Probably there is no formulation in scholastic thought that has become more widely known. Even those who did not enjoy the privilege of a classical education are able to say that truth is *adaequatio rei et intellectus*. What is meant by that seems to be clear. The formula appears to express the "natural" idea of truth, i.e., the correspondence between thought and reality. The determination of truth as *adaequatio* has become so self-evident that, as the *Handbuch philosophischer Grundbegriffe* states, it is the point of depart and reference for all contemporary discussions on truth.(3) It can be added that this occurs mostly in a critical sense. Two examples may suffice.

In the above-mentioned synodal report the first chapter sketches the changes in the concept of truth over the course of time. The so-called subject/object relation underlies the entire exposition, apparently from the unquestioning presupposition that this relation is fundamental to the phenomenon of truth as such. The changes in the concept of truth, then, are described in three phases. Successively the report speaks of "objective truth", "subjective truth" (in systems of thought like idealism and existentialism), and finally, of a newer conception called the "relational" concept of truth - the objective and the subjective in one. This means that "truth always occurs within a relation, within the 'relatedness' of man to something else."(4) As the report claims, moreover, this relational concept of truth links up with what the Bible calls truth.

The objective concept of truth - the most current idea of truth - is represented by the medieval formula, phrased "truth is the correspondence of the human way of picturing things with the matters themselves." The human way of imagining things, the human consciousness, is like a mirror able to reflect "the objective state of affairs". This conception of truth is not only ascribed to Thomas Aquinas, but to a great variety of people: " . . . Greek philosophers, . . . the classical Reformed theologians, . . . the logician Bertrand Russell, . . . the Marxist Lenin". The drawback of this conception, in the assessment of the report, is that man is very passive. Does knowing the truth not demand man's activity, research; and wrestling? Without a human spirit there is no truth.

An entirely different criticism can be found in Heidegger, who dealt most thoroughly with the western conception of truth. The lectures he delivered at the University of Freiburg during the winter semester of 1942-43 appeared in 1982 in the *Gesamtausgabe* of his works under the title *Parmenides*.(5) Strictly speaking, the title is misleading for actually these lectures deal with the essence of truth, the identical subject that engaged Heidegger in writing *Vom Wesen der Wahrheit,* which dates from the same time. In the lectures, however, there is "a more direct confrontation with the history of western thought". (6) In his view a change in the essence and "locus" of truth has

evolved in philosophy. Truth becomes "rightness" *(Richtigkeit)* of knowing and asserting; it is no longer "unconcealedness" *(aletheia)* of being, as it was for the early Greek thinkers. The medieval formulation fixes this essential transformation. " *`Veritas est adaequatio intellectus ad rem' Im Sinne dieser Umgrenzung des Wesens der Wahrheit als Richtigkeit denkt das gesamte abendländische Denken von Platon bis zu Nietzsche.* "(7) Truth becomes a characteristic of a mental act within man. Inevitably the problem then arises how a psychical process in the inner man can be brought into agreement with things outside.(8) This traditional and current conception of truth, however, is derivative *(abkünftig)*. Parmenides' thought reveals "the road of truth, far away from the beaten track of men". *(Fragm.* B 1, 27). It can give us a reminder of the forgotten "primordial" sense of truth, the unhiddenness of being, which is the ground of the possibility of rightness.

But when the proper function of philosophy is to "re-mind", we are also allowed to ask of this twofold criticism: do we recall the meaning of truth as *adaequatio rei et intellectus* at all? Does it have a merely derivative sense, i.e., the rightness of thought? On the other hand, does the formula imply that truth is "reflection" and leave the human mind out of account? These questions lead, me this afternoon to focus on medieval views of truth, in which the idea of the *adaequatio* plays a central role." (pp. 3-5)

Concluding observations.

Looking back over the course of this discussion, we may conclude that the criticism of the medieval *adaequatio*-formula, outlined at the beginning, did not grasp its original meaning. Neither is this conception concerned with truth in a merely derivative sense, nor does it ignore man's activity. For in the previous analysis we observed that Thomas's notion of true includes first, transcendentality, second, relationality, third, anthropocentrism, fourth, the fulfilment in an act of the intellect, fifth, the necessity of a norm and measure, sixth the intrinsic connection with the word, seventh, the relation to the divine Logos, and finally, the identity with God Himself. These

moments are implicitly or explicitly expressed in the formula *adaequatio rei et intellectus*, in which every term is charged with meaning.

Compared to the breadth of this conception, modern theories appear to be a reduction of the integral process of truth. It is philosophically important to note that in the medieval approach what is fundamental to truth is not the duality of subjective and objective from which then their togetherness has to be conceived. Rather, it is the primordial conformity of being and intellect that is fundamental to truth. Indeed, as we have seen, being and thinking are the same in the Origin.

Another remarkable aspect in this medieval view is the attempt to integrate philosophical and religious truth. This endeavour runs parallel to the philosophical introduction of the synodal report of the Reformed Churches, with which I began this address. Its intention is that the "relational" concept of truth links up with what the Bible calls truth. Thomas's conception lies concretely in the notion of word, a good example of the way in which his understanding of truth is deepened by a theological reflection. But that which fundamentally enables the integration is the basic idea of the transcendentality of truth. This conception underlies his entire discussion.

The medieval doctrine of the transcendentals - being, one, true, good, and beautiful - forms "the heart of scholastic ontology and metaphysics."(93) This doctrine will be the subject of my research over the coming years. Today I wanted to present you with a sample of it.(94)

"The study presented here is the revised version of a doctoral dissertation that was submitted to the Central Interfaculty (Faculty of Philosophy) of the Free University in Amsterdam in fulfillment of the requirements of the Doctorate of Philosophy and defended publicly on April 16, 1982. That this dissertation was originally published at a Protestant university may be considered a sign of common responsibility for a Doctor of the still undivided western Christendom." (from the Preface).

"Our aim was to develop an interpretation of the inner coherence and direction of Thomas's philosophizing. This objective was pursued by following his way of thought and by seeking to fathom the motives of his quest for intelligibility. Now that this inquiry has been brought to an end, it turns out that our investigation of Thomas's way of thought has proceeded according to the order of the transcendentals "being," "true," and "good." Their logical order, which Thomas sketches, is that "being" is the first and that "the true" and "good" come after it, in this order. For, so he argues in *S. Th.* I, 16, 4, "knowledge naturally precedes the appetite." "Being" is the first, "good" the ultimate.

From the triad "being"-"true"-" good," their convertibility, and their conceptual nonidentity a number of coherences can be brought to light that were not always signalized or worked out by Thomas himself. They are nonetheless most illuminating for the movement of Thomas's thought, and also for the course of our investigation. These coherences show that in what has

preceded, a multiplicity of themes has been traversed according to a definite pattern." (p. 391)

(7) The result of Aristotle's exposition in *Metaph*. II is the thesis: "There is the same disposition of things in being and in truth" (4.3.1.). On the analogy of this thesis Thomas himself frames the statement: "There is the same disposition of things in goodness and in being" (8.1.1.). A hierarchical order can be found in being, the true, and good. Whatever is in any way and is true and is good is to be reduced to the first Being, to the maximally True and to the ultimate Good, namely, God. The causal relation of God to the world is therefore threefold. He is 'causa efficiens', 'exemplaris', and 'finalis'. With this threefold causality Thomas connects the triad of transcendental determinations 'ens (or: unum) - verum - bonum'.

This coherence of the transcendentals with the divine causality makes clear that the "anthropocentrism" in Thomas's doctrine is to be specified: man is marked by a transcendental openness, certainly, is "in a certain sense all things," but not in a constitutive sense. It is typical of the medieval approach to inquire into the origin of being, into the ground of the truth and goodness of things. This origin and ground is conceived as "creation." Every being is true and good because it is thought and willed by the Creator. The relational character of the transcendentals "true" and "good" is ultimately founded in the relation to the divine intellect and will.

The divine foundation of the transcendentals is connected by Thomas with the circulation in God Himself, the eternal coming forth of the Persons. "Being" (or: "one") is attributed by appropriation to the Father, "true" to the Son, and "good" to the Spirit. This connection with the divine Trinity provides the basis for developing a trinitarian interpretation of that which is creaturely. In the conceptual nonidentity of the transcendentals ' *ens - verum - bonum*' the threefold structure of that which is comes to expression. Viewed in the light of the Triune causality, the different components of that which is concur into a unity.

"Being," "true," and "good" are not only common names but also divine names. The relation of what is common to what is

proper to the Transcendent is conceived by Thomas in terms of "participation." He subscribes to Aristotle's criticism of this Platonic idea by stating that there

are no separate, self-subsisting Forms of natural things. But Thomas, in the prologue to his commentary to pseudo-Dionysius's *De divinis nominibus,* recognizes the legitimacy of this doctrine with regard to what is most common. Only in the case of transcendental forms can a first be posited which is the perfection essentially and as such subsistent. All else must consequently be understood as participation in this perfection. Against this background it becomes understandable that Thomas conceives "creation" preeminently as "participation."

The doctrine of the transcendentals is found to have an important, integrating function in Thomas's way of thought. In man's quest for intelligibility, the transcendentals present a comprehensive perspective on nature and creature. Their circular ways come to an end in the return to the Origin, in which "being," "true," and "good" are perfectly one." (pp. 395-396).

   Spanish translation: *La Filosofía medieval y los trascendentales. Un estudio sobre Tomás de Aquino*, Pamplona: Eunsa 2003.

   "The title of this book speaks of "Medieval Philosophy" and "the Transcendentals." It can be read as affirming that there is a philosophy in the Middle Ages and that this philosophy

encompasses a doctrine of the transcendentals alongside many others.

But our aims in this work are more ambitious. Our title means to suggest a more intrinsic relation between the terms "Philosophy" and "Transcendentals" than mere juxtaposition. We want to show that philosophy in the Middle Ages expresses itself as a way of thought which can be called "transcendental." The present book may therefore be seen as a contribution to the discussion of the question: what is philosophy in the Middle Ages? A recent review of literature offers a telling example of the relevance of this question: "Unmistakably philosophical research about the Middle Ages has fallen into a crisis (...) It is even impossible to reach agreement on the premise what philosophy means in the Middle Ages.(1) '"

(1) A. Speer and J.H.J. Schneider, "Das Mittelalter im Spiegel neuerer Literatur", in: *Theologische Quartalschrift* 172 (1992), p. 235.

(...)

In this introductory chapter I want first to analyze three different answers to the question "Is there a medieval philosophy?" that are (or were) important for the place of the Middle Ages in the history of philosophy. This analysis affords me an opportunity to take stock of the current study of medieval philosophy (0.1.-0.3.), I will then explain how I myself approach the period, indicating what, in my view, is constitutive for the thought of the Medium Aevum (0.4.). This final section will clarify the intention of this book." (pp. 1-2).

(...)

"Is there a medieval philosophy? Thus far I have discussed three significant conceptions, those of Gilson, of the Cambridge History and of De Libera. They have made substantial contributions to the study of medieval philosophy, but I have formulated objections to all three because they do not provide sufficient insight into the philosophical dimension of medieval thought. Now in order to make some progress in this question, I am interested in statements by medieval writers in which they

personally indicate what they consider to be fundamental to their thought or what they regard as decisive for the possibility of philosophy. Such "ego" statements are relatively rare among Scholastic authors, but they are not altogether absent. I mention four examples, all taken from *theologi*. [The authors discussed are Bonaventure, Thomas Aquinas, Duns Scotus and Meister Eckhart.] (p. 17).

"The transcendental way of thought is neglected in the conceptions of medieval philosophy discussed above. Although the doctrine of the transcendentals is the core of medieval metaphysics, the doctrine is not considered at all in Gilson's The Spirit. In the Cambridge History it receives only one brief reference (p. 493), and it remains outside of consideration in De Libera's determination of the place of medieval philosophy. One of the objectives of the present study is to show not only that the "forgotten" doctrine is important for our understanding of medieval philosophy, but also that the idea of medieval philosophy as a transcendental way of thought does not exclude the other conceptions, but incorporates them.

The conception of medieval philosophy as transcendental thought expresses already in its terminology a moment of continuity with modern philosophy, for the term 'transcendental' is generally reserved for the way of thought inaugurated by Kant.

Kant brings the project of his three Critiques together under the title of "Transcendental Philosophy," but he himself recognizes that this notion has a long tradition. In the Critique of Pure Reason (B 113) he points to the 'transcendental Philosophy of the Ancients" and quotes the proposition "so famous among the Schoolmen: quodlibet ens est unum, verum, bonum," At the same moment, however, he distances himself from the traditional conception. 'These supposed transcendental predicates of things are nothing else but logical requirements and criteria of all knowledge of things in general" (B 114) . 'Transcendental' in the Kantian sense is concerned with the mode of our cognition of objects, insofar as this mode of cognition is possible a priori.

The Kantian perspective has strongly affected the study of medieval transcendental thought. An example of the connection of medieval thought with "modernity" is to be found in Kurt Flasch's important study on Nicholas of Cusa which contains a chapter, entitled "Metaphysics and Transcendental Thought in the Middle Ages. (56) Flasch does not refer here to the doctrine of the transcendentals, for he wants to take the term 'transcendental' exclusively in a Kantian sense, that is, as transcendental-logical. (57) Every transcendental philosophy, in his view, is based on the idea that the world of objects is constituted by the human mind. Transcendental thought in the Middle Ages is therefore related to those thinkers who acknowledge a constitutive function of the human mind, such as the German Dominican Dietrich of Freiberg (d.

after 1310), They show "a much more modern Middle Ages than it is generally supposed. "(58)

Yet this transcendental-logical approach seems questionable from a historical point of view. It makes the Kantian position the exclusive criterion for determining what transcendental thought is in the Middle Ages. Medieval philosophers, however developed their own concept of transcendentality, and it is this way of thought that Kant called the 'Transcendental Philosophy of the Ancients'.

It would be more appropriate historically and philosophically to consider the medieval doctrine as a distinctive form within the tradition of transcendental philosophy.

The French scholar S. 8reton wrote in 1963 that the doctrine of the Transcendentals is "classic and yet poorly known."·(59) His observation still holds. We only possess two general studies on this subject, the first by H. Knittermeyer, the other by G. Schulemann.

Both studies go back to the 1920's and must be regarded as out of date. Their main shortcomings are that they do not pay sufficient attention to the historical and doctrinal background of the formation of the doctrine in the thirteenth century and fail to give an explicit analysis of the notion of

transcendentality. A new history of transcendental thought in the Middle Ages is required.(61)

The focus in this book will be on Thomas Aquinas (1 224/5-1274), a representative of medieval thought, whose importance for the transcendental way of thought is often neglected or underestimated. Although libraries have been written on his thought, and although we possess various studies of some aspects of his doctrine of the transcendentals, it is striking that a comprehensive study of Aquinas's doctrine is lacking. This book will till this lacuna and wants to show that the doctrine of the transcendentals is not, as has been suggested, "a small, rather insignificant part' of his metaphysics," (62) but is of fundamental importance for his thought. By the same token, the study will substantiate in an exemplary way the claims made in this section concerning the conception of medieval philosophy as a transcendental way of

thought.

Thomas Aquinas was, however, not the first to formulate the doctrine of the transcendentals. The beginning of the doctrine is t0 be located in the first half of the thirteenth century; it coincides with the introduction of a voluminous body of new philosophical literature into the Latin West. Not only the entire corpus aristotelicum, but also the writings of Arabic philosophers become available in translation at this time. In the first chapter we will analyze the beginning of the doctrine of the Transcendentals. It is, of course, a requirement of modern scholarship on Thomas t0 place his philosophy in its proper historical context. The first chapter provides the background for Thomas's transcendental thought and enables us to see its traditional and innovative aspects," (pp. 21-24)

"The present work represents the completion of a research project that has engaged me intensively throughout my scholarly life. Its origins reach back to my inaugural address on the occasion of taking up the Chair of Medieval Philosophy at the Free University of Amsterdam (1984). At the end of this lecture, *Medieval Reflections on Truth, 'Adaequatio rei et intellectus',* I concluded that the idea of the transcendentality of truth underlies these reflections and announced that the medieval doctrine of the transcendentals "will be the subject of my research over the coming years".

This programmatic statement, typical of an ambitious new professor, turned out to be a fortunate choice. The choice had been motivated by a twofold interest. Historically, the doctrine of the transcendentals is an innovative contribution of the Middle Ages to the history of philosophy; the origin of transcendental thought is not to be sought in modern philosophy but is medieval. Systematically, the transcendental terms "being", "one", "true" and "good" concern what is first *in* a cognitive respect and what is fundamental; they express "basic" words of philosophy.

The project resulted in a large number of studies, including the monograph *Medieval Philosophy and the Transcendentals. The Case of Thomas Aquinas* (1996). In the Introduction, I advanced the provocative thesis of an intrinsic connection between medieval philosophy and transcendental thought, already suggested by the main title of the book. My argument was that the theory of the transcendentals is essential for insight into the properly *philosophical* dimension of medieval thought, which is often developed in a theological context; medieval philosophy *can* be regarded as a way of transcendental thought. The thesis provoked critical comments and questions: does it not presuppose an "essentialist" conception of medieval philosophy and ignore its real diversity? In my view, the critique was based on a misunderstanding, which could only be removed by providing a complete history of the doctrine of the transcendentals that shows the multiplicity of transcendental thought in the Middle Ages.

In 2003, on the occasion of my retirement as Director of the Thomas Institute at the University of Cologne, thirty-five colleagues, friends and students offered me an impressive Festschrift with the title *Die Logik des Transzendentalen*. The editor of the volume expressed the hope (p. XXI) that the various contributions would stimulate the realisation of the planned history of the doctrine of the transcendentals in a not too remote future. The Festschrift was indeed both a tribute and a stimulus." (from the Preface)

1. Aertsen, Jan A. 1985. "The Convertibility of Being and Good in St. Thomas Aquinas." *New Scholasticism* no. 59:449-470.

   "In many medieval thinkers, e.g. Alexander of Hales, Bonaventure, Albert the Great, Thomas Aquinas, the statement can be found: " being and good are convertible " *(ens et Comm convertuntur)*.(1) That is to say, " being " and " good " are interchangeable terms in predication *(converti enim est conversim praedicari)*.(2) Wherever " being " is predicated of something, the predicate " good " is involved as well.

   That must imply that " good " is here not a concept that adds a real content or a new quality to " being ", as a result of which " being " is restricted. For in that case there would be no question of convertibility.(3) " Good " is an attribute which pertains to every being, it is a property of being as such, a "mode that is common, and consequent upon every being." In other words, " good " is coextensive with " being ", it is one of the so-called

transcendentie which, since Suarez, are usually referred to as " transcendentals ".

2. ———. 1986. "The Circulation-Motive and Man in the Thought of Thomas Aquinas." In *L'homme et son univers au moyen âge. Actes du septième congrès international de philosophie médiévale, 30 août - 4 septembre 1982, Vol. I*, edited by Wenin, Christian, 432-439. Louvain-la-Neuve: Peeters.

"Little attention is usually paid to this divine circular motion in the interpretation of Thomas' work, even though Thomas himself says in the prologue to the first book of his Commentary on the *Sententiae* that this bringing forth is the «reason» *(ratio)* of every subsequent process. The *circulatio* within God is the archetype of the work of creation. A trinitarian interpretation of Thomas' thought, albeit unusual, finds support in this idea. And his reflections on the originating order of the Trinity could also open up fruitful perspectives for further thought about (the problematics of) his thought.

In his explanation of the Trinity, Thomas gives a new elaboration of the concept of relation. In the divine *circulatio* there are relation of primordiality which are subsistent : «In

God relation and essence do differ in being from each other, but are one and the same» *(S. Th.,* I 28, 2). Relation is not an accidental category of substance; being and relation belong « originally» together.

This idea has remained outside of Thomas' metaphysics of creation. But it is this model of relation,which is philosophically important for a renewed reflection on created being. The relation of the creature to God is not accidental as Thomas claimed (18), but for the creature to be is to be in relation. At precisely this point a more comprehensive notion of finite being can be developed. There is the three-foldness in the creature: of subsistent-being, what-being, and act-being. These components agree in *esse,* which is a being from, through, and to God. In relationship to the Triune-Origin there is unity.

In man the Trinity is represented in a distinctive *way,* viz., according to the identical character of activity *(secundum eamdem rationem rationis, De potentia,* 9, 9). The processes of intellection and volition are found in man. Man, who is a person, is therefore *imago Trinitatis*. It la in this idea that the «anthropocentrism» of medieval thought most clearly comes to the fore.

The manner, however, in which man's movement to God is worked out by Thomas, formed a second «crux» in his thinking. Here again we find in his elaboration of the idea of relation, possibilities for giving his penetrating intuition of the circular motion of egress and return a more integral meaning.

Man is destined to one purpose, viz., communion with God. His drama consists not so much in the natural inability to close the circle through knowing, as in the aversion from his own essentially relational mode of existence. The circular motion thereby comes to stand in a concrete salvation history. This moreover offers the possibility of doing justice to the internal coherence of the structure of the *Summa Theologiae*. In the prologue to bk. 1, 2, Thomas indicates this design: the first part deals with God, and «the procession of all creatures from Him»; the second with the movement of the rational creature toward Him; and the third with Christ who as man is the way

(via) of our tending to God. The second person of the Trinity, the Word, became flesh in order to show mankind the way (back) to its Origin. True *human-being* is possible only by God's grace.

In summary: the new perspective which Thomas' reflection on the faith mystery of the divine process opens up, is philosophizing oriented to the perfection of being-itself in being toward something else." (pp. 438-439)

   Reply to the essay by Arvin Vos: *As the Philosopher Says: Thomas Aquinas and the Classical Heritage*, same volume, pp. 69-82.

   "Arvin Vos has written an excellent paper on Thomas Aquinas and the classical heritage. His paper shows admiration for and affinity with Aquinas's achievement. I share this admiration; Aquinas is a great thinker. Now it is a mark of great thinkers that the content of their thought is so full and rich that one can put emphasis on different aspects. And this is what I intend to do in my response by making some comments and raising some questions. My reflections, stressing a number of underlying ideas, are primarily meant as a supplement to what has been said.

In order to present my remarks in a systematic and coherent way, I take as a starting point a statement of Aristotle which I will develop in four steps, more or less related to the main parts of Vos's paper: (1) the background of the thirteenth century; (2) Thomas's attitude towards Aristotle; (3) the relationship between faith and reason; and (4) the conclusion concerning the question whether **the** classical heritage can be integrated in the Christian position." (p. 83)

8. ———. 1991. "The Medieval Doctrine of the Transcendentals. The Current State of Research." *Bulletin de Philosophie Médiévale* no. 33:130-147.

   "An important, new development in medieval philosophy was the constitution of the doctrine of the transcendentals (DT) in the thirteenth century. The term « transcendental » - the medievals themselves speak of *transcendens* -- suggests a kind of surpassing. What is transcended are the special modes of being that Aristotle called the « categories », in the sense that the transcendentals are not restricted to one determinate category. « Being » and its « concomitant conditions », such as « one », « true » and « good », « go through *(circumeunt)* all the categories » (to use an expression of Thomas Aquinas). DT is thus concerned with those fundamental philosophical concepts which express universal features of reality.

   The doctrine played a prominent role in later medieval thought. The study of it is essential for our understanding of philosophy in this period, since, according to J.B. Lotz, [« Zur Konstitution der transzendentalen Bestimmungen des Seins nach Thomas

von Aquin », in P. Wilpert(ed.), *Die Metaphysik im Mittelalter* (Miscellanea Mediaevalia, Vol. 2). Berlin 1963, pp. 334-340] p. 334), DT is « the core of Scholastic ontology and metaphysics ». Remarkably, however, research on this doctrine has hitherto been rather limited. The observation, made by the French scholar S. Breton [« L'idée de transcendental et la genèse des transcendentaux chez Saint Thomas d'Aquin » in *Saint Thomas d'Aquin aujourd'hui*. Paris 1963, pp. 45-74] p. 45) in 1963, that DT is « classic and yet poorly known », still holds. An example of its neglect is the *Cambridge History of Later Medieval Philosophy* (ed. N. Kretzmann, 1982) that contains only one brief reference (p. 493, to Ockham). In this contribution I want to take stock of the current state of research on DT, to assemble and discuss the relevant literature, to indicate certain lacunas, and to make some suggestions for further research." (p. 130).

9. ———. 1991. "Good as Transcendental and the Transcendence of the Good." In *Being and Goodness*, edited by MacDonald, Scott, 56-73. Ithaca: Cornell University Press.

   "Conclusion.

   In *ST* Ia.6.4 ("Whether all things are good by the divine goodness?") Thomas concludes that the Platonic view appears to be unreasonable in affirming that there are separate forms of natural things subsisting of themselves; still, it is absolutely true that there is something first that is essentially being and essentially good which we call God. Hence, everything can be called 'good' and 'being,' insofar as it participates in the first being, which is essentially good. To this conclusion Thomas still adds, however, an important remark. That every being is good through an external cause by no means excludes each things being called through a goodness that is formally its own goodness. "And so of all things," Thomas ends, "there is one goodness, and yet many goodnesses."

   This text can serve as a summary of our analysis, which is focused on the relation between the good as transcendental and the transcendence of the Good. I want to emphasize four points of philosophical importance in Thomas's reflection on the good.

First, Thomas really understands the good transcendentally by establishing an intrinsic connection between being and goodness. To be is the actuality of everything and thereby a good proper to each thing. Things are called good in virtue of an inner goodness. It is characteristic of finite things that although being and good are convertible, there is in them nonetheless a nonidentity between being absolutely and good absolutely.

Second, because the good is transcendental, Thomas applies to it the predication essentially or by participation. This predication expresses the transcendence of the divine goodness and the creaturely character of the goodness of other things. That which is in any way good must be reduced to what is good by its essence as to its origin. That things are good through an intrinsic goodness is not incompatible with their dependence on that which is the good itself.

Third, from a historical point of view, Thomas effects a kind of synthesis between the Aristotelian way of thought and Aristotle's conception of the good, on the one hand -- the good is something common and the essential forms of things are inherent in them -- and the Platonic way of thought and Plato's conception of the good, on the other hand -- the Form of the Good is "separate" from particular goods.

Fourth, Thomas effects a synthesis in still another respect. Characteristic of Boethius's position, according to MacDonald, (29) is the creation approach to explaining the relation between being and goodness. Aristotle's view, in contrast, exemplifies what might be called the nature approach. This approach explains what it is for a thing to be good by referring to the nature of the thing. "The historical significance of *DH* [Boethius's *De Hebdomadibus*] MacDonald says, "consists largely in its offering an interesting account of the nature of goodness which is possibly incompatible ... with the sort of account medieval philosophers found in Aristotle." Thomas's reflection on the claim *that* all things are good and on question *how* they are good can be regarded as a philosophically original synthesis of the nature approach and the creation approach."

(30) The nature approach explains the intrinsic goodness of things, for 'nature' says what beings are *in themselves;* it always refers to an intrinsic principle. Now, it is Thomas's transcendentality claim that everything is good, insofar as it is. Things are good (in a certain respect) in virtue of their own being. So all things owe their being good to their nature. The creation approach explains that everything is called 'good' through an external cause, for 'creature' says *being-related* to the Origin of things. Creation expresses that things received their being and goodness from another. Their goodness consists in their relation to the transcendent good, that is, in their participation in what is goodness itself." (pp. 72-73)

(29) MacDonald "Boethius's Claim That All Substances Are Good." *Archiv für Geschichte der Philosophie* 70:345-79, 1988. (See also the Introduction in this volume.)

(30) The relation between nature an creature in Thomas is the central theme of Aertsen 1988a [*Nature and Creature*]

12. ———. 1992. "Truth as Transcendental in Thomas Aquinas." *Topoi.An International Journal of Philosophy* no. 11:159-171.

    "Aquinas presents his most complete exposition of the transcendentals in *De veritate* 1, 1, that deals with the question "What is truth?". The thesis of this paper is that the question of truth is essential for the understanding of his doctrine of the transcendentals.

    The first part of the paper (sections 1--4) analyzes Thomas's conception of truth. Two approaches to truth can be found in his work. The first approach, based on Aristotle's claim that

"truth is not in things but in the mind", leads to the idea that the proper place of truth is in the intellect. The second approach is ontological: Thomas also acknowledges that there is truth in every being. The famous definition of truth as "adequation of thing and intellect" enables him to integrate the two approaches. Truth is a relation between two terms, both of which can be called "true" because both are essential for the conformity between thing and intellect.

The second part of the paper (sections 5--7) deals with the manner in which Thomas gives truth a place in the doctrine of the transcendentals, and shows that his conception of truth leads to important innovations in this doctrine: the introduction of relational transcendentals and the correlation between spirit and being. If "truth" is transcendental, it must be convertible with "being". Sect. 6 discusses objections that Thomas advances himself to this convertibility.

Sect. 7 deals with a difficulty in his account of truth as a relational transcendental. Ontological truth expresses a relation to an intellect but the relation to the human intellect is accidental for the truth of things. Essential for their truth can only be a practical intellect that causes things. In this way, Thomas argues, the divine intellect relates to all things." (p. 159)

13. ———. 1992. "Ontology and Henology in Medieval Philosophy (Thomas Aquinas, Master Eckhart and Berthold of Moosburg)." In *On Proclus and His Influence in Medieval Philosophy*, edited by Bos, Egbert Peter and Meijer, Pieter A., 120-140. Leiden: Brill.

    "In this contribution I would like to investigate whether and in which way the opposition between ontology and henology took shape in medieval thinkers and was a subject of discussion. I will focus my inquiry on three Dominicans of different generations, namely, Thomas Aquinas, Master Eckhart and Berthold of Moosburg. The last one is the least well known of the three. Yet I want to begin with him, since we find in his work not only a justification but also a philosophical deepening of our question." (p. 122)

(...)

5. Conclusion

In my paper I first presented a medieval version of the question: "Metaphysics of Being or philosophy of the One?" - namely, the interpretation of Berthold of Moosburg. In his commentary on Proclus [*] he traces the opposition between ontology and henology to the different structures of thought associated with Aristotelianism and Platonism, which we have indicated with the keywords "transcendentality" and "transcendence" of the first. I then proceeded to use Berthold's model to elucidate the thought of Thomas Aquinas and Master Eckhart. To this analysis I would add three concluding observations.

First, we can ascertain that for Thomas and Eckhart the transcendental and transcendent approaches do not form an absolute opposition. Thomas posits a causal relation between God and the *maxime communia*. Transcendentals are to be traced to God as their cause. Eckhart identifies. God and the *transcendentia*. That which is most general is God.

Secondly, both in Thomas and in Eckhart the doctrine of transcendentals is found to have an integrating function. That is notable, because Berthold regards this doctrine as typical of the Aristotelian position. Now this theory certainly contains anti-Platonic elements, as we observed in Thomas, such as the emphasis on predicative generalness. But transcendentals have yet another aspect, which Berthold does not mention, an aspect which played an essential role in the development of the doctrine. Generally, the *Summa de bono* of Philip the Chancellor, written about 1230, is regarded as the first treatise on transcendentals. In the prologue of this work Philip observes that "being," "one," "true" and "good" are not only that which is most common but are sometimes also "appropriated," that is, treated as "proper" to something. For in Scripture these names are attributed pre-eminently to God, they are also divine names. (90) The attention given this second kind of naming is undoubtedly influenced by pseudo-Dionysius, who functions in Berthold as an eminent witness for the Platonic view. Thus we

see that in the context of the doctrine of *transcendentia* themselves the question must arise concerning the relation between the most general which goes through all categories, and the divine which surpasses all categories.

Thirdly, the medieval doctrine of transcendentals is pluriform. The solutions of Thomas and Eckhart diverge. Philosophically more important, however, is that in which they agree. Characteristic of philosophy is a transcending movement. It surpasses the concrete things of experience in quest of a first, from which reality can be understood. The answer to the question of what this first is can be sought in different directions. Berthold sketches two options: the first is the most general, which is the precondition for man's intellectual knowledge; or the first is the cause of the being of things but is not itself of the nature of the caused. Thomas and Eckhart represent a type of philosophical thought in which the two options in question are connected. That is their contribution to the debate about what philosophy should be: ontology or henology." (pp. 139-140)

15. ———. 1993. "Aquinas's Philosophy in its Historical Setting." In *The Cambridge Companion to Aquinas*, edited by Kretzmann, Norman, 12-37. Cambridge: Cambridge University Press.

"In this chapter Aquinas's attitude towards philosophy, his leading sources, and the aims of his philosophical interest are clarified in two complementary ways. First, his writings, which are very voluminous in spite of his relatively early death, will be placed within the historical context of the thirteenth century. An overview of his work and its philosophical relevance will be provided in connection with the most important intellectual developments in this period -- the rise of the university, the reception of Aristotle, and the conflict between the faculties (sections II-IV). Subsequently, Aquinas's view of philosophy and of its relationship to theology will be elaborated in a more systematic way (sections V-X)." (p. 14)

16. ———. 1995. "The Beginning of the Doctrine of the Transcendentals in Philip the Chancellor (ca. 1230)." In *Quodlibetaria. Miscellanea studiorum in honorem Prof. J. M. da Cruz Pontes Anno Iubilationis suae Conimbrigae MCMXCV*, edited by Santiago de Carvalho, Mario A., 269-286. Porto: Fundaão Eng. António de Almeida.

    A revised version of this study form the Chapter Three of *Medieval Philosophy as Transcendental Thought. From Philip the Chancellor (ca. 1225) to Francisco Suárez* (2012), pp. 109-133.

    "Our comparative inquiry does not allow any other conclusion than that Philip the Chancellor, in the introductory questions of his *Summa de bono,* really presents something new. His intention of going back into the "ground of thought" by reducing our understanding of questions to the *communissima* results in the earliest systematic formulation of a doctrine of the transcendentals. The doctrine is introduced as the philosophical answer to the dualism of Manichaeism. For the first time, Philip brings together four basic notions, "being", "one", "true", and "good", and investigates their mutual relations. But his account bears the marks of a first draft; it is rather terse and sometimes little explicit.

    Viewed from a historical perspective, his doctrine has an atypical aspect, insofar as it is centered in a metaphysics of the good. The context of the doctrine generally is a conception of

metaphysics, in which "being" is the proper subject of this science. Philip recognizes that *ens* is the first concept, but he does not say much about it. His interest concerns "the good", a notion that is richer than *(habundat)* "being". Two elements of Philip's doctrine were especially directive for subsequent discussions of the transcendentals. The first is his view of the twofold relation between the *communissima:* there exists a real identity between them -- they are convertible according to their supposits --, but they differ according to their concepts. The other element concerns the order of the most common notions, which is based on the notion of "indivision". It is somewhat paradoxical that Philip does not deal separately with *unum,* whereas the *ratio* of "one" determines his understanding of *bonum* and *verum*.

The *Summa de bono* was attentively read and frequently used, especially in the Franciscan milieu. The influence of Philip's account of the *communissima* is manifest in two works that were composed about twenty years after his *Summa,* namely, in the Franciscan *Summa theologica* attributed to Alexander of Hales, and in *De bono,* an early writing of the Dominican Albert the Great." (pp. 132-133)

18. ———. 1996. "Transcendental Thought in Henry of Ghent." In *Henry of Ghent. Proceedings of the International Colloquium on the Occasion of the 700th Anniversary of his Death (1293)*, edited by Vanhamel, Willy, 1-18. Leuven: Leuven University Press.

"From the account of the relation between *res* and *ens* it is possible to draw a number of conclusions pertinent to Henry's way of thought and his point of departure.

I. The first conclusion is that it is incorrect to say that in his thought there is an insoluble tension between the primacy of

being and that of thing. Henry describes the relation between the first concept, that of "thing" in the most general sense, and the second concept, that of "being," as a relation of foundation. "Something cannot have the character of being unless it first has the *ratio* of thing in the sense of *reor, reris,* in which the *ratio* of that being is founded *(fundatur)*. (46)

2. The firstness of *res* is not an a priori condition of knowledge, that is, a "transcendental form" in the Kantian sense. It can be an idle concept, such as an imaginary thing. The firstness is related, as appeared from the discussion of the seventh *Quodlibet,* to the way in which the human intellect is "moved" by reality. The relation of foundation between *res* and *ens* is worked out by Henry in two respects, from the angle of the theory of science and ontologically.

3. From the angle of the theory of science, the relation is that between the precognition of a quiddity and intellectual knowledge of it. At the first level, *res* in the sense of *reor, reris* is the most general concept, the *communissimum* of the seventh *Quodlibet*. At the second level, "being" is the first and most general concept. Henry's statement that *ens* is the first that is *scientifically* known *(scita)* must be understood in this precise sense.

In ontological respect, the relation between the first and the second concept is the relation between the still undetermined thing and the thing that is determined by its essence. The quidditative being however is not determined to this or that thing, to creator or creature, to substance or accident. It is understood, Henry states, under the aspect of being that is the subject of metaphysics. (47) Not the first mode of "thing" but the second mode is the point of departure of metaphysics.

The level of quidditative being is the level of the transcendentals. Henry's identification of *res, ratitudo* with *ens* is the answer to the question (see section 3, above) why *res* is not named in Henry's account of the transcendentals. It is the concept that lies at the basis of his doctrine of being and of the most general *intentiones*. In comparison to his predecessors, the novelty of Henry's doctrine is the central place he attributes

to Avicenna's notion of "thing." That *res, ratitudo* lies at the basis of Henry's doctrine explains the fact that he, otherwise than in the tradition, understands truth as a real relation to the exemplar.

Another distinctive feature of Henry's doctrine of the transcendentals is its being preceded by a more general concept, the cognition of "thing" in the broadest sense. For the clarification of this relation one may utilize a distinction that emerged in post-medieval philosophy. In a study of the concept of *res,* Ludger Oeing-Hanhoff has called attention to the fact that in the seventeenth century transcendental concepts were opposed to "super-transcendental" concepts, which are said not only of real but also of fictitious beings. Examples of these super-transcendental concepts are *cogitabile* and *opinabile.* (48) Henry's notion of *res* may be regarded as an anticipation of such concepts." (pp. 17-18).

(46) *Summa* 34.2 (ed. R. Macken, p. 175): "Et tamen rationem esse nihil potest habere, nisi prius habendo rationem rei dictae a reor, in qua fundatur ratio esse ilius."

21. ———. 1998. "Being and One: The Doctrine of the Convertible Transcendentals in Duns Scotus." In *John Duns Scotus (1265/6-1308). Renewal of Philosophy. Acts of the Third Symposium organized by the Dutch Society for Medieval Philosophy Medium Aevum (May 23 and 24, 1996)*, edited by Bos, Egbert Peter, 13-26. Amsterdam: Rodopi.

    "In the prologue of his commentary on the *Metaphysics*, Duns Scotus explains the name 'metaphysics' as *transcendens scientia*, that is, the science that is concerned with the *transcendentia*.(1) This explanation is indicative of the prominent place Scotus ascribes to the doctrine of the transcendentals, which was formulated for the first time in the *Summa de bono* of Philip the Chancellor that is datable about 1225. The connection between the object of first philosophy and the transcendentals is not in itself new, although the identity posed by Scotus is more radical than in his predecessors.(2) Yet it is no exaggeration to say that Scotus's philosophy marks a new phase in the history of the doctrine of the *transcendentia*.

    Scotus understands the concept 'transcendental' differently than his predecessors did. To thinkers of the thirteenth century, transcendental properties are *communissima*. 'Being, 'one,'true' and 'good' 'transcend' the Aristotelian categories because they are not limited to one of them but are common to all things. According to Scotus, however, it is not necessary that a transcendental as transcendental be predicated of every being; it is not essential to the concept *transcendens* that it has many inferiors. In his *Ordinatio* he determines the concept negatively: 'what is not contained under any genus' or 'what remains indifferent to finite and infinite'. (3) This definition makes possible a vast extension of the transcendental domain; the most important innovation is formed by the so-called disjunctive transcendentals, which are convertible with being, not separately but as pairs.

    The fact that the transcendental properties are not necessarily identical with the *communissima* is, I suspect, the reason why

the expression *transcendentia*, which occurs only sporadically in thinkers like Albert the Great, Thomas Aquinas and Henry of Ghent, gains the upperhand in Scotism and becomes the usual term.

About Scotus's doctrine of the transcendentals, in contrast to that of other medieval thinkers, we are well informed by Allan B. Wolter's pioneering study, *The Transcendentals and Their Function in the Metaphysics of Duns Scotus* (1946). Yet there are aspects of his doctrine that have thus far received little attention in scholarly literature. One of them is Scotus's treatment of the transcendentals 'one, 'true' and 'good,' which as such are convertible with being. In my contribution I want to show that with respect to the traditional transcendentals, too, Scotus breaks new ground and approaches critically the views of his thirteenth-century predecessors. Because he discusses most extensively the relation between being and one, I foals on this discussion." (pp. 13-14)

    "In 1597 Francisco Suarez published his *Disputationes Metaphysicae,* a work that had an incredible influence on seventeenth century philosophy. The most salient feature of his metaphysics is the central position of the *transcendentia* or *transcendentalia* (Suarez uses these terms as synonyms) : Disp. 2-11 deal with being, unity, truth and goodness. In comparison with Aristotle's conception of a science of being, metaphysics had acquired a « transcendental » character. As Suarez knew very well, this transformation had taken place in the Middle Ages.

    In the *Bulletin* 33 (1991), pp. 130-147, I analyzed the current state of research on the medieval doctrine of the transcendentals (= DT), which is essential for our understanding of philosophy in this period. In the present article I will assemble and discuss the relevant literature of the last decade, adding some older publications that were not mentioned in the first report." (p. 107)

Actes du Colloque internationale de Louvain-la-Neuve et Leuven 12-14 septembre 1998 organisé par la S.I.E.P.M.*, edited by Hamesse, Jacqueline and Steel, Carlos, 241-255. Turnhout: Brepols.

    "In the study of medieval philosophy it is customary to speak of the doctrine of the « transcendentals » (1). We have to realize, however, that this term comes from the vocabulary of modern philosophy. The medieval authors themselves speak of *transcendentia*. What is the significance of this fact ? What is in those names ? By way of introduction, we consider the two terms, « transcendent » and « transcendental », more closely in order to make clear that the interference of the conceptual language of modem philosophy with that of medieval philosophy is not coincidental. The difference in terminology points to a doctrinal evolution. (p. 241)

    (...)

    "By way of conclusion, let me sum up the main results of our inquiry into the genealogy of the *term transcendentia* (in the sense of transcendentals »).

    (i) The first philosophical account of a doctrine of the transcendentals is presented in Philip the Chancellor's *Summa de bono*. This work did not use the term *transcendentia,* but later in the thirteenth century Roland of Cremona, Albert the Great and Thomas Aquinas applied the term to a systematic doctrine of the *communissima*. The origin of the doctrine is not the Platonic-Augustinian idea of « transcensus », but rather the Avicennian tradition of primary notions.

    (ii) The term *transcendentia* already existed before the emergence of a systematic doctrine. Albert the Great's commentaries and some texts from the *Logica modernorum* strongly suggest that the term originates in logical discussions,

focussing on the distinctive nature of certain (« transcendental ») terms." (p. 255)

(1) I myself wrote a book with the title *Medieval Philosophy and the Transcendentals. The Case of Thomas Aquinas,* Leiden - New York, 1996.

29. ———. 2002. "'Res' as Transcendental. Its Introduction and Significance." In *Le problème des Transcendantaux du XIVe au XVIIe siècle*, edited by Federici Vescovini, Graziella, 139-155. Paris: Vrin.

"The history of *res* as a transcendental term is an intriguing one: it could be described in terms of a success-story: from "nothing" to "king". In the first account of a doctrine of the transcendentals, the *Summa de bono* written by Philip the Chancellor ca. 1225-28, *res* is not mentioned at all. In the prologue Philip states that « most common *(communissima)* are these : *ens, unum, verum, bonum »,* whose mutual relations he investigates in the next questions (1). *Res* is also absent in the expositions by Alexander of Hales, Bonaventure and Albert the Great: they restrict the number of transcendentals to the four that Philip had listed in his *Summa* (2).

Thirty years after Philip, however, the picture changes. In his account of the transcendentals in *De veritate* q. 1, a. 1 -- the most extensive one in the thirteenth century --, Thomas Aquinas incorporated *res* into the doctrine. He distinguishes six *transcendentia,* in the order *ens, res, unum, aliquid, verum* and *bonum* (3). Yet the role of the new transcendental *res* in Thomas and the Thomistic tradition in general remains somewhat marginal. A good illustration offers a treatise from the 14th century, the *Tractatus de sex transcendentibus,* composed by Franciscus de Prato (who was lector in Perugia from 1343-45). The treatise is an attempt to systematize the doctrine on the basis of Thomas's teachings. Contrary to the order in *De veritate, res* holds the last place in this work, and its treatment is substantially briefer than those of the traditional transcendentals (4).

But in the generation after Thomas Aquinas, *res* started, as we shall see a splendid career. A notable reaction against Thomas's

doctrine is Lorenzo Valla's philosophical mainwork *Dialecticae disputationes* (first version 1439) (5) In these disputations, Valla critically inquires into the basic notions of traditional philosophy, starting with the six primordial prin ciples *(primordia)* which the Aristotelians called *transcendentia*. They regarded these principles as the "princes of princes" or the "kings", but according to Valla a plurality of firsts is impossible ; only the monarchy is good. He will therefore investigate which among the six is the true *rex imperator,* that is, the most comprehensive *(capacissima)* notion (6).

Valla's conclusion is that only *res* can claim this title. It is evident *unum* is to be understood as "one *res", aliquid* as "another *res",* etc. But how about the notion *ens,* to which the Aristotelians give a place honour? In Valla's view, the term does not have a universal force of its own, but its force is wholly borrowed from another, namely from res (7) His arguments are marked by the (humanistic) linguistic turn; they are mainly philological. *Ens is* a participle that is to be resolved into a relative pronoun and a verb : *id quod est*. *Id* is to be resolved into *ea res,* so that finally *ens* can be reduced to *ea res que est* (8). When we say, for instance "the stone is being" *(lapis est ens),* the expression means "the stone is thing *(res)* which is". But does such a formula make any sense, when simpler and clearer to say "the stone is a *res"?* The words "that which is" cannot mean that the stone is "the thing that is", because only God "is" in the proper sense *(Exodus* 3,14). When therefore it is said of something else than God that it is "being" *(ens),* one uses an inappropriate way of expression (9).

The dignity of a transcendental was given only to *res* (10). To illustrate its position, Valla alludes to a story, reported by Herodotus in his *Historiae* (III, 86), a work that Valla translated into Latin. Six Persians contested the empire, but when Darius managed to become the king of the Persians, the other five descended from their horses and rendered hommage to the king. Similarly the other five transcendentals descend in order to honor *res* (11).

With respect to the remarkable history of "thing" I want to raise three questions: How did *res* come into philosophy, why did it enter philosophy and what did it bring about in philosophy, for our understanding of "reality" (12)?" (pp. 139-141 notes renumbered)

(6) Lorenzo Valla, *Retractatio* I, cap. 1,n. 9 (ed. Zippel I, p. 11) : « Ea numero sex dicuntur : "ens", "aliquid", "res", "unum", "verum", "bonum". Que quoniam sunt altiora principia et velut principum principes et quasi (ut istis videtur) quidam imperatores et reges (...), de his prius ordine ipso dicendum est 0. Cap. 2, n. 1 : « Iam primum non plures esse debere

imperatores ac reges, sed unum (...). Ergo quod ex his vocabulum, sive que vocabuli significatio sit imperator et rex, idest omnium capacissima (...), inquiramus ».

(7) Lorenzo Valla, *Retractatio* I, cap. 2, n. 12 (ed. Zippel I, p. 14) : « Quo palam est, omnem vim non naturalem habere, sed, ut sic dicam, precariam ac mutuo sumptam ». *Repastinatio* I, cap. 2, n. 9 (ed. Zippel II, p. 369) : « Quare quis non videt "ens" non habere suapte natura aliquam universalem vim, sed omnem mutuari ab illo 'res' ? ».

(8) Lorenzo Valla, *Retractatio I,* cap. 2, n. 11 (ed. Zippel I, p. 14) : « Igitur si "ens" ita resolvitur : "id quod est", et "id" resolvitur "ea res", profecto "ens" ita resolvetur : "ea' que est" ».

(9) Lorenzo Valla, *Retractatio I,* cap. 2, n. 12 (ed. Zippel I, p. 14-15) : « Quid enim sibi vult verbi causa "lapis est ens", id est "ea res, quae est' ? Quid faciunt ille voces "ea que est", cum sit et apertius et expeditius et satius, "lapis est res' ? (...) cum presertim absurda videatur oratio: "lapis est ea res que est", sive "lapis est res que est", quasi nihil sit proprie nisi solus lapis, aut quicquid erit illud, de quo dicemus ipsum esse "rem, que est" : que oratio de solo Deo propria est (...). Itaque cum de alia re quam de Deo dicitur quod sit "ens", inepte dicitur ».

(10) Lorenzo Valla, *Repastinatio* I, cap. 2, n. 12 (ed. Zippel II, p. 370) : « Quo fit ut solum sit "res", quod transcendentis dignitate donetur ».

(11) Lorenzo Valla, *Retractatio* I, cap. 2, n. 2 (ed. Zippel I, p. 11-12) : « Apud me autem ex his sex que nunc quasi de regno contendunt, non aliter "res" erit rex, quam Darius Hystaspis filius futurus rex erat ex illis sex Persis, qui regnum sorti permisere ». Cap. 2, n. 16 (ed. Zippel I, p. 15).

(12) There does not exist a comprehensive study on *res as* a philosophical concept. A good overview is offered by J. F. Courtine, *Res, in Historisches Worterbuch der Philosophie,* vol. 8, Basel 1992, p. 892-901. The volume *Res. Atti del III (Colloquio internazionale del Lessico intellettuale europeo,* ed. by M. Fattori and M. Bianchi, Rome 1982 (Lessico intellettuale europeo, 26), contains two interesting contributions : J.

Hamesse, *Res chez les auteurs philosophiques du XIIe et XIIIe siècles ou le passage de la neutralité a la spécificité* (p. 91-104); L. Oeing-Hanhoff, *Res comme concept transcendental et sur-transcendental* (p. 285-296). See also R. Darge, "Suarez" Analyse der Transzendentalien "Ding" und "Etwas" im Kontext der scholastischen Metaphysiktradition », *Theologie und Philosophie* 75, 2000, p. 339-358.

30. ———. 2002. "Truth in Thomas Aquinas." In *The Contemporary Debate on the Truth. Proceedings of the II. Plenary Session of the Pontifical Academy of St. Thomas Aquinas, Doctor Communis II, n. s.*, 50-54. Vatican City: Pontifica Academia Sncti Thomae Aquinatis.

"When I was invited to comment upon the theme of the section -'Truth in Thomas Aquinas' - I pondered on the best way of meeting the request. I asked myself: What is most important in his conception of truth? The following comments are designed to be an answer to that question and are based on Thomas's remarks in *De veritate*. As such, my answer does not pretend to be definitive, but is based on personal reflections that are indebted to on-going discussions in the German academic world to which I belong. That said, I would hope that my comments possess some general relevance to other students of Thomas. It is my view, that the salience of Thomas's view of truth can be appreciated by means of highlighting four substantive points.

1. First and foremost we should attend to Thomas's approach to the question *quid sit veritas*.

(...)

2. Having considered the transcendentality of the truth, Thomas then solicits an answer to the question as to what it is.

(...)

3. There is truth in things; 'truth' is also predicated of the intellect.

What, then, is the primary 'locus' of truth: the thing or the intellect?

In his reply to this question (*De veritate* q. 1, a. 2) Thomas advances the idea of the *analogy* of the true; this predicate is said of many things according to an order of priority and posteriority, that is, in relation to one (thing) that possesses the *ratio* of the predicate primarily. The classical application

of the doctrine of analogy concerns the term 'being'. The novelty of Thomas's thinking here is to be seens in his application of the analogy to the predicate 'true', in order to determine the relation between the truth of being and the truth of the intellect.

(...)

4. At *De veritate* 1,4 Thomas poses the question that dominates the first systematic account of truth in the history of philosophy, Anselm of Canterbury's work *De veritate*: 'Is there only one truth by which all things are true?' Anselm had answered this question affirmatively; there is only one truth in the proper sense (*proprie*), the divine truth. Thomas's reply is more differentiated: truth is properly found in the human or divine intellect; primarily in the divine intellect; secondarily in the human intellect. A human truth, too, is truth in the proper sense.

The power of truth manifests itself in its claim of having absolute force; it holds without respect of persons. Thomas gives a remarkable example of that in *his Commentary on the Book Job*. He interprets the dispute between Job and God after the model of a medieval disputation. But Thomas wonders whether such a disputation is appropriate, since God is far superior to any human being. Truth does not change because of the difference of persons.

When somebody speaks the truth, he cannot therefore be defeated, irrespective of the person, with whom he disputes (*cum aliquis veritatem loquitur, vinci non potest cum quocumque disputat*). (8)

In summary, four ideas are most important in Thomas's conception of truth: the transcendental character of truth; its relationality (truth as adequation); the primary 'locus' of truth

is the mind; and a human truth also is a truth in the proper sense. Seen together, they reflect the novelty of his philosophical thought and its relevance." (pp. 50-54)

"This essay examines Aquinas's analysis of the human desire to know, which plays a central role in his thought. (I.) This analysis confronts him with the Aristotelian tradition: thus, the desire for knowledge is a "natural" desire. (II.) It also confronts him with the Augustinian tradition, which deplores a non-virtuous desire in human beings that is called "curiosity." (III.) Aquinas connects the natural desire with the Neoplatonic circle motif: principle and end are identical. The final end of the desire to know is the knowledge of God. (IV.) Aquinas also connects the end of the natural desire to know with Christian eschatology, teaching that man's ultimate end is the visio Dei. This end, however, is "supernatural." (V.) Duns Scotus severely criticizes central aspects of Aquinas's account. (VI.) As a rejoinder to Scotus's objections, we finally consider Aquinas's view on the proper object of the human intellect."

    "This essay in honour of Carlos Steel examines a fundamental thesis behind the medieval metaphysics of the good, namely the «goodness of being» thesis, according to which everything that is is good. The basic text used is a *Quodlibet* disputed by the Parisian master Gerard of Bologna at the beginning of the fourteenth century, in which he discusses various determinations of the nature (*ratio*) of the good. This discussion reveals the difficulties to which the metaphysics of the good can lead: is it really the case that every being is good?"

44. ———. 2011. "Tino-logia: An alternative for Ontology?" In *Mots médiévaux offerts à Ruedi Imbach*, edited by Atucha, Iñigo, Clama, Dragos, König-Pralong, Catherine and Zavattero, Irene, 729-737. Turnhout: Brepols.

    "In our contribution to the *Festschrift* in honour of Ruedi Imbach the focus will be on the term « tino-logia ». The notion is not mentioned in the most complete philosophical dictionary of our time, the *Historisches Worterbuch der Philosophie,* which appeared in 13 volumes from 1971-2007. The vocable was suggested by French scholars two decades ago in their analysis of the genealogy of Western metaphysics and has since then found acceptance. « Tinology » is meant to characterize an alternative for the traditional ontological model of metaphysics. Influential was an observation made by Jean-Francois Courtine at the end of his monumental study on the metaphysics of Francis Suarez : « En rigueur de termes, l'ontologie classique-moderne devrait donc plutot être caracterisée comme une 'tinologie' »(1). The emergence of this neologism and its historical place is the first thing that calls for attention." (p. 729)

Kommentierte Bibliographie Jan Aertsen Beitrag zur Geschichte der Transzendentalen Etüden

Aufsätze

Abkürzungen: DT = Lehre der Transzendentalen

1. Aertsen, Jan A. 1985. "Der wissenschaftstheoretische Ort der Gottesbeweise in der *Summa Theologie* des Thomas von Aquin." In *Mediaeval Semantics and Metaphysics. Studies Dedicated to L. M. de Rijk, Ph. D. on the Occasion of his 60th Birthday*, edited by Bos, Egbert Peter, 161-193. Nijmegen: Ingenium Publishers.
2. ———. 1986. "Transzendental versus Kategorial: die Zwiespaltigkeit von Thomas 'Philosophie'? Eine Kritische Studie." *Vivarium* no. 24:143-157.
3. ———. 1987. "Ockham, ein Transzendentalphilosoph? Eine kritische Diskussion mit G. Martin." In *Ockham and Ockhamists. Acts of the Symposium organized bt the Dutch Society for Medieval Philosophy Medium Aevum on the occasion of its 10th anniversary (Leiden, 10-12 September 1986)*, edited by Bos, Egbert Peter and Krop, Henri A., 3-13. Nijmegen: Ingenium Publishers.

   [*This study is a discussion of three contribution by Gottfried Martin.*]

   An outstanding place in the history of the Doctrine of the Transcendentals was attributed to William of Ockham by a

study of the German scholar G. Martin (37). His thesis is that Ockham's denial of the reality of the categories except that of substance and quality must be understood as « transcendental philosophy ». Ockham regarded quantity and relation as general conditions that do not add a distinct reality to things, that is, as « transcendental being ». In Martin's later publications (38 and 39), we encounter again the view that Ockham was a vital link in the tradition of transcendental philosophy from Aristotle's *Metaphysics* to Kant, Martin's Ockham-interpretation has hardly been discussed." (from J. A. Aertsen, *Bulletin de Philosophie Médiévale*, 33 1991, p. 138).

4. ———. 1988. "Die Lehre der Transzendentalien und die Metaphysk. Der Kommentar von Thomas von Aquin zum IV. Buch der *Metaphysica* ." *Freiburger Zeitschrift für Philosophie und Theologie* no. 35:293-316.

"In still another, more fundamental, respect the introduction of Aristotle's works in the West was of importance. The reception of his *Metaphysics* led to independent reflection on the question of the proper subject of this science. Not without reason, L. Honnefelder, « Der zweite Anfang der Metaphysik. Voraussetzungen, Ansatze und Folgen der Wiederbegriindung der Metaphysik im 13./14. Jahrhundert », in J.P. Beckmann e.a. (ed.), *Philosophie im Mittelalter. Entwicklungslinien and Paradigmen*. Hamburg, 1987, pp. 165-186, has characterized this development as « the second beginning of metaphysics ». It is noteworthy that the Middle Ages did not adopt the theological conception of metaphysics that prevailed among the Greek commentators on Aristotle. In the commentaries of Thomas Aquinas and Duns Scotus we find a decidedly « ontological » view. Against the background of this conception of metaphysics, the interest in the transcendentals becomes

understandable, for they are the universal properties of being. Metaphysics becomes *scientia transcendens* -- the term appears for the first time in Scotus' Commentary on the *Metaphysics* (prol., n. 5)." (from J. A. Aertsen, *Bulletin de Philosophie Médiévale*, 33 1991, p. 132).

   "A by medieval standards extensive systematics of DT is presented by Thomas Aquinas in *De veritate,* qu. 1, art. 1. This text includes an important new element, namely, the introduction of relational transcendentals. Through this innovation Thomas departs from Philip the Chancellor's version of DT. A transcendental is not necessarily expressed by a negation, an indivision, as Philip meant, but can also be determined by something positive, a relation. Thomas understands the transcendentals « true » and « good » in relation to the two faculties of a spiritual substance, that is, to intellect and will. Although we possess various studies concerning some aspects of Aquinas's DT, the general significance of this doctrine for his philosophy seems to be underestimated." (from J. A. Annotated Bibliography of John P. Doyle (1966-2016)

Introduction

John Patrick Doyle (September 14, 1930 - July 2, 2016) was Professor Emeritus of philosophy at Saint Louis University and Distinguished Professor of Philosophy at Kenrick-Glennon Seminary in Shrewsbury, Missouri; his main area research was late medieval philosophy; he has published eighth volumes of translations from Latin, two volumes of Collected Studies and over fifty articles, essays, and encyclopedia entries.

Abbreviations:

CSS = John P. Doyle, *Collected Studies on Francisco Suárez S.J. (1548-1617)*. Edited by Victor M. Salas, Leuven: Leuven University Press 2010

Complete bibliography

1. Doyle, John Patrick. 1966. *The Metaphysical Nature of the Proof for God's Existence According to Francis Suárez S.J.*, University of Toronto.

   Unpublished Ph.D. Dissertation.

2. ———. 1967. "Suárez on the Reality of the Possibles." *The Modern Schoolman* no. 44:29-48.

Reprinted as Chapter 2 in *CSS*."The first of twelve essays which follow the introduction ("Suarez on the Reality of the Possibles") agrees with Etienne Gilson's view of Suárez as an heir to the Avicennian doctrine of the possibles, while it adds the refinement that a possible here equates with a not-impossible or with a non-self-contradictory essence. The key to this is provided by the Scotist doctrine that "What is not non-being, is being" *(Quod non est non-ens est ens)*. The main distillate from Suárez's teaching is a lowest common denominator concept of being which is found everywhere from mere possibles to the most actual being of God." (*CS* p. XI).

"This article shows that for Francisco Suarez the core reality of possible beings is their non-self-contradiction. Their intrinsic claim to inclusion under the common concept of Being and the Suarezian analogy of Being resides in the fact that as non-repugnant they are not non-being. So understood, they are actually nothing but still more than mere beings of reason. Of themselves, they are eternally true and apt to be known, even if there were no God. Far beyond this, their reality is such that if they were not what they are, there would be no God and, '*a fortiori*', none of the actual creatures which depend upon him."

3. ———. 1969. "Suárez on the Analogy of Being (First part)." *The Modern Schoolman* no. 46:219-249.

Reprinted as Chapter 3 in *CSS*. The next essay ("*Suarez* on the Analogy of Being") presents the ground plan of Suarezian metaphysics and gives a more detailed account of Suárez's thoughts on the formal and objective concepts of being, as well as on being as a participle and being as a noun. Coupled with this is his identification of the subject of metaphysics with the *one common objective concept of being as a noun*. This in turn is identified with what is *apt to exist* - what is non-contradictory of itself and what importantly excludes beings of reason. The basic Suarezian analogy of intrinsic attribution presupposes this common concept and works within it. The essay goes on to show the main program of Suárez's metaphysics, which is to treat the general concept of being and then to follow its internal demand for partition into God and creatures. In this, real being for Suarez is *one,* but neither a

genus nor *simpliciter simplex* in the manner of Scotus. In creatures as well as in God, its common denominator is aptitude for existence in the sense of intrinsic non-contradiction. This marks the difference between possibles and beings of reason and reduces real being in the widest sense to that which is "not nothing." Then despite the gradation in their analogous sharing of being, God and creatures, including mere possibles, are equal in their lack of intrinsic contradiction." (*CS* p. XII).

4. ———. 1969. "Suárez on the Analogy of Being (Second part)." *The Modern Schoolman* no. 46:323-341.

   Reprinted as Chapter 3 in *CSS*.

   "Francis Suárez doctrine of the analogy of being requires that one common character of being be found intrinsically but unequally, according to an order of prior and posterior, in those inferiors of which the one, common, objective concept of being as a noun is predicated.

   Problems are that the requirement of intrinsicality has forced Suarez to give a shadow reality to merely possible things while the need for inequality has militated against the all important unity of the common character or concept of being."

5. ———. 1972. "Heidegger and Scholastic Metaphysics." *The Modern Schoolman* no. 49:201-220.

   Reprinted as Chapter 4 in *CSS*. "The third essay ("Suarezian and Thomistic Metaphysics before the Judgment of Heidegger" - which is a change from the original title, "Heidegger and Scholastic Metaphysics"), contends that Heidegger's criticism of medieval metaphysics is aimed directly at the Avicennian-Scotistic-Suarezian metaphysics rather than at that of St. Thomas Aquinas. While written from a Thomistic viewpoint, for present purposes this essay highlights the difference between the Suarezian science of being as the non-contradictory and the Thomistic metaphysics of *esse*. For the Suarezian metaphysics, the essay notes nuances and raises questions linked with: the Scotistic equation of being and thinkability; the rooting of thinkability in non-contradiction;

using the *passiones disjunctae entis* as the basis of a progression in metaphysics; justifying any progression in a metaphysics of the non-contradictory; and Heidegger's rejection of any speech-governed metaphysics as well as his accusation of *"Seinsvergessenheit."* This essay might be improved by an addendum that would take into account Heidegger's famous Marburg lectures, which were not available at the time I composed my original text." (*CSS* p. XII).

"Regarding Heidegger's appraisal of Scholastic metaphysics, we have asked: (1) is he right about the sort of metaphysics represented by Scotus and Suarez? and (2) is he correct in equating all medieval metaphysics with this type of Scotistic-Suarezian metaphysics?

We have answered the first question in the affirmative and have replied negatively to the second."

8. ———. 1973. "*Ipsum Esse* as God-Surrogate: The Point of Convergence of Faith and Reason for St. Thomas Aquinas." *The Modern Schoolman* no. 50:293-296.

   "Since, for St. Thomas Aquinas, "cognita sunt in cognoscente secundum modum cognoscentis," even revealed truths must be phrased in terms which we can naturally understand. But the very best term which we can naturally muster for God-talk is "ipsum esse," a term to which we come across the medium of a demonstration "quia" from the being of creatures. As such, it has obvious limitations.

   It does not supply us with an immediate knowledge of the divine reality, but it is, instead, a surrogate for God who remains unknown in himself. This surrogate then is employed in theology not only at the level of "de Deo uno" but also at the very heart of "de Deo trino". As so employed, it is patently the point of convergence of faith and reason for St Thomas."

9. ———. 1974. "Saint Bonaventure and the Ontological Argument." *Medieval Studies* no. 52:27-48.

   "For St Bonaventure the self-evident truth of God's existence can be shown forth by 'intellectual exercises' like that of St Anselm.

   Such exercises are not simple-minded transits from the ideal to the real order. Rather they are based upon a sophisticated metaphysics; they involve the experience of common intelligibility.

   With Plato, they accept the 'really real' character of that intelligibility. Implicitly, they also accept a plurality and a one-way hierarchy of intelligibles leading up to a 'First'. Turning then precisely upon the unprincipiated nature of this 'First', they spread before us its absolute necessity both in reality and for thought."

10. ———. 1979. "Some Thoughts on Duns Scotus and the Ontological Argument." *New Scholasticism* no. 53:234-241.

    "Duns Scotus has substituted the notion of a "highest thinkable" for Anselm's "that than which a greater cannot be thought." For Scotus, the touchstone of "thinkability" is non-contradiction. He resumes the non-contradictory and therefore the thinkable character of God. He then shows God's existence in two steps: (1) from thinkability to essential reality, and (2) from essence to existence. The first step involves Scotus in some inconsistency and also comes close to making man's mind the very rule of reality. The second step entails a confusion of internal possibility with total possibility, which ordinarily, beyond internal possibility, includes an external potency."

11. ———. 1982. "The Suarezian Proof for God's Existence." In *History of Philosophy in the Making. A Symposium of Essays to Honor Professor James D. Collins on his 65th Birthday*, edited by Thro, Linus J., 105-117. Washington: University Press of America.

    Reprinted as Chapter 5 in *CSS*.

"Essay four after the introduction ("The Suarezian Proof for God's Existence") pursues the entailment of the common concept of being as a noun as it is divided into God and creatures. Fundamentally, the essay argues that Suárez's metaphysical proof for God's existence, which is the pivotal point of his metaphysics and whose Avicennian roots he has expressly embraced, amounts to an ontological argument of the type later criticized by Kant." (*CSS* p. XII).

12. ———. 1984. "Prolegomena to a Study of Extrinsic Denomination in the Work of Francis Suárez S.J." *Vivarium* no. 22:121-160.

    Reprinted as Chapter 6 in *CSS*. In the next essay (*"Prolegomena* to a Study of Extrinsic Denomination in the Work of Francis Suarez, S.J."), I looked to discover in Suárez's use of *extrinsic denomination* rules which might adumbrate the Kantian *a priori*. While I found that in regard to extrinsic denomination Suarez did observe conventions which I was able to catalog, these did not in any clear way anticipate Kant. Indeed, I may have discovered the opposite. For although, on its face, extrinsic denomination might seem to be simply a matter of names imposed by us on things, my study showed that Suarez thought it to be a feature of things themselves, anterior to any operation of ours. In this, it clearly stood on the side of real being as opposed to being of reason." (*CS* p. XII-XIII).

    "At times, extrinsic denomination for Suarez seems close to, if not synonymous with, a mere naming from the outside. But at other times, it is regarded as a feature of things themselves. In this article, there is some description and some examples of extrinsic denomination according to Suarez. Following this, are some of his reasons for and sources of such denomination. Special attention is paid to his use of extrinsic denomination in connection with the properties and categories of being. Finally, there are listed conventions and other items observed in Suarez's use of extrinsic denomination."

13. ———. 1984. "The Unborn as Person." In *Restoring the Right to Life: The Human Life Amendment*, edited by Bopp, James Jr.,

14. ———. 1985. "The Conimbricenses on the Relations Involved in Signs." In *Semiotics 1984*, edited by Deely, John, 567-576. New York: University Press of America.

"*Conimbricenses* is the name of a group of Jesuit professors of philosophy at the University of Coimbra during the latter half of the sixteenth century. It is also the name given to a five volume set of philosophical commentaries on Aristotle which they edited and published between 1592 and 1606. The last volume to appear was a Logic entitled: *Commentarii in universam dialecticam Aristototelis* (Friedrich Stegmuller, *Filosofia e teologia nas universidades de Coimbra e Evora no seculo XVI*, Coimbra, Universidade de Coimbra, 1959 pp. 95-96).

(...)

The particular work, with which I am now concerned, is their commentary on Aristotle's *De Interpretatione*. More precisely, my concern is with the first chapter of that commentary. Entitled *De signo* (On the Sign), it runs over 60 pages in quarto. While some treatment of signs at this place in Aristotelian commentary was common among the Scholastics, these pages of the *Conimbricenses* represent, as far as I know, the first really major treatise on signs as such which we have from the Scholastic period. The table of contents of the chapter gives a pretty fair indication of its character.

Principal issues raised are four: (1) On the nature and conditions common to signs; (2) On the divisions of signs; (3) On the signification of spoken words (*voces*) and of writing; (4) Whether some concepts in our minds are true or false, and others devoid of truth and falsity. Along the way there are sub-questions about the essence of a sign, the possibility of something being a sign of itself, signs as actual or aptitudinal, the relations involved in signs, *et cetera*. Although this commentary is a work of logic, the *Conimbricenses* explicitly aware of further epistemological, psychological, metaphysical, and theological questions which can be raised with regard to signs and signification. At the same time, they also display a

remarkable understanding of the breadth and scope of semiotics itself.

Some of the items which they have touched on different ways are the following: language, syntactical speech, laughing, nodding, coughing, persons talking in sleep, persons lying, persons emitting words without thought. They consider the signification of negative words, of syncategorematic words such as "if", nonsense words like "Blictri", and words like "chimaera" and "goat-stag" to which no real things correspond. They are interested in the signs involved in writing and reading, especially voiceless reading. Coupled with a discussion of the physiological bases of speech and hearing, they treat the relation of deafness and an inability to speak or communicate." pp. 567-568.

15. ———. 1987. "Suárez on Truth and Mind-Dependent Beings: Implications for a Unified Semiotic." In *Semiotics 1983*, edited by Jonathan, Evans and Deely, John, 121-133. New York: University Press of America.

16. ———. 1987. "Suárez on Beings of Reason and Truth (First part)." *Vivarium* no. 25:47-75.

    Reprinted as Chapter 7 in *CSS* and as Chapter 2 in *BBK*.

    "The sixth essay after the introduction ("Suárez on Beings of Reason and Truth"), against a background view of truth as a function of being, considers Suárez's response to the question of truth where there is no real being independent of the mind. If truth consists in a conformity between the mind and reality, how can there be any truth where there is no independent reality? Most of all, how can there be any truth where something would be impossible of realization? In last analysis, Suárez's reply turns upon the significative cast of the words involved in the expression of beings of reason, especially so called impossible objects. Because, unlike mere nonsense words such as *"Blytiri"* or *"scyndapsus,"* words like *"goat-stag"* or *"chimera"* have signification, there is in their regard, and in regard to the beings of reason they express, the possibility of some statements being true even as others are false." (*CSS* p. XIII).

17. ———. 1987. "Peter John Olivi on Right, Dominion, and Voluntary Signs." In *Semiotics 1986*, 419-429. New York.

18. ———. 1988. "Suárez on Beings of Reason and Truth (Second part)." *Vivarium* no. 26:51-72.

    Reprinted as Chapter 7 in *CSS* and as Chapter 2 in *BBK*.

    "From Parmenides on, it has been a commonplace in the Western philosophical tradition that truth is a function of being. One need only remember the general Platonic doctrine of Forms, which are at once 'really real' and the locus of intelligibility of truth. Francis Suarez has passed on the common teaching of the Schoolmen that truth is threefold. (1) There is a truth in words, in writing, and in what he calls 'non-ultimate concepts' which is termed truth 'in signifying'. (2) There is a truth in the intellect knowing things, which is called truth 'in knowing'. And (3) there is a truth in things, which is a truth 'in being'."

    "This is the completion of a two-part article which considers Suarez's reply to the question of truth where there is no real being independent of the mind. That reply turns upon the significative cast of the words expressing beings of reason, especially "impossible" beings. Because such words, unlike nonsense syllables, have signification, there is in their regard, and in regard to the beings of reason they express, the possibility of some statements being true even as others are false."

19. ———. 1988. "Thomas Compton Carleton S.J.: On Words Signifying More Than Their Speakers or Makers Know or Intend." *The Modern Schoolman* no. 66:1-28.

    "For Carleton (1591-1666) words have power to signify independent of their speakers. Moreover, while first wordmaker may control the extension of his words, he cannot control their intension. Words can signify something more clearly to a hearer than that same thing was understood by the one who first established a word to express it. Carleton clearly demarcates the roles of speakers and wordmakers and

foreshadows current concerns about extension versus intension of words."

20. ———. 1990. "*Extrinsic Cognoscibility*: a Seventeenth Century Supertranscendental Notion." *The Modern Schoolman* no. 68:57-80.

    Reprinted as Chapter 3 in *BBK*.

    "This essay explores the area of intentionality in late Scholasticism. For Suarez the subject of metaphysics is 'real being' which is transcendental but exclusive of beings of reason. After Suarez, the Calvinist Clemens Timpler says that the subject of metaphysics is 'the intelligible,' which encompasses both real and unreal, even impossible, beings. Also for 17th century Jesuit logicians what seems common to real beings and beings of reason, including impossible objects, is 'cognoscibility.' More precisely, this is 'extrinsic cognoscibility,' which is labeled 'supertranscendental.' In Timpler and the Jesuits I see anticipations of Meinong's *Gegenstandstheorie* (Theory of objects)."

21. ———. 1991. "Suárez on the Unity of a Scientific Habit." *American Catholic Philosophical Quarterly* no. 65:311-334.

    Reprinted as Chapter 8 in *CSS*. The next essay ("Suárez on the Unity of a Scientific Habit") explores Suárez's reply to the question: how is a science such as geometry somehow undivided in itself and divided off from arithmetic, or from other speculative sciences such as physics and metaphysics? Is there a basis in things themselves for such indivision and division? Or is it something entirely or in part supplied by the knower? Connected with this is a question about the growth of a habit of science. Suárez's view is that any collection of conclusions making up a scientific habit will have at best only an artificial unity but nevertheless one which in some way rests on an aptitude in things to be so unified. However, as the essay shows, this view plainly raises as many questions as it answers, and Suárez's admitted perplexity is understandable." (*CS* p. XIII).

22. ———. 1991. "Francisco Suárez: On Preaching Gospel to People Like the American Indians." *Fordham International Law Journal* no. 15:879-951.

    Reprinted as Chapter 10 in *CSS*. The ninth essay after the introduction ("Francisco Suarez: On Preaching the Gospel to People like the American Indians") was written in commemoration of the 500th anniversary of the European discovery of America. As its title suggests, the essay considers Suárez's doctrine on evangelization against the background of a new situation, a new opportunity, and new obligations for European Christians. On the basis of related passages and themes in his Opera omnia it attempts to fathom some of his deepest thoughts with respect to the personhood and rights of the American Indians in face of Christ's last command that his followers teach all nations. Along the way, it presents a fairly extended study of Suárez's views on the basic equality of all human beings, the character of human society (domestic and especially political), morality and law (Eternal, natural, and civil, including the "law of nations" [jus gentium]), sovereignty, jurisdiction, war and conquest, Church and state, as well as a host of other issues." (*CS* p. XIV).

23. Doyle, John Patrick, and Charron, William C. 1993. "On the Self-Refuting Statement 'There is no Truth'. A Medieval Treatment." *Vivarium* no. 31:241-266.

    "It is commonly known that 14th and 15th century logicians were deeply interested in the properties of self-referring statements.

    Perhaps, however, it could be better known that medieval theologians were also interested in them. In this regard, one important discussion centered around the proposition "There is no truth" ("Nulla Veritas est"). Construed as a universal negative about an entire class of items of which it itself is a member, it is partially self-referring. And just because it is self-referring it also seems to be self-refuting: if it is true, then it is false; if it is false, then something is true. Thus, its contradictory is necessarily true, namely "There is some truth".

The history here goes back many centuries through a line of theologians and ultimately to St. Augustine. (1) Following him, St. Anselm, St. Bonaventure, and others claimed to have found in the self-refutation of the denial of truth a foundational premise adequate

to support other claims about God and immortality. But this was not without opposition from theological colleagues and successors, including Aquinas, Scotus, and in the post medieval period, Cajetan, and Toletus. Criticism came at either of two points: the critics

objected(a) that the self-referring character of the denial of truth does not entail the truth of what is claimed, or (b) that the truth which the self-refutation is purported to establish is not itself sufficient to found the metaphysical constructions it is further claimed to found.

An unraveling of this ancient debate -- beginning our story with Augustine in the 4th century and ending it with Toletus in the 16th reveals the appreciation among these theologians of ever more powerful tools of logical analysis, tools that have proven to be of lasting use." (pp. 241-242)

(1) Interest in self-refutation is common among ancient Greek and Hellenistic philosophers. SextusEmpiricus provides a notable statement of the alleged self refutation of the proposition in which we are interested. Sextus Empiricus, Against the Logicians , I 398-9, II 55, ed. and tr. R.G. Bury, Loeb Classical Library , Cambridge 1935, II, 213, 265. "Now as to those who assert that all things are false,... they are confuted. For if all things are false, the statement 'All things are false,' being one of the 'all things', will be false. And if the statement 'All things are false' is false, its contradictory, 'Not all things are false,' will be true. Therefore, if all things are false, not all things are false." (p. 265) For the history of the notion of self-refutation, see M. F. Burnyeat, 'Protagoras and Self- Refutation in Later Greek Philosophy', in: *The Philosophical Review*, 85 (1976), 44-69.

24. Doyle, John Patrick. 1994. "Poinsot on the Knowability of Beings of Reason." *American Catholic Philosophical Quarterly*

no. 68:337-362.

"John Poinsot (a.k.a. Joannes a sancto Thoma (1589-1644) was heir to a common division of beings into these that are in themselves real and those which are entirely dependent upon human reason. Those division went back to Aristotle's split between being as found in the categories and being as true. In the Middle Ages and thorough the period of the Spanish Revival, it was found, *mutatis mutandis,* in Averroes (d. 1198), St. Thomas Aquinas (1225-1274), Henry of Ghent (1217?-1293), John Duns Scotus (1266-1308), Francisco Suárez (1548-1617), and just about everyone else in the Scholastic tradition.

One of the very few exceptions that I know to this general rule was Francis of Mayronnes, O.F.M. (d. ca. 1325), who denied the existence of beings of reason. Not only an heir, Poinsot himself embraced and transmitted the common view. For him, beings were either real or rational. Real beings (*res extra animam*) were those which exist, or can exist, independently of the human mind and which belong in the Aristotelian categories. Rational beings, or beings of reason, in the sense which contrasts with this, were those which do not belong to the categories, and which cannot exist outside human understanding. That there are such beings of reason was not for Poinsot a matter of doubt."

25. ———. 1995. "Another God, Chimerae, Goat-Stags, and Man-Lions: a Seventeenth Century Debate About Impossible Objects." *The Review of Metaphysics* no. 48:771-808.

Reprinted as Chapter 4 in *BBK* and as Post-Scriptum in: Victor M. Salas (ed.), *Hircocervi & Other Metaphysical Wonders. Essays in Honor of John P. Doyle*, Milwaukee, Marquette University Press, 2013, pp. 329-367.

"This article concerns a 17th Century debate over whether there are self-contradictory impossible objects of understanding or whether there is no intellectual object which is not some actual or possible being. The debate, which has its roots in the Greek and Scholastic traditions, is presented especially between two Jesuits: Thomas Compton Carleton and John Morawski, respectively, a proponent and an opponent of impossible

objects. The article itself does not take sides in the debate, but, inasmuch as he wrote later, Morawski is presented as espousing his own view and answering arguments in support of Carleton's position."

26. Suárez, Francisco. 1995. *On Beings of Reason (De Entibus Rationis). Metaphysical Disputation LIV by Francisco Suárez.* Milwaukee: Marquette University Press.

    Translated from the Latin with an introduction and notes by John P. Doyle.

    "Suárez's *Disputationes metaphysicae* is to this day the most comprehensive and systematic treatise on metaphysics written from an Aristotelian perspective. It addresses every metaphysical issue raised by medieval and Renaissance scholastics and discusses the views of all important figures who preceded Suárez. As such it is a treasure-trove not only for the metaphysician but also for the historian and has exercised enormous influence on early modern philosophy, particularly in Continental Europe. (...) The Disputation deals with mental entities and, therefore, contains relevant discussions to the philosophy of mind and the ontological status of intensional objects."

    Jorge J. E. Gracia - State University of New York at Buffalo.

    "In a finely wrought and philosophically intelligible translation of this 54th Disputation of Suárez, John P. Doyle has documented with care the ancient Greek and Medieval sources of Suárez's discussion, its influence upon many hitherto unknown late Scholastic writers and the relevance of Suárez's intentionality theory to such prominent figures in early, middle and late Modern thought as Descartes, Berkeley, Leibniz, Kant, Brentano, Husserl, Meinong, B. Russell, Heidegger and others."

    Norman J. Wells, Boston College.

27. Doyle, John Patrick. 1996. "Silvester Mauro, S.J. (1619-1687) on Four Degree of Abstraction." *International Philosophical Quarterly* no. 36.

    Reprinted as Chapter 7 in *BBK*.

"Mauro says there are four degrees of abstraction. The lowers is 'physical', abstracting from material singulars. The second is 'mathematical', abstracting not just from singulars, but also from sensible and changeable matter as such. A third is 'metaphysical', abstracting from all matter and opening on to real immaterial being. Peculiar to Mauro and marking a departure from orthodox Aristotelianism is the last and highest degree, which is 'logical'. At this level, we consider intentional being -- which he says is more immaterial than real being, including that studied by metaphysics, in as much as 'being known' is identical with being elevated from matter."

28. ———. 1997. "Between Transcendental and Transcendental: The Missing Link?" *The Review of Metaphysics* no. 50:783-815.

    Reprinted as Chapter 8 in *BBK*.

    "Medieval transcendentals are on the side of things while Kantian transcendentality is on the side of the knower. Is there a link between the two in the Seventeenth-Century scholastic understanding of 'supertranscendentals'? In the century before Kant, scholastic supertranscendental being was primarily identified with extrinsic intelligibility and regarded as a contribution of the knower. It was said to be the same as 'the object as such' (objectum ut tale). This seems very close to 'der Gegenstand uberhaupt' which Kant has called a 'missing concept' above the dichotomy of the possible and the impossible."

30. ———. 1997. "Vitoria on Choosing to Replace a King." In *Hispanic Philosophy in the Age of Discovery*, edited by White, Kevin, 45-58. Washington D. C.: Catholic University of America Press.

    "Anyone familiar with the development of Hispanic philosophy in the Age of Discovery must be aware of the importance of Francisco de Vitoria (c. 1492-1546). Perhaps, however, that person will be surprised to hear that Vitoria, the holder of the

Catedra de Prima in theology at the University of Salamanca, never published any of his own works. Instead, it was through his teaching that, during and after Spain's golden century, Vitoria influenced countless disciples, especially in areas of ethical and political thought. There are estimates of up to one thousand auditors attending some of his lectures. He himself in one place comes close to confirming that figure. But more than this, in the decades that followed, almost all the great moralists of the age looked back to Vitoria as their foremost authority. Their names read like the honor roll of Spanish and Counter-Reformation Scholasticism. But also outside Spain and Catholic Scholastic circles, in the dawning age of international jurisprudence, Vitoria exercised patent influence on important figures such as Hugo Grotius (1583-1645) and Alberico Gentili (1552-1608). Looking at all his influence and at the dearth of work published while he lived, it was with perfect truth that Domingo Bañez (1528-1604) could refer to him as "another Socrates"."

32. Vitoria, Francisco de. 1997. *On Homicide and Commentary on Summa Theologiae IIa-IIae Q. 64 (Thomas Aquinas)a*. Milwaukee, Wisconsin: Marquette University Press.

    "A. "Relection."

    Literally a "re-lecture," the term "relection" refers to the practice in which professors at Salamanca were required to represent in a formal manner some ropic treated in their lecture courses each year. In ways a successor to the medieval *Quaestio quodlibetalis*, a Salamanca relecrion was open ro the whole university community. Unlike its medieval forerunner, however, the relection took the form of a set speech, rather than a question and reply exchange between the master and his students or those in attendance. The custom was for the master to prepare his own manuscript and read from it for the space of two hours, measured by a water clock. At Salamanca the pracnce went back ro 1422 when it was sanctioned by Pope Martin V (pope: 1417-1431}.

After Viroria, 1t was continued by Domingo Soto (1494-1560) and others." (p. 14, notes omitted)

33. Doyle, John Patrick. 1998. "The 'Conimbricenses' on the Semiotic Character of Mirror Images." *The Modern Schoolman* no. 76:17-31.

"Seneca distinguished two theories about images in a mirror. The first is that we see 'simulachra' and through their mediation we pass to things. The second is that in the mirror we immediately see things. The 'Conimbricenses', Jesuits at the Sixteenth-Century University of Coimbra, regarded mirror images as signs and, aware of Seneca's distinction, they favored the second theory. In so doing, they contrasted formal and instrumental signs and thought mirror images to be formal signs. All of this put them at odds with Thomas Aquinas who apparently favored Seneca's first theory. It also puts them at odds with the present-day semiotician, Umberto Eco, who says that mirror images are not signs."

Translated in Russian by Lada Tsipana as: 'Koimbrskie scholastiki o semioticheskom charaktere zerkalnich otrazhenij', *Verbum* (St. Petersburg Society of Philosophy), 5, pp. 93-109.

34. ———. 1998. "Supertranscendental Nothing: A Philosophical Finisterre." *Medioevo* no. 24:1-30.

Reprinted as Chapter 9 in *BBK*.

"For the innocent of geography, let me first explain that Finisterre is a cape in northern Spain at the westernmost point of the Spanish mainland. It marks an end of Europe; beyond Finisterre there is only the ocean. As readers of this essay may see, 'supertranscendental nothing' is arguably a philosophical Finisterre which was a farthest point of speculation reached by European philosophers in the seventeenth century. But what readers also may see is that this apparently ultimate item of seventeenth-century European philosophy was possibly pushed

even farther out, at what might then to some have seemed beyond Spain and Europe the very end of the earth itself, in Santiago, Chile [by Miguel Viñas, S. J. (1642-1718)]."

35. ———. 1998. "Supertranscendental Being: On the Verge of Modern Philosophy." In *Meeting of the Minds. The Relation between Medieval and Classical Modern European Philosophy*, edited by Brown, Stephen F., 297-315. Turnhout: Brepols.

"As every historian of philosophy knows, Aristotle thought the subject of metaphysics was «being insofar as it is being» and from this subject he excluded «being as true». Centuries after Aristotle, Francisco Suarez, S.J., (1548-1617) designated the subject of metaphysics more explicitly as «being insofar as it is *real* being» (*).

The addition of «real» to Aristotle's formula highlighted the inclusion of all that *can* as well as does exist. Against the backdrop of two already well known distinctions -- (1) between formal and objective concepts, and (2) between being as a participle and being as a noun -- for Suarez the subject so conceived was identical with "the objective concept of being as a noun". Concurrently, while being was said to be analogous with regard to hierarchically ordered objects (God and creatures, substance and accidents) with an intrinsic attribution of the perfection it represented, such analogy presupposed a common, unitary, and all but univocal, concept. But from that concept and from the subject of metaphysics Suarez excluded "beings of reason", which he subsumed under Aristotle's *being as true,* and of which impossible objects, in the sense of those that would be self-contradictory, furnished the paradigm case.

On at least one occasion, Suarez did use the word "supertranscendental" to label a notion wide enough to cover both a transcendental and a predicamental relation (**) -- but not to signify anything common between real beings and beings of reason. Nevertheless, there does seem to be some kind of supertranscendent community here. Real being is transcendent, but real beings and beings of reason are in some

more than transcending way the same inasmuch as they both can be objects of cognition. Yet Suarez will allow only a community of name and not of concept between real being and being of reason. At the same time, he has distinguished between being which is the object of metaphysics and being which is the object of cognition generally." (notes omitted)

36. ———. 1999. "Francisco Suárez on the Law of Nations." In *Religion and International Law*, edited by Janis, Mark W. and Evans, Carolyn, 103-120. London.

    Reprinted as Chapter 11 in The tenth essay ("Francisco Suarez on the Law of Nations") repeats a great deal of what is found in the ninth essay both in content and even style. Its inclusion in the present volume was considered justified, however, since its focus is much narrower than the ninth essay, not to mention that there are nine years separating the two essays and both were written for different audiences. "Francisco Suarez on the Law of Nations" concerns the law of nations, which for Suarez was a quasi-medium between natural law and the positive human law of individual states. Closely following upon the natural law, the law of nations is not as necessary as that law. In truth, it has the character of positive law. Yet its precepts differ from those of civil law inasmuch as they are unwritten and have been established by the customs not of a single state or province but rather by those of all, or *almost* all, nations. In this way, like the state itself, the *jus gentium* has its origin in human consensus. Along the way here we will see Suárez's general teaching with regard to *"jus"* which in different contexts he translates as "law" or as "right." This will then lead into the next essay." (*CS* p. XIV).

37. ———. 2000. "Suárez on the Truth of the Proposition: "This is my Body"." *The Modern Schoolman* no. 77:145-163.

    Reprinted as Chapter 9 in *CSS*.

"Essay eight in order ("Suarez on the Truth of the Proposition, `This is My Body-) treats a problem coming from Suárez's Aristotelian doctrine of truth vis-a-vis the Council of Trent's dogma of Transubstantiation. The model case of truth is offered by a present indicative proposition which correctly affirms the identity of its subject with its predicate. "This is my Body" aims to do that. But the dogma requires in this proposition a basic non-identity between its subject and predicate. So it appears that the subject is bread, while the substantially different predicate is Christ's Body. Suarez considered earlier opinions and then advanced his own soution to the problem, a solution which gives us insight into not only his doctrine respecting truth but also his understanding of objectivity." (CS p. XIII-XIV).

"Best known for his systematic study of metaphysics and his teaching on law, Francisco Suarez was arguably the greatest theologian in the history of the Jesuits. While the particular doctrine that I am now treating was published in 1587 in the wake of his teaching sacramental theology at Alcali de Henares, there is no indication that he ever changed his mind on it.

My precise present focus is on Suarez's treatise, De Eucharistia, Disputation 58, Sections 4 to 9, which cover pages 322-336, in Volume 20 of the Vivès edition (Paris, 1856-78) of his Opera omnia. In that place, he is commenting on St. Thomas Aquinas' Summa Theologiae, Part III, Question 78, and is raising questions with regard to the formula of Eucharistic consecration: most specifically, the words: This is my Body." p. 145.

38. ———. 2001. "Francisco Suárez, S.J. on Human Rights." In *Menschenrechte: Rechte und Pflichten in Ost und West*, edited by Wegmann, Konrad, Ommerborn, Wofgang and Roetz, Heiner, 105-132. Muenster: LIT Verlag.

Reprinted as Chapter 12 in *CSS*. The eleventh study ("Suarez on Human Rights") addresses a controverted matter in Scholastic philosophy - the doctrine of subjective rights which has been generally associated with Suarez. In fact, Suarez here accented something already in the Scholastic tradition, something which

then later came to be termed a "subjective right." Suarez himself called it a "moral faculty" - understanding "moral" as intentional rather than physical and "faculty" as a power, an authority, a claim, a warrant, or a license. Moreover, he did not reject the earlier "objective" notion of rights, with its understanding of *"jus"* as the object of the virtue of justice. Rather, he presupposed a common objective order of justice upon which ultimately all rights would be grounded. But he did emphasize and to a certain extent modify something that existed in the tradition before himself, namely, the thought that :ndividuals can be the bearers of personal rights, not in opposition to but in distinction from the common "right" which is the object of justice. An added nuance here is that subjective rights may be understood not just over against an objective right but also as moral faculties which are possessed by persons who are subject to human authority opposite that authority to which they are subject." (*CS* p. XIV-XV).

"For most observers, the American Declaration of Independence is a milestone in the history of human rights. From its promulgation in 1776 down to present time it has served as a philosophical base for various democratic systems of government and as a logical, if not an always demonstrably historical, starting point for the expansion of human rights claims in such current-century documents as the United Nations Universal Declaration and the. Geneva Conventions. However, it has long been recognized that the Declaration of Independence has its own philosophical antecedents, most notably perhaps in the work of John Locke (1632-1704). Our aim now is to go back before Locke and to show such antecedents in the Scholastic philosophy which Locke himself imbibed as a young student at Oxford where he first enrolled in 1652. More specifically, I will point to their presence in the work of arguably the greatest Jesuit philosopher-theologian of all time, Francisco Suárez (1548-1617). (*)

39. ———. 2001. *The Conimbricenses: Some Questions on Signs*. Milwaukee: Marquette University Press.

    Translated with introduction and notes by John P. Doyle.

    "The *Conimbricenses* were late sixteenth and early seventeenth century Jesuit philosophy professors at the University of Coimbra. Chief among them were Emmanuel de Goes (1542-1597), Cosmas de Magelhães (1551-1624), Balthasar Alvarez (1561-1630), and Sebastian do Couto (1567-1639). Although not usually numbered among the *Conimbricenses*, their confrere in the Society, Pedro da Fonseca (1528-1599), had promoted the novel idea of a philosophical *cursus* authored by the Jesuits of Coimbra.

    The treatise *De Signo* (On the Sign) is the commentary to the first chapter of Aristotle's *De Interpretatione*. The work raises five principal questions: (1) On the nature and conditions common to signs; (2) On the division of signs; (3) On the signification of spoken words and of writing; (4) Whether concepts are the same among all and whether spoken words are different; then (5) Whether some concepts in our minds are true or false, and others devoid of truth or falsity."

40. ———. 2001. "On the Pure Intentionality of Pure Intentionality." *The Modern Schoolman* no. 79:57-78.

    Reprinted as Chapter 5 in *BBK*.

    "With his own intention of instructing novices, Luis de Lossada, S.J. (1681- 1748), has summarized the new, yet old, terminology of the disputed Scholastic doctrine of intellectual intentionality. (*) Although the Scholastics (and I to entitle the present essay) have ambiguously used the term 'intention' -- first in relation to will and then to understanding, in executing his intention Lossada has employed it simply to designate an act of the human intellect. Such an act may be either first or second, depending upon whether it directly represents the physical reality of its object or reflexly represents an object as already known or insofar as it has some being derived from the intellect. From these intellectual acts, the words which signify things as first and directly conceived are called `terms of first

intention,' while those which signify things as secondly and reflexly known are called 'terms of second intention,' that is to say terms corresponding to a second intending by the intellect. Examples of the former terms may be 'man,' 'animal,' or 'sun,' while terms like 'universal, 'genus,' 'species,' 'subject,' or 'predicate' are examples of the latter. Moreover, since objects are customarily named from the knowledge they terminate, both first and second intentions (whether one looks at acts of understanding or the words which express them) may be either 'formal' or 'objective'."

    Translated in German by Thomas Dewender.

    The original English version is published as Chapter 6 in *BBK* with the title: *Beings of Reason and Imagination*.

42. ———. 2003. "The Borders of Knowability: Thoughts from or Occasioned by Seventeenth-Century Jesuits." In *Die Logik des Transzendentalen. Festschrift für Jan A. Aerstsen zum 65. Geburtstag*, edited by Pickavé, Martin, 643-658. Berlin, New York: Walter de Gruyter.

    Reprinted as Chapter 11 in *BBK*.

    "This essay concerns the upper and the lower borders between what is and what is not knowable for human beings, particularly as these borders were variously considered by some seventeenth-century Jesuit thinkers. Expanding, let me say that the boundary above is reached when one confronts the reality of God, who while He may be evidently knowable in Himself is not so, at least in this life, for us. In contrast, the lower boundary seems to run between that which is in itself knowable and that which is totally unknowable either for us or for God.

This lower boundary is reached at the level of what is intrinsically impossible and what to that extent fails of being and of being knowable.

A further refinement is suggested from geography. Take the Alps as a natural boundary between Italy and France. As any tyro knows, this boundary has a double face, inasmuch as we can view it either from the side of Italy or of France, that is from either a cisalpine or a transalpine perspective. Apply this to the borders of knowability. The cisalpine side of the upper border is somehow supplied by our human knowledge groping toward God - especially through negative theology in the wake of Pseudo-Dionysius and through what seventeenth-century Scholastics termed the metaphysical essence of God. The transalpine side is the reality of God in Himself which is beyond the present grasp of a human mind. The lower border will be at the interface of the possible and the impossible. More exactly, its cisalpine side will enclose both the possible and the impossible. Its transalpine side will in some way exclude both the possible and the impossible.

For what follows I will use Jesuit sources in the wake of Francisco Suarez, S. J. (1548-1617), but I will principally focus on one Jesuit, Maximilian Wietrowski (1660-1737), whom I have treated in other places. This will occasion forays into Jesuits between him and Suarez, most singularly: Thomas Compton Carleton (1591 -1666), Sylvester Mauro (1619-1687), and André Semery (1630-1717), as well as one publishing after, Miguel Viñas (1642-1718). At times I will go outside Jesuit writings to clarify or to confirm points and finally I will suggest conclusions against the backdrop of Thomistic theology, which the Jesuits, by their "Constitutions" and "Ratio Studiorum", were obliged wherever possible to follow." (notes omitted)

44. Suárez, Francisco. 2004. *The Metaphysical Demonstration of the Existence of God. Metaphysical Disputations 28-29 by Francisco Suárez, S.J.* South Bend: St. Augustine Press.

    Translated and edited from the Latin with an introduction and notes by John P. Doyle.

    "The two Disputations that are translated in the present work open the second part of the *Disputationes metaphysicae* and mark the turn from being in general lo particular beings. Their concern is with, first in Disputation 28, a comprehensive division of being in general, and after in Disputation 29, the existence of the principal member of this division, namely, that being which is God.

    Disputation 28 is divided into three Sections, which ask about the legitimacy and the sufficiency of the division, as well as whether the dividend, i.e. being, is univocal or analogous between God and creatures. In the first Section (Vivès: vol. 26, pp. 1-8), the question is whether being is rightly divided into infinite and finite being? Doubts arise from the fact that "infinite" and "finite" on their face do not appear to cover the whole range of being but rather look to be restricted to accidental being in the category of quantity (§ 1). In addition, the terms of the proposed division seem obscure, especially the term "infinite" (§ 2). Suarez's answer is to analyze the terms (§ 3) and then to defend the division as one that is good and necessary (§ 4) as well as first and most evident (§ 5). It is equivalent to other divisions such as being by itself *(ens a se)* and being from another *(ens ab alio) (§§* 6-7) or, with clarifications, necessary being and contingent being (§§ 8-12). It is also equivalent to: essential being and being by participation (§ 13), created being and uncreated being (§ 14), or being in act and being in potency (§§ 15-16). Suarez next compares the first division with the rest (§ 17), explains the terms of the first division by comparison with quantity (§ 17), and closes the first Section (§ 18) with a reply to objections raised at its beginning." p. XIV.

    "Though almost twice as long, Disputation 29 like the one before is again divided into three Sections. Section 1 (vol. 26,

pp. 21-34) begins after two introductory paragraphs (§§ 1-2) in which Suarez gives reasons for the location of the subject matter of the Disputation in this place and remarks how he will leave aside as much as possible items which depend for their understanding on Revelation. The first Section then asks whether and/or by what means the existence of God can be demonstrated. Among the Scholastic Doctors, Peter d'Ailly (1350-1420) has denied the possibility of such a demonstration. To this Suarez makes the brief but revealing reply that already by the various divisions of being that have been presented in the previous *Disputation* the existence of "some being which is uncreated or not produced" has been proven (§ 1). The obvious implication is that by now the existence of God has in effect been proven. But immediately the question arises: by what means, physical or metaphysical, is this properly done? On one side, the opinion of Averroes is that the means is physical, namely the motion of the heavens (§ 2). The contrary opinion, that of Avicenna and later of Duns Scotus among others, holds that the means must be metaphysical (§ 3) -- that is, not motion but being itself. A third and a fourth opinion hold in different ways that the task must belong to both physics, that is natural philosophy, and metaphysics (§§ 4-5). In different ways the means would thus be both physical and metaphysical. In Suarez's judgment the second opinion is certainly the true one but there can be some probability in the fourth position, if it is rightly explained (§ 6).

At this juncture, he examines at length the physical argument that proceeds by the medium of motion and for various reasons he finds it wanting (§§ 7-17). Then he considers another physical argument, from the operations and the essence of the rational soul (§ 18). This too comes up short, unless we first pose a question about the soul's being, which is a metaphysical question (§ 19). Here Suarez gives the metaphysical argument that is based upon a broader and deeper principle than the physical one, *"Whatever is moved is moved by another."* The metaphysical principle is *"Whatever is made or produced is made by another"* and the argument itself concludes to an unmade Maker (§§ 20-21). An objection of a possibly circular

chain of causes is dismissed as every bit as inadmissible as a thing's causing itself (§ 22). Other objections involve an infinite number of causes that would preclude any arriving at a first uncaused or unmade cause. There are different ways to conceive such an infinity of causes. Suarez explains such ways in detail and shows their insufficiencies (§§ 23-40). The first Section ends (§§ 41-42) with a brief rehearsal of and summary judgment upon the opinions listed at the beginning." pp. XV-XVI.

45. ———. 2004. *A Commentary on Aristotle's Metaphysics (Index locupletissimus in Metaphysicam Aristotelis) - by Francisco Suárez*. Milwaukee: Marquette University Press.

    Translated from the Latin with an introduction and notes by John P. Doyle.

    "As the reader will see, the following volume is divided into translations and the corresponding Latin texts. The translations are in order:

    (1) *Suarez's Plan for his Metaphysical Disputations*. This is his preface to the 1597 edition. It is an address to his reader in which he lays out his intention as a Christian theologian to pursue a Christian philosophy, specifically a metaphysics which will be at the service of his theology. This metaphysics will be in two main parts. The first of these will be what will shortly after be called an "ontology" or a general science of being, in which after establishing "real being insofar as it is being" as the object of metaphysics, he will proceed to study its properties, its principles, and its causes. The second part will then descend from the general concept of being to study those beings, God and creatures, substances and accidents, which are contained under that concept. Finally, it should be noted that in this preface he speaks of the present Index and gives his reader some idea of its purpose.

    (2) *The Proemium to the Second Metaphysical Disputation*. This short piece is important. After again indicating the systematic plan of the *Disputationes,* it contrasts that with the disorganized text of Aristotle and commentaries on it. But then he says that, in order to satisfy "students of Aristotle," he has

added the present Index which follows the order of the *Metaphysics* and which gives cross-references to the *Disputations*. It will also, he tells us, comment at times directly on the text of Aristotle and will explore matters which for whatever reasons have not been covered well enough in the *Disputations*.

(3) Next comes the *Most Ample Index* itself. In this Suarez, as he promised, follows the order of the *Metaphysics,* essentially commenting on it as I have said, "by way of question." To appreciate this Index, a modem reader should have some familiarity with Aristotle's text and the main problems interpreters have encountered with it. To facilitate that, I have at he start of most Books added a summary of the remarks of Jules Tricot, the important French translator of the *Metaphysics*. I chose Tricot's remarks for a number of reasons. First, they were succinct. Second, they were the thoughts of an authentic scholar. Third, while Tricot's scholarship may be a few decades old, it is still valuable for understanding the main nineteenth and twentieth-century debates about the composition and the meaning of Aristotle's *Metaphysics*, debates which often bear on problems which Suarez and the medievals encountered. Finally, there is something which will not be evident from the summaries I gave, but which was in the background of my choosing Tricot. This is that he, unlike many contemporary writers, extends his interest out beyond the text of Aristotle to the traditions of his Greek and Latin commentators. In short, Tricot pursues understanding of Aristotle in a way which I am certain Suarez would endorse.

(4) *An Index of Disputations:* This amounts to a Table of Contents for the fifty-four Disputations which comprise the main portion of Suarez's work. To make it easier for readers to find these Disputations I have added volume and page numbers to Suarez's list. A further benefit of this may be that a reader will be able to see at a glance the relative importance which Suarez attached to each Disputation from the number of pages he allotted to it. In passing I did notice minor variations between some of the Section headings in the main text of the *Disputationes* and the Index of Disputations. Generally, in my

notes I ignored such variations and mentioned them only on rare occasions.

Following the translations, the next portion of the current volume is devoted to the Latin texts. Thus I have transcribed in their original language the Preface to the whole work, the Prologue to the Second Disputation, the Most Ample Index itself, and the Index of the Disputations. The most important notes that I added contain the Latin translations mentioned above, i.e., those of Moerbeke, Argyropoulos, Bessarion, and Fonseca. On this score, let me say that I deliberately separated the Greek of Aristotle from the Latin of Suarez and these others. My purpose in this was to allow interested persons to compare the Latin translations without the immediate distraction of the Greek. At the same time, the Greek will be available and matched directly to my English translation of Suarez's Latin. My hope is that this is clear and that it makes some sense to interested readers.

The volume includes a *Dramatis Personae,* that is, a list of and a few facts about persons whom Suarez mentions in the Ample Index. Again, I have added a bibliography of sources in various languages to which readers may go for more in depth understanding of the issues raised in the translated texts."

46. Doyle, John Patrick. 2005. "Two Sixteenth-Century Jesuits and a Plan to Conquer China. Alonso Sanchez and José de Acosta: An Outrageous Proposal and its Rejection." In *Rechtsdenken: Schnittpunkte West und Ost. Recht in den gesellschafts- und staatstragenden Institutionen Europas und Chinas*, edited by Wegmann, Konrad and Holz, Harald, 253-273. Münster: LIT Verlag.

"I. The Plan of Alonso Sanchez SJ.

II. The Great Plan in Detail: Ten Sections of Preparing, Pursuing, and Safe-Guarding the Conquest of China

III. The Opponent of he Plan: José de Acosta S.J.

IV. Several Reasons, Technico-practical and Moral, against the Plan

V. The Royal Decision: Renunciation of the Plan.

I. The Plan of Alonso Sanchez S. J. of Conquering China

The first of our two Jesuits, Alonso Sânchez (1547-1593), has been called “a Jesuit like no other.” (1) Born in the province of Guadalajara in Spain, he entered the Society of Jesus in 1565 at the age of 17. (2) In 1571 he was ordained a priest and in 1579 he was sent by his Order to Mexico and then on to the Philippine Islands, where he disembarked in September of 1581 at the city of Manila, which had been founded ten years earlier by Miguel Lopez de Legazpe (1510-1572). In the years that followed, Sânchez gained prominence in the Philippines and made two trips from there to China.

His first trip, in 1582, was to the Portuguese enclave at Macao. (3) His purpose was to acquaint the Portuguese with, and to gain their acceptance of, the fact that Philip II of Spain had in 1580 also assumed the throne of Portugal and that now the whole Iberian peninsula was united under one rule. In this Sânchez was most successful and upon returning to the Philippines he was acclaimed as a skilled diplomat. Well known for his virtue, his learning, and his zeal for souls, (4) he still became a figure of controversy even within the Jesuits. (5) This last was largely because of his penchant for crossing the line between affairs of church and state and in particular for his view with regard to China. (6)

47. ———. 2006. "Hervaeus Natalis, O.P., (d. 1323) On Intentionality: Its Direction, Context, and Some Aftermath." *The Modern Schoolman* no. 83:85-124.

"It is generally known that Franz Brentano (1828-1917) came through a tradition Aristotelian-Scholasticism to a philosophy which stood in opposition to Kant and to the main stream of German idealism after. It is also often thought that nothing in that tradition was more influential than its intentionality doctrine. Central for Brentano's early development, intentionality was a doctrine whose Scholastic origin he himself indicated, when in 1874, he wrote:

"Every mental phenomenon is characterized by what the scholastics of the Middle Ages referred to as the intentional (and also mental) inexistence of the object, and what we, although with not quite unambiguous expressions, would call relation to a content, direction upon an object (which is not here to be understood as a reality) or immanent objectivity."

Since 1874, for proponents, opponents, and simple observers of Brentano and of intentionality doctrine, whatever else may be at issue the general consensus has been that the term "intentionality" indicates a direction from knower to known. *Mutatis mutandis,* so understood, intentionality continued to be important for various phenomenological philosophies which stemmed from Brentano. In this vein, Brentano's most recognized disciple, Edmund Husserl (1859-1938), who is credited with introducing the term itself into modern philosophy, has described its basic signification as "the property of being conscious of something." This direction from consciousness to the object (which Brentano himself influenced by the problem of non-existent objects later at least in part rejected in his famous *Abkehr vom Nichtrealen* has been regarded as central in Husserl's work even by critics. The same direction appears in the work of others dependent upon Brentano and a glance at secondary sources will confirm its almost universal acceptance as the common view.

In the Middle Ages, from the Latin Avicenna on, the term "intention" (*intentio*) can be found throughout the thirteenth century. However, to my knowledge, somewhat surprisingly, the actual word, "intentionality" (*intentionalitas*), first appears only when we come to the fourteenth-century writing of Hervaeus Natalis. It was a bigger surprise for me to find that Brentano in one place actually mentioned Hervaeus and listed three of his works. But the biggest surprise was to discover that for Hervaeus the direction of *intentionality* as such was not from knower to known but rather opposite wise -- from known to knower! My purpose now is to recount and perhaps to sharpen that discovery as well as to go further and touch on some of its possible *Wirkungsgeschichte*." pp. 85-86 (notes omitted).

48. ———. 2006. "Francisco Suárez, S. J. (1548-1617) on the Interpretation of Laws." *The Modern Schoolman* no. 83:197-222.

    Reprinted as Chapter 13 in *CSS*.

"The twelfth and final essay ("Francisco Suarez on the Interpretation of Laws") will serve to bring out some of the breadth and depth of Suarez's great work, *De Legibus*. For that I have picked out just one of its 246 chapters and have given a brief exposition of that chapter against the civil and canon law background before which it was written. In this, I have followed Suarez to speak generally of interpretation of the words of a law, the mind of the lawgiver, and the reason for the law, in the two directions of expanding and of restricting that law. Along the way, I have treated such issues as various types of law which Suarez recognized, the legal codes he had to cope with, the interpreters on whom he relied, the absence of any written constitution, yet, at the same time, some *de facto* practices and principles substituting for that. I have also highlighted his own skills at interpretation in other contexts. Lastly, I have added an Appendix here which using particular laws will show more concretely some of the points made in the essay." (*Cs* p. XV).

49. ———. 2006. "Mastri and Some Jesuits on Possible and Impossible Objects of God's Knowledge and Power." In *Rem in seipsa cernere: saggi sul pensiero filosofico di Bartolomeo Mastri (1602-1673)*, edited by Forlivesi, Marco, 439-468. Padova: Il Poligrafo.

"Why are some things possible while others are not? Is possibility and/or impossibility ultimately from God Himself? If so, how can this be understood? Is it, as St Thomas Aquinas (1225-1274) thought, stemming from God's intellect in such way that creatures are possible inasmuch as the divine essence is thought by God to be imitable in various ways? Accordingly, God's intellect rather than possible creatures would be the cause of their multiplicity. But further obstacles are posed by the Divine simplicity. St Thomas himself has addressed the question of how can the absolutely simple Divine intellect understand at once many things? Or how can what is simple be imitable in various ways? How can what is perfectly one be the last ground of plurality? This last difficulty was highlighted in the time between Plato and St. Thomas by those to whom it seemed, at best, that from what is simply one, necessarily only one thing could proceed.

Contrasted with this, perhaps the final ground for things being many as well as possible or impossible might be that God has freely willed them so. This seems to have been the view of Henry of Ghent (1217-1293) when he said that the passive potency of creatures and the active power of God are correlative. It was also the thought of William of Ockham (ca. 1290-1349), whose disciple, Gabriel Biel (1410?-95), has gone even more decidedly along this path. Are possibilities themselves, then, creatures of God, depending on His will to make them as they are? If yes, is it in God's power to make other things possible and then to create them - things which are now impossible? Could God make square circles or a second God? Without restraint from what is beforehand possible, could God abrogate the present moral order and substitute another in its place?

(Or can there be a third, on its face more Platonic, position which would find the source of multiplicity, possibility, and impossibility in other beings which are equally independent with God? Other Gods or "Semi-gods"? Like Plato's Demiurge, could the Christian God be bound by a set of antecedent possibilities which are not other Gods and which are not His creatures but which are simply "there", governing His action? We might recoil from such a position, but that won't solve problems.

2. Some sources

The 17th century Conventual Franciscan, Bartolomeo Mastri, (1602-1673), came to such problems chiefly as a continuator and an interpreter of Duns Scotus (1266-1308), for him "the Doctor". (17) But between Mastri and the Subtle Doctor centuries had intervened, during which there were other interpreters and different lines of thought about possibles and impossibles. The present paper is confined to Mastri's views both personal and as an interpreter; and it will try to relate these views to those of some 17th-century Jesuit thinkers whose works were known to him.

Primary sources for Mastri's doctrine will be in his (so posthumously called) *Cursus integer* of philosophy, the first

three volumes of which he co-authored with his friend and fellow Franciscan, Bonaventura Belluto (1601-1678), (18) whereas the last two, which contain his metaphysical disputations, he afterwards produced alone. (19) My emphasis will be on his metaphysical Disputation 8 (On the Essence and Existence of Finite Being) and, from their joint logic, Disputation 3, question 6 (On Beings of Reason). I will also draw on Mastri's later *Disputationes theologicæ* which contain his mature doctrine. (20) The remote source for Mastri's views will be the writings of his master, Duns Scotus, especially the *Ordinatio*, most particularly, Book I, distinctions 35, 36, and 43. (21) Someone always present will be the Irish Franciscan, John Punch (Poncius, 1603-1672/3), who was over decades Mastri's principal opponent. (22)". (pp. 440-443, many notes omitted).

(17) On Mastri, see M. Forlivesi, *"Scotistarum princeps". Bartolomeo Mastri (1602-1673) e il suo tempo*, Padova: Centro studi antoniani, 2002. In English, cf. B. Crowley, "The Life and Works of Bartholomew Mastrius, O.F.M. Conv. 1602-1673", in *Franciscan Studies*, 8 (1948), pp. 97-152.

(18) I have used the following edition: Mastrius - Bellutus, *Philosophise ad mentem Scoti cursus integer*, Venetiis: Apud Nicolaum Pezzana, 1727.

(19) Here I have used Mastrius, *Disputationes in XII Aristotelis Stagiritæ libros Metaphysicorum*, 2 vols., Venetiis: Typis Marci Ginammi, 1646-1647.

(20) For this I have used: Mastrius, *Disputationes theologicæ, I In primum librum Sententiarum*, Venetiis: Apud Ioannem Iacobum Hertz, 1675 (archetypal edition Venetiis: Apud Ioannem Iacobum Hertz, 1655). In addition, I have had access to: Mastrius, *Disputationes theologicæ, I In primum lihrum Sententiarum*, Venetiis: Ex Typographia Balleoniana, 1719. From what I have seen, I would judge the 1675 edition to be better.

(21) In Joannes Duns Scouts, *Opera omnia*, ed. Commissio scotistica, Civitas Vaticana: Typis polyglottis vaticanis, 1950-.

(22) I. Poncius, *Philosophiae ad mentem Scoti cursus integer*, Lugduni: Sumptibus Laurentii Arnaud et Petri Borde, 1672. On Punch, cf. M.J. Grajewski, “John Punch, Franciscan Scotist of the Seventeenth Century”, in *Franciscan Studies*, 6 (1946), pp. 54-92. For Punch versus Mastri here, see J. Coombs, “The Possibility of Created Entities in Seventeenth-Century Scotism”, in *The Philosophical Quarterly*, 43 (1993), pp. 447-459; St. Sousedík, “Der Streit um den wahren Sinn der scotischen Possibilienlehre”, in *John Duns Scotus. Metaphysics and Ethics*, eds. L. Honnefelder, R. Wood and M. Dreyer, Leiden - New York - Köln: E. J. Brill, 1996, pp. 191-204; and T. Hoffmann, *“Creatura intellecta”. Die Ideen und Possibilien bei Duns Scotus mit Ausblick auf Franz von Mayronis, Poncius und Mastrius*, Münster: Aschendorff Verlag, 2002, especially ch. 7, pp. 263-304.

50. Suárez, Francisco. 2006. *On Real Relation (Disputatio Metaphysica XLVII) by Francisco Suárez*. Milwaukee: Marquette University Press.

    Translated from Latin with an introduction and notes by John P. Doyle.

    "There are two main places in which Aristotle has dealt with the category of relation. These are: (a) *Categories*, Chapter 7, and (b) *Metaphysics*, Book V, Chapter 15. As will become apparent, these places will be central for Suarez's treatment of relation in *Disputation* 47." p. 19.

    "At very least, without pinning the matter down at all points, it is safe to say that relation is central to any overall understanding of Aristotle's doctrine of the categories and even more to any understanding of his wider doctrine beyond.

    As I have mentioned, there are two principal places in the *Disputationes metaphysicae* (DM) in which Suarez treats relation. These are the present Disputation 47 and then Disputation 54, Section 6. The obvious dividing line between them is that between real being in the categories and "being as true" which by Suarez's time has come to be identified with being of reason. (77) But even as we say this, it is important once again to note that real relation extends beyond the

category of relation and also that in the Second Section, Paragraph 22, of Disputation 47 Suarez will come exceedingly close to a reduction of real relation to a simple act of the knower, that is, a connotation.

There are other places in the *Disputationes* where in various ways Suarez has touched upon relation. While I have not explored them all in the present work, they do frequently shine added light on this work. For examples, let me mention his treatment of "prior and posterior" in the *Index locupletissimus* at Book Five, Chapter 11; (78) his discussion-in the context of his treatment of distinction -- of relation and its terminus; (79) his discussion of relation in the context of truth; (80) various points he makes about relation in treating transcendental goodness; (81) his contrast of finite created relations and infinite divine relations as regards the essences in which they are found; (82) the divine relations of paternity and filiation as dissimilar; (83) or within a context of his discussion of quantity, a further discussion of the characters of "measure" and "measured," (84) etc.

As may be gathered from some of the examples just mentioned, there are Christian dimension of relation both in Suarez's sources and in his own teaching. These are linked particularly with the doctrines of the Trinity and the Incarnation. On both these themes, besides what he has said in the *Disputationes*, (85) he has written special works, which contain much on the subject of relation." pp. 26-27.

(77) For some of the history of this identification, cf. Theo Kobusch, "Ens inquantum ens und ens rationis: ein aristotelisches Problem in der Philosophie des Duns Scotus und Wilhelm von Ockham," in Aristotle in Britain during the Middle Ages: Proceedings of the International Conference at Cambridge, 8 -11 April 1994 organized by the Société internationale pour l'Étude de la philosophie médiévale, edited by John Marenbon (Turnhout, Brepols, 1996), pp. 157-175, esp. 158-9.

(84) DM 40, 3, nn. 9-10, vol. 26, pp. 540-41.

(85) As regards relation and the Trinity, cf. DM 7, 2, n. 27, vol. 25, p. 270; DM 10, 3, nn. 16-18, pp. 351-2; DM 28, 2, nn. 5,6, 8-13, vol. 26, pp. 9-12; DM 29, 3, nn. 16-17, vol. 26, p. 53; and DM 47, 4, n. 21, below. As regards relation and the Incarnation, sec., e.g.: DM 47, 4, n. 9, below.

51. Doyle, John Patrick. 2007. "Hispanic Scholastic Philosophy." In *The Cambridge Companion to Renaissance Philosophy*, edited by Hankins, James, 250-269. Cambridge: Cambridge University Press.

    "Hispanic scholastic philosophy in this chapter designates a sixteenth and seventeenth-century stream of philosophy which flowed out of medieval universities, increased to a torrent on the Iberian peninsula, then poured into other regions of Europe, America, Africa, and Asia. Arising in the wake of Spanish and Portuguese explorations and conquests, which at the end of fifteenth and through the sixteenth century brought radically new, and usually bloody, encounters between European and non-European peoples, it was at its core concerned with such encounters. Other background were furnished by the Counter-Reformation, especially the reforms of the Council of Trent (1545-63) and its aftermath; the late Renaissance debates among philosophers, humanists and skeptics; and the revival of Thomistic texts and thought. Two subjects stand out as particularly important and influential: (1) moral and juridical philosophy centering on "the law of nations" (the *jus gentium*) and (2) theoretical philosophy, which included Aristotelian physics but culminated in metaphysics.

For present purposes the birth year of Hispanic philosophy was 1526, when Francisco de Vitoria, OP (1492-1546), was elected to the Cátedra de Prima, in theology at Salamanca and began lectures on the "Second Part of the Second Part" (IIa-IIae) of the Summa theologiae of Thomas Aquinas. This introduced the Summa as the principal textbook in theology and also inaugurated a Thomistic revival in theology and in philosophy at Salamanca, then elsewhere. Choosing a terminal date for Hispanic philosophy here is more arbitrary, but a plausible one is 1718, when Miguel Viñas, SJ (1642-1718) died. It may immediately be noted that while Vitoria taught in Spain and belonged to the older religious order of the Dominicans, Viñas was a Jesuit who taught at Santiago in Chile. In the period under discussion two salient facts are the passage of philosophical leadership from the Dominicans to the Jesuits, and the spread of Hispanic philosophy overseas from the Iberian peninsula, especially to Latin America. The development of that philosophy between 1526 and 1718 occurred within this broader context of a general shift from an old to a new religious order and from the Old World to a New. What follows is a very limited sketch of figures and themes in that development." pp. 250-251.

52. Hervaeus, Natalis. 2008. *A Treatise of Master Hervaeus Natalis (d.1323) The Doctor Perspicacissimus On Second Intentions*. Milwaukee: Marquette University Press.

    Volume One - An English translation and Volume Two - A Latin edition by John P. Doyle.

    "These volumes present a first critical Latin edition and an English translation of an important, but very difficult to read and understand, medieval treatise. As almost everyone knows, the notion of intentionality comes from the Middle Ages. What is less known is that Hervaeus Natalis, O.P. (d. 1323) was the first one explicitly to consider it as such. Even less known is the fact that he carne to it not immediately from the Aristotelian *De Anima,* but rather from the division in Aristotle's *Metaphysics* between "being as being" and "being as true." Least of all known is the fact that Hervaeus, who uses the term"intentionality" in the present work 235 times, regards its

significance as a relation of reason which runs in the direction of known or knowable to knower. Apart from its exceedingly obscure Latin style, what particularly makes this work difficult to understand is its multi-layered reflection on things and non-things, its reflection on Hervaeus thinking itself, and its reflection on his thinking about his thinking about things and non-things."

53. Doyle, John Patrick. 2009. "Hervaeus Natalis On Intentionality: its Direction and Some Aftermath." In *Philosophical Debates at Paris in the Early Fourteenth Century*, edited by Brown, Stephen F., Dewender, Thomas and Kobusch, Theo, 261-283. Leiden: Brill.

    A longer version of this article appeared in *The Modern Schoolman*, 83, 2006, pp. 85-124.

54. ———. 2010. *Collected Studies on Francisco Suárez S.J. (1548-1617)*. Leuven: Leuven University Press.

    Edited by Victor M. Salas.

    Contents: Editor's Foreword VII-IX; Introduction: The Theme of this Collection, its Contents, its Character and Rationale XIII-XVI; 1. Francisco Suárez, His Life, His Works, His Doctrine, and Some of His Influence 1; 2. Suárez on the Reality of the Possibles 21; 3. Suárez on the Analogy of Being 41; 4. Suarezian and Thomistic Metaphysics before the Judgment of Heidegger 89; 5. The Suarezian Proof for God's Existence 109; 6. Prolegomena to a Study of Extrinsic Denomination in the Work of Francis Suárez, S.J. 123; 7. Suárez on Beings of Reason and Truth 161; 8. Suárez on the Unity of a Scientific Habit 209; 9. Suárez on the Truth of the Proposition, "This is My Body" 235; 10. Suárez on Preaching the Gospel to People like the American Indians 257; 11. Francisco Suárez on the Law of Nations 315; 12. Suárez on Human Rights 333; 13. Francisco Suárez on the Interpretation of Laws 357; 14. Postscript and Prospectus 389; Bibliography 393; Index of Names 409; Index of Terms 413-416.

    "The main theme in these studies is twofold. The first is theoretical, centering on the Suarezian conception of being and

metaphysics. As Etienne Gilson pointed out in *Being and Some Philosophers,* this conception had its origin in Avicenna's understanding of Aristotelian metaphysics, an understanding which passed through Duns Scotus to Suarez and then on to Suárez's successors, notably Christian Wolff. I still accept Gilson's basic account of Suárez's lineage, which account was also basic for these studies in their original appearance. But now (in 2010) I would modify it along the line suggested by Rolf Darge, who has emphasized the difference of the Suarezian concept of being and its descent to its inferiors versus the Scotistic concept of being as *simpliciter simplex* as this descends to its inferiors by differences outside itself.(1) The second theme takes up the practical side of Suárez's philosophical and theological interests, including his views on human society, law and morality, Church and state, international law, and human rights. The first theme is represented in different metaphysical and epistemological dimensions through eight studies, while the second is the major concern of the last four essays.

The introduction to the collection attempts to give an overview of Suarez the man, his published writings, his philosophical thought, and some of his influence." (p. XI)

(1) For this, see Rolf Darge, *Suárez transzendentale Seinsauslegung und die Metaphysik-tradition* (Leiden/Boston: Brill, 2004).

55. ———. 2010. "Suárez and some Precursors on *Lex* and *Ius*." In *Politische Philosophie und Rechtstheorie des Mittelalters und der Neuzeit. Abteilung II: Untersuchungen: Lex und Ius. Band I*, edited by Fidora, Alexander, Lutz-Bachmann, Matthias and Wagner, Andreas, 393-427. Stuttgart-Bad Cannstatt: Frommann Holzboog.

56. ———. 2011. "St. Thomas Aquinas On Theological Truth." In *Philosophy and Theology in the Long Middle Ages: A Tribute to Stephen F. Brown*, edited by Emery, Kent, Friedman, Russell L. and Speer, Andreas, 571-590. Ledien: Brill.

"Aquinas (1225-1274) clearly recognized two kinds of theology, namely, that of the philosophers, which is metaphysical, and

that based upon divine revelation, which is "sacred doctrine" (*sacra doctrina*). Each will be in its way a science with its own distinctive subject matter and procedure. At the same time, there will be continuity between the two theologies inasmuch as faith, grace, and supernature presuppose nature. However, both philosophical and sacred theology have different subjects and relate to God in different ways. As it is ostensibly part of metaphysics, philosophical theology has common being (*ens* or *esse commune)* as its subject and relates to God as the extrinsic principle of that subject. Sacred theology has God and divine things as the subject to which it seems immediately to relate. To the degree that both theologies are conceived as scientific, each, in line with the norms of the *Posterior Analytics,* will need to presuppose the existence and essence of its subject and then explore the attributes and/or principles of that subject. In the case of philosophical theology, the subject of metaphysics will be the being that is commonly experienced in this sensible world and God will be established as its extrinsic principle. In the case of sacred theology, God will be the subject of the science, which will then go on with the help of revelation to consider his nature and attributes. In this, God and the articles of faith will be first principles of sacred theology. To prove its principles, sacred theology will not have a way intrinsic to itself, but neither will it reject the common principles of human reasoning itself." (pp. 571-573, notes omitted).

57. ———. 2011. "The Falling Dog and the Numerical Unity of Motion." In *Tolle Lege. Essays on Augustine and on Medieval Philosophy in Honor of Roland J. Teske, SJ*, edited by Taylor, Richard C. , Twetten, David and Wreen, Michael, 253-276. Milwaukee: Marquette University Press.

"In his *Physics,* Aristotle tells us that the numerical unity or, in today's talk, the diachronic identity of local motion depends upon three things: something which is in motion, something, such as a place or a quality, within which the motion occurs, and some time in which it occurs (*Physics* 5.4, 227b23–26). Without all of these there is no singular unified motion. And without such singular motion, Plato notwithstanding, there will be no universal motion (*Nicomachean Ethics* 6.12, 1143b4–5)

and a fortiori no science of things in motion (*Metaphysics* 11.1, 1059b26; 11.2, 1060b20–21; *Physics* 3.1, 206b14–15). If then any one of the three requirements of motion is in doubt, the whole of the Aristotelian physics may seem in jeopardy. In what follows, concentration is on the requirement of a continuous unitary subject of motion, on one medieval

objection to this requirement, and on replies to that objection" (p. 255, a note omitted)

58. ———. 2012. *On the Borders of Being and Knowing. Late Scholastic Theory of Supertranscendental Being*. Leuven: Leuven University Press.

Edited by Victor M. Salas.

Table of Contents: Editor's Foreword VII-IX; Introduction XIII-XVI; 1. Sprouts from Greek Gardens: Antisthenes, Plato, Aristotle, and the Stoics (first publication) 1; 2. Suarez on Beings of Reason and Truth 19; 3. Extrinsic Cognoscibility 67; 4. Impossible Objects 95; 5. The Teleology of Impossible Objects 127; 6. Beings of Reason and Imagination 151; 7. Four Degrees of Abstraction 167; 8. From Transcendental to Transcendental 185; 9. Supertranscendental Nothing 215; 10. Wrestling with Wraith 243; 11. The Borders of Knowability 273; 12. Conclusion 293; Bibliography 301; Indices 319-326.

"Sylvester Mauro, S.J. (1619-1687) noted that human intellects can grasp what is, what is not, what can be, and what cannot be. The first principle, 'it is not possible that the same thing simultaneously be and not be,' involves them all.

The present volume begins with Greeks distinguishing 'being' from 'something' and proceeds to the late Scholastic doctrine of 'supertranscendental being,' which embraces both. On the way is Aristotle's distinction between 'being as being' and 'being as true' and his extension of the latter to include impossible objects. The Stoics will see 'something' as the widest object of human cognition and will affirm that, as signifiable, impossible objects are something, more than mere nonsense. In the sixteenth century, Francisco Suárez will identify mind-dependent beings most of all with impossible objects and will

also regard them as signifiable. By this point, two conceptions will stand in opposition. One, adumbrated by Averroes, will explicitly accept the reality and knowability of impossible objects. The other, going back to Alexander of Aphrodisias, will see impossibles as accidental and false conjunctions of possible objects. Seventeenth-century Scholastics will divide on this line, but in one way or another will anticipate the Kantian notion of 'der Gegenstand überhaupt.' Going farther, Scholastics will see the two-sided upper border of being and knowing at God and the negative theology, and will fix the equally double lower border at 'supertranscendental being' and 'supertranscendental nonbeing,' which non-being, remaining intelligible, will negate the actual, the possible, and even the impossible."

Salas: Henry of Ghent, Duns Scotus, & Edith Stein on Essential Being 285; 12: Roland Teske, S.J.: Augustinian Abstraction & Henry of Ghent's Metaphysical Argument 309; John Patrick Doyle: *Post Scriptum*: Hircocervi & Other Metaphysical Wonders 329; About the Contributors 369; Index of Names 373; Index of Terms 377-384.

The twelve essays contained in this volume are a tribute to the career and scholarship of John Patrick Doyle offered by his former students, colleagues, and friends. Chapter 1, an edition of Peter of Candia's *Commentarium in II librum Sententiarum*, d. 1, q. 1, a. 3, which pertains to the question of the eternity of the world, is Stephen Brown's contribution to this volume. In chapter 2 Rolf Darge discusses Suarez's understanding of the transcendental character of being and takes pains to distinguish it from Scotus's *conceptus entis simpliciter simplex*. In chapter 3 Thomas Dewender offers an examination of a subject near and dear to Doyle, impossible objects, according to the logical and semantic analyses of John Buridan and his followers, Albert of Saxony and Marsilius of Ingham. Marco Forlivesi's contribution, chapter 4, considers the role epistemology plays for John Punch in determining the proper object of metaphysics. Chapter 5 offers Jennifer Hart-Weed's consideration of how Moses Maimonides's account of divine actions informs much of Thomas Aquinas's analogical theory of religious language. Chapter 6 is Daniel Heider's contribution, wherein it is argued that Suárez's ontological theory of universals, even when compared to John Poinsot's theory of universals, proves to be an equivalent — if not stronger — form of moderate realism than that of the Thomists. Ludger Honnefelder's essay, chapter 7, identifies the nature, scope, and peculiar features of Duns Scotus's metaphysics, identifying it as a truly transcendental science. Jack Marler's contribution, chapter 8, on the *De ente et essentia*'s, 'phoenix example' argues that Thomas's intention is to show how even (created) individuals that are one of a kind, like the phoenix, are such that their essence too is really distinct from their *esse*. In chapter 9 Daniel Novotny places Francisco de Araújo's theory of *entia rationis* into opposition with that of Suárez and argues that, while the former is not exactly the philosophical equal of the latter, nonetheless, Araújo improves upon and ultimately holds a more consistent theory than Suárez. Chapter 10, Michael Renemann's contribution, argues that self-consciousness according to Thomas Aquinas is not nerely as anemic as those sympathetic to Kant might consider it to be is but a truth-revealing power that has significant implications in contemporary experimental science. My own contribution, chapter 11, examines the notion of essential being as a point of convergence between the medieval metaphysics of Henry of Ghent and Duns Scotus, on the

one hand, and, on the other, the phenomenology of Edith Stein. Finally, in chapter 12 Roland Teske, S.J., discusses Henry of Ghent's metaphysical argument for God's existence and finds it problematic because of a faltering effort to synthesize a fundamentally Platonic Augustinian abstraction theory with an Aristotelian analogy of being. The volume concludes with a *post scriptum* featuring a reprint of one of Doyle's own articles on imaginary beings. In this essay Doyle, the consummate historian of philosophy, traces the lineage of beings of reason from a cast off of the Aristotelian metaphysics (i.e., being as true) to the vexing centerpiece of late Scholastic metaphysics. Questions pertaining to the metaphysical status of such "shadowy" beings eventually give rise to that topic which would eventually preoccupy much of Doyle's scholarship, namely, supertranscendental being."

Bibliographie Choisie de Jean École (tous les écrits sur Christian Wolff). Première partie: 1961-1983

Introduction

Jean École (2 mars 1920 - 8 septembre 2015) était professeur de métaphysique à l'Université Catholique d'Angers de 1957 à 1969; il a publié l'édition critique des Œuvres latines de Christian Wolff (1679-1754).

Une bibliographie complète au 1994 est contenue dans: Robert Theis et Claude Weber (eds.) - *De Christian Wolff à Louis Lavelle: métaphysique et histoire de la philosophie: recueil en hommage à Jean École à l'occasion de son 75e anniversaire* - Hildesheim, Georg Olms 1995 (VIII, 313 pages) - (Studien und Materialen zur Geschichte der Philosophie, 39).

Cette page contient tous le livres de Jean École et ses articles sur la philosophie wolffienne; pour la bibliographie de Christian Wolff (de 1791 à 2004) voir: Gerhard Biller (Éditeur / Herausgegeber) - *Wolff nach Kant. Eine Bibliographie* - Mit einem Vorwort von Jean École - Hildesheim, Georg Olms, 2004 (IX, 251 pages, 3105 titres).

Essais sur Christian Wolff

1. École, Jean. 1961. "La "Philosophia prima, sive Ontologia" de Christian Wolff. Histoire, doctrine et méthode." *Giornale di Metafisica* no. 16:114-125.

   Repris dans: *Introduction à l'Opus Metaphysicum de Christian Wolff,* pp. 8-19.

"Philosophie première, en ce sens qu'il faut commencer par elle pour avancer ensuite dans les divers domaines de la connaissance, *l'Ontologia* de Wolff serait tout aussi bien dénommée philosophie générale, étant donné son universalité. En tant que science de l'être pris dans toute son extension, elle étudie, en effet, outre les principes qui dirigent la connaissance de l'être, tout ce qui appartient ou peut appartenir à l'être, ainsi que les diverses formes qu'il peut revêtir et les rapports que peuvent avoir entre elles ces diverses formes; et c'est pourquoi, après avoir examiné le principe de contradiction et celui de raison suffisante, elle envisage, tour à tour, la nature de l'être et ses propriétés ou ses affections, à savoir l'identité et la similitude, la singularité et l'universalité, la nécessité et la contingence, la quantité, la qualité, l'ordre, la vérité et la perfection, puis sa différenciation en être composé et en être simple, à laquelle se rattache la considération de l'étendue, de l'espace, du temps et du mouvement, ensuite sa division en être fini et en être infini, enfin les relations de ces divers êtres, notamment sous la forme de la causalité. Car comme tout est soit de l'être, soit propriété de l'être, elle s'intéresse nécessairement à tout ce que l'être est ou peut-être, même s'il est vrai qu'elle se contente souvent de déblayer le terrain pour les autres disciplines du savoir auxquelles elle sert d'introduction.

C'est ainsi, par exemple, que l'analyse des notions d'identité, de similitude, de quantité, d'infiniment grand et d'infiniment petit, est destinée à servir de fondement aux mathématiques. Il faut en dire autant de tout ce qui trait à la singularité et à l'universalité de l'être, par rapport à la logique qui a aussi beaucoup à prendre dans le chapitre consacré à la notion de déterminé. Tout ce qui concerne la qualité, la nature de l'être composé et de l'être simple, l'étendue, le continu, l'espace, le temps et le mouvement, sert de toute évidence de préparation en partie à la psychologie, en partie à la cosmologie et aux sciences physiques, de même que les considérations relatives à l'infini métaphysique défrichent la voie de la théologie naturelle. Mais toutes ces analyses, qui peuvent à première vue, sembler très disparates, font partie intégrante de la théorie

générale de l'être, qui leur sert de cadre en formant l'armature de l'ontologie wolffienne. A vrai dire même, la question de la nature de l'être y commande toutes les autres ou leur est sous-jacente; d'où son importance qui est d'autant moins indéniable qu'elle est non seulement la part centrale, mais aussi la plus originale et la plus inédite de tout l'ouvrage.

Pour Wolff, en effet, l'être s'identifie à l'essence définie par la possibilité conue comme l'absence de contradiction, et l'essence est constituée par les *essentialia* qui ont en eux-mêmes leur raison suffisante, tout en contenant celle des attributs et des modes, lesquels forment, avec les *essentialia,* ce qu'on pourrait appeler les éléments constitutifs de l'être. Car les *essentialia* ne sont pas autre chose que les tout premiers éléments de l'être, du fait qu'ils ne sont pas contradictoires entre eux et ne sont pas déterminés par d'autres, pas plus qu'ils ne se déterminent mutuellement, cependant qu'ils déterminent les attributs qui, comme eux, appartiennent toujours à l'être, en même temps qu'ils contiennent aussi en eux la raison suffisante des modes qui peuvent affecter l'être. Tout être, de ce point de vue, c'est-à-dire ramené à l'essence ou, si l'on veut, aux *essentialia* avec lesquels l'essence s'identifie, a donc en soi sa raison suffisante; mais cela n'implique pas pour autant, qu'il soit nécessaire, tout au moins absolument, puisque, hormis l'être dont l'essence est la raison suffisante de l'existence, tous les autres, dont l'existence est un mode de l'essence, ne le sont qu'hypothétiquement.

Nous sommes donc placés d'emblée en face d'un véritable primat de l'essence. Et c'est ce qui explique tout d'abord, que presque toute la doctrine wolffienne de l'être, qu'il s'agisse, par exemple, de la détermination des genres et des espèces, de l'analyse des qualités ou de la nature de la substance et des accidents, tourne autour de l'agencement des *essentialia* et de leurs déterminations: attributs et modes, si l'on peut ainsi s'exprimer, car, à proprement parler, les modes ne trouvent dans les *essentialia* que la raison de leur possibilité et non celle de leur actualité qui est à chercher, selon les cas, dans les modes antécédents ou dans un autre être, ou encore en partie dans les premiers, en partie dans le second. Cela explique

encore qu'elle soit entièrement fondée sur les deux principes de contradiction et de raison suffisante. Car les essences sont en premier lieu régies par la loi de non-contradiction, en tant qu'elles doivent tout d'abord être possibles, c'est-à-dire non contradictoires. Et si l'on veut ensuite les expliquer, il n'est pas d'autre moyen que d'en chercher la raison suffisante, c'est-à-dire de leur appliquer le principe leibnizien soigneusement distingué du principe de causalité. Car, comme Wolff l'a parfaitement vu et démontré, le principe de causalité concerne l'existence ou, si l'on veut, l'essence actualisée, et ne joue pas dans le domaine de l'essence pure, dont on ne peut rendre compte qu'en recherchant la raison suffisante de ce qu'elle est et de ce qui lui appartient ou peut lui appartenir. Et comme on ne peut remonter au-delà de l'essence considérée en elle-même, on ne peut trouver cette raison suffisante qu'en elle, c'est-à-dire dans les *essentialia* qui la constituent et en lesquels se situe en même temps la raison suffisante des attributs et des modes qui en découlent ou peuvent en découler. D'où la triple affirmation de la nécessité, de l'éternité et de l'immutabilité des essences; car ces trois propriétés ne sont que des conséquences du fait qu'elles ont en elles-mêmes leur raison suffisante.

Ainsi la science de l'être et, par le fait même, toute l'Ontologie de Wolff, est-elle essentiellement et uniquement une science des essences, d'où la considération de l'existence est, en fait, bannie ou presque. Car, lorsqu'il lui arrive de parler de cette dernière, c'est très rapidement et sans s'y arrêter, comme à propos de la contingence et de la causalité, sous le biais du rattachement des êtres contingents à l'être nécessaire et de celui des causes secondes à la cause première, ou d'une manière tout à fait implicite, comme dans la définition du temps et de l'espace, le premier comme ordre des êtres successifs, et le second comme ordre des êtres coexistants. En un mot, Wolff mène toute son *Ontologie*, comme s'il n'était pas de son ressort de traiter de l'existence qui n'est, selon sa définition lapidaire, que le *complementum possibilitatis* (§ 74).

Or c'est par là surtout qu'elle fait date dans l'histoire de la métaphysique, puisque c'est la première fois, semble-t-il, depuis Avicenne qui faisait déjà de l'existence une sorte

d'accident de l'essence, qu'a été poussée aussi loin l'exorcisation de l'existence. Quoi qu'il en soit, d'ailleurs, c'est en tous les cas ce primat exclusif attribué à l'essence qui a permis à Wolff de couper radicalement, comme cela n'avait jamais encore été fait, l'ontologie de la théologie naturelle; car, dans une telle perspective, l'étude des conditions générales de l'être se suffit à elle-même, sans qu'il soit besoin d'y insérer l'examen de sa source, que requiert nécessairement la considération de son existence. Et c'est ce qui permet d'affirmer qu'il a été beaucoup loin que Suárez et les scolastiques post-suaréziens dans l'essentialisation de l'être, dont la philosophie aura tant de mal à se défaire après lui." (pp. 117-120)

2. ———. 1963. "Un essai d'explication rationnelle du monde ou la "Cosmologia generalis" de Wolff." *Giornale di Metafisica* no. 18:622-650.

   Repris dans: *Introduction à l'Opus Metaphysicum de Christian Wolff,* pp. 20-48.

   " On ne peut certes contester que la publication de la *Cosmologia Generalis* constitue un évènement digne d'intérêt pour l'histoire de la philosophie. Car si Wolff n'a pas été, comme on l'affirme souvent à tort, le fondateur de l'Ontologie, qui a été érigée en discipline distincte des autres parties de la philosophie, sans doute au XVIe siècle, par les auteurs des premiers manuels de philosophie, (*) il a créé le terme *Cosmologia generalis* et a écrit le premier traité paru sous ce titre, ainsi qu'il le revendique hautement." (...) p. 21

   "Le propre de la *Cosmologia generalis* n'est d'ailleurs pas seulement de servir de science rectrice par rapport à la physique et à la cosmologie expérimentale, mais aussi de fournir à la théologie naturelle les instruments indispensables pour la démonstration de l'existence de Dieu et l'analyse de ses attributs (p. 11x, 12x, et § 6). L'étude du *nexus rerum*, de l'ordre du monde et de lois qui régissent les changements qui y surviennent, découvre, en effet, la contingence foncière de l'univers, qui appelle un fondement extérieur à lui et nécessaire, dont il appartient à la théologie naturelle d'établir l'existence et d'éclairer la nature. C'est même là, à en croire Wolff, l'

uberrimus fructus de cette nouvelle science (not. § 6), qu'il s'honore d'avoir créée.

Mais tout ceci apparaîtra plus clairement au fur et à mesure que nous avancerons dans l'inventaire des principaux thèmes de cet ouvrage, qu'on peut ramener à cinq : I) le *nexus rerum*, 2) l'union du mécanisme et du dynamisme, 3) la transposition de l'atomisme et sa combinaison avec la philosophie corpusculaire, 4) l'essai de mécanique a priori, 5) l'ordre de la nature et la possibilité du miracle." (pp. 23-24)

(...)

"Il nous est, en effet, possible de porter un jugement d'ensemble sur elle, maintenant que nous en avons dégagé les thèmes essentiels. L'ouvrage de Wolff porte la marque des grands courants de pensée du XVIIe et du XVIIIe siècles. Tantôt il les combat vigoureusement, comme dans l'analyse du *nexus rerum*, de la contingence des lois du mouvement et de la possibilité du miracle, directement dirigée contre Spinoza. Tantôt il cherche, dans la ligne de Leibniz, à en faire la synthèse, comme dans tout ce qui a trait à l'atomisme à la philosophie corpusculaire, au mécanisme et au dynamisme. A vrai dire même, sur ce dernier point, Wolff prolonge davantage Leibniz qu'il ne le suit à proprement parler, de même que dans son essai de mécanique a priori, dont Leibniz avait certes jeté les fondements, mais sans lui donner d'aussi amples développements. On peut être surpris, voire rebuté, au premier abord, par l'appareil impressionnant de définitions et de démonstrations qui s'enchaînent les unes aux autres, employé par Wolff pour traiter de ces questions. Mais si l'on ne se laisse pas arrêter par cette faon de procéder, qui le rendit célèbre et dont on ne peut contester la rigueur et la précision, on est entrainé, par la lecture de la *Cosmologia generalis* au plus fort de la passionnante mêlée qui a opposés philosophes et savants de cette grande époque. Et l'on ne peut pas être insensible à l'effort courageux tenté par Wolff pour la dominer." (p. 47)

3. ———. 1964. "Cosmologie wolffienne et dynamique leibnizienne. Essai sur les rapports de Wolff avec Leibniz." *Etudes Philosophiques*:3-9.

   Repris dans: *Études et documents photographiques sur Wolff,* pp. 177-183.

   "Si paradoxal que cela puisse être, il en est en philosophie comme en bien d'autres domaines, les slogans qui entretiennent les préjugés et les erreurs ont la vie dure et sont presque indestructibles. Le cas de Wolff en offre un exemple typique. Comme le dit très justement M. Gusdorf, Wolff «est une des victimes de l'histoire de la philosophie qui, concentrant toute la lumière sur les personnalités reconnues comme des génies, laisse dans l'ombre tout le reste. (1) ». Certes, tous les traités et manuels d'histoire de la philosophie le mentionnent toujours, mais en le présentant, la plupart du temps, comme le compilateur et le vulgarisateur des thèses de Leibniz. Et, comme on ne le lit plus depuis longtemps, cette opinion se transmet fidèlement, de génération en génération, aux étudiants en philosophie. Il est vrai qu'elle a des racines profondes et déjà deux fois centenaires; car, dès le vivant de Wolff, on prit coutume de parler, comme d'un seul bloc, de la philosophie Leibnizio-Wolffienne (2), et bon nombre de ceux qui le combattirent lui reprochèrent de ne pas faire autre chose que de reprendre les grandes lignes de la philosophie de Leibniz, comme Joachim Lange, par exemple, son ennemi acharné, qui l'accusait, entre autres, de ne pas proposer d'autre conception des éléments que celle de Leibniz. Or Wolff, non seulement n'admit jamais ce reproche global, comme en témoignent maints passages de son œuvre, mais il se défendit encore vigoureusement contre cette accusation précise de Lange, avec une netteté qui rie laisse rien à désirer).

   Une telle attitude ne peut qu'inciter à y regarder de plus près, afin de se rendre compte si oui ou non Wolff a fait plus que synthétiser et vulgariser la doctrine de Leibniz. Et c'est ce que nous nous proposons de faire, en limitant notre étude aux données de la Cosmologie wolffienne. Cela nous permettra d'examiner l'accusation de Lange, à l'instant évoquée, et de

nous faire une idée exacte de la position de Wolff par rapport au monadisme leibnizien, ce qui est d'une importance capitale. Car, s'il est démontré que Wolff, comme il le prétend, ne l'admet pas et ne suit pas Leibniz sur ce point fondamental, comment pourra-t-on encore soutenir qu'il est le disciple fidèle de celui qu'il n'aurait cependant pas refusé de reconnaître comme son maître?" (pp. 3-4 notes omises).

(2) Deux titres d'ouvrages, entre beaucoup d'autres, en attestent : celui de Georg Volckrnar Hartmann, *A Einleitung zur Historie der Leibnizisch-Wolffischen Philosophie, und der darinnen von Herrn Prof. Langen erregten Controvers,* Frankfurt und Leipzig, 1737, et celui de Carl Günther Ludovici, *Neueste Merküivirdigkeiten der Leibnitz-Wollfischen Weltweisheit,* Frankfurt und Leipzig, 1738.

4. ———. 1966. "Des rapports de l'expérience et de la raison dans l'analyse de l'âme ou la "Psychologia empirica" de Christian Wolff." *Giornale di Metafisica* no. 21:589-617.

   Repris dans: *Introduction à l'Opus Metaphysicum de Christian Wolff,* pp. 49-77.

   "Or il faut dire tout d'abord que c'est Wolff qui a définitivement introduit le terme *Psychologia* pour désigner la science de l'âme, même s'il est vrai qu'il ne l'a pas créé. Rares, en effet, sont ceux qui, avant lui, l'ont employé." (p. 590)

   (...)

   "Or, avec l'emploi qu'en fait Wolff, et grâce au succès éclatant de son enseignement, le terme *Psychologia*, comme précédemment ceux d' *Ontologia*, et de *Cosmologia*, acquiert droit de cité dans le vocabulaire philosophique et devient très rapidement usuel. Si donc Wolff n'en peut être dit le père, il en peut du moins être considéré comme le parrain.

Mais il n'a pas seulement assuré définitivement l'usage du terme *Psychologia*, il a, en outre, été le premier, semble-fil, à diviser la psychologie en deux traités distincts: la *Psychologia empirica* et la *Psychologia rationalis* (*)." (p. 592)

(...)

D'une part donc, une analyse de l'âme fondée sur une mise en ordre des données de l'expérience et visant, comme l'explique encore la préface de la *Psychologia empirica* (p. 11x, 13x), à découvrir les lois selon lesquelles s'exercent ses facultés; de l'autre, à partir du concept de l'âme, une détermination *a priori* de ses facultés et de la raison qui fait que leurs lois sont telles que l'expérience nous les révèle. (p. 593)

(...)

"Tel est ramené à l'essentiel, l'ensemble des questions traitées par Wolff dans sa *Psychologia empirica,* qu'il considère non seulement comme un complément apporté à la *Logica, à* propos de opérations de l *' intellectus* (p. 12x, § 9), mais aussi comme l'aide indispensable de la *Theologia naturalis* dans la détermination des attributs divins dont la notion ne peut être éclairée qu'à partir de celle des facultés de l'âme humaine (p. 15x, 16x, § 7 et not.), enfin et surtout comme la base indispensable de toute la philosophie pratique, qui ne peut prétendre régir la vie humaine, qu'en se fondant sur une connaissance nette et précise de ces facultés et tout particulièrement de ce qui est ou non en notre pouvoir (p. 13x-15x, § 8 et not.).

Peut-être trouvera-t'on que, dans l'examen de ces questions, Wolff n'apporte rien qui ne fut déjà connu et exploré avant lui. Mais, si l'on n'en peut disconvenir, il reste que sur plusieurs points, tout en utilisant largement ses devanciers, il les dépasse cependant par son effort d'approfondissement des questions, par exemple dans son étude de la mémoire, dans celle de l'emploi des signes, et dans son analyse de la marche que suit l' *intellectus* vers la découverte de la vérité. Comment ne pas reconnaître encore un effort de renouveau dans sa description des *affectus,* qui mérite de retenir l'attention non seulement en

raison de la clarté de la classification qu'elle en propose, mais aussi à cause des nombreuses notations fines qu'elle contient et dont nous n'avons pu faire ressortir la richesse? Comment enfin ne pas admirer la rigueur avec laquelle il définit les rapports de l'appétit et de l'aversion avec la connaissance du bien et du mal? Mais ce qui fait surtout l'intérêt de la *Psychologia empirica,* c'est le tableau d'ensemble qu'elle présente des facultés de l'âme et qui met si bien en lumière leur unité et leur continuité. Sans doute peut-on regretter que cette synthèse laisse délibérément de côté les conditions et les manifestations somatiques de leur exercice. Mais Wolff garde le mérite d'avoir, le premier, dressé un bilan aussi complet des résultats de l'observation portant sur l'esprit humain.

Or ceci ajouté à sa volonté de séparer la psychologie empirique de la psychologie rationnelle, et au projet, qu'il n'a pas réalisé, mais qui était nouveau à cette époque, de calquer la psychologie empirique sur le type de la physique expérimentale, et d'exprimer *stilo mathematico* (not. § 522) la mesure des phénomènes psychiques, contribue à faire de la *Psychologia empirica* un ouvrage qui marque, dans l'histoire de la psychologie, une étape importante; au point qu'un historien récent (**) des sciences humaines a pu écrire qu'elle est "le premier traité de psychologie digne de ce nom et publié sous ce nom." (p. 617)

(*) Wolff ne revendique pas la paternité des termes: *Psychologia empirica* et *Psychologia rationalis;* mais nous ne les avons pas trouvés chez ses prédécesseurs.

(**) Gusdorf, *Introduction aux sciences humaines,* Paris, 1960, troisième partie, c. 4, p. 181.

5. ———. 1969. "De la nature de l'âme, de la déduction de ses facultés, de ses rapports avec le corps, ou la "Psychologia rationalis" de Christian Wolff." *Giornale di Metafisica* no. 24:499-531.

   Repris dans: *Introduction à l'Opus Metaphysicum de Christian Wolff,* pp. 79-111.

"Dans la *Psychologia empirica*), Wolff s'était donné pour tâche de dresser l'inventaire des facultés de l'âme et des lois auxquelles elles obéissent. Il s'agissait, pour lui, d'y présenter une analyse de l'âme basée sur l'expérience privilégiée que constitue, en ce domaine, la conscience de ce qui se passe en nous, sans toutefois négliger l'observation externe, et en faisant appel aussi au raisonnement pour mettre en lumière comment ces facultés dépendent les unes des autres. La méthode de la *Psychologia empirica* était donc déjà rationnelle en même temps qu'expérimentale; mais la raison n'y avait d'autre rôle que d'établir avec rigueur l'enchainement des faits observés.

Dans la *Psychologia rationalis,* Wolff entreprend de rendre compte *a priori* de ces faits. Il se sert ici de la raison pour montrer, à partir du concept ou, si l'on veut, de l'essence de l'âme, pourquoi celle-ci possède les facultés décrites dans la *Psychologia empirica,* et pourquoi ces facultés obéissent aux lois énoncées dans ce traité. Mais cette déduction n'est cependant pas l'œuvre de la raison pure, car Wolff y fait perpétuellement appel aux données de l'expérience.

Or, à l'en croire, jamais encore pareille entreprise n'avait été tentée. Et c'est parce qu'il craignait que sa nouveauté ne rebutât ses lecteurs, qu'il se décida à présenter séparément l'analyse empirique des facultés de l'âme et leur déduction *a priori,* afin que les résultats de la première ne fussent pas rejetés en bloc avec les propositions de la seconde. D'où ses deux traités de psychologie qui forment cependant un seul tout indissociable, du fait qu'il n'est possible de rendre compte *a priori* que de ce qui est connu d'abord *a posteriori.*

On ne peut donc attendre de la *Psychologia rationalis* un acroissement de nos connaissances sur l'âme; tout au plus la déduction *a priori* peut-elle permettre de découvrir des détails de notre vie intérieure que par la seule observation nous ne réussirions pas à déceler (§ 8, 9, not. 227). Tout le but de la *Psychologia rationalis* est d'éclairer davantage les données déjà certaines, puisqu'elles sont celles de l'expérience, recueillies dans la *Psychologia empirica,* en cherchant à expliquer pourquoi elles sont telles (§ 7).

Dans ces conditions, le plan de la *Psychologia rationalis* s'impose de lui- même. Il s'agit d'abord d'analyser et de définir avec le plus grand soin possible l'essence et la nature de l'âme (sect. 1, c. 1). Puis il convient de montrer comment chacune de ses facultés, distinguées dans la *Psychologia empirica,* trouve son explication dans cette essence et cette nature: les facultés de connaissance d'abord, c'est-à-dire: la *facultas sentiendi* (c. 2), l'imagination (c. 3, § 178-276), la mémoire (c. 3, § 277-332, 350-356), la *facultas fingendi* (c. 3, § 333-349), l'attention (c. 4, § 357-379), la réflexion (c. 4, § 380-387), *l'intellectus* (c. 4, § 388-479); les facultés d'appétition ensuite, c'est-à-dire: l'appétit et l'aversion sensibles (sect. 2, c. 1), l'appétit et l'aversion rationnels (c. 2).

Dans ces deux premières sections Wolff édifie ce qu'il appelle à diverses reprises sa théorie de l'âme, qu'on peut bien considérer comme la première partie de ce traité, bien qu'il ne le divise pas ainsi, et dans laquelle il met aussi en lumière la correspondance harmonique des opérations de l'âme et des mouvements du corps. Après quoi il examine les différents systèmes qui tentent d'expliquer cette correspondance, puis analyse les principaux attributs de l'âme.

D'où les deux autres sections qui suivent, et qui constituent comme deux autres parties: la première où il étudie ces systèmes, d'une faon générale d'abord (sect. 3, c. 1), puis chacun en particulier: celui de l'influx physique (c. 2), celui des causes occasionnelles (c. 3), celui de l'harmonie préétablie (c. 4); la seconde où il disserte de la nature de l'esprit et de la spiritualité de l'âme (sect. 4, c. 1), de son origine, de son union avec le corps et de son immortalité (c. 2), enfin de l'âme des bêtes (c. 3)." (pp. 500-502 omises nombreuses notes).

6. ———. 1973. "De la démonstration "a posteriori" de l'existence et des attributs de Dieu, ou la "Theologia naturalis, Pars I" de Christian Wolff (Première partie)." *Giornale di Metafisica*:363-388.

   Repris dans: *Introduction à l'Opus Metaphysicum de Christian Wolff,* pp. 113-138.

"Après les prolégomènes, qui servent d'introduction générale à cet ensemble, et dans lesquels Wolff définit sa conception de la théologie naturelle, la première partie, que nous analyserons seule ici, est divisée en sept chapitres où il est traité tour à tour: de l'existence et des attributs de Dieu en général (c. 1); de l'intelligence, des idées et de la science de Dieu (c. 2); de la volonté, de la puissance divines et de la permission du mal (c. 3); de la sagesse de Dieu, de sa bonté et de l'utilisation du mal (c. 4); de la création, de la conservation, du concours de Dieu au mal, de son gouvernement et de la Providence (c. 5); du droit de Dieu sur les créatures (c. 6); de quelques autres attributs de Dieu et de son essence (c. 7). La seconde partie, elle, est subdivisée en deux sections dont la première a pour but de rendre raison *a priori* tant de l'existence (c. 1), que des attributs divins: intelligence (c. 2), volonté (c. 3), création, providence et puissance (c. 4), et dont la seconde contient l'examen critique des différentes erreurs relatives à Dieu: athéisme (c. 1); fatalisme, déisme et naturalisme (c. 2); anthropomorphisme, matérialisme et idéalisme (c. 3); paganisme, manichéisme, spinosisme et épicurisme (c. 4).

Alors qu'on définit communément la théologie naturelle comme la science de Dieu et des choses divines. Wolff en propose cette autre définition: «scientia eorum, quae per Deum possibilia sunt, hoc est, eorum, quae ipsi insunt, et per ea, quae ipsi insunt, fieri posse intelliguntur» (§ 1), tout en faisant remarquer qu'elle ne s'oppose pas à la première, puisqu'il faut entendre par choses divines ce qui est possible du fait que Dieu existe et qu'il a tels attributs. Il précise, en outre, qu'il s'agit d'une discipline philosophique, acquise par les lumières de la raison, et qu'elle se distingue par là, sans confusion possible, de la théologie surnaturelle, qui s'appuie sur la révélation (not. § 1, 9 et not.).

Parce qu'elle est une science rationnelle et aussi parce qu'on ne peut obtenir d'une autre faon la connaissance de ce qui ne tombe pas sous les sens, la théologie naturelle doit démontrer que Dieu existe, quels sont ses attributs, et quelles choses sont possibles par ceux-ci (§ 2, 3 et not. § 4). Or, dans ce but, il lui faut partir d'une définition nominale de Dieu. Car, d'une part,

pour démontrer l'existence de Dieu, encore faut-il connaître la signification de ce terme (§ 5, 9), et, d'autre part, de cette définition, doivent être déduits tous les attributs divins (§ 6); d'où il suit que cette définition ne doit rien contenir de plus que ce qui est nécessaire à cette déduction (§ 7). En plus de cette définition, on ne peut utiliser dans la *Theologia naturalis,* d'autres principes que ceux qui reposent sur une expérience incontestable ou sur d'autres démonstrations (§ 8), comme celles des traités qui l'ont précédée (§ 11 et not., *Discursus praeliminaris,* § 96), et qui tendent vers elle comme vers leur but (p. 25x lignes 11-13). Ainsi faut-il y admettre tout particulièrement: la nécessité des essences définie dans *l'Ontologia,* § 299-303, le *nexus rerum,* la théorie des éléments et la perfection du monde établis dans la *Cosmologia,* sect. 1, c. 1, sect. 2, c. 2-3, sect. 3, c. 2, de même que l'existence des âmes démontrée dans la *Psychologia empirica,* pars I, sect. 1, c. 1 (p. 22x ligne 4 - p. 24x ligne 16).

En ce qui concerne plus spécialement la démonstration de l'existence de Dieu, Wolff souligne qu'un seul argument suffit pour acquérir la certitude en ce domaine, et que point n'est besoin, par conséquent, de les multiplier. Ce qui serait d'ailleurs une complication inutile, car chacun d'eux nécessiterait une définition nominale différente dont il faudrait déduire les attributs divins, à moins de démontrer que c'est le même être dont les divers arguments prouvent l'existence (§ 10 et not.).

Par la preuve que Dieu existe, la théologie naturelle apporte la réfutation de l'athéisme (§ 12). Mais elle doit aussi fournir la notion distincte de ses attributs (§ 13). Et, pour ce faire, elle doit utiliser les termes qui servent à désigner ceux-ci selon leur signification communément admise (§ 14), et notamment selon les sens qu'ils ont dont l'Écriture. Car le but de cette discipline est de convaincre les athées qu'existe l'Être que l'Écriture appelle Dieu; et d'ailleurs, quand on parle de Dieu, note Wolff, c'est toujours dans le sens où l'Écriture emploie ce terme (§ 15-16)." (pp. 465-367)

7. ———. 1973. "De la démonstration "a posteriori" de l'existence et des attributs de Dieu, ou la "Theologia naturalis, Pars I" de

Christian Wolff (Deuxième partie)." *Giornale di Metafisica* no. 28:537-560.

Repris dans: *Introduction à l'Opus Metaphysicum de Christian Wolff,* pp. 139-162.

"Telle est la face du Dieu de Wolff, dont tout l'exposé précédent montre qu'il ressemble beaucoup à celui de Leibniz, au point que d'aucuns seront peut- être tentés de conclure que Wolff n'a fait ni plus ni moins, dans la *Theologia naturalis, pars I,* que reprendre à son compte l'ensemble des thèmes de la théologie leibnizienne. Cela est indéniable au sujet des deux points qui commandent le reste de la doctrine: la formation des idées des choses dans l'intelligence divine, et le choix du meilleur monde.

Pour Wolff, comme pour Leibniz, l'intelligence divine, étant toujours en acte et même acte pur, ne peut pas ne pas former les idées des choses; ce qui revient à dir que ces idées existent nécessairement en elle, sans éclairer toutefois le comment de leur formation. Mais il faut noter que Wolff, bien avant d'écrire la *Theologia naturalis,* avait proposé de l'expliquer en disant, un peu à la manière des Thomistes (148), que Dieu forme les idées des choses, lorsqu'en contemplant les perfections de son essence, il conoit toutes les faons possibles de les représenter hors de lui, comme en témoigne sa *Lettre à Leibniz* du 2 Décembre 1705 (149). Et il a repris et développé cette explication dans la seconde partie de la *Theologia naturalis,* 102 et not.

Quant à la création du monde, selon Wolff comme selon Leibniz, il ne convient pas à Dieu, en raison de la perfection de son intelligence et de sa volonté, d'en choisir un autre que le plus parfait et le meilleur, bien qu'il aurait pu cependant en créer un autre; ce qui à leurs yeux sauvegarde la liberté de la création. Et lorsqu'il s'agit d'expliquer l'existence du mal dans le monde le meilleur ou, plus exactement lorsqu'il s'agit de concilier la thèse du meilleur des mondes avec le déploiement du mal en son sein, Wolff, pas plus que Leibniz, n'apporte d'argument convaincant en faveur de l'Optimisme.

A noter que, comme Leibniz, Wolff fait siennes beaucoup de thèses de la doctrine scolastique, et notamment thomiste, sur Dieu." (pp. 558-559)

8. ———. 1976. "De quelques difficultés à propos des notions 'd'a posteriori' et 'd'a priori' chez Wolff." *Teoresi* no. 31:23-34.

   Repris dans: *Études et documents photographiques sur Wolff,* pp. 132-143.

   "Comme l'indique le titre de cet article, nous n'entendons pas exposer ici, de faon exhaustive, la doctrine de Wolff sur les rapports de l'a posteriori et de l'a priori, ce qui reviendrait à développer sa théorie générale de la connaissance, à laquelle nous consacrerons une autre étude, mais seulement signaler les difficultés auxquelles se heurte l'interprétation de certaines de ses affirmations et aussi de certains de ses silences à propos de ces deux notions, tant dans sa classification des différentes sortes de connaissance que dans son exposé des preuves de l'existence de Dieu. Pour ce qui est de la première question, il note que tout ce que nous connaissons, nous l'acquérons soit a posteriori, soit a priori, c'est-à-dire soit par l'expérience, soit par le raisonnement, en précisant que la connaissance a posteriori s'opère par le moyen des sens pour tout ce qui est extérieur à nous, grâce à l'aperception pour ce qui se passe en nous, et que la connaissance a priori est l'oeuvre de l'entendement discursif, c'est-à-dire de la raison.

   D'une part donc, l'expérience sensible qui consiste dans l'attention prêtée à nos perceptions tant externes qu'internes et se ramène à l'intuition, sans englober les jugements qui portent directement sur celles-ci; d'autre part, la raison qui, de propositions déjà connues, en déduit d'autres qui ne l'étaient pas. La première porte sur les singuliers, puisque nous ne percevons que ceux-ci; la seconde a pour objet les vérités universelles dont la raison, a pour fonction de découvrir le lien.

   A ces deux formes de connaissance, il en ajoute une troisième: la connaissance mixte, acquise en partie a posteriori, en partie a priori, c'est-à-dire à la fois par l'expérience et par la raison, en donnant comme exemple la conclusion du raisonnement qui, à partir des effets du soleil connus a posteriori, et grâce à la

médiation de la notion de feu, permet d'affirmer que le soleil est un feu.

Il distingue par ailleurs deux sortes de raison : la raison pure et la raison non pure. La raison est pure, lorsqu'on n'admet dans le raisonnement que des définitions et des propositions connues a *priori,* c'est-à-dire acquises elles-mêmes par le raisonnement, comme c'est le cas en arithmétique, en géométrie et en algèbre. Elle n'est pas pure, lorsqu'on admet aussi dans le raisonnement des définitions et des propositions connues *a posteriori,* c'est-à-dire par l'expérience, comme en physique et en astronomie par exemple." (pp. 23-25 nombreuses notes omises)

9. ———. 1977. "De la démonstration "a priori" de l'existence et des attributs de Dieu, et des erreurs sur Dieu, ou la "Theologia naturalis, Pars II" de Christian Wolff (Première partie)." *Giornale di Metafisica* no. 32:85-109.

   Repris dans: *Introduction à l'Opus Metaphysicum de Christian Wolff,* pp. 163-187.

   "Dans les prolégomènes de la *Theologia naturalis, Pars I,* qui servent d'introduction générale à l'ensemble de sa théologie naturelle, Wolff avait défini avec beaucoup de rigueur sa conception de celle-ci, tant du point de vue de l'objet que de celui de la méthode, en la distinguant nettement de la théologie révélée. Point n'était donc besoin, pour lui, d'y revenir dans la *Theologia naturalis, Pars II,* mais seulement de préciser la raison de cette seconde partie et ce qui la différencie de la première. Il s'en explique dans la préface de ce nouveau traité.

   Alors qu'il s'était efforcé, dans la première partie, de démontrer l'existence et les attributs de Dieu à partir de la considération du monde (9), son but, dans la seconde, est d'effectuer cette démonstration à partir de la notion de l'être très parfait et de la nature de l'âme (10); ou, comme il dit encore, de démontrer l'existence de Dieu à partir de la notion de l'être très parfait et de déduire ses attributs de la considération de notre âme (11). Ces formules se complètent plus qu'elles ne s'opposent. Car, souligne-t-il, nous ne pouvons connaître la nature de l'être très parfait qu'à partir de celle de notre âme et il s'ensuit que

démontrer l'existence de Dieu à partir de la notion de l'être très parfait revient à le faire à partir de la connaissance de notre âme (12).

Aussi se croit-il autorisé à conclure que cette preuve, qu'on dénomme *a priori,* parce qu'elle consiste à inférer l'existence nécessaire de Dieu de sa définition comme l'être très parfait (13), est non moins *a posteriori* que celle qui s'appuie sur la considération du monde (14).

Nous aurons à revenir sur cette affirmation qui ne laisse pas de surprendre. Mieux vaut, pour le moment, suivre l'exposé de Wolff. Or il indique qu'il s'agit, malgré tout, d'une autre sorte de preuve qui implique une autre faon de démontrer les attributs divins et commande un autre système de théologie que celui contenu dans la première partie (15). Il précise par exemple (§627 et not.) que, dans celle-ci, on confère à Dieu les attributs qui permettent de rendre compte de l'existence des âmes et du monde, alors que, dans la seconde, on connaît ses perfections, en lui attribuant au degré suprême et *per modum actus,* ce qui appartient à l'âme *per modum facultatis*. Encore faut-il noter que, dans la seconde partie, il ne se borne pas à démontrer autrement ce qui l'a déjà été dans la première, mais y traite de questions qu'il n'a pas abordées dans celle-ci (16) et que nous aurons l'occasion d'indiquer. Toutefois, parce qu'il considère comme complet (17) le système de théologie qui y est exposé et qui s'appuie sur la définition de Dieu comme l'être nécessaire, raison suffisante de tout ce qui est, il n'est pas question, pour lui, d'en développer, dans la seconde partie. un autre aussi complet, fondé sur la notion de l'être très parfait, mais d'en démontrer seulement les thèses principales (18).

Or, s'il a consacré à celles-ci les quatre chapitres de la première section, qui couvrent la moitié de la *Theologia naturalis, Pars II,* bien qu'il ait affirmé, dans la *Theologia naturalis, Pars I* (19), qu'il n'est pas besoin de démontrer l'existence de Dieu de plusieurs faons, c'est à n'en pas douter à cause du succès remporté par la preuve *a priori* après que Descartes l'eût illustrée à la suite de saint Anselme (20), et parce qu'il entendait lui conférer une force qu'à son avis Descartes n'a pas

réussi o)à lui donner (21). Mais une autre raison l'y a sans doute également poussé, qu'il indique lui-même (22) lorsqu'il affirme qu'il est plus facile de déduire les attributs divins de la connaissance de notre âme que de celle du monde.

4. Quoiqu'il en soit, la *Theologia naturalis, Pars II* se divise en deux sections très distinctes: - la première dans laquelle il analyse la notion de l'être très parfait et démontre *a priori* l'existence de Dieu (c. 1), ainsi que ses principaux attributs: entendement (c. 2), volonté (c. 3), création, providence et puissance (c. 4); la seconde dans laquelle il se livre à un examen critique des erreurs fondamentales sur Dieu: Athéisme (c. 1), Fatalisme, Déisme, Naturalisme (c. 2), Anthropomorphisme, Matérialisme, Idéalisme (c. 3), Paganisme, Manichéisme, Spinozisme, Épicurisme (c. 4).

Autant de points que nous allons envisager tour à tour; et, tout d'abord, le problème de la preuve *a priori*." (pp. 87-88)

(9) *Theologia naturalis, Pars I,* praefatio, p. 24*, lignes 8-16, *Theologia naturalis, Pars Il,* praefatio, p. 11*, lignes 10-13, § 429, 627.

10. ———. 1977. "De la démonstration "a priori" de l'existence et des attributs de Dieu, et des erreurs sur Dieu, ou la "Theologia naturalis, Pars II" de Christian Wolff (Deuxième partie)." *Giornale di Metafisica* no. 32:238-272.

    Repris dans: *Introduction à l'Opus Metaphysicum de Christian Wolff,* pp. 187-222.

    "Arrivés au terme de notre analyse de la *Theologia naturalis, Pars II,* il nous reste à dresser le bilan de son apport. Wolff a raison d'affirmer qu'elle n'est pas la simple répétition sous une autre forme des thèses qu'il a démontrées dans la *Theologia naturalis, Pars I.*

C'est évident pour toute la seconde section où il procède à l'examen critique des erreurs sur Dieu; les quatre chapitres qu'elle comporte sont absolument neufs. Ils répondent à coup sûr au besoin de se justifier contre les attaques des théologiens piétistes de Halle et notamment de Joachim Lange, son ennemi acharné, qui l'accusait de verser dans les unes et les autres, à l'exception du Manichéisme. Mais, par-delà ce souci apologétique, ils manifestent un indéniable effort de clarté et de rigueur en une matière où régnait à l'époque une grande confusion. On peut certes regretter qu'il n'ait pas cru bon de se référer à des sources précises pour les exposer et les critiquer, sauf en ce qui concerne le Spinozisme, qu'il a tort de taxer d'athéisme, mais au sujet duquel il a dénoncé avec beaucoup de vigueur les difficultés que soulève la thèse de l'unicité de la substance.

Cela est non moins vrai de la première section. On peut le montrer négativement, en énumérant les points de la *Theologia naturalis, Pars I* sur lesquels Wolff ne revient pas, comme la science de simple intelligence et la science de vision, le droit de Dieu sur ses créatures, sa sainteté, sa justice et son essence, ainsi que ceux qu'il ne fait qu'effleurer alors qu'il les avait abondamment développés, comme l'Optimisme et le problème du mal, l'organisation des fins par la sagesse divine, de décret de Dieu et son mode de présence. Mieux vaut le faire positivement en insistant sur ce qui est nouveau dans cette section et qu'on peut ramener à trois points principaux: la preuve *a priori* de l'existence de Dieu, l'origine des idées dans son entendement et la détermination des *affectus* qui peuvent lui être attribués.

Son exposé de la preuve *a priori* vient heureusement compléter la *Theologia naturalis, Pars I* dans laquelle il n'avait fait état que de la preuve *a posteriori* et plus exactement de la preuve par la contingence. Le fait qu'il ait tenu à en traiter à part souligne l'intérêt qu'il lui portait, malgré ses réserves quant à la présentation qu'en a fait Descartes. Celles-ci le situent dans le sillage de Leibniz, mais il a présenté cette preuve de faon plus détaillée et plus didactique que ce dernier." pp. 268-269.

"Dans ces conditions, il est possible malgré tout de conclure que la seconde partie de la *Theologia naturalis* apporte des compléments à la fois importants et intéressants à la première, avec laquelle elle forme un ensemble remarquablement complet des question relatives à Dieu, envisagées à la lumière de la raison. Dans la préface à cette seconde partie (p. 21 C, lignes 2-5), Wolff se targue d'avoir été plus loin en ce domaine que ses prédécesseurs. Le compliment qu'il s'adresse ainsi n'est pas démérité. Car, dans la foulée de Descartes, il a contribué, plus que quiconque, à l'élaboration d'une théologie naturelle proprement dite, c'est-à-dire d'une métaphysique de Dieu, libérée de la tutelle de la théologie révélée, tant dans sa méthode que dans les questions dont elle traite." (p. 272)

11. ———. 1978. "La conception wolffienne de la philosophie d'après le "Discursus praeliminaris de philosophia in genere"." *Filosofia Oggi* no. 1:403-428.

    Repris dans: *Études et documents photographiques sur Wolff,* pp. 163-222.

    "Le *Discursus praeliminaris* est composé de 6 chapitres où il est traité tour à tour: -- des trois formes historique, philosophique et mathématique, de la connaissance humaine (c. 1), -- de la définition et des caractéristiques de la philosophie (c. 2), -- de ses différentes parties (c. 3), -- de sa méthode (c. 4), du style qu'il convient d'y employer (c. 5); -- enfin de la "libertas philosophandi", c'est-à-dire des possibilités d'expression qui doivent être reconnues au philosophe (c. 6).

    L'ensemble constitue un véritable manifeste, dans lequel Wolff exprime sa conception de la philosophie, dont nous allons tenter de dégager les principaux points, marqués par les titres de ces six chapitres, mais en regroupant leurs paragraphes lorsqu'ils relèvent d'un même thème.

    Nous pouvons, selon Wolff, exercer trois sortes de connaissance ou, plus exactement, exercer notre connaissance de trois faons. La première, qu'il dénomme historique, consiste dans la découverte de ce qui existe ou se produit dans le monde matériel et en nous (§ 1-2), c'est-à-dire dans la saisie pure et simple des faits (§ 7, 17). La seconde, dite philosophique, est la

recherche de la raison de ces faits; ce qui revient à dire qu'elle tend à expliquer pourquoi ces faits existent ou se produisent (§ 4-7, 17). La troisième, qu'il appelle mathématique, cherche à déterminer la quantité c'est-à-dire, dans son esprit, le degré en plus ou en moins qui affecte tout ce qui est fini, tant dans le domaine matériel que dans celui de l'âme (§ 13 et not., 14, 17).

Au sujet de la première, il précise qu'elle est acquise par les sens, soit externes, soit internes (§ 1). A propos de la seconde, il est facile d'inférer de ses propos qu'elle est l'oeuvre de l'entendement discursif ou de la raison (§ 9). Quant à la troisième, elle requiert certes la mesure, mais aussi la démonstration (not. § 14, 19). Si bien que ces trois formes de la connaissance humaine pourraient, selon leur origine, c'est-à-dire du point de vue des moyens mis en œuvre, être regroupées en deux catégories: d'une part la connaissance historique ou sensible, d'autre part la connaissance philosophique et la connaissance mathématique qui font appel à la raison, si les développements de Wolff au sujet de la première ne s'y opposaient.

2. Il considère, en effet, comme en faisant partie, ce que nous apprenons par ouï-dire, par exemple que les enfants élevés parmi les animaux ne savent pas exercer leur raison (not. § 1). 11 explique, en autre, comme Descartes (4), qu'il y a une connaissance historique des vérités philosophiques et mathématiques, lorsqu'on les connaît sans pouvoir les démontrer (§ 9, 15-16, 19, 50-53, 156). Il distingue enfin de la connaissance historique, qu'il appelle commune et à laquelle suffit l'attention prêtée aux donnée des sens, la connaissance historique, qu'il qualifie de secrète ("arcana") et dans laquelle la raison doit suppléer aux sens (§ 20 et not., 21), bien qu'elle puisse être ramenée à la première, grâce aux arts et à l'expérimentation (§ 24, 25).

Autrement dit, il désigne, sous l'appellation générale de connaissance historique, des réalités fort différentes qui ne se laissent pas ramener à la pure activité des sens, à part la connaissance historique commune, laquelle se confond avec la connaissance vulgaire (§ 23) (5) et constitue le plus bas degré

de la connaissance humaine (§ 22). L'exemple de connaissance par ouï-dire qu'il donne relève déjà de l'entendement, non discursif s'entend. A combien plus forte raison cela est-il vrai des vérités philosophiques et mathématiques que nous ne pouvons démontrer, mais que nous comprenons cependant, et c'est pourquoi il emploie le verbe "intelligere" à propos des premières (§ 50, 54). Quant aux faits cachés, sur lesquels porte la connaissance historique secrète, comme la composition de la lumière établie par Newton (6), il faut non seulement les découvrir, mais aussi les démontrer (§ 20 et not.), ce qui requiert l'intervention de la raison" (pp. 404-405)

12. ———. 1979. "De la notion de philosophie expérimentale chez Wolff." *Etudes Philosophiques* (4):397-406.

    Repris dans: *Études et documents photographiques sur Wolff,* pp. 53-62.

    "Wolff s'est beaucoup intéressé à la philosophie expérimentale, comme le prouve le fait qu'il a publié une vingtaine d'articles' et deux ouvrages' sur des sujets relevant de cette discipline, dont il parle, en outre, très souvent dans ses autres écrits, dans deux desquels il lui consacre tout un chapitre. Dans ces articles, ces deux ouvrages et ces deux chapitres, la philosophie expérimentale ne fait qu'un, pour lui comme pour Newtons, avec la physique expérimentale. Les descriptions d'expériences et d'instruments qu'il y donne, ainsi que les considérations qui accompagnent ces descriptions, ne présentent plus guère d'intérêt aujourd'hui, sinon pour l'historien des sciences; aussi ne nous y arrêterons-nous pas. Par contre, les diverses notations dont il parsème ses autres écrits au sujet de la nature et surtout du domaine de la philosophie expérimentale méritent l'attention; car elles dénotent une conception de celle-ci, pour le moins originale, que nous nous proposons d'examiner.

    L'essentiel de cette conception peut se résumer d'un mot : au lieu de cantonner la philosophie expérimentale dans les limites de la physique, comme on l'a fait jusqu'alors, il faut l'étendre à toutes les parties de la philosophie. C'est là un point sur lequel Wolff revient à diverses reprises, en indiquant à et là quelques

autres disciplines susceptibles de faire appel à l'expérience, à savoir, selon l'ordre chronologique des textes : la théologie, la morale, la politique, la psychologie, l'ontologie et la cosmologie générale." pp. 397-398.

"Quoi qu'il en soit, Wolff ne s'explique pas sur ces points pourtant importants. Et ce manque de précision, qui traduit un manque de netteté dans sa conception de la nature de la philosophie expérimentale, est sans doute à l'origine de ses déclarations contradictoires au sujet de la psychologie empirique. En effet, tantôt il affirme qu'elle ne ressortit pas à la connaissance historique, tantôt au contraire il prétend qu'elle est une pure histoire de l'âme, et cela de faon d'autant plus incompréhensible que la première affirmation se rencontre dans le *Discursus praeliminaris* et la seconde dans la *Philosophia rationalis sive Logica,* qui ont été publiés en un seul volume.

Aussi en arrive-t-on à la conclusion que la conception wolffienne de la philosophie expérimentale, si originale et intéressante soit-elle, n'en laisse pas moins d'être imprécise. Et la raison en est à chercher dans le fait que les rôles respectifs de l'expérience et de la raison n'y sont pas suffisamment délimités. Autrement dit, nous retrouvons là le problème des rapports de l'a *posteriori* et de l'a *priori,* que Wolff, nous l'avons montré ailleurs, n'est pas parvenu à éclairer pleinement.

Mais il reste que cette conception s'appuie sur une notion large et souple de l'expérience, sous ses deux formes, qui permet d'étendre son emploi à toutes les parties de la philosophie, en respectant la diversité de la nature de leurs objets. Et c'est là ce qui mérite d'en être retenu et qui est du plus haut intérêt. Car il ne fait pas de doute que l'emploi conjugué de l'expérience et de la raison, comme il le dit fort bien, «ad certitudinem cognitionis plurimum facit, et progressum in scientiis juvat». Seulement, afin d'éviter toute ambiguïté, en raison de l'usage, établi avant Wolff et retenu après lui, de considérer le terme de philosophie expérimentale comme synonyme de physique expérimentale, mieux vaudrait parler, pour caractériser ce qui est non seulement l'essentiel de son enseignement sur ce point, mais

aussi la marque spécifique de sa méthode, d'une extension de l'emploi de l'expérience, plutôt que d'une extension de la philosophie expérimentale, à tous ces domaines. N'est-ce pas d'ailleurs ce qui ressort de ce qu'il dit des rapports de la connaissance philosophique et de la connaissance historique qui ne fait qu'un avec l'expérience" ? 1l affirme, en effet, que la première ne peut se passer de la seconde, qui lui sert de fondement indispensable, en même temps que parfois de confirmation", et ajoute : «Nobis per omnem philosophiam sanctum est utriusque connubium».

En tous les cas, cet aspect de sa philosophie est d'autant plus digne de remarque qu'il est l'un des représentants les plus authentiques et les plus célèbres du rationalisme, et que l'histoire a surtout retenu l'usage qu'il a fait de la méthode démonstrative, c'est-à-dire *a priori.* C'est au point qu'on a souvent porté contre lui l'accusation d'avoir pratiqué un rationalisme outrancier; ce qui, on le voit, est à la fois faux et injuste. Car, par son souci de faire partout appel à l'expérience pour établir les points de départ de ses démonstrations ou pour confirmer les conclusions de celles-ci, il a tracé, entre le rationalisme pur qui n'attribue de valeur qu'à la déduction *a priori,* et l'empirisme strict qui ne fait fond que sur l'expérience, une voie médiane permettant d'éviter les écueils de l'un et de l'autre". (pp. 397-398)

13. ———. 1979. "En quel sens peut-on dire que Wolff est rationaliste?" *Studia Leibnitiana* no. 11:45-61.

    Repris dans: *Études et documents photographiques sur Wolff,* pp. 144-160.

    "Objet d'une vogue considérable de son vivant et durant les premières années qui suivirent sa mort, Wolff fut très vite éclipsé par Kant et les Post-Kantiens, dont le succès le relégua, non pas dans l'oubli, car on n'a jamais cessé de parler de lui, mais parmi les auteurs qu'on ne lit plus. Et c'est ce qui explique que tant d'ouvrages d'histoire de la philosophie aient pu colporter et colportent encore sur son compte des contrevérités aussi tenaces que regrettables, par exemple qu'il n'a fait que systématiser et vulgariser la pensée de Leibniz', qu'il ramène

toutes les démonstrations de l'existence de Dieu à la preuve ontologique', ou qu'il a soutenu un rationalisme outrancier et si absolu qu'il ne laisse aucune place à l'expérience dans la constitution du savoir.

C'est ce dernier point que nous nous proposons d'examiner ici, du moins pour une part. Car le rôle qu'il attribue à la raison dans l'acquisition de la connaissance intellectuelle permet de distinguer un autre sens dans lequel on peut dire qu'il est rationaliste. Et c'est pourquoi le titre de cette étude est exprimé au pluriel." (p. 144)

14. ———. 1979. "Les preuves wolffiennes de l'existence de Dieu." *Archives de Philosophie* no. 42:381-396.

    Repris dans: *Études et documents photographiques sur Wolff,* pp. 184-199.

    "Wolff a exposé trois preuves de l'existence de Dieu, qu'il dénomme respectivement : a posteriori, par l'ordre de la nature, et a priori. Par preuve a posteriori, il entend celle qui part de la démonstration de la contingence de l'existence de l'âme et du monde et en cherche la raison suffisante dans un être nécessaire distinct de l'une et de l'autre. La preuve par l'ordre de la nature est une variante de la précédente, en tant qu'elle procède, de la même faon, à partir de la démonstration de la contingence des lois du mouvement. Quant à la preuve a priori, elle requiert non seulement la démonstration de la possibilité de l'être très parfait, mais aussi celle de l'existence de l'être nécessaire avec lequel il ne fait qu'un, pour conclure qu'il ne peut pas ne pas exister. Ces preuves supposent, en outre, qu'on démontre que conviennent les attributs conférés à Dieu par l'Écriture: dans les deux premiers cas, à l'être nécessaire; dans le troisième, à l'être très parfait." (*Résumé*, p 381)

15. ———. 1981. "Logique formelle et logique de la vérité dans la "Philosophia rationalis sive Logica" de Christian Wolff. Première Partie." *Filosofia Oggi* (4):339-373.

    Repris dans: Études et documents photographiques sur *Wolff,* pp. 65-131.

"La Philosophia rationalis sive Logica (1) est le premier des grands traités latins de Wolff. Son texte, précédé de celui du Discursus praeliminaris de philosophia in genere, comporte deux parties après les "Prolegomena" où il expose sa conception de la nature et de l'objet de la logique. La première, qu'il qualifie de théorique, correspond à ce qu'on a pris coutume d'appeler logique mineure, comme il le fait lui-même (not. 5 1125), ou encore logique formelle, et est divisée en quatre sections dans lesquelles il traite tour à tour des présupposés psychologiques et ontologiques de la logique (sect. 1), des notions (sect. 2), des jugements (sect. 3) et des raisonnements (sect. 4). La seconde, qu'il dénomme pratique, comprend six sections. Les deux premières, consacrées au discernement du vrai et du faux, du certain et de l'incertain (sect. 1), aux moyens de découvrir la vérité (sect. 2), se rapportent à la logique, dite par opposition, majeure ou matérielle (2). Dans les trois suivantes, il fixe les règles de la rédaction, de l'examen, et de la lecture des livres (sect. 3), celles de la communication de la vérité, qu'il s'agisse de convaincre, de réfuter, de se défendre, de mener une dispute ou d'enseigner (sect. 4), et celles de l'estimation des forces nécessaires dans chacun des domaines précédents (sect. 5). Dans la dernière, il éclaire l'usage de la logique dans la pratique de la vie et la faon de l'apprendre (sect. 6). Autrement dit, les deux premières sections de la seconde partie relèvent de ce qu'on peut appeler la logique de la vérité et les quatre dernières de la méthodologie.

De cet ensemble, nous n'analyserons que la logique formelle et la logique de la vérité, après avoir examiné, sous forme de préliminaires, la définition que donne Wolff de la logique, ainsi que les notions psychologiques et métaphysiques qu'il considère comme ses fondements.

Wolff définit la logique: la science qui dirige l'esprit humain dans la connaissance de la vérité (§ 1-2), c'est-à-dire la science des règles qu'il doit suivre pour la découvrir (§ 3)." (pp. 339-340)

(1) *Philosophia rationalis sive Logica, methodo scientifica pertracta et ad usum scientiarum atque vitae aptata*,

Francofurti et Lipsiae, 1728, 1732, 1740.

(2) Alors que les appellations: logique formelle et logique matérielle sont devenues courantes seulement depuis Kant, celles de logique mineure et de logique majeure semblent avoir fait leur apparition chez les Scolastiques du XVIIème siècle, qui se servaient aussi des termes: petite logique et grande logique, cependant que des auteurs comme Jungius et Micraelius utilisaient ceux de logique générale et de logique spéciale.

16. ———. 1982. "Des différentes parties de la métaphysique selon Christian Wolff." In *Christian Wolff 1679-1754. Interpretationen zur seiner Philosophie und deren Wirkung. Mit einer Bibliographie der Wolff-Literatur*, edited by Schneiders, Werner, 121-128. Hamburg: Felix Meiner Verlag.

Repris dans: Nouvelles études et nouveaux documents photographiques sur *Wolff,* pp. 15-22.

"Dans le *Discursus praeliminaris de philosophia in genere*, situé en tête de la *Philosophie rationalis sive Logica*, et où il brosse le programme d'ensemble de la philosophie, Wolff indique, comme il l'avait déjà fait dans la *Ratio praelectionum Wolffianarum in Mathesin et Philosophiam universam*, que la métaphysique comporte quatre parties qui doivent être traitées dans l'ordre suivant: Ontologie, Cosmologie générale, Psychologie, Théologie naturelle. Et il justifie cet ordre en soulignant que, dans la métaphysique comme en tout autre domaine, doivent précéder les parties dont les autres tirent leurs principes; ce qui est le cas de l'Ontologie par rapport à toutes les autres, de la Cosmologie générale par rapport à la Psychologie, ainsi que de ces deux dernières par rapport à la Théologie naturelle.

Or telles sont les quatre disciplines métaphysiques qu'il a développées successivement dans ses traités latins, en scindant la Psychologie en Psychologie empirique et en Psychologie rationnelle, et la Théologie naturelle en deux sous-parties aussi: la première *a posteriori*, la seconde *a priori*; ce qui donne la classification suivante: Ontologie, Cosmologie générale, Psychologie empirique, Psychologie rationnelles, Théologie naturelle *a posteriori* et Théologie naturelle *a priori*.

Mais, dans les *Vernünfftige Gedancken von Gott, der Welt und der Seele des Menschen, auch allen Dingen überhaupt*, qui constituent sa métaphysique allemande, il avait, sans employer ces appellations, adopté un autre ordre, plaant la Psychologie empirique avant la Cosmologie générale, parce qu'il jugeait celle-là plus facile pour ceux qui débutent dans l'étude de la philosophie, comme il l'explique dans l' *Ausführliche Nachricht von seinen eigenen Schrifften* . . . Et ce n'est qu'après que Thümmig, dans ses *Institutiones philosophiae Wolffianae in usus Acatlemicos adornatae*, eût présenté la métaphysique wolffienne en situant la Cosmologie générale avant la Psychologie empirique, et que Bilfinger eût fait de même dans les *Dilucidationes philosophicae de Deo, Anima et Mundo et generalibus rerum affectionibus*, que Wolff fit sienne cette répartition.

Cela ne change rien à vrai dire à sa conception d'ensemble de la métaphysique, que l'on n'est pas dès lors étonné de le voir définir comme la science de l'être, du monde en général et des esprits, c'est-à-dire de l'âme et de Dieu. Mais ce qu'il faut noter, c'est que, ce faisant, il lui attribue un champ d'investigation beaucoup plus vaste qu'Aristote et les Scolastiques d'une part, Descartes d'autre part." p. 121

"Telle est dans toute son ampleur et toute sa richesse la classification wolffienne des différentes parties de la métaphysique. Nouvelle et originale par son insertion de la Cosmologie générale à côté de la Psychologie, déjà introduite par Descartes dans le schéma aristotélico-scolastique réduit à l'Ontologie et à la Théologie naturelle, elle l'est non moins par celle de l'Ontologie expérimentale, de la Cosmologie générale expérimentale, de la Psychologie empirique et de la Théologie naturelle expérimentale à côté des parties dogmatiques correspondantes. Car, par ce double élargissement du domaine de la métaphysique, Wolff a profondément transformé la conception de la nature de celle-ci, nous l'avons dit, et celle de sa méthode, en mettant en plus vive lumière qu'on ne l'avait fait avant lui le rôle que doit jouer l'expérience en union avec la raison dans sa constitution, comme dans celle de tout le reste du savoir. Et, ce faisant, il a rappelé avec un rare bonheur aux

métaphysiciens qu'il n'est pas d'autre voie possible pour eux que ce qu'il dénomme si justement et si joliment le *connubium rationis et experientiae*." (p. 128 notes omises).

17. ———. 1982. "Logique formelle et logique de la vérité dans la "Philosophia rationalis sive Logica" de Christian Wolff. Deuxième Partie." *Filosofia Oggi* no. 5:71-102.

    Repris dans: *Études et documents photographiques sur Wolff,* pp. 65-131.

    "Il nous reste à porter un jugement sur ces deux parties de la logique de Wolff que nous venons d'analyser.

    1. Pour ce qui est de la première, qu'il appelle logique théorique, il va sans dire qu'elle n'est pas formelle au sens où l'on entend aujourd'hui ce terme; car s'il y utilise les variables littérales dans l'énoncé des syllogismes pour désigner les termes concrets, il n'exprime pas les constantes logiques par des symboles, malgré sa formation mathématique et son intérêt pour le projet leibnizien d'une caractéristique universelle. Mais il est possible d'affirmer qu'elle l'est au sens défini par Kant (*), à savoir que les notions, les jugements et les raisonnements y sont étudiés abstraction faite de leur contenu. Et il faut même souligner que, de ce point de vue, elle est plus formelle que beaucoup de traités scolastiques, ainsi que la logique de Jungius et celle de Port-Royal, par son souci de renvoyer à la logique de la vérité le soin d'établir les relations des propositions opposées et des conclusions des syllogismes avec la vérité et la fausseté, de même que l'analyse des démonstrations.

    Toutefois Wolff n'expose pas la logique formelle ainsi conue dans son intégralité, mais seulement ce dont la connaissance est indispensable pour formuler les règles de la logique pratique, ainsi qu'il l'indique à diverses reprises (§ 115 et not., not. § 299, § 397, 408) et conformément à sa définition de la logique comme la science directrice de l'esprit dans la connaissance de la vérité. Et c'est ce qui explique les lacunes de cette partie de son traité et la rapidité avec laquelle il traite certaines questions. (...)

2. Ce qui vient d'être dit de la logique formelle vaut également de la logique de la vérité. On y retrouve l'appel aux mêmes notions ontologiques dans l'analyse des jugements tant intuitifs que discursifs et dans celle des définitions nominales. La définition de la vérité logique comme la possibilité de déterminer le prédicat par la notion du sujet constitue une explicitation et un approfondissement dignes de remarque de celle proposée par Tschirnhaus, et à travers elle de celle de Descartes dont Tschirnhaus s'est inspiré. L'importance du lien établi par Wolff entre la démonstration et la découverte de la vérité ou, plus exactement, la saisie de la raison de la vérité, car la seule observation peut suffire pour découvrir la vérité, n'échappera à personne.

La logique de la vérité présente encore l'avantage de contenir, ainsi d'ailleurs que le chapitre sur les fondements psychologiques de la logique, les linéaments d'une théorie de la connaissance, qu'il serait intéressant d'expliciter, en les complétant à l'aide des notations a et là éparses dans ses autres traités et ses articles. Pour nous borner à ce qu'il en dit ici, rappelons: - 1) qu'il attribue deux sources à toutes nos connaissances: l'expérience sensible et le raisonnement, qui portent respectivement sur les êtres singuliers et sur les notions universelles; ce qu'il exprime en affirmant que toute connaissance est soit a posteriori, soit a priori, la seconde étant l'apanage exclusif de l'entendement discursif; - 2) qu'il explique que nous passons de la représentation de l'individuel à celle de l'universel, soit en réfléchissant sur ce qui est peru, soit en séparant ce qui est commun à plusieurs notions, soit en déterminant ce qui ne l'est pas ou en déterminant autrement ce qui l'est déjà d'une certaine faon dans une notion donnée ou, si l'on veut, soit par la réflexion, soit par l'abstraction, soit par une détermination arbitraire. D'où suit: - 1) que la connaissance a priori s'enracine dans la connaissance a posteriori; - 2) que l'abstraction n'est qu'un des moyens qui assurele passage de celle-ci à celle-là." (pp. 98-99)

"Ajoutons seulement qu'il résulte de ce qui vient d'être exposé à partir de la *Logica*, que l'objet de la connaissance intellectuelle est entièrement constitué par les notions des genres et des

espèces. Car si l'on ne fait pas appel à l'entendement intuitif, en tant que faculté indépendante de la raison, il est seulement possible d'envisager les idées selon leur extension, puisqu'on obtient dès lors la notion distincte des choses en les rattachant à leur genre et à leur espèce grâce au raisonnement et non en cherchant à avoir une vue compréhensive de leur essence grâce à l'intuition abstractive. Aussi ne peut-on s'étonner de voir Wolff en définitive tenir pour synonymes les deux appellations: notions et notions universelles.

De là ne suit pas pour autant que sa logique formelle, pour en revenir à elle, soit extensiviste. Bien au contraire, elle est plutôt compréhensiviste. Qu'il suffise d'en apporter pour preuve le fait qu'il y traite les propositions comme des attributives et ramène les catégoriques aux hypothétiques d'une part, et d'autre part qu'il y utilise, pour exprimer celles qui sont universelles, les adjectifs: omnis ou omne et non les adjectifs: omnes ou omnia." (p. 102)

18. ———. 1983. "Les rapports de la raison et de la foi selon Christian Wolff." *Studia Leibnitiana* no. 15:205-214.

Repris dans: *Études et documents photographiques sur Wolff,* pp. 229-238.

"Lorsqu'on traite du rationalisme de Wolff, on a d'ordinaire en vue la faon dont il conoit les rapports de la raison et de l'expérience. Mais *ce* n'est là qu'une des facettes du problème qui ne peut être pleinement élucidé que si l'on envisage aussi comment il comprend ceux de la raison et de la foi. Or c'est là un aspect méconnu de sa pensée, sans doute parce que dans ses traités latins il n'y fait que de brèves allusions et que l'on néglige trop souvent les *Horae subsecivae Marburgenses* où il s'en explique.

Ce point mérite d'autant plus l'attention que les Piétistes, comme Joachim Lange, son collègue de la Faculté de théologie de Marburg, l'ont accusé de détruire la religion révélée et que certains auteurs récents lui reprochent de ne pas reconnaître d'autres vérités que celles qui sont fondées sur l'évidence rationnelle.

Autrement dit, on retrouve à propos de ces seconds rapports la même appréciation négative qu'au sujet des premiers, laquelle repose sur le même préjugé que Wolff est un rationaliste intransigeant ne reconnaissant pas plus des vérités transcendant la raison qu'un concours de l'expérience à l'établissement des vérités rationnelles. Or ce jugement est complètement faux et ne tient pas compte de ses affirmations les plus explicites, ainsi que nous nous proposons de le démontrer en nous appuyant surtout sur les *Horae subsecivae*, mais sans négliger l'apport de ses autres ouvrages.

Une remarque préalable s'impose. Wolff à vrai dire ne traite pas directement et pour eux-mêmes des rapports de la raison et de la foi, mais à travers ceux de la philosophie et de la théologie' avec lesquels il les confond. C'est là une position discutable, mais que nous acceptons telle quelle, nous bornant à dégager de l'examen de ces derniers rapports sa conception de ceux de la raison et de la foi.

A cette fin nous délimiterons d'abord le domaine de la foi, tout en analysant le mode de connaissance dont elle relève, à partir de ce qu'il dit de l'objet de la théologie et de ses différentes parties. Puis nous expliquerons en quoi consiste la méthode qu'il préconise d'appliquer à la théologie, afin de préciser comment elle doit y être utilisée, car c'est surtout cette utilisation qui soulève la question des rapports de la raison et de la foi. Après quoi nous tirerons les conclusions auxquelles conduira notre exposé." (pp. 229-230)

19. ———. 1983. "Les "Opuscola metaphysica" de Christian Wolff." *Filosofia Oggi* no. 6:213-243.

Repris dans: *Introduction à l'Opus Metaphysicum de Christian Wolff,* pp.223-252.

"Sous ce nom *d'Opuscula metaphysica,* nous désignons deux petits écrits de Christian Wolff, intitulés,

-- le premier: De *differentia nexus rerum sapientis et fatalis necessitatis, nec non systematis harmoniae praestabilitae et hypothesium Spinosae luculenta commentatio, in qua simul genuina Dei existentiam demonstrandi ratio expenditur et*

multa religionis naturalis capita illustrantur, Halae Magdeb., 1723, 1737,

-- le second: *Monitum ad commentationem luculentam de differentia nexus rerum sapientis et fatalis necessitatis, quo nonnulla sublimia metaphysicae ac theologiae naturalis capita illustrantur, Halae Magdeb.,* 1723, 1737 (1).

Bien qu'il ne les range pas sous cette étiquette, ils appartiennent à la catégorie de ce qu'il appelle ses «Schutzschrifften». Car ils contiennent ses réponses à des critiques formulées par Joachim Lange, professeur de théologie à Halle, où il enseignait aussi à l'époque, contre ses thèses métaphysiques exposées dans la *Ratio praelectionum Wolffianarum in Mathesin et Philosophiam universam,* Halae, Magdeb., 1718, et surtout dans les *Vernünfftige Gedancken von Gott, der Welt und der Seele des Menschen, auch allen Dingen überhaupt, den Liebhabern der Wahrheit mitgetheilet,* Franckfurt und Leipzig, 1720." (pp. 213-214)

(...)

"Nous en avons fini avec la présentation de la *Luculenta commentatio* et du *Monitum*. Il faut maintenant dresser le bilan de leur apport.

Pour enchaîner avec ce qui précède, nous commencerons par sa critique du Spinosisme. Elle tourne tout entière autour du fatalisme universel. Mais certaines conséquences qu'il en tire, comme la négation de la perfection des choses, celle de la liberté divine et humaine, la confusion de Dieu avec la nature, appellent des réserves.

Il n'a pas vu que si Spinoza rejette la perfection apparente attribuée aux choses en fonction de leur finalité, il n'en reconnaît pas moins la perfection plus profonde de leur essence, qui tient au fait qu'elles ont été produites avec une souveraine perfection, puisqu'elles suivent nécessairement de l'essence divine qui est absolument parfaite.

Il n'a pas tenu compte que Spinoza, tout en refusant à Dieu et à l'homme la liberté conue comme un libre arbitre, affirme

cependant que Dieu est parfaitement libre du fait qu'il existe et agit en vertu de l'absolue perfection de son être conformément aux lois de sa nature raisonnable, se rapproche de la perfection et se libère de la servitude du corps.

Il n'a pas enfin été sensible au sens pourtant si vif qu'a Spinoza de la distance infinie qui sépare, si l'on peut ainsi s'exprimer, la substance de ses modes ou, si l'on veut, de la différence radicale de nature qui existe entre l'absolument infini et tout ce qui est fini, comme l'atteste la difficulté qu'il éprouve à dériver le second du premier. Faute de quoi, il n'a pas compris que Spinoza était habité par un authentique sens de Dieu qui s'oppose à ce qu'on l'accuse d'avoir confondu Dieu avec la nature.

Il est vrai qu'il était poussé à attaquer Spinoza sur ces trois points par le besoin de se défendre contre les accusations dont il était lui-même l'objet. Il est vrai aussi qu'il s'y trouvait en accord avec la plupart des philosophes et des théologiens de son temps. Il est certain enfin qu'il y déduit des conséquences qui étaient en germe dans les principes posés par Spinoza. Mais il reste que son tempérament dogmatique et logicien lui a fait méconnaître la complexité de la doctrine de celui-ci et l'a empêché de voir qu'elle ne se laisse pas ramener à un schéma unique.

Ceci dit, il faut cependant reconnaître que l'ensemble de sa critique du Spinosisme, outre certains aspects nouveaux, comme le rapprochement entre Spinoza et les partisans des idées arbitraires au sujet du fondement des possibles, ne laisse pas d'être rigoureuse et pertinente, en tant qu'elle se situe au niveau de ce qu'il appelle les raisons métaphysiques." (pp. 240-241 notes omises)

(1) Nous les désignerons désormais comme suit: *Luculenta commentatio* et *Monitum* dans le texte, et: L.C. et M. dans les notes.

20. ———. 1983. "A propos du projet de Wolff d'écrire une "Philosophie des Dames"." *Studia Leibnitiana* no. 15:46-57.

Repris dans: *Études et documents photographiques sur Wolff,* pp. 217-228.

"Quoi qu'il en soit, si l'on se rappelle le but ultime assigné par Manteuffel à la « Philosophie des Dames » (*), à savoir oeuvrer pour le bonheur de l'humanité, en essayant de rendre les femmes raisonnables et par elles les hommes, il apparaît que ce projet de Wolff n'est pas étranger à son dessein de rendre la philosophie utile à la pratique de la vie tant publique que privée.

C'est là un aspect de sa pensée qui n'a pas été assez remarqué. On le considère la plupart du temps comme un théoricien pur, faute d'avoir prêté suffisamment attention au fait que la *Philosophia rationalis sive Logica* n'est pas seulement *ad usum scientiarum*, mais aussi *ad usum vitae aptata*, ainsi que l'indique son titre, et que sa partie pratique est beaucoup plus développée que sa partie théorique, d'une part; d'autre part, que ses traités de métaphysique ouvrent tous la voie à sa philosophie pratique qui, avec les deux tomes de la *Philosophia practica universalis,* les huit du *Jus naturae,* les cinq de la *Philosophia moralis sive Ethicam,* celui du *Jus gentium* et celui de *l'Oeconomica,* constitue la part de son œuvre la plus importante quantitativement. Ce préjugé vient aussi de ce qu'on rélègue d'ordinaire au second plan derrière ces traités *les Horae subsecivae Marburgenses,* sans relever la portée pourtant très significative de leur titre: *quibus philosophia ad pubiicam privatamque utilitatem aptatur*.

Ces *Horae subsecivae* sont destinées à montrer l'aide irremplaable apportée par la philosophie à la théologie révélée, au droit et à la médecine, c'est-à-dire aux disciplines enseignées dans les Facultés supérieures qui préparent à la vie publique", en leur proposant sa propre méthode dont l'emploi les rendra rigoureuses, ainsi que les notions directrices qui leur permettent d'affiner et de préciser les leurs. Mais elles fourmillent aussi de notations plus practico-pratiques, si l'on peut ainsi s'exprimer." (pp. 565-566 notes omises)

(*) Lettre du 8 Mai 1739.

21. ———. 1983. "Des rapports de Wolff avec Leibniz dans le domaine de la métaphysique." In *Leibniz, Werk und Wirkung. IV Internationaler Leibniz Kongress, Hannover, 14-19 November 1983. Vorträge.*, 153-163. Hannover: Gottfried-Wilhelm-Leibniz-Gesellschaft.

    Repris dans: Beiträge zur Wirkungs- und Rezeptionsgeschichte von Gottfried Wilhelm Leibniz (Studia leibnitiana, Supplementa XXVI). Hannover 1986, pp. 88-96.

    "A propos des rapports de Wolff avec Leibniz dans le domaine de la métaphysique, est née de son vivant l'opinion qu'il n'a fait qu'y systématiser les thèses de celui-ci. Quoi qu'il en soit de sa valeur, elle présente l'intérêt d'inviter à tenter une approche d'ensemble du problème, comme d'ailleurs sa propre déclaration en réaction contre elle qu'il s'est très peu inspiré du philosophe de Hannovre.

    Pour en juger, nous apporterons d'abord quelques précisions sur l'origine de cette opinion. Puis, à partir de la déclaration de Wolff, nous passerons en revue les questions sur lesquelles il s'est écarté de Leibniz. Nous relèverons ensuite celles à propos desquelles il a reconnu explicitement sa dépendance vis-à-vis de lui. Nous examinerons aussi les emprunts qu'il lui a faits, en les taisant, dans la solution de quelques autres. Enfin nous prendrons en considération la faon dont il a utilisé ses sources leibniziennes reconnues ou pas. Le tout, en nous en tenant aux données les plus importantes que fournit son œuvre latine sur ces divers points." (p. 153)

    (...)

    "Si rapide et partielle soit l'enquête que nous venons de mener, elle a fait apparaître que les rapports de Wolff avec Leibniz dans le domaine de la métaphysique ne se laissent pas enfermer dans l'alternative que nous évoquions au début. S'il s'écarte de l'héritage leibnizien sur beaucoup de points, celui-ci n'en est pas moins présent dans son élucidation de nombreux autres, même et y compris lorsqu'il n'en fait pas état. Aussi ne peut-on souscrire à sa déclaration qu'il y a "paucissima Leibnitii" dans sa métaphysique et doit-on l'interpréter comme l'expression de

son irritation en face des allégations de Lange. Il faut au contraire affirmer, en le paraphrasant, qu'il y a utilisé "-multa Leibnitii", mais de faon si personnelle qu'il est faux de prétendre avec ce dernier qu'elle n'est qu'une systématisation de celle de Leibniz.

Cette wolffianisation, si l'on peut dire, des thèses leibniziennes, est un point important à noter. Il serait facile de le prouver à partir de son illustration du principe de raison suffisante qu'il a tenté de démontrer et dont il a fait le grand principe d'explication sur lequel reposent toutes les parties de sa métaphysique, à partir aussi de sa théorie du *nexus rerum* qu'il a tirée de la définition leibnizienne du monde et qui sert de fondement à sa cosmologie générale, cependant qu'elle aide entre autres à délimiter les contours de la représentation de l'univers dans la connaissance humaine et à illustrer la doctrine des fins voulues par Dieu, partir encore de sa défense de l'Optimisme qu'il s'est efforcé d'établir du double point de vue de la volonté et de la puissance de Dieu, de sa sagesse et de sa bonté.

Dans ces trois cas, et l'on pourrait en citer beaucoup d'autres, il a si bien inséré et fondu dans sa propre métaphysique ses emprunts à Leibniz, qu'ils en font véritablement partie et qu'on peut dire qu'il a construit avec son propre système. Peut-être est-ce parce qu'il en avait conscience qu'il a tu certains d'entre eux.

En terminant nous citerons une autre de ses déclarations qui nous semble bien résumer ses rapports avec Leibniz en métaphysique, comme d'ailleurs dans tout le reste de sa philosophie, car elle met en lumière leur commun dénominateur et montre, du même coup, que leur complexité est plus apparente que réelle, tout en les situant dans l'ensemble de ceux qu'il a entretenus avec les autres philosophes dont il s'est aussi approprié certains thèmes: "Usus sum principiis Leibnitii, quando ceteris erant consona et veritas eorum mihi patebat, quemadmodum scholasticorum et aliorum." (p. 163 notes omises).

22. ———. 1983. "La critique wolffienne du Spinozisme." *Archives de Philosophie* no. 46:553-567.

Repris dans: *Études et documents photographiques sur Wolff,* pp. 200-215.

"Pour l'apprécier équitablement, il faut certes tenir compte de l'état de l'interprétation du Spinozisme au XVIIe siècle et des motifs, sinon des mobiles, qui ont amené Wolff à le combattre. Tout le portait à la sévérité. Mais l'on ne peut s'empêcher de regretter que sa critique soit entièrement négative. Il n'a relevé que les difficultés de cette philosophie qui lui en ont caché la beauté et la grandeur. De plus son tempérament dogmatique et logicien lui a fait méconnaître, à diverses reprises, sa complexité, notamment sur trois points flagrants: la perfection des choses, la liberté divine et humaine, la nature de Dieu et ses rapports avec les autres êtres.

Sur le premier point, il n'a pas vu que si Spinoza rejette la perfection apparente attribuée aux choses en fonction de leur finalité, il n'en reconnaît pas moins la perfection plus profonde de leur essence, qui tient au fait qu'elles ont été produites avec une souveraine perfection, puisqu'elles suivent nécessairement de l'essence divine qui est absolument parfaite".

Sur le second, il n'a pas tenu compte que Spinoza, tout en refusant, à Dieu et à l'homme, la liberté conue comme un libre-arbitre, affirme cependant que Dieu est parfaitement libre, du fait qu'il existe et agit en vertu de la perfection de son essence", et que l'homme, dans la mesure où il tend à persévérer dans son être, conformément aux lois de sa nature raisonnable, se rapproche du même coup de la perfection et se libère de la servitude du corps".

Sur le troisième, obnubilé par l'affirmation que les choses particulières sont des modifications des attributs de Dieu, il n'a pas été sensible au sens pourtant si vif qu'a Spinoza de la distance infinie qui sépare, si l'on peut s'exprimer ainsi, la substance de ses modes ou, si l'on préfère, de la différence radicale de nature qui existe entre l'absolument infini et tout ce qui est fini, comme l'atteste la difficulté qu'il éprouve à dériver

le second du premier'". Faute de quoi, Wolff n'a pas compris que Spinoza était habité par un authentique sens de Dieu, qui s'oppose à ce qu'on l'accuse aussi bien d'avoir confondu Dieu avec la nature, que d'être athée.

Mais ces graves réserves exprimées, il faut ajouter que sur beaucoup d'autres points, notamment dans ce qui a trait à la conception du nécessaire, du possible, de la substance et de ses attributs, la critique qu'a faite Wolff de la philosophie de Spinoza ne manque ni de pertinence, ni de rigueur. A vrai dire, il a même dénoncé les difficultés de celle-ci avec plus d'à propos et de sérieux que beaucoup de ceux qui l'ont précédé dans cette voie, en évitant leurs exagérations, même s'il a pu s'inspirer d'eux et, ce, parce que sa propre critique se situe, comme cette philosophie elle-même, en l'y suivant, au niveau de ce qu'il appelle les raisons métaphysiques'". Qui plus est, il y fait même preuve parfois de nouveauté, par exemple avec le rapprochement qu'il opère entre Spinoza et les partisans des idées arbitraires au sujet du fondement des possibles. Et c'est pourquoi elle ne mérite pas l'oubli dans lequel elle est tombée." (pp.565-567)

Raul Corazzon || e-mail: rc@ontology

Bibliographie Choisie de Jean École (tous les publications sur Christian Wolff). Deuxième partie: 1984-2008

Essais sur Christian Wolff

1. ———. 1984. "Wolffius redivivus." *Revue de Synthèse* no. 116:483-501.

   Repris dans: *Études et documents photographiques sur Wolff,* pp. 5-23.

   "La méthode de la philosophie, telle qu'il la conoit, est donc à la fois démonstrative et expérimentale, qu'il s'agisse de la philosophie théorique ou de la philosophie pratique, pour reprendre la grande division proposée par les premiers historiens de sa pensée, comme Ludovici.

   De la philosophie pratique, composée de la philosophie pratique universelle, du droit naturel, de la morale, de la politique, du droit des gens et de l'économique, nous ne dirons rien non plus, parce que nous la connaissons mal.

   Reste la philosophie théorique, c'est-à-dire la logique, la métaphysique et la physique dans laquelle il fait rentrer, outre la physique expérimentale et dogmatique, la physiologie animale et végétale, et la téléologie.

   Si, en ce qui concerne la physique expérimentale et la physiologie, il est parfaitement au courant des recherches de

son temps, il va sans dire que l'intérêt de son apport en ces domaines n'est plus aujourd'hui que d'ordre historique aussi.

La logique, qu'il divise en deux parties : la logique théorique et la logique pratique, en contient en fait trois. Car la seconde se subdivise en logique de la vérité et en méthodologie. Dans la première qui correspond à la logique formelle, il prend soin de considérer les notions, les propositions et les raisonnements en faisant strictement abstraction de leur contenu, et il renvoie à la logique de la vérité la tâche d'établir les relations des propositions opposées et des conclusions des raisonnements avec la vérité et la fausseté, de même que l'analyse de la démonstration. Si bien que si la partie théorique de sa logique n'est pas formelle au sens actuel du terme, car il n'exprime pas les constantes logiques par des symboles, malgré son goût pour le projet leibnizien d'une caractéristique universelle, elle l'est au sens encore admis par Kant, et de faon beaucoup plus pure que nombre de manuels scolastiques. Dans la partie méthodologique, il expose en détail les règles de la transmission de la vérité par les écrits et l'enseignement oral, ainsi que de son accueil. L'ensemble contient, en outre, les linéaments d'une théorie de la connaissance qu'il n'a jamais développée explicitement, mais qu'on peut tenter de reconstituer en s'appuyant aussi sur son analyse psychologique des fonctions de connaissance et les multiples notations dont sont parsemés ses ouvrages de métaphysique.

Or la métaphysique constitue la pièce centrale de son système. Elle suit la logique et est tout entière orientée vers la philosophie pratique ; ce qui montre que se sont également trompés ceux qui le tiennent pour un théoricien pur. Cependant, s'il ne cultive pas la théorie pour elle-même, il ne laisse pas d'y exceller. Et l'on peut dire que sa métaphysique est, de ce point de vue, en dépit des longueurs des traités latins, un monument remarquable, d'autant plus digne d'attention qu'elle joue, si l'on peut dire, le rôle de plaque tournante entre la philosophie scolastique, celles de Descartes et de Leibniz, d'une part, la philosophie kantienne et celles qui l'ont suivie, d'autre part.

Elle est composée de l'ontologie, de la cosmologie générale, de la psychologie empirique, de la psychologie rationnelle et de la théologie naturelle. Cette division, reprise par Kant qui l'a léguée à la postérité, en refusant toutefois d'y maintenir la psychologie empirique, nous semble aujourd'hui toute naturelle. Mais elle ne s'est pas imposée d'emblée. Chez les Aristotélico-Scolastiques, la métaphysique comprenait seulement l'ontologie et la théologie naturelle. Si certains Scolastiques post-suaréziens y faisaient rentrer timidement la psychologie, c'est Descartes qui l'y a définitivement introduite, mais il en supprimait ou presque l'ontologie. En redonnant plein droit de cité à celle-ci, Wolff renoue avec la tradition aristotélico-scolastique, mais il garde l'apport cartésien en ce qui concerne la psychologie, et surtout il lui ajoute la cosmologie générale ; ce que personne n'avait jamais encore tenté.

Or cet élargissement du champ de la métaphysique est lié à une conception de sa nature tout autre que celle de ses prédécesseurs. D'abord science de l'être en tant qu'être et de sa source, puis science des êtres immatériels, si l'on s'en tient, pour résumer, aux grands courants, elle devient avec Wolff la science de l'être en général et des différentes sortes d'êtres que sont le monde, l'âme humaine et Dieu." (pp. 498-500)

2. ———. 1984. "De la méthode universelle selon Christian Wolff." *Filosofia Oggi* no. 7:179-192.

   Repris dans: *Études et documents photographiques sur Wolff,* pp. 161-174.

   ""Le méthode, il n'est pas un seul philosophe du XVIIème siècle qui n'en ait parlé dans le sillage de Descartes, et durant la première moitié du suivant s'est développée la controverse au sujet de l'emploi de la méthode des mathématiques en philosophie (*). Le climat intellectuel de l'époque était tellement marqué par cette question, que Wolff ne pouvait manquer de l'aborder. Il s'en est même beaucoup préoccupé, comme en attestent les nombreux endroits de son œuvre où il en parle. Les plus importants sont sans contredit: le chapitre 4 du *Discursus praeliminaris de philosophia in genere*, les écrits

divers: lettres, préfaces à des ouvrages d'autres auteurs, programmes de cours, qui ont été réunis dans les *Meletemata Mathematico-Philosophica*, et beaucoup d'articles des *Horae subsecivae Marburgenses*. Mais alors qu'il se contente, dans le *Discursus,* de codifier les règles à suivre pour que la philosophie soit claire, rigoureuse et certaine, et dans les écrits des *Meletemata* d'affirmer que l'application des mêmes règles conduit aux mêmes résultats dans toutes les autres disciplines, notamment dans la théologie, le droit et la médecine, dans les *Horae subsecivae,* tout en rappelant les dites règles, il explique pourquoi leur portée est universelle et montre comment à partir d'exemples pris en ces trois domaines. Autrement dit, c'est dans les *Horae subsecivae* que Wolff livre l'ensemble de sa conception de la méthode et c'est donc à cet ouvrage qu'il faut recourir pour l'exposer dans son intégralité, sans toutefois négliger de faire appel aux autres textes qui éclairent certains de ses détails en soulignant l'importance qu'ils revêtaient à ses yeux.

Le plan de cet exposé est imposé par ce qui vient d'être dit. Parce que Wolff s'emploie d'abord à préciser la méthode de la philosophie et montre ensuite l'utilité et la nécessité de son utilisation partout où s'exerce la recherche de la vérité, nous commencerons par examiner la nature de cette méthode, ses réquisits, son fondement et les résultats qu'elle procure, puis nous nous attacherons à éclairer son universalité à partir de l'application qu'il en fait à la théologie, au droit et à la médecine." (pp. 179-180 notes omises)

(*) Sur l'histoire des doctrines concernant la méthode aux XVIIème et XVIIIème siècles, cf.: Hans Werner Arndt, *Methodo scientifica pertractatum. Mos geometricus und Kalküllbegriff in der philosophischen Theorienbildung des 17. und 18. Jahrhunderts*, Berlin, New York, 1971, Walter de Gruyter; et sur la controverse en question: Giorgio Tonelli, *Der Streit über die mathematische Methode in der Philosophie in der ersten Halte des 18. Jahrhunderts und die Enstehung von Kants Schrift über die Deutlichkeit*, in Archiv für Philosophie, 1959, Heft 9/1, 2, p. 37-68.

3. ———. 1986. "Du rôle de l'entendement intuitif dans la conception wolffienne de la connaissance." *Archiv für Geschichte der Philosophie* no. 68:280-291.

   Repris dans: *Nouvelles études et nouveaux documents photographiques sur Wolff,* pp. 55-66.

   "Wolff, pas plus qu'aucun autre philosophe avant Kant, n'a élaboré une théorie de la connaissance. Mais cela ne l'a pas empêché de s'intéresser, comme la plupart d'entre eux, aux divers problèmes que pose la connaissance, notamment celui de son origine, c'est-à-dire des facultés qu'elle met en jeu. On trouve de nombreuses notations à ce sujet dans la *Philosophia rationalis sive Logica*, dans la *Psychologia empirica*, dans deux articles intitulés, le premier: *Solutio nonnullarum difficultatum circa mentem humanam obviarum, ubi simul et agitur de origine notionum et facultate ratiocinandi* (1707), le second: *Leges experientiarum fundamentales* (1708), quelques-unes aussi dans ses autres traités latins et dans les *Horae subsecivae Marburgenses*, pour nous borner à son *Corpus latinum*.

   Or si nous nous reportons au premier des traités qui viennent d'être indiqués, il y affirme on ne peut plus nettement qu'il y a deux sources, et seulement deux, de toutes nos connaissances: les sens et la raison. (...)

   Ainsi assimile-t-il la connaissance acquise par les sens, qu'il dénomme encore expérience, à la connaissance a posteriori, d'une part; la connaissance obtenue en raisonnant, donc grâce à l'entendement discursif, à la connaissance a priori, d'autre part; et semble du même coup exclure toute autre source.

   Pour achever de caractériser l'une et l'autre, il précise que la première est intuitive et a pour objet ce qui est singulier, c'est-à-dire les individus; que la seconde, qui est discursive, porte sur les notions universelles. Si bien qu'on en arrive à la double équation: connaissance sensible ou a posteriori, intuitive et singulière; connaissance intellectuelle ou a priori, discursive et universelle.

Il faut signaler encore que, sous le nom de connaissance intuitive, il range à la fois celle acquise par les sens et celle due à l'imagination. Après l'avoir définie de faon générale: « *quae ipso idearum intuitu absolvitur*», et expliqué: « *rem intuitive cognoscere dicimur, quatenus ideae ejus, quam habemus, nobis sumus conscii*», il en donne comme exemples tant la saisie par les sens d'un arbre qui nous est présent, que la représentation d'un triangle par l'imagination. (...)

L'affirmation de la dépendance de l'imagination par rapport à la *facultas sentiendi* se comprend aisément, puisqu'elle ne fait que reproduire la représentation des choses perues par les sens, en leur absence. D'où le nom commun de perceptions qu'il donne tant aux sensations qu'aux actes de l'imagination, ainsi qu'aux représentations qui en résultent, tout en appelant idées sensuelles celles acquises par les sens et phantasmes celles produites par l'imagination.

Mais les termes dans lesquels il s'exprime ne font que poser avec plus d'acuité le problème de l'existence de l'entendement intuitif, puisqu'il identifie purement et simplement la connaissance intuitive et la connaissance sensible entendue en un sens large, et l'oppose radicalement à celle obtenue par l'entendement discursif, sans faire la moindre place au premier.

Il y a là une difficulté que nous avions signalée dans notre introduction à la réédition de la *Philosophia rationalis sive Logica*, en remettant à plus tard de la résoudre. Et c'est ce que nous nous proposons de faire dans l'étude présente." (pp. 280-281 notes omises)

4. ———. 1986. "Contribution à l'histoire des premiers principes. Exposé de la doctrine wolffienne." *Filosofia Oggi* no. 9:225-239.

   Repris dans: *Nouvelles études et nouveaux documents photographiques sur Wolff,* pp. 83-97.

   "Comme Jean-Baptiste du Hamel, dont il s'est peut-être inspiré, Wolff place n tête de son *Ontologia* l'examen des principes de contradiction et du tiers-exclu, auxquels il ajoute

celui de raison suffisante qu'ignorait celui-ci. Et il les appelle «principia philosophiae primae».

Il est bien connu que le principe de raison suffisante a été formulé expressément et ainsi dénommé par Leibniz, alors que les deux premiers étaient utilisés depuis toujours. Mais l'on a peu remarqué que les expressions servant à désigner ceux-ci sont d'origine tardive. On ne les rencontre pas encore, en effet, au XVIème siècle chez Fonseca et Suárez par exemple, ni même au XVIIème chez Descartes, Clauberg et Bayle, pas plus que chez les auteurs de lexiques philosophiques, comme Goclenius, Chauvin et Micraelius. Mais Jungius, dans la *Logica Hamburgensis* qui date de 1638, parle de «duo principia contradictionis», en rangeant sous cette dénomination ce que nous appelons maintenant principe de contradiction et principe du tiers-exclu. Et l'on sait que Leibniz utilise le terme principe de contradiction dans le sens actuel, ainsi que parfois celui de principe d'identité, qu'on lui doit sans doute, en le traitant comme synonyme du premier. Quant à l'appellation principe du tiers-exclu, nous ne l'avons pas rencontrée avant Wolff; mais il l'emploie de faon si naturelle qu'on peut penser qu'elle existait déjà chez des petits scolastiques aujourd'hui oubliés.

Nous exposerons tout à tour sa conception des principes de contradiction et du tiers-exclu d'abord, celle du principe de raison suffisante ensuite, en les situant par rapport aux doctrines antérieures, puis la faon dont il explique les rapports et la portée du premier et du troisième, avant de mettre en lumière sa dépendance et son originalité dans toute cette question." (p. 225)

(...)

"Avant de terminer, nous voudrions tenter de mieux situer la conception de Wolff par rapport à celles qui l'ont précédée, en regroupant les notations dont nous avons émaillé notre exposé.

Tout d'abord, de faon générale, malgré la formule si typique: « *Eam experimur mentis nostrae naturam »,* qu'il employe pour préparer l'énoncé des premiers principes, il n'en fait pas, comme Descartes, de pures lois de la connaissance, mais les

tient, à la manière d'Aristote et de Thomas d'Aquin, pour les lois de l'être qui, en tant que telles, dirigent la connaissance.

Pour ce qui est plus particulièrement du principe de raison suffisante, il est à peine besoin de dire qu'il doit beaucoup à Leibniz dont il s'est fait l'écho. Mais il importe de souligner ce par quoi il en diffère. D'abord, il a très nettement distingué ce principe de celui de causalité dont Leibniz semble parfois le rapprocher. Ensuite, alors que celui-ci n'a fait que le poser, sans tenter d'en donner la moindre preuve, Wolff, tout en reconnaissant qu'on peut l'admettre comme un axiome, s'est efforcé, plus ou moins bien il est vrai, de le démontrer tant *a priori* qu' a *posteriori.* Il l'a de plus formulé de faon plus générale et même absolue. Par ailleurs, il l'a appliqué à Dieu plus explicitement. A quoi il faut ajouter qu'il écrit parfois, par exemple dans la *Cosmologia generalis,* «principium convenientiae sive rationis».

Or Leibniz conoit le principe de convenance, qui régit les choix de la sagesse divine, comme une application du principe de raison suffisante et ne l'identifie pas avec. Enfin Wolff, plus que Leibniz, dans la pratique, a fait de ce principe le fondement et la pierre de touche de toute sa philosophie, notamment des différentes parties de sa métaphysique. Et l'on peut noter qu'à propos de l'usage qu'il en fait dans l'ontologie, mais cela vaut aussi de la cosmologie générale, de la psychologie et de la théologie naturelle, il déclare: « An vero Leibnitius eodem modo usus fuerit hoc principio, ego non dixerim, cum Leibnitianas circa philosophiam primam meditationes huc usque viderim nullas. »

En un mot, Wolff ne s'est pas contenté de répéter Leibniz, ni même de systématiser ce qu'il connaissait de sa pensée. Il a précisé et développé la doctrine du principe de raison suffisante, il a étendu ses applications. Et il a su si bien lui imprimer sa marque personnelle et l'intégrer dans son propre système, que son nom y reste à jamais attaché comme celui de Leibniz. (*)

(*) Cette étude était déjà à l'impression, quand le Professeur Hans Werner Arndt de Mannheim nous a indiqué que Leibniz a

lui aussi tenté de donner une démonstration a priori du principe de raison suffisante dans un texte inédit publié par Zocher dans *Leibniz Erkenntnislehre*, in *Leibniz zu seinen 300. Geburstag*, Berlin, 1952, p. 15. La voici, telle que ce dernier l'a retranscrite: « Propositio: Nihil est sine ratione sufficiente seu quicquid est habet rationem sufficientem. Def. 1: Ratio sufficiens est qua posita res est. Def. 2: Requisitum est quo non posito res non est. Demonstratio: Quicquid est, habet omnia requisita. Uno enim non posito non est per def. 2. Positis omnibus requisitis res est. Nam si non est, deerit aliquid quo minus sit, id est requisitum. Ergo omnia requisita sunt ratio sufficiens per def. 1. Igitur quicquid est habet rationem sufficientem. q.e.d.»." (pp. 238-239)

5. ———. 1986. "Wolff et la Bible." In *Le siècle des Lumières et la Bible (Bible de tous les temps)*, edited by Belaval, Yvon and Bourel, Dominique, 805-822. Paris: Beauchesne.

   Repris dans: *Nouvelles études et nouveaux documents photographiques sur Wolff,* pp. 194-211.

   "Dans son *Eigene Lebensbeschreibung* (1) Wolff nous apprend que ses parents l'habituèrent à lire la Bible chaque jour dès son enfance. Une telle pratique ne pouvait que lui donner une connaissance remarquable du texte sacré, dont attestent les multiples références et les nombreuses citations qui parsèment ses ouvrages. Nous en dresserons d'abord, la liste (2) de leur importance et de leur variété.

   Puis nous nous emploierons à éclairer la faon dont il les utilise. Mais ses rapports avec la Bible ne se réduisent pas à la connaissance qu'il en a et à l'utilisation qu'il en fait. Il a en outre proposé de suivre dans l'interprétation dc l'Ecriture la méthode qu'il préconise pour parvenir, en tout domaine, à la clarté et à la certitude. Et c'est là un troisième point que nous examinerons, avant de dire quelques mots de son explication de quelques passages du Nouveau Testament à l'aide de cette méthode." (p. 805)

   (1) Rédigée en 1743 et publiée seulement en 1841 par Heinrich Wuttke sous le titre *Christian Wolffs eigene Lebensbesschreibung. Herausgegeben mit einer Abhandlung*

über Wolff, Leipzig 1841, elle a été rééditée par Hans Werner Arndt avec les deux biographies dues respectivement à Friedrich Christian Baumeister et à Johann Christoph Gottsched dans un recueil intitulé *Biographie* in *Christian Wolff, Gesammelte Werke,* Abteilung I, Band 10, Hildesheim 1980, où sont respectées les paginations de ces trois ouvrages. Le passage en question se trouve p. 112 de l' *Eigene Lebensbeschreibung*.

(2) Dans notre *Index auctorum et locorum Scripturae sacrae ad quo Wolffius in opere metaphysico et logico remittit,* Hildesheim 1985, pp. 181-196 (*Ges. Werk.,* Abt. III, Band 10), et dans notre Introduction à la réédition des *Horae subsecivae Marburgenses*, Hildesheim 1983, vol. I, pp. CVII-CX (*Ges. Werk.,* Abt. II, Band 34) nous avons indiqué où se trouvent toutes ces références et toutes ces citations dans les ouvrages de Wolff.

   Repris dans: *Nouvelles études et nouveaux documents photographiques sur Wolff,* pp. 175-193.

   "Le débat autour des systèmes d'explication des rapports 4e l'âme et du corps était encore très vif au XVIIIème siècle. Après avoir penché, dans sa jeunesse, pour les causes occasionnelles à cause des difficultés de l'influx physique', Wolff l'abandonna rapidement, mais sans prendre parti pour l'harmonie préétablie malgré sa préférence pour celle-ci. C'est surtout dans la *Psychologia rationalis* qu'il examine ces trois systèmes. Il porte sur chacun d'eux un jugement dénué de tout esprit partisan et qui, parce qu'il est basé sur une information fort vaste à défaut d'être toujours solide, offre une vue d'ensemble sur la question. Aussi est-il intéressant de le connaître." (p. 3)

7. ———. 1989. "Note sur la définition wolffienne de la philosophie." *Studia Leibnitiana* no. 21:205-208.

   Repris dans: *Nouvelles études et nouveaux documents photographiques sur Wolff,* pp. 171-174.

"Il est notable que, de la définition donnée par Wolff de la philosophie en général, on n'a la plupart du temps retenu que son énoncé brut: la science des possibles, de tous les possibles, sans se préoccuper des explications dont il l'accompagne sur ce qu'il entend par possibles et sur la faon dont à son avis la philosophie doit les envisager. Or, cette faon de faire, surtout si l'on rapproche cette définition, prise telle quelle, du climat indéniablement essentialiste de sa métaphysique de l'être, risque de conduire à lui prêter d'exclure de l'objet de la philosophie tout ce qui est actualisé, et ce serait là une erreur regrettable.

Afin de le montrer, nous commencerons par collationner les différentes formulations qu'il a proposées de cette définition, sans les séparer des éclaircissements susdits.

On trouve la première en 1709 dans la préface des *Aërometriae Elementa* (1): "Philosophiam ego definire soleo (2) per rerum possibilium, qua talium, scientiam." (3) Il explique aussitôt après: "Philosophi igitur est, non solum nosse, quae fieri possint, quae non; sed et rationes perspicere, ob quas aliquid fieri potest, vel *esse* nequit", en ajoutant: "Quaenam vero dicis possibilia? Nonne, quae vel sunt, vel esse possunt." (4)

La seconde se rencontre en 1712 dans le *Vorbericht von der Welt-Weisheit,* §1, situé en tête de la *Deutsche Logik* (5) *: "*Die Welt-Weisheit ist eine Wissenschaft aller möglichen Dinge, wie und warum sie möglich sind." A sa suite, § 3, il déclare: "Möglich nenne ich alles, was seyn kan, es mag entweder wurcklich da seyn, oder nicht.", puis, § 4, de ce que: "Alles hat einen Grund, warum es ist.", il conclut, § 5: "Solchergestalt muss ein Welt-Weiser nicht allein wissen, dag etwas möglich sey, sondern auch den Grund anzeigen können, warum es seyn kan." (6) Dans la version latine qu'il a effectuée lui-même de cet ouvrage (7), il traduit ainsi ce qui précède: § 1: "Philosophia est scientia possibilium, quatenus esse possunt.", § 3: "Possibile hic appello, quod contradictionem nullam involvit, seu, quod existere potest, sive acte existat, sive minus.", § 4: "Necessitas rationis sufficientis", § 5: "Ea de causa philosophus non solum

nosse debet, *esse* quid possibile. Sed rationem quoque reddere tenetur, cur quid *esse* vel fieri possit." (8)

La troisième figure dans *le Discursus praeliminaris de philosophia in genere,* qui précède le texte de la logique latine (9) publiée en 1728, "Philosophia est scientia possibilium, quatenus esse possunt.", au § 29 dans la note duquel il retrace brièvement l'histoire de cette définition, mais sans faire allusion à la *Deutsche Logik*. A la suite de quoi il explique, § 31: "In philosophia reddenda est ratio, cur possibilia actum consequi possint." (10) et précise, § 32: "Quodsi ergo plura fuerint, quorum unum perinde possibile est ac cetera, philosophia docere debet, cur illud potius fiat aut fieri debeat, quam cetera." (11)." (pp. 171-172)

(1) *Aërometriae Elementa, in quibus aliquot Aëris vires cic proprietates juxta methodum Geometrarum demonstrantur*, Lipsiae, 1709, Hildesheim, 1981, praefatio, p. 13-14 (non paginées).

(2) En ce sens qu'il a proposé cette définition dès 1703 dans ses leons privées à l'Université de Leipzig, et qu'il en a discuté en 1705 dans une correspondance, malheureusement perdue, avec Caspar Neumann, Inspecteur des églises et des écoles de la Confession d'Augsburg à Breslau; cf.: *Discursus praeliminaris de philosophia in genere*, not. § 29, p. 13.

(3) Il répète deux autres fois cette formule dans cette même préface, p. 14, 15.

8. ———. 1990. "La notion d'être selon Wolff ou la "désexistentialisation de l'essence"." *Il Cannocchiale* no. 2-3:157-173.

   Repris dans: Sonia Carboncini & Luigi Cataldi-Madonna (eds.), *Nuovi studi sul pensiero di Christian Wolff,* Hildesheim: Georg Olms, 1992 et dans: *Nouvelles études et nouveaux documents photographiques sur Wolff,* pp. 98-114.

   "La première tâche de la théorie de l'être que se propose de construire Wolff dans la *Philosophia prima sive Ontologia* est de préciser ce qu'il faut entendre par être. Mais, d'après lui, cette notion n'est pas primitive: celle d'impossible la transcende et celle de détermination sert à la déduire. Aussi fait-il précéder son analyse de celle de l'impossible et du possible, de l'indéterminé et du déterminé.

   I. Impossible et Possible. Indéterminé et Déterminé.

   A) *Définitions de l'impossible et du possible*

   1. Il considère la notion d'impossible comme la plus simple de toutes et en donne cette définition: «quicquid contradictionem involvit».

   Or cela revient à affirmer que, dans l'impossible, «idem simul esse, et non esse ponitur». Et, comme la nature de notre entendement est telle que nous ne pouvons juger que la même chose en même temps est et n'est pas, il s'ensuit que nous ne pouvons nous représenter l'impossible, donc qu'aucune notion véritable ne lui correspond, et qu'il se confond avec le néant.

   2. Le possible, lui, parce qu'il est ce qui n'est pas impossible, n'enveloppe aucune contradiction. Aussi est-il quelque chose et,

de ce fait, une notion lui correspond.

Wolff assimile le possible au non-contradictoire, comme les mathématiciens avec lesquels il souligne son accord sur ce point x; il le fera aussi à propos de l'indéterminé et du déterminé. Il n'envisage donc ici que ce que saint Thomas appelait la possibilité absolue qui résulte «ex habitudine terminorum» , et que, pour sa part, il dénomme la possibilité de la chose. Il indique d'ailleurs que sa définition est conforme à celle de l'Aquinate: «possibile est, quod si ponatur in esse, non sequitur impossibile».

Mais à cela ne se réduit pas sa doctrine de la possibilité qu'il va compléter bientôt en précisant les rapports de la possibilité ainsi conue avec ce qu'il appelle la possibilité intrinsèque et la possibilité extrinsèque d'exister. Et, dans la *Theologia naturalis,* il l'enrichira encore en distinguant entre les possibles *absolute spectata* et ceux qui le sont *in systemate redacta,* ainsi qu'entre les possibles primitifs premiers et seconds et les possibles dérivatifs.

Pour le moment lui est nécessaire et lui suffit la définition du possible par la non-contradiction, laquelle, nonobstant sa forme négative, est, à son avis, la seule qui permet de reconnaître sans risque d'erreur ce qui est possible, si du moins on prend soin de démontrer qu'il n'y a pas de contradiction, comme il est indispensable d'établir aussi qu'une chose est contradictoire pour pouvoir la déclarer impossible." (pp. 157-158)

(...)

"Les composants de la notion d'Être

A) *L'être et le possible*

Pour éclairer la notion d'être, Wolff se sert d'abord de celles d'impossible et de possible.

Ce qui est impossible étant contradictoire ne peut exister, en vertu du principe de contradiction. C'est un non-être.

Par contre, du fait que le possible n'enveloppe pas la contradiction, il n'y a pas de raison suffisante pour qu'il n'existe pas. Aussi, malgré le rejet de la première définition critiquée ci-dessus, on peut cependant dire que ce qui est possible peut exister, si on ne le rapporte pas à sa cause, car la non-répugnance à exister est une propriété strictement interne.

Or, fait-il remarquer, on appelle être ce à quoi l'existence ne répugne pas, ainsi que cela ressort du langage commun où on désigne sous ce nom, non seulement les choses qui existent, mais aussi celles qui ont existé et celles qui existeront, et on peut dès lors considérer le possible comme un être.

Mais on ne peut conclure de là, ainsi que l'ont fait certains que Wolff tient l'être et le possible pour une seule et même chose. Car, souligne-t-il y, la notion d'être ajoute à celle du possible, qui ne connote que la possibilité de la chose ou sa non-contradiction, la non-répugnance à exister qui constitue ce qu'il appelle la possibilité intrinsèque d'exister, laquelle suit de la première.

Ainsi donc, et c'est un point très important à noter, la notion d'être en général implique, pour lui, non pas l'existence, mais seulement la possibilité d'exister." (p. 162 notes omises)

9. ———. 1991. "De la connaissance qu'avait Kant de la métaphysique wolffienne, ou Kant avait-il lu les ouvrages métaphysiques de Wolff?" *Archiv für Geschichte der Philosophie* no. 73:261-276.

   Repris dans: *Nouvelles études et nouveaux documents photographiques sur Wolff,* pp. 152-167.

   "Selon l'opinion courante, la philosophie critique s'est formée en réaction contre la métaphysique de Wolff. Mais, parce que Kant attribue à celui-ci des thèses qu'il n'a pas professées, comme l'harmonie préétablie et le monadisme, parce qu'aussi il lui adresse certains reproches injustifiés, par exemple de n'avoir proposé qu'un critère logique de distinction entre la connaissance sensible et la connaissance intellectuelle, et de n'avoir présenté qu'une preuve *a priori* de l'existence de Dieu, force est d'admettre qu'il n'avait pas lu ses textes s'y rapportant.

Et, comme il est possible de trouver la source de ces assertions et de la plupart des autres de Kant concernant la métaphysique de Wolff dans les manuels de Baumgarten surtout, mais aussi de Baumeister et de Gottsched, on en arrive à la conclusion qu'il ne devait guère connaître cette métaphysique qu'à travers ceux-ci qui la déforment souvent." (*Sommaire*).

" *Conclusion*

I. Nous voici arrivés au terme de notre enquête et en mesure d'en tirer les conclusions.

Parmi les textes que nous avons collationnés, il en est deux: celui où il est question de la force morte des corps tirés ou poussés, et cet autre où l'existence est qualifiée *d'omnimoda determinatio,* dont nous ne pouvons affirmer qu'ils ne supposent pas la lecture des ouvrages métaphysiques de Wolff.

Il faut aussi reconnaître que ceux qui contiennent des déclarations vagues, de même que celui où Kant fait allusion au « somnio objective sumto », ceux encore où il garde le silence sur le « connubium rationis et experientiae » et sur l'insertion de la cosmologie générale parmi les disciplines métaphysiques, celui enfin où il a pu parler de la possibilité de Dieu d'après Baumeister, ne peuvent non plus rendre certaine cette conclusion. Mais ils forment avec ceux que nous allons rappeler aussi un ensemble qu'on ne peut dissocier et dont l'analyse conduit vers elle.

En effet, les renvois à Baumgarten en même temps qu'à Wolff à propos de la démonstration du principe de raison suffisante et de la définition de l'existence d'une part, d'autre part la ressemblance de la définition de la raison avec celle qu'en propose Baumeister, donnent à penser que Kant a pu effectuer cette critique à partir de la *Metaphysica* du premier, et emprunter cette définition aux *Institutiones metaphysicae* du second. Parce que la faon dont il présente la preuve de l'unicité du monde actuel et celle de l'existence de Dieu rappelle l'exposé de celle-là par Baumgarten et le résumé de celle-ci par Gottsched, on peut penser encore qu'il en parle d'après eux, en se servant de plus du vocabulaire de Baumgarten pour formuler

la seconde. Quant au critère de distinction entre la connaissance sensible et la connaissance intellectuelle, il a dû l'emprunter à Baumgarten qui ne retient qu'une partie, la moins importante, des explications de Wolff. Enfin, au sujet de l'harmonie préétablie et de la monadologie, il n'aurait pas soutenu que celui-ci en est partisan, s'il avait lu ses déclarations dans la *Deutsche Metaphysik* et dans *l'Opus metaphysicum*.

Ce regroupement des textes de Kant met en lumière que l'examen des trois derniers vient seulement renforcer la conviction acquise peu à peu au cours de celui des précédents - à l'exception des deux tout premiers - qu'il n'avait pas une connaissance directe de la métaphysique de Wolff. A cause des deux textes en question et parce que d'autres ont pu nous échapper, nous ne pouvons certes pas prétendre qu'il n'avait strictement rien lu des ouvrages où elle est exposée. Mais, parce que ceux que nous avons retenus ont trait à des thèses aussi variées qu'importantes, il nous semble possible d'affirmer qu'il ne devait guère connaître autre chose de cette métaphysique que ce que lui en avaient appris les manuels dans lesquels on peut trouver la source de ses jugements sur elle." (pp. 274-275 notes omises)

10. ———. 1993. "Les pièces les plus originales de la métaphysique de Christian Wolff (1679-1754), le "Professeur du genre humain"." In *Aufklärung als Mission. La mission des Lumières. Akzeptanzprobleme und Kommunikationsdefizite. Accueil réciproque et difficultés de communication. Actes du Colloque de Luxembourg, 1989*, edited by Schneiders, Werner, 103-114. Marburg: Hitzeroth.

    Repris dans: *Nouvelles études et nouveaux documents photographiques sur Wolff,* pp. 23-33.

    "L'oeuvre de Wolff peut être qualifiée d'encyclopédique, tant il est vrai qu'il a traité «de omni re scibili» à son époque ou peu s'en faut, sans qu'on puisse alléguer là-contre qu'on la divise d'ordinaire en deux parties correspondant à ses ouvrages de mathématiques et à ceux de philosophie. Car, dans les premiers, il n'expose pas seulement l'arithmétique, l'algèbre, la géométrie et la trigonométrie, mais encore, comme c'était la

coutume alors, des disciplines aussi diverses que l'astronomie, la mécanique, l'aérométrie, l'hydraulique, l'hydrologie, l'optique, la dioptrique, la chronologie, l'architecture, pour n'en citer que quelques-unes; et, dans les seconds, il aborde les questions relevant de la logique, de la métaphysique, du droit naturel, de la morale, du droit des gens, de l'économique, ainsi que de la physique conue comme comprenant, outre la physique au sens actuel du terme, la physiologie, l'anatomie, la botanique et la chimie, il fait aussi rentrer dans la philosophie l'étude rationnelle des arts tant manuels que libéraux, celle encore de la jurisprudence, enfin la méthodologie de la théologie révélée dogmatique, morale et scripturaire.

Le tout tient en un corpus énorme de 34 ouvrages en 58 volumes, de 34 opuscules et de 40 articles, les uns en allemand, les autres en latin, sans compter les préfaces, les comptes rendus et les lettres.

(...)

C'est sans contredit la partie philosophique de son œuvre et plus particulièrement sa métaphysique qui l'a rendu célèbre.

(...)

Elle se situe au confluent des doctrines scolastique, cartésienne, leibnizienne et lockienne, dont elle est un essai de synthèse. Mais si cette tentative, beaucoup plus que les 4600 pages de *l'Opus metaphysicum,* en fait un véritable monument et s'inscrit en faux contre l'accusation sans cesse répétée qu'il n'a fait que vulgariser les thèses de Leibniz, l'originalité de Wolff en ce domaine se manifeste davantage par son apport sur certains points particuliers, parmi lesquels nous retiendrons les trois où elle est la plus éclatante: l'introduction de l'étude du monde et des corps dans la métaphysique, la transposition et la synthèse de la Philosophie corpusculaire, de l'Atomisme et du Monadisme dans l'explication des corps, la libération de la théologie naturelle par rapport à la tutelle de la théologie révélée.

Qu'il ait innové dans chacune de ces questions, c'est ce que nous nous proposons de montrer, en nous appuyant sur les

traités de l' *Opus metaphysicum,* paree qu'ils expriment l'état définitif de sa pensée et qu'ils sont beaucoup plus élaborés que l'esquisse de la *Deutsche Metaphysik*. Toutefois, en ce qui concerne la première, c'est au *Discursus praeliminaris de philosophia in genere*, situé en tête de la *Philosophia rationalis sive Logica,* que nous ferons appel, car c'est là qu'il s'explique le plus complètement sur l'objet de la métaphysique." (pp. 103-104)

11. ———. 1994. "De la nature de la raison, de ses rapports avec l'expérience et la foi selon Christian Wolff." In *Vernunftbegriffe der Moderne. Stuttgarter Hegel-Kongress 1993*, edited by Fulda, Hans Friedrich and Hortsmann, Rolf-Peter, 127-139. Stuttgart.

    Repris dans: *Nouvelles études et nouveaux documents photographiques sur Wolff,* pp. 67-79.

    "Il est normal que Christian Wolff, dont Hegel dit, dans ses *Vorlesungen über die Geschichte der Philosophie,* ' *dass [er] ... erst das Philosophieren in Deutschland einheimisch gemacht hat*', ait sa place dans un Congrès qui porte sur le concept de raison dans la philosophie moderne et dont le premier Colloque est consacré au rationalisme précritique, car il ne fait pas de doute qu'il est l'un des principaux représentants de celui-ci.

    La chose est tellement connue qu'il est inutile d'insister. Mais on se contente la plupart du temps de l'enregistrer, sans chercher à approfondir ce qu'il entend exactement par raison, alors qu'il en propose deux conceptions qui, de prime abord, semblent s'opposer, et c'est ce que nous nous proposons de faire en premier lieu. Ensuite on s'est trop longtemps plu - et Kant n'a pas fait exception - à le présenter comme un rationaliste pur ne faisant fond que sur la déduction et s'il est vrai qu'on a pris conscience de nos jours qu'il a beaucoup fait appel aussi à l'expérience, il reste que sa conception d'ensemble des rapports de la raison et de l'expérience a rarement été dégagée, et c'est ce que nous allons tenter dans un second temps. Mais, à ces deux premières questions ne se ramène pas tout le problème de son rationalisme; il y en a une troisième relative à la faon dont il a envisagé les rapports de la raison et

de la foi et à laquelle on s'est fort peu intéressé, alors qu'il est indispensable de faire également la lumière sur ce point si l'on veut avoir une vue aussi complète que possible de sa doctrine sur la raison." (p. 127)

13. ———. 1996. "La définition de l'existence comme le complément de la possibilité et les rapports de l'essence et de l'existence selon Christian Wolff." *Etudes Philosophiques*:261-273.

    Repris dans: *Nouvelles études et nouveaux documents photographiques sur Wolff,* pp.115-127.

    "Mon exposé s'appuiera surtout sur la *Philosophia prima, sive Ontologia,* beaucoup plus complète et plus élaborée que le deuxième chapitre de la *deutsche Metaphysik* qui a trait à l'ontologie. Pour plus de brièveté, j'indiquerai seulement le numéro des paragraphes de ce traité, sans rappeler à chaque fois son titre. Sous le nom de note, je désignerai le texte en petits caractères de ces paragraphes.

    Être, possible, essence, existence

    1. La définition de l'existence comme le complément de la possibilité se rattache à la question des rapports de l'essence et de l'existence qui, chez Wolff comme chez tous les représentants de la métaphysique de l'être, se situe elle-même au cœur d'une théorie générale de l'être. Aussi est-il indispensable, si l'on veut éclairer ce point de sa doctrine, de présenter d'abord les lignes de faîte de cette théorie avec lesquelles cette définition et cette question entretiennent des rapports étroits.

    Pour construire cette théorie, il ne part pas de l'expérience qui nous impose sa présence ou, si l'on veut, son existence, mais de l'analyse de sa notion. Et c'est ce qui l'a immanquablement

conduit à voir dans l'essence ce qui est d'abord connu dans l'être et à la fois ce qui sert de fondement à toutes ses propriétés (§ 168). Voyons comment.

Se référant au langage commun dans lequel on parle aussi bien, fait-il remarquer, des êtres passés et futurs que des êtres présents ou actuels, il en conclut que l'être peut être défini, de faon générale, ce à quoi l'existence ne répugne pas, c'est-à-dire comme ce qui peut exister (§ 134, 139). Or telle est aussi la définition générale du possible qu'il rappelle juste auparavant (§ 133). Et c'est ce qui a fait que certains, comme Étienne Gilson *(L'être et l'essence,* Paris, Vrin, 1948, c. 5, p. 170), ont pu penser qu'il tient l'être et le possible pour une seule et même' chose. Mais, ainsi qu'il le souligne: «Possibile... et ens non prorsus synonyma sunt» (not. § 135) et, pour s'en convaincre, il suffit de passer en revue les différentes sortes de possibilités qu'il distingue.

3. La première d'entre elles est constituée par la propriété de n'être pas contradictoire. Il s'agit là de ce que Thomas d'Aquin, auquel il se réfère dans la *Luculenta commentalio... (§,* 7), appelait la possibilité absolue en indiquant qu'elle résulte « ex habitudine terminorum» *(In duodecim libros Metaphysicorum* lib. 9, lect. 2, n° 1807). Il la dénomme pour sa part : «possibilitas rei» (not. § 99, not. § 103, not. § 135). A ce stade, le possible, c'est donc essentiellement ce qui n'enveloppe pas la contradiction et, par conséquent, comme il le dit encore, ce qui n'est pas impossible (§ 85).

Or, à la notion du possible ainsi conu, celle d'être, du moins celle d'être en général ajoute, poursuit-il, la non-répugnance à exister qui ne se confond pas avec la non-contradiction, mais s'ensuit, en tant que de celle-ci ne découle aucune raison suffisante pour que le possible ne soit pas actualisé ou, si l'on préfère, aucune raison suffisante pour qu'il n'existe pas« (§'133). A cette non-répugnance à exister qui est la caractéristique de l'être en général, Wolff donne, dans un premier temps, le nom de « possibilitas existendi» (not. § 134, not. § 135), puis celui plus précis de « possibilitas intrinseca existendi» (not. § 175), lorsqu'il traite de l'être en puissance,

c'est-à-dire tel qu'il l'entend, de l'être qui peut avoir la raison suffisante de son existence en d'autres êtres, afin de la distinguer de la possibilité propre à celui-ci, qu'il qualifie de «possibilitas extrinseca existendi».

Entre ces deux dernières sortes de possibilités, il y a toute la différence qui existe entre une, propriété appartenant à l'être envisagé en lui-même, c'est-à-dire, ainsi qu'il, sera précisé ultérieurement, en vertu de son essence, et une autre propriété qui lui vient de ses rapports avec la ou les causes pouvant le poser dans l'existence.

4. Ainsi apparaît-il que ce n'est pas seulement la, notion de possible, mais aussi celle d'être, qui est plus complexe qu'on pourrait le croire au premier abord, d'autant qu'il distingue de l'être en général, outre l'être en puissance, l'être en acte ou, qui existe, en les considérant l'un et l'autre comme les deux espèces en lesquelles se divise l'être en général considéré comme leur genre (not. § 175).

Quoi qu'il en soit, pour nous en tenir à ce dernier dont nous sommes partis et qui constitue, selon Wolff, l'objet de *l'Ontologia* (§ 1), il est clair que, s'il ne se confond pas avec la «possibilitas rei» définie par la non- contradiction, par, contre, il s'identifie à la « possibilitas intrinseca existendi». Et de là suit que l'existence est exclue de sa notion (not. § 134); ce qui revient à prétendre qu'il n'est qu'essence. Ainsi, faut-il expliciter ce que connote pour lui le terme essence, si l'on veut pénétrer plus avant dans la compréhension de ce qu'il entend par être en général et de ses rapports avec l'existence." (pp. 263-264)

14. ———. 1996. "Contribution à l'histoire des propriétés transcendentales de l'être." *Filosofia Oggi* no. 19:367-394.

Repris dans: *Autour de la philosophie Wolffienne,* pp. 131-158.

"Les propriétés transcendentales de l'être, comment l'énoncé de ce titre n'évoquerait-il pas aussitôt la fameuse formule scolastique: «Ens, unum, verum, bonum convertuntur», à laquelle on ramène trop souvent à tort la doctrine de ces propriétés, qui est beaucoup plus complexe que le donne à

penser la dite formule? Je n'entreprendrai pas d'en exposer toutes les composantes, mais seulement un point précis, à savoir l'extension de cette appellation à beaucoup d'autres déterminations que l'unité, la vérité et la bonté, qui s'est fait jour dès le Moyen Age, mais s'est beaucoup accrue à partir de la fin du XVIème siècle.

Dans un premier temps, je m'appliquerai à brosser le tableau des principaux types de conceptions de ces propriétés qui ont été proposées au cours de l'histoire de la haute scolastique et de la scolastique tardive, et je clôturerai mon enquête avec Christian Wolff qui n'appartient ni à l'une, ni à l'autre, parce que sa propre conception apparaît comme le point extrême auquel ont conduit celles des petits Scolastiques qui ont élargi considérablement le domaine de ces propriétés. Dans un second temps, je tenterai d'éclairer pourquoi et comment s'est produit cet élargissement." (p. 367)

15. ———. 1997. "La doctrine wolffienne de la nécessité et son enracinement dans la tradition." In *Nouvelles études et nouveaux documents photographiques sur Wolff*, 35-53. Hildesheim: Georg Olms.

    Conférence donnée au Colloque *Tradition et émancipation*, Vianden, 30 juin - 3 Juillet 1991 (Inédit).

    "Notre titre peut pas ne pas faire penser aux critiques du théologien piétiste Joachim Lange contre la métaphysique de Christian Wolff, car il est bien connu qu'il les a centrées sur la question de la nécessité. Mais on a peu remarqué que, ce faisant, il a fortement contribué â mettre en lumière la place importante qu'y tenait cette question et il faut lui en donner acte.

    Pourtant nous n'avons pas l'intention de retracer les étapes de cette âpre et longue controverse -- elle dura plus de treize ans -- qui aviva les passions dans les milieux non seulement universitaires, mais aussi politiques et amena Frédéric-Guillaume Ier, circonvenu par Linge, à chasser Wolff de son royaume. Point n'est question pour nous non plus de brosser le tableau complet et détaillé des objections inlassablement répétées par Lange et ses partisans dans un nombre

considérable de volumes et de libelles, car elles portent à faux en tant qu'elles visent à accréditer l'idée que Wolff n'a fait que professer un spinozisme déguisé n'osant s'afficher ouvertement.

Ce que nous nous proposons, c'est d'exposer la doctrine wolffienne de la nécessité pour elle-même, tant dans ses principes que dans ses applications et d'en éclairer les sources." (p. 35)

16. ———. 1997. "Wolff était-il leibnizien?" In *Nouvelles études et nouveaux documents photographiques sur Wolff*, 131-151. Hildesheim: Georg Olms.

"Vaste question que celle-ci, tant l'oeuvre de Wolff, comme celle de Leibniz, est véritablement encyclopédique; ils ont, en effet, traité, l'un et l'autre, «de omni re scibili» ou presque à leur époque. Et c'est pourquoi je vous propose de la restreindre au domaine de la métaphysique, qui en est la partie la plus intéressante pour les philosophes que nous sommes.

Or très vite, du vivant de Wolff qui est né en 1679 et est mort en 1754, s'est fait jour l'idée, qu'on s'est plu ensuite à colporter, alors qu'on ne le lisait plus, jusqu'à nos jours où on commence à le redécouvrir, qu'il n'a guère fait que vulgariser en les systématisant les grandes thèses de la métaphysique de Leibniz.

Aussi importe-t-il de retracer, au moins dans les grandes lignes, l'origine et l'histoire de cette opinion, avant de faire appel aux textes de Wolff pour essayer de déterminer si elle est ou non justifiée." (p. 131)

(...)

"Nous revenons par là aux réflexions de tout à l'heure sur son éclectisme. Chez Leibniz, comme chez ses autres prédécesseurs, Wolff a choisi ce qui lui semblait conforme à la raison et qu'il pouvait démontrer, pour en faire un ensemble nouveau et cohérent. On peut certes parler à ce sujet de systématisation. Mais cette systématisation, loin d'avoir seulement pour objet les thèses de Leibniz, s'étend aussi à celles des autres auteurs dont il s'est également inspiré et surtout elle consiste davantage dans l'édification de ce nouvel ensemble que dans l'explicitation

de la métaphysique leibnizienne. En un mot, Wolff n'est le pur disciple ni de Leibniz, ni de ceux-ci. On ne peut même pas prétendre qu'il avait une plus grande affinité intellectuelle avec Leibniz qu'avec les Scolastiques, par exemple du fait qu'il a développé et approfondi l'enseignement de celui-là, alors qu'il a contracté et résumé les thèses de ceux-ci. Mais on peut voir dans cette faon différente de traiter le premier et les seconds la marque d'une indépendance d'esprit qui est la preuve d'une indéniable, quoique relative, originalité et d'une réelle vigueur intellectuelle. L'une et l'autre s'affirment d'ailleurs dans cette dernière déclaration de Wolff dans le *Monitum de sua philosophandi ratione...,* qu'on peut citer en guise de conclusion : « *Ego magna Leibnitii in scientiam merita veneror, non tamen instar idoli colo, cum... nihil admitto, nisi quod notionibus meis conforme deprehendo*» (*)." (p. 151)

(*) In: *Meletemata Mathenzatico-Philosophica...* Sect. 1, n. 37, p. 171.

17. ———. 1998. "Christian Wolff était-il un Aufklärer?" In *Aufklärung als praktische Philosophie. Werner Schneider zum 65. Geburstag*, edited by Grunert, Frank and Vollhardt, Friedrich, 31-44. Tübingen: Niemeyer.

    Repris dans: *Autour de la philosophie Wolffienne,* pp. 172-185.

18. ———. 1999. "La place de la *Metaphysica de ente, quae rectius Ontosophia* dans l'histoire de l'Ontologie et sa réception chez Christian Wolff." In *Johannes Clauberg (1622-1665) and Cartesian Philosophy in the Seventeenth Century*, edited by Verbeek, Theo, 61-74. Dordrecht: Kluwer.

    Repris dans: *Autour de la philosophie Wolffienne,* pp. 117-130.

    "Que Wolff ait lu la *Metaphysica de ente, quae rectius Ontosophia*, c'est ce que prouve le fait qu'il en parle de faon précise, qu'il indique toujours, sauf une fois, le paragraphe et le plus souvent la page, que de plus il en cite trois fois le texte "expressis verbis". Ajoutons qu'il s'y réfère au moins onze fois, dont dix dans la *Philosophia prima, sive Ontologia* ... publiée en 1730 à Frankfurt et Leipzig où elle fut rééditée en 1736, et

une autre dans les *Horae subcesivae Marburgenses* ... de 1731, parues aux mêmes endroits en 1735.

Il notes à son propos que, malgré l'effort qu'y a tenté Clauberg, en 1664, d'améliorer l'ontologie, Leibniz n'en a pas moins appelé en 1693, dans le *De primae philosophiae emendatione* ...," à réformer cette discipline, puis prétendu, dans un propos recueilli par Joachim Friedrich Feller dans l' *Otium Hannoveranum*... qui date de 1718, qu'elle était toujours "inter quaerenda". Et l'on peut penser que c'est parce que Wolff partageait cette opinion qu'il a écrit sa *Philosophia prima, sive Ontologia*.

Toujours est-il que, outre ce jugement général, il en porte d'autres, pour la plupart critiques aussi, sur quelques-unes des définitions de Clauberg.

Si l'on suit l'ordre dans lequel il s'y réfère, on trouve d'abord celle du possible. À son propos, il fait remarquer qu'en le définissant: ce qui peut être produit par une cause quelconque, du moins par Dieu, Clauberg confond la possibilité absolue constituée par la propriété de n'être pas contradictoire avec la possibilité extrinsèque d'exister, celle de l'être qui peut avoir en un autre la raison de son existence. Il ajoute qu'en affirmant que c'est là ce que notre esprit peut comprendre clairement et distinctement, Clauberg s'en tient certes au critère cartésien de la distinction du vrai et du faux, mais qu'il aurait dû définir le possible: ce dont on peut démontrer qu'il peut être produit par une cause quelconque, du moins par Dieu, car il aurait alors proposé une notion claire et distincte de la possibilité de produire, avec à charge de prouver ensuite que quelque chose peut être ainsi produit.

Il passe ensuite aux définitions de l'essence et de la nature, à propos desquelles il rappelle d'abord que Clauberg déclare que toutes les propriétés qui peuvent être attribuées à une chose, une seule est première, principale, interne et embrasse en quelque sorte les autres ou en est comme la racine et le fondement et que c'est là ce qu'on appelle l'essence, ainsi que nous l'avons déjà vu; cependant qu'on lui donne le nom de nature eu égard aux propriétés et aux opérations qui découlent

de cette chose. Puis il lui donne acte d'avoir bien vu qu'essence et nature sont parentes, mais il lui reproche de ne pas avoir suffisamment marqué ce en quoi elles conviennent et ce en quoi elles diffèrent.

(...)

La conclusion qu'on peut tirer des propos de Wolff sur la *Metaphysica de ente*, c'est qu'il ne la tenait pas dans une très grande estime, car il en dit somme toute peu de bien. Il ne s'agit pourtant pas d'une critique purement négative. Avec Clauberg, comme avec les autres auteurs auxquels il se réfère, il fait preuve d'éclectisme, en ne retenant de sa doctrine que ce qui lui semble conforme à la raison et qu'il peut démontrer. Aussi peut-on cependant affirmer que la lecture de la *Metaphysica de ente* a été pour lui une occasion d'affiner sa pensée.

Rien ne permet de prétendre qu'il a connu les deux premières éditions de l *' Ontosophia*, puisqu'il ne parle que de la troisième et ne donne de références qu'à celle-ci.

Mais on ne peut pas ne pas être frappé par l'étroite parenté qui existe entre cette affirmation de la " *Praefatio ad lectorem*" de la première, à savoir que, dans cette doctrine générale de l'être, "omnis cognitionis et scientiae, naturali lumine partae, fundamenta et semina continentur", et le titre de la *Philosophia prima, sive Ontologia ... qua omnis cognitionis humanae principia continentur*.

Enfin, si l'on note que, parmi les manuels d'ontologie parus après celui de Clauberg, Wolff ne se réfère ni à celui de du Hamel, ni à celui de Budde, qu'il connaissait pourtant à coup sûr, par comparaison avec les dix fois qu'il fait appel à la *Metaphysica de ente,* on peut voir là une preuve de plus qu'il lui reconnaissait malgré tout une certaine importance." (pp. 68-70 notes omises)

19. ———. 2001. "Une étape de l'histoire de la métaphysique: l'apparition de l'Ontologie comme discipline séparée." In *Autour de la philosophie Wolffienne. Textes de Hans Werner Arndt, Sonia Carboncini-Gavanelli, Jean École*, edited by École, Jean, 95-116. Hildesheim: Georg Olms.

"Après avoir connu une certaine éclipse due sans doute au succès de la philosophie kantienne et des doctrines post-kantiennes qui ont pratiquement éliminé la discipline qu'il désigne, le terme ontologie est redevenu un terme courant du vocabulaire philosophique, grâce en partie à Husserl et à Heidegger. On connaît la distinction du premier entre l'ontologie formelle et les ontologies matérielles ou régionales, et la tentative du second' pour constituer la métaphysique du «Dasein» en une ontologie fondamentale. On sait aussi que Sartre a sous-titré L'être et le néant': «Essai d'ontologie phénoménologique», et que Lavelle a publié un petit traité intitulé Introduction à l'ontologie. Pour nous limiter à ces quelques exemples, tous ces auteurs ont gardé à ce terme son sens étymologique de science de l'être, tout en concevant cette-ci de faons fort différentes que connaissent leurs lecteurs.

Mais peu d'entre eux ont une idée de l'événement qu'a constitué l'apparition des premières ontologies. Les historiens de la philosophie eux-mêmes y ont prêté peu d'attention parce que les acteurs de cette apparition étaient de petits représentants de la Scolastique tardive qui ont consacré à cette discipline des manuels à l'usage de leurs élèves. Pourtant l'apparition et la multiplication de ces manuels est une étape de l'histoire de la métaphysique qui présente de l'intérêt pas seulement pour les érudits, mais pour tous ceux qui sont soucieux d'obtenir une vue d'ensemble complète des idées en ce domaine. Et c'est ce que nous nous proposons de montrer." (p. 95 notes omises)

20. ———. 2001. "Des rapports de la métaphysique de Wolff avec celle des Scholastiques." In *Autour de la philosophie Wolffienne. Textes de Hans Werner Arndt, Sonia Carboncini-Gavanelli, Jean École*, edited by École, Jean, 55-69. Hildesheim: Georg Olms.

"En faisant de l'ontologie une discipline séparée de la théologie naturelle et qui joue le rôle d'introduction générale aux autres parties de la métaphysique, ainsi qu'aux autres disciplines philosophiques en tant qu'elle affine les notions et établit les principes nécessaires à l'ensemble du savoir d'une part, et d'autre part se présente comme une théorie générale de l'être, Wolff se situe indéniablement dans la lignée des petits

Scolastiques qui, dés la fin du XVIème siècle, pendant tout le XVIIème et encore au XVIIIème, ont envahi le devant de la scène philosophique, et qui firent tant et si bien qu'à leur époque elle avait définitivement acquis droit de cité.

Mais, alors que ces auteurs n'avaient publié que des manuels souvent réduits à l'état de lexiques philosophiques, en se bornant à disserter de faon abstraite sur l'essence et les propriétés de l'être, ainsi qu'il le déplore - et c'est ce qui explique son rejet par Descartes et l'appel de Leibniz, déjà évoqué, à l'améliorer, -- Wolff, pour sa part, a fait de sa *Philosophia prima sive Ontologia*, un grand traité beaucoup plus élaboré et beaucoup plus complet. En appelant cette discipline *«Ontologia* seu *Philosophia prima»,* il suit certains de ces auteurs comme Jean-Baptiste du Hamel qui expliquait, comme il le fait, qu'elle est appelée «Ontologia» en tant qu'elle contient une théorie générale de l'être, et «Philosophia prima» en tant qu'elle définit les notions et établit les principes en usage dans le raisonnement.

Tout donne à penser que c'est aussi de Jean-Baptiste du Hamel qu'il s'inspire en ouvrant son traité sur l'étude des premiers principes, même s'il est vrai qu'aux deux seuls retenus par celui-ci: le principe de contradiction et celui du tiers exclu, il ajoute le principe de raison suffisante.

II ne fait pas de doute non plus qu'il a repris des Scolastiques les divisions de la cause efficiente en: principale et instrumentale, prochaine et éloignée, immédiate et médiate, et celles de la cause finale en: principale et secondaire, prochaine et éloignée, déjà effectuées en totalité par Thomas d'Aquin, en partie par Suarez.

Quant à la distinction entre les signes naturels et artificiels, primitifs et dérivatifs, elle avait déjà été proposée par Thomas d'Aquin entre autres, et Clauberg en avait retenu le premier couple." (p. 63 notes omises)

21. ———. 2007. "Remerciement. "Le professeur du genre humain". Discours sur le Métaphysique de Wolff." In *Wolffiana II. Christian Wolff und die europäische Aufklärung. Teil 1*,

edited by Stolzenberg, Jürgen and Rudolph, Oliver-Pierre, 27-37. Hildesheim: Georg Olms.

Akten des 1. Internationalen Christian-Wolff-Kongresses, Halle (Saale), 4-8 April 2004.

"... je voudrais ajouter quelques mots sur Wolff lui-même que des Français , -- dont il parle dans une de ses lettres (2) au Comte Ernst von Manteuffel son protecteur, sans malheureusement préciser de qui il s'agit --, ont dénommé le "Professeur du genre humain", appellation que Heinrich Wuttke dans l'introduction à son édition de la *Christian Wolffs eigene Lebensbeschreibung*, (3) a latinisé en le qualifiant de "Professor universi generis humani".

"Professeur du genre humain", Wolff pourrait être appelé aussi "Docteur universel", non seulement en raison de son rayonnement extraordinaire dans tout l'Europe du XVIIIème siècle et de l'intérêt qu'il suscite encore aujourd'hui un peu partout dans le monde, comme le révèle ce congrès, mais aussi parce qu'il est le type même de l'esprit encyclopédique qui a en fait, traité "de omni re scibile" ou presque à son époque, qu'il s'agisse -- et ce ne sont là que quelques-uns des domaines du savoir qu'il a investis --, qu'il s'agisse des mathématiques proprement dites, de l'astronomie, de la mécanique, de la physique, de le physiologie, de la médicine, du droit, de la politique, de la théologie surnaturelle, de l'exégèse et de toutes les parties de la philosophie: logique, métaphysique et morale.

Or pour ce qui est de ces dernières, si l'on a unanimement reconnu qu'il fut un grand professeur, très grand même, on lui a la plupart du temps refusé le titre de grand philosophe. Sans doute ne peut-il être mis sur le même pied que Leibniz, Descartes, Spinoza par exemple. Mais, pour ne retenir que le domain métaphysique, force est de reconnaître qu'il a fait preuve d'ingéniosité et d'innovation dans chacune de ses parties, comme on peut le montrer facilement à l'aide de quelques exemples.

Tout d'abord, c'est à lui, que nous devons leur nombre et leur répartition toujours admise de nos jours: l'Ontologie, la

Cosmologie générale, la Psychologie et la Théologie naturelle, et nul avant lui n'avait systématisé avec autant de rigueur l'enseignement de chacune d'elles et l'ordre de succession qui les unit: l'Ontologie servant de propédeutique à toutes les autres en leur fournissant les principes et les notions directrices dont s'édifier, la Cosmologie servant de base, entre autres, à la preuve a posteriori de l'existence de Dieu avec la démonstration de la contingence du monde. et la Psychologie à l'analyse de ses attributs à partir de celle de nos facultés, l'une et l'autre dans la Théologie naturelle.

Son Ontologie apparaît comme la réalisation du vœu formulé par Leibniz (4) de voir cette discipline réformée, améliorée, tant elle tranche par son ampleur et la profondeur de ses analyses avec les manuels des petits Scolastiques du XVIIIème siècle qui l'ont séparée de la Théologie naturelle à laquelle elle était étroitement liée jusqu'à eux (5) et qui se contentaient le plus souvent d'y donner des définitions en leur ajoutant des notations rapides. Sans doute se situe-t-il dans la lignée de Suarez en y proposant une conception de l'être accordant à l'essence la primauté par rapport à l'existence: mais, en faisant de celle-ci ce qui, dans les êtres contingents, s'ajoute à l'essence pour la faire passer de l'état de possibilité à celui d'actualité, (6) il en vient à poser entre l'une et l'autre, chez ceux-ci, une distinction réelle, alors que Suarez, en les concevant comme les deux éléments constitutifs de ce qu'il appelle l *'essentia realis*, (7) ne reconnaissait entre elles qu'une distinction de raison. Il y différencie aussi beaucoup mieux que Leibniz le principe de raison suffisante de celui de causalité en expliquant que la cause est ce dont dépend l'existence d'une chose, son source directe; la raison suffisante, ce qui permet de comprendre pourquoi cette chose existe (8) et, pour éclairer ceci, il allègue l'exemple des êtres contingents qui ont leur cause dans leur série en tant qu'ils sont déterminés par ceux qui les précèdent, mais dont on ne peut rendre pleinement compte qu'en les rattachant à un être nécessaire extérieur à cette série, qui en est la raison suffisante. (9) Son traité d'Ontologie se singularise encore par l'introduction, en tête de son explication des propriétés des êtres composés, d'un chapitre sur la nature de

l'étendue, de l'espace, du lieu, de la position, du temps et du mouvement, (10) d'ordinaire rattaché à la Philosophie de la nature, et cette introduction est d'autant bien venue qu'Il est impossible de comprendre l'être composé sans faire appel à ces notions." (pp. 29-30)

Recueil d'articles.

Table des matières:

Première Partie - Etudes wolffiennes

I. En guise d'introduction

Wolffius redivivus 5

II. De la philosophie en général

La conception wolffienne de la philosophie d'après le Discursus praeliminaris de philosophia in genere 27

De la notion de philosophie expérimentale selon Wolff 53

III. Logique, méthodologie et philosophie de la connaissance

Logique formelle et logique de la vérité dans la Philosophia rationalis sive Logica de Christian Wolff 65

De quelques difficultés à propos des notions d'a posteriori et d'a priori chez Wolff 132

En quels sens peut-on dire que Wolff est rationaliste? 144

De la méthode universelle selon Christian Wolff 161

IV. Métaphysique et histoire de la philosophie

Cosmologie wolffienne et dynamique leibnizienne 177

Les preuves wolffiennes de l'existence de Dieu 184

La critique wolffienne du Spinozisme 200

V. Varia

A propos du projet de Wolff d'écrire une "Philosophie des Dames" 217

Les rapports de la raison et de la foi selon Christian Wolff 229

Documents photographiques sur Wolff 240.

6. ———. 1990. *La métaphysique de Christian Wolff*. Hildeshein: Georg Olms.

   Deux volumes: 1. Texte; 2: Notes.

   Table des matières:

   Avant-propos 7

   Première Partie: Préliminaires sur la vie et l'oeuvre de Wolff, sa personnalité, sa conception d'ensemble de la métaphysique, la controverse autour de celle-ci 13

   Chapitre I. Christian Wolff. La vie, l'oeuvre et l'homme 15

   Chapitre II. La place de la métaphysique dans la philosophie de Wolff 51

   Chapitre III. La controverse autour de la métaphysique wolffienne 81

   Deuxième Partie: La théorie de la connaissance 93

   Chapitre I. Jalons pour la théorie de la connaissance 95

   Chapitre II. La connaissance sensible 103

   Chapitre III. La connaissance intellectuelle 113

   Chapitre IV. Récapitulations et compléments 135

   Troisième Partie: La théorie de l'être in général 139

   Chapitre I. Théorie de l'être in général et ontologie 141

   Chapitre II. Les principes de l'être et de sa connaissance 143

   Chapitre III. La notion d'être 155

   Chapitre IV. les affections de l'être 167

   Chapitre V. Les différents espèces d'être 191

   Chapitre VI. Les rapports des êtres 209

   Chapitre VII. Des rapports de Wolff aves ses prédécesseurs dans la théorie de l'être 219

Quatrième Partie. La théorie du monde en général 221

Chapitre I. Théorie du monde en général et cosmologie générale 223

Chapitre II. Le nexus verum et l'essence du monde 225

Chapitre III. Les composants du monde 235

Chapitre IV. Le monde et la nature. Le surnaturel et le miracle 247

Chapitre V. La Cosmologie générale. Ses caractéristiques: sa place dans l'ensemble de la métaphysique 257

Cinquième Partie. La théorie de l'âme 261

Chapitre I. Théorie de l'âme, psychologie empirique et psychologie rationnelle 263

Chapitre II. Les points de départ de la théorie de l'âme 265

Chapitre III. L'essence et la nature de l'âme 279

Chapitre IV. L'explication a priori des facultés de l'âme 285

Chapitre V. Les systèmes d'explication des rapports de l'âme et du corps 299

Chapitre VI. Spiritualité, origine et immortalité de l'âme humaine. de l'âme des bêtes 317

Chapitre VII. La théorie de l'âme, ses sources et son originalité 325

Sixième Partie. La théorie de Dieu 327

Chapitre I. Théorie de Dieu et théologie naturelle 329

Chapitre II. Les preuves de l'existence de Dieu 335

Chapitre III. Première approche vers la détermination des attributs divins 349

Chapitre IV. L'entendement divin 355

Chapitre V. La volonté de Dieu et sa toute-puissance 369

Chapitre VI. La sagesse et la bonté de Dieu 383

Chapitre VII. La création, la conservation, le concours et le gouvernement divins, la Providence 391

Chapitre VIII. Les autres attributs de Dieu et son essencb4 03

Chapitre IX. Tradition et nouveauté dans la théorie de dieu. Son apport et ses limites 417

Conclusions 421-428.

   Table des matières:

   Avertissement 7

   Première partie: Études wolfiennes

   I. Coup d'oeil d'ensemble sur la métaphysique

   Des différentes parties de la métaphysique selon Christian Wolff 15

   Les pièces les plus originales de la métaphysique de Christian Wolff (1679-1754), le "Professeur du genre humain" 23

   La doctrine wolffienne de la nécessité et son enracinement dans la tradition 35 (Inédit: Conférence donnée au Colloque Tradition et émancipation, Vianden, Luxembourg, 30 juin - 3 juillet 1991)

   II. Métaphysique de la connaissance

   Du rôle de l'entendement intuitif dans la conception wolffienne de la connaissance 55

   De la nature de la raison, de ses rapports avec l'expérience et la foi selon Christian Wolff 67

   III. Métaphysique de l'être

Contribution à l'histoire des premiers principes. Exposé de la doctrine wolffienne 83

La notion d'être selon Wolff ou la "désexistentialisation de l'essence" 98

La définition de l'existence comme le complément de la possibilité et les rapports de l'essence et de l'existence selon Christian Wolff 115

IV: Histoire de la philosophie

Wolff étail-il leibnizien? 131 (Conférence donnèe aux Universités de Nice, Mannheim et Siegen).

De la connaissance qu'avait Kant de la métaphysique wolffienne, ou Kant avait-il lu les ouvrages métaphysiques de Wolff? 152

V. Varia

Note sur la définition wolffienne de la philosophie 171

La critique wolffienne des systèmes d'explication des rapports de l'âme et du corps 175

Wolff et la Bible 194

Deuxième partie. Documents photographiques sur Wolff 214-231.

"Des treize études que nous avons réunies dans ce volume onze ont déjà paru dans des revues ou des actes des congrès, deux sont inédits. (...) Tous ces études ont été réprises telles qu'elles ont été publiées ou prononcées. D'où quelques inévitables rédites que nous prions le lecteurs d'excuser." (*Avertissement,* pp. 9-10).

Der Briefwechsel zwischen Leibniz und Christian Wolff (1988) 279

Hans Werner Arndt

Philosophische Systematik im Anschluss an Leibniz (1995) 287

Christian Wolffs Stellung zur "Ars characteristica combinatoria" (1965) 299.

Avant-propos de Jean École: "J'ai déjà publié dans cette méme série des Gesammelte Werke de Christian Wolff deux recueils (a) de mes études sur sa pensée. A la composition de celui-ci se sont associés Hans Werner Arndt et Sonia Carboncini-Gavanelli, bien connus par leurs savants travaux sur cet auteur. D'où la plus grande richesse de ce troisième volume en raison des intéréts différents de nous trois pour telle ou telle partie de la philosophie wolffienne.Y sont envisagés tour à tour: la théorie de la connaissance (Arndt), la métaphysique et plus spécialement l'ontologie (Carboncini-Gavanelli, École), la morale expérimentale (Arndt), les rapports de Wolff avec les Scolastiques (Carboncini-Gavanelli, École), et Leíbniz (Arndt, Carboncini-Gavanelli), les réactions de Reimarus (Arndt), Crusius (Carboncini-Gavanelli), et des Piétistes, notamment

Thomasius (Arndt, Carboncini-Gavanelli), à ses positions logiques pour ce qui est du premier, métaphysiques en ce qui concerne les autres.Toutes ces études (19 en tout, dont 8 de Hans Werner Arndt, 6 de Sonia Carboncini-Gavanelli, et 5 de moi) ne portent pas exclusivement sur Wolff, mais s'y rapportent en tant qu'elles tendent à le situer dans l' histoire des idées; ce qui explique le titre retenu pour ce recueil: Autour de la philosophie wolfienne.A l'exception de trois d'entre eux, ces textes ont paru dans des revues, des volumes d'hommage ou des actes de congrès indiqués dans la Table des matières. Le premier: Zu Begriff und Funktion der 'moralischen Erfahrung' in Christian Wolffs Ethik de Hans Werner Arndt n'est cependant inédit que quant à la langue, car une traduction italienne en a été publiée sous le titre: Concetto e funzione dell' 'Esperienza morale' nell'Etica di Christian Wolff. (b) Il en est de même du deuxième: Des rapports de la métaphysique de Wolff avec celle des Scolastiques, qui faut partie des miens et a été traduit en allemand sous ce titre: Christian Wolffs Metaphysik und die Scolastik (c). Quant au troisième: Une étape de l'histoire de la métaphysique: l'apparition de l'ontologie comme discipline séparée, il n'est inédit qu'en partie du fait qu'it est une contraction et une synthèse de deux autres de mes écrits: La place de la Metaphysica de ente quae rectius Ontosophia dans l'histoire de l'Ontologie et sa réception chez Wolff, et: Contribution à l'histoire des propriétés transcendentales de l'étre. Malgré les répétitions que cela occasionne, j'ai cru bon de ne pas l'éliminer, parce que seul il donne une vue complète de l'état de cette discipline à ses origines et jusq'à Wolff."
